Introduction: The origins of Tacare by Jane Goodall xv
The Jane Goodall Institute’s approach to community-led conservation

1 The human-made island 1
Jumanne Kikwale meets Jane Goodall at an impressionable age; Anthony Collins arrives to study Gombe’s baboons

2 Paradigms and problems 17
Jumanne Kikwale moves back to Kigoma to teach the next generation about trees; Anthony Collins recalls Tacare’s earliest steps—and missteps

3 1994: Understanding deforestation 29
George Strunden and the genesis of Tacare

4 1994: The forester 41
Aristides Kashula sees both the forests and the trees

5 Cultivating a holistic approach 53
Emmanuel Mtiti dances with donors

6 Creating a common language 67
Lilian Pintea uses mapping technologies to develop a dialogue between communities and conservationists

7 Local ambassadors: Learning from and speaking for the chimps 86
Gabo Paulo Zilikana, Eslom Mpongo, Hamisi Mkono, Fatuma Kifumu, and Yahaya Almas reflect on decades of chimp observation at Gombe

8 A confluence of disciplines 102
Shadrack Kamenya explains why indigenous researchers are essential to outreach efforts; Deus Mjungu dedicates his career to creating habitat corridors for endangered wildlife
9 The cycles of old and new
Japhet Mwanang’ombe educates and inspires the younger generation; Hamisi Matama preserves the traditional ecological knowledge his mother taught him

10 Seeking homeostasis
KANYACODA, VHTs, PFOs, KIKACODA: Working toward human and ecological health in Uganda

11 The fatal interface
KACODA, Uganda: Finding successful strategies to reduce human–chimp conflict

12 From the cloud to the ground
Uganda Wildlife Authority: Obed Kareebi, Frank Sarube, and Philemon Tumwebaze on poverty, technology, and conservation

13 Outreach through fire
Dario Merlo hears Jane’s words of hope as bombs fall on Goma

14 The banks and the bees
Phoebe Samwel links microcredit to women’s empowerment; KICODA harvests honey—and venom

15 Changing the retirement plan
Sania Lumelezi manages difficult conversations about choice

16 Of women champions
Alice Macharia paves the way for African women in conservation; Yakaka Saweya explains why so many village girls don’t complete their education

17 The cycle of regeneration
Alice Macharia is in it for the long term—and the short term

18 A ‘talking office’ with maps
Joseline Nyangoma wants science to tell a story

19 People, pixels, and puff adders
Lilian Pintea contemplates different ways of knowing

Conclusion
