Esri Accessibility Conformance Report

Product Information

Product Name/Version: ArcGIS Enterprise / 10.9.1

Report Template: Revised Section 508 Edition (based on VPAT® version 2.4)

Product Release Date: November 18, 2021

Report Date: August 3, 2022

Product Description: ArcGIS Enterprise is the foundational software system for GIS, powering mapping and visualization, analytics, and data management. It is the backbone for running the Esri suite of applications and your own custom applications. ArcGIS Enterprise is tightly integrated with ArcGIS Pro for mapping and authoring, and seamlessly connects with ArcGIS Online to share content between systems.

Notes: This report covers ArcGIS Enterprise organization administration, including managing email settings, setting up and modifying federated servers, managing users and licenses, and creating administrative reports. It also covers working with hosted feature layers in the Enterprise portal such as by viewing, adding, and editing fields, creating a read-only view layer, and setting the extent for a given feature layer item.

This product does not contain any prerecorded or live audio-only and video-only content.

Evaluation Methods Used: Testing ArcGIS Enterprise involved a combination of manual and functional testing on desktop. The product was tested by certified accessibility professionals on a selection of the application representative of ArcGIS Enterprise using, among other methodology, the screen reader JAWS 2022, exclusive use of the keyboard, and manual inspection of code. Functional testing of typical user workflows was also conducted.

Contact Information: Environmental Systems Research Institute, Inc. (Esri)

For more information regarding Esri accessibility and Section 508, visit https://www.esri.com/en-us/legal/accessibility.

Specific inquiries may be emailed to <u>EsriAccessibility@esri.com</u>, or mailed to Esri, Contracts and Legal Department, 380 New York Street, Redlands, California 92373.

Table 1: Applicable Standards and Guidelines

| Standards / Guidelines | Included In Report |
|--|---|
| Web Content Accessibility Guidelines 2.0 | Level A (Yes) Level AA (Yes) Level AAA (No) |
| Web Content Accessibility Guidelines 2.1 | Level A (Yes) Level AA (Yes) Level AAA (No) |
| Revised Section 508 Standards | (Yes) |
| EN 301 549 V3.1.1 | (Yes) |

Table 2: Record of Changes

| Version | Date | Description of Changes |
|---------|------------|---|
| 1.0 | 08/03/2022 | Evaluation results and explanations updated by testing vendor (initial version) |
| 2.0 | 09/16/2022 | Updated to 2.4 VPAT® template and Esri ACR format |
| 2.1 | 09/21/2022 | Evaluation results and explanations updated by certified accessibility professionals and Esri internal. |

Purpose

The Voluntary Product Accessibility Template (VPAT®) – used to create Esri Accessibility Conformance Reports – is a template used to document a product's conformance with accessibility standards and guidelines. The purpose of the VPAT® is to assist customers and buyers in making preliminary assessments regarding the availability of commercially-available Information and Communication Technology (ICT) products and services with features that support accessibility.

Background

On March 20, 2017, the Architectural and Transportation Barriers Compliance Board (Access Board) revised, updated, and combined standards for ICT developed, procured, maintained, or used by federal agencies covered by Section 508 of the Rehabilitation Act of 1973 and Section 255 of the Communications Act of 1934. The revisions and updates to these standards are intended to ensure that electronic media is accessible to and usable by individuals with disabilities.

Terms

The terms used in the 'Conformance Level' information are defined as follows:

Table 3: Conformance Level Definitions

| Conformance Level | Definition |
|--------------------|--|
| Supports | The functionality of the product has at least one method that meets the criterion or meets with equivalent facilitation. |
| Partially Supports | Product does not entirely meet the letter and intent of the criterion, but does provide some level of access. |
| | OR |
| | Product provides alternative methods to meet the intent of the criterion. |
| Does Not Support | The majority of product functionality does not meet the criterion. |
| Not Applicable | The criterion is not relevant to the product. |
| Not Evaluated | The product has not been evaluated against the criterion. |

Revised Section 508 Considerations

Application and Administration

Information and Communication Technology (ICT) that is procured, developed, maintained, or used by agencies shall conform to these requirements. Section 508 of the Rehabilitation Act (29 U.S.C. 794d) applies to federal departments and agencies, including the U.S. Postal Service. The term "agency" is defined in Section E103 to include the United States Postal Service and other federal agencies and departments as specified in 44 U.S.C. 3502. That section of the U.S.C. defines agency to mean any executive department, military department, Government corporation, Government controlled corporation, or other establishment in the executive branch of the Government (including the Executive Office of the President), or any independent regulatory agency, but does not include (a) the General Accounting Office; (b) Federal Election Commission; (c) the governments of the District of Columbia and of the territories and possessions of the United States, and their various subdivisions; or (d) Government-owned contractor-operated facilities, including laboratories engaged in national defense research and production activities.

