ArcGIS for Teams

Andrew Stauffer – Product Manager

2021 ESRI
DEVELOPER SUMMIT

ArcGIS for Teams

- Teams is about communication and working together
- It is a place where sharing happens
- ArcGIS adds context to that with applications and maps
- Focus on communication and collaboration

ArcGIS + Microsoft 365

Voice of the Customer

- Teams is in place for sharing data and communications
  - Calls, Chats, Collaborative work
- ArcGIS for Teams would be valuable to:
  - Search (often ad-hoc)
  - Facilitating GIS across the org
  - Notifications
  - Locational collaboration with reduced friction
  - Mark-up and annotation of a map
  - Used for briefings
  - Team resources/gallery
  - Alternative to emailing PDF’s
