ArcGIS Arcade: An Introduction

- ArcGIS Arcade
 - What is ArcGIS Arcade?
 - Arcade profiles, expressions, and workflow
 - The Arcade expression language
- How Arcade is used
 - Maps
 - Apps
 - APIs

ArcGIS Arcade is...

“...a portable, lightweight, and secure expression language written for use in ArcGIS.”

Portable --- Write, share, and execute expressions across ArcGIS

Lightweight --- Runs in ArcGIS with minimal impact

Secure --- No executable code

Expression language --- Write statements that ArcGIS can execute

For use in ArcGIS --- Developed by Esri for use in ArcGIS

Arcade profiles

Profile --- context in which expression is evaluated and understood

Alias	Field Mapping	Location Update Constraint
Attribute Rules (3)	Form Calculation	Measure Visualization
Constraint	GeoAnalytics	Popups (2)
Dashboard (2)	Geotrigger Notification	Tasks
Dictionary Renderer	Labeling	Velocity
Feature Z	Layout	Visualization
Field Calculation		

Global Variables --- special variables usable in expressions

`$datastore` `$feature` `$layer` `$map` `$value` `$view.scale`

Arcade expressions

Output value

variable

constant

```
label = Trim($feature.Station_Name) + TextFormatting.NewLine  
+ Round($feature.TEMP) + '° F ' + $feature.R_HUMIDITY + '% RH'
```

function

literal

operator

Arcade workflow

Profile
Labeling
Popup
Visualization

Global Variables

`$feature`

`$feature $layer`
`$map $datastore`

`$feature $view.scale`

Arcade Language

Structure & Logic

- Variables
- Data types
- If statement
- For loops
- Operators
- User-defined functions

Functions

- Data
- Date
- Geometry
- Logical
- Mathematical
- Text

Expression

>Returns
Label string
Popup text
Rendering value

Arcade language basics

```
1  /* Multi-line label
2   * Name, Temp, Wind direction,
3   * Relative humidity
4   */
5  var DEG = $feature.WIND_DIRECT;
6
7  var SPEED = $feature.WIND_SPEED;
8
9  // Calc wind octant
10 var DIR = When( SPEED == 0, null,
11   (DEG < 22.5 && DEG >= 0) || DEG > 337.5, 'N',
12   DEG >= 22.5 && DEG < 67.5, 'NE',
13   DEG >= 67.5 && DEG < 112.5, 'E',
14   DEG >= 112.5 && DEG < 157.5, 'SE',
15   DEG >= 157.5 && DEG < 202.5, 'S',
16   DEG >= 202.5 && DEG < 247.5, 'SW',
17   DEG >= 247.5 && DEG < 292.5, 'W',
18   DEG >= 292.5 && DEG < 337.5, 'NW', null );
19
20 var WIND = SPEED + ' mph ' + DIR;
21
22 var TEMP = Round($feature.TEMP) + '° F';
23
24 var RH = $feature.R_HUMIDITY + '% RH';
25
26 var NAME = $feature.STATION_NAME;
27
28 var labels = [ NAME, TEMP, WIND, RH ];
29
30 return Concatenate(labels, TextFormatting.NewLine);
```

Case insensitive

```
var labels = [ Name, Temp, Wind, RH ];
```

Comments

```
// Calc wind octant
/* Multi-line label
Name, Temp, Win dir, Rel hum
*/
```

Multi-line statements

```
var DIR = When( SPEED == 0, null, ...
```

Mulitple statement separated by semicolons

Terminate statement with semicolon

```
var DEG = $feature.WIND_DIRECT;
var SPEED = $feature.WIND_SPEED;
```

Arcade language basics

```
1  /* Multi-line label
2   * Name, Temp, Wind direction,
3   * Relative humidity
4   */
5  var DEG = $feature.WIND_DIRECT;
6
7  var SPEED = $feature.WIND_SPEED;
8
9  // Calc wind octant
10 var DIR = When( SPEED == 0, null,
11   (DEG < 22.5 && DEG >= 0) || DEG > 337.5, 'N',
12   DEG >= 22.5 && DEG < 67.5, 'NE',
13   DEG >= 67.5 && DEG < 112.5, 'E',
14   DEG >= 112.5 && DEG < 157.5, 'SE',
15   DEG >= 157.5 && DEG < 202.5, 'S',
16   DEG >= 202.5 && DEG < 247.5, 'SW',
17   DEG >= 247.5 && DEG < 292.5, 'W',
18   DEG >= 292.5 && DEG < 337.5, 'NW', null );
19
20 var WIND = SPEED + ' mph ' + DIR;
21
22 var TEMP = Round($feature.TEMP) + '° F';
23
24 var RH = $feature.R_HUMIDITY + '% RH';
25
26 var NAME = $feature.STATION_NAME;
27
28 var labels = [ NAME, TEMP, WIND, RH ];
29
30 return Concatenate(labels, TextFormatting.NewLine);
```

Variables declared with var

```
var DEG = $feature.WIND_DIRECT;
```

Access feature attributes using global variables

```
var RH = $feature.R_HUMIDITY + '% RH'
```

Access joined data

```
var percentageStatePop = Round(( $feature.POP21 /
$feature.[STATE.POP21] ) * 100, 2);
```

Access features in a layer

```
var totalValue = Sum( $layer, 'Market Value' );
```

Return results with return

```
return Concatenate( labels, TextFormatting.NewLine );
```

Arcade language basics

Data types

Array	var label = [NAME, TEMP, WIND, RH];
Boolean	var RAINING = true;
Date	var today = Date(2021,7,12);
Dictionary	var WIND = Dictionary("Speed", 10, "DIRECTION", "southwest");
Number	var TEMP = 65;
Text	var NAME = "Mt. Rainier"