All sections of the technical standards may apply to this product and are individually addressed in the following sections. This applies to the majority of ArcGIS software, services, and solutions.

Scoping Requirements

Section 508 Chapter 2 addresses application and scoping of the Revised 508 Standards, including exceptions. Multiple significant changes were made to this chapter, including:

- Adding a category to E205.3, official agency communications that are non-public facing electronic covered content;
- Clarifying the application of WCAG 2.0 to non-Web documents and software; and
- Made corresponding changes to E205.4 and E207.2, including adding E205.4.1 and E207.3, which specify the word substitution necessary to apply WCAG 2.0 to non-Web content.

207.2 WCAG Conformance. User interface components and content of platforms and applications shall conform to Level A and Level AA Success Criteria and Conformance Requirements specified for webpages in WCAG 2.0.

Functional Performance Criteria

301.1 Scope. The requirements of Chapter 3 shall apply to ICT where required by 508 Chapter 2 (Scoping Requirements), 255 Chapter 2 (Scoping Requirements), and where otherwise referenced in any other chapter of the Revised 508 Standards or Revised 255 Guidelines.

Hardware

401.1 Scope. The requirements of Chapter 4 shall apply to ICT that is hardware where required by 508 Chapter 2 (Scoping Requirements), 255 Chapter 2 (Scoping Requirements), and where otherwise referenced in any other chapter of the Revised 508 Standards or Revised 255 Guidelines.

EXCEPTION: Hardware that is assistive technology shall not be required to conform to the requirements of this chapter.

402.1 General. ICT with closed functionality shall be operable without requiring the user to attach or install assistive technology other than personal headsets or other audio couplers, and shall conform to 402.

Software

501.1 Scope. The requirements of Chapter 5 shall apply to software where required by 508 Chapter 2 (Scoping Requirements), 255 Chapter 2 (Scoping Requirements), and where otherwise referenced in any other chapter of the Revised 508 Standards or Revised 255 Guidelines.

EXCEPTION: Where Web applications do not have access to platform accessibility services and do not include components that have access to platform accessibility services, they shall not be required to conform to 502 or 503 provided that they conform to Level A and Level AA Success Criteria and Conformance Requirements in WCAG 2.0 (incorporated by reference, see 702.10.1).

502.1 General. Software shall interoperate with assistive technology and shall conform to 502.

502.2 Documented Accessibility Features. Software with platform features defined in platform documentation as accessibility features shall conform to 502.2.

Support Documentation and Services

602.1 General. Documentation that supports the use of ICT shall conform to 602.

Web Content Accessibility Guidelines (WCAG) Report

WCAG Principle 1: Perceivable

Information and user interface components must be presentable to users in ways they can perceive. Criteria also apply to Revised Section 508 standards for Support Documentation (602.3). Report contains Level A and AA only (Revised Section 508 does not apply to AAA).

Table 4: WCAG Principle 1 Success Criteria - Perceivable

| Criteria | Conformance Level | Remarks and Explanations |
|--|--------------------|--|
| 1.1.1 Non-text Content (Level A) All non-text content that is presented to the user has a text alternative that serves the equivalent purpose, except for the situations listed below. | Partially Supports | Some non-text content that is presented to the user has a text alternative that serves the equivalent purpose. However, a rating of Partially Supports has been given for the following reasons: |
| Controls, Input: If non-text content is a control or accepts user input, then it has a name that describes its purpose. | | Some icons and/ or images lack a text alternative |
| Time-Based Media: If non-text content is time-based media, then text alternatives at least provide descriptive identification of the non-text content. | | |
| Test: If non-text content is a test or exercise that would be invalid if presented in text, then text alternatives at least provide descriptive identification of the non-text content. | | |
| Sensory: If non-text content is primarily intended to create a specific sensory experience, then text alternatives at least provide descriptive identification of the non-text content. | | |
| CAPTCHA: If the purpose of non-text content is to confirm that content is being accessed by a person rather than a computer, then text alternatives that identify and describe the purpose of the non-text content | | |

