

ArcGIS® Pro Intelligence

Intelligence analysis software for investigative, geospatial, and link analysis

What Is ArcGIS Pro Intelligence?

ArcGIS® Pro Intelligence is intelligence analysis software built for intelligence analysts working in the military and in civilian intelligence agencies, law enforcement, and the private sector. Use link analysis, 2D and 3D maps, timelines, imagery exploitation, and graphs to uncover patterns, trends, and relationships in data to inform decision-making. ArcGIS Pro Intelligence scales to meet your mission whether you need to conduct movement analysis, understand patterns of life, or perform investigative analysis. ArcGIS Pro Intelligence is interoperable and extensible, supporting your data integration strategy across multiple domains in connected, disconnected, and air gapped networks.

How It Works

Transforming raw data into decision support

What can users do?

- Analyze past incidents to determine patterns and trends to assess potential threats
- Visualize complex relationships to reveal hidden connections
- Exploit imagery and full-motion video to extract essential information
- Conduct geospatial data analysis to visualize locations and activities of interest in both 2D and 3D
- Track geolocated entities and analyze their movements

2 Visualize and analyze your data

1 Integrate data from multiple sources

3 Share actionable intelligence

Benefits of ArcGIS Pro Intelligence

- **Analysis and production:** ArcGIS Pro Intelligence integrates a variety of data from multiple sources to conduct multidimensional visualization, advanced analysis, and intelligence production in one desktop environment. Share final assessments with stakeholders for informed decision-making.
- **Mission scalable:** From headquarters to the edge, ArcGIS Pro Intelligence scales to support many missions. Use one system with focused tools for threat assessments, investigations, indications, and warnings.
- **Interoperable and extensible:** ArcGIS Pro Intelligence integrates with your ArcGIS infrastructure, enabling intelligence professionals to access and use shared data. ArcGIS Pro Intelligence is interoperable and complies with industry standards, making it easier to leverage existing data. It can also be extended and configured to work with existing systems and applications.