ArcGIS specific data types

Attachment
Feature
FeatureSet
FeatureSetCollection
Geometry
Portal

Arcade language basics

Operators

Mathematical --- + - * /

Increment --- i++ j--

Comparison --- == != > <

Logical --- && ||

Built-in functions for data, dates, geometry, logical, mathematical, text, and tracking

Sort()

IsEmpty()

TrackCurrentSpeed

Now()

Mean()

Intersects()

Trim()

Arcade language basics

Conditional statements

```
if ($feature.WIND_SPEED > 1 ){  
    WIND = ROUND( $feature.WIND_SPEED * 0.62137 ) + " mph";  
} else {  
    WIND = "negligible"  
}  
- IIF()  
- When()
```

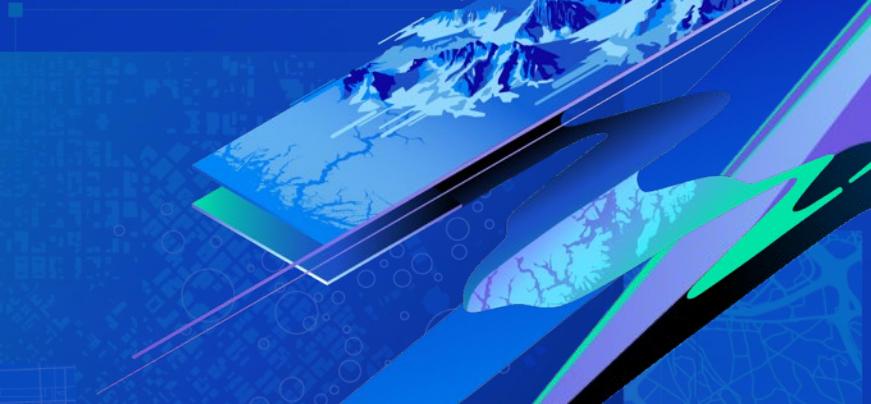

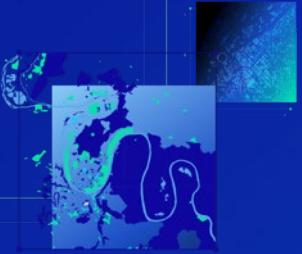

Loop statements

```
For ( var i = 0; i < MaxVal; i++ ){  
    /* Code block */  
}  
- Iterate through arrays, dictionaries, and FeatureSets
```

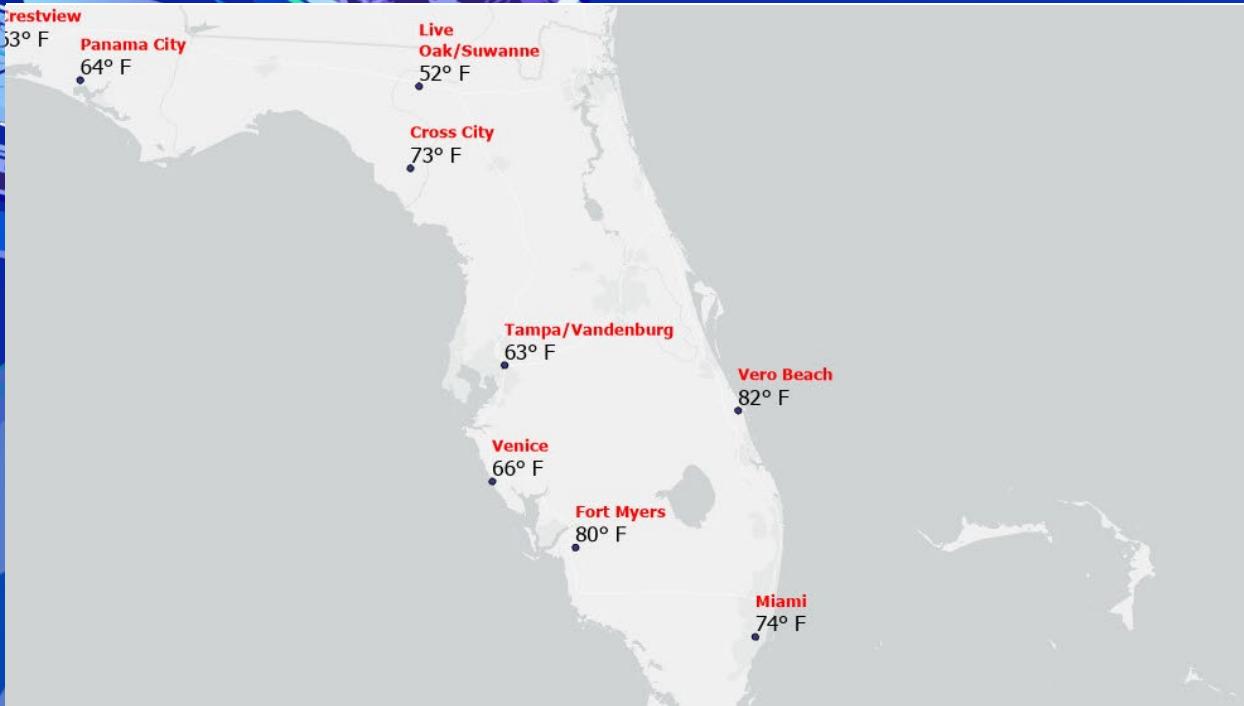

User-defined functions

```
Function calcWindSpeed( param1, param2 ){  
    /* Code block */  
};
```