| Criteria | Conformance Level | Remarks and Explanations |
|--|-------------------------------------|--|
| are provided, and alternative forms of CAPTCHA using output modes for different types of sensory perception are provided to accommodate different disabilities. | | |
| Decoration, Formatting, Invisible: If non-text content is pure decoration, is used only for visual formatting, or is not presented to users, then it is implemented in a way that it can be ignored by assistive technology. | | |
| 1.2.1 Audio-only and Video-only (Prerecorded) (Level A) | Supports | The product does not have pre-recorded audio-only |
| For prerecorded audio-only and prerecorded video-only media, the following are true, except when the audio or video is a media alternative for text and is clearly labeled as such: | or pre-recorded video-only content. | or pre-recorded video-only content. |
| Prerecorded Audio-only: An alternative for time-based media is provided that presents equivalent information for prerecorded audio-only content. | | |
| Prerecorded Video-only: Either an alternative for time- based media or an audio track is provided that presents equivalent information for prerecorded video-only content. | | |
| 1.2.2 Captions (Prerecorded) (Level A) | Supports | The product does not contain prerecorded content |
| Captions are provided for all prerecorded audio content in synchronized media, except when the media is a media alternative for text and is clearly labeled as such. | requiring synch | requiring synchronized captions. |
| 1.2.3 Audio Description or Media Alternative (Prerecorded) (Level A) | Supports | The product does not contain prerecorded content requiring synchronized audio description. |
| An alternative for time-based media or audio description of the prerecorded video content is provided for synchronized media, except when the media is a media alternative for text and is clearly labeled as such. | | |

| Criteria | Conformance Level | Remarks and Explanations |
|---|--------------------|--|
| 1.2.4 Captions (Live) (Level AA)Captions are provided for all live audio content in synchronized media. | Supports | The product does not contain live video or audio content. |
| 1.2.5 Audio Description (Prerecorded) (Level AA) Audio description is provided for all prerecorded video content in synchronized media. | Supports | This product does not contain prerecorded audio- only or video-only content. |
| 1.3.1 Info and Relationships (Level A) Information, structure, and relationships conveyed through presentation can be programmatically determined or are available in text. | Partially Supports | Information, structure, and relationships conveyed through presentation can generally be programmatically determined or available in text. A rating of Partially Supports has been given for the following reasons: Some icons and/ or images lack a text alternative. Some headings and lists convey their roles only visually. Some form inputs lack a visible, unique, and programmatically associated label. Some controls do not have their name, role, and/ or state programmatically available, or the title attribute has been used to supply these, which is no longer well supported. Some ARIA patterns have not been fully implemented or has been implemented incorrectly |
| 1.3.2 Meaningful Sequence (Level A) | Partially Supports | The product contains pages whose programmatic reading order matches the visual and logical order in |

| Criteria When the sequence in which content is presented affects its meaning, a correct reading sequence can be programmatically determined. | Conformance Level | Remarks and Explanations most cases. However, a rating of Partially Support has been given for the following reason: |
|--|--------------------|---|
| | | Infrequently, a set of buttons will be coded and displayed in a different order. |
| 1.3.3 Sensory Characteristics (Level A) | Supports | Instructions provided for understanding and |
| Instructions provided for understanding and operating content do not rely solely on sensory characteristics of components such as shape, size, visual location, orientation, or sound. | | operating content do not rely solely on sensory characteristics of components, such as size, visual location, orientation, or sound. |
| 1.3.4 Orientation (Level AA – WCAG 2.1) | Supports | Content does not restrict its view and operation to a |
| Content does not restrict its view and operation to a single display orientation, such as portrait or landscape, unless a specific display orientation is essential. | | single display orientation. |
| 1.3.5 Identify Input Purpose (Level AA – WCAG 2.1) | Supports | Admin users input information about the various |
| The purpose of each input field collecting information about the user can be programmatically determined when: | | projects but do not submit any information about themselves beyond username and password. Nonadmin users do not input any personal information. |
| The input field serves a purpose identified in the Input Purposes for User Interface Components section; and | | • |
| The content is implemented using technologies with support for identifying the expected meaning for form input data. | | |
| 1.4.1 Use of Color (Level A) | Partially Supports | Most functions of the product do not convey |
| Color is not used as the only visual means of conveying information, indicating an action, prompting a response, or distinguishing a visual element. | | information through color alone. However, a rating of Partially Supports has been given for the following reason: |

| Criteria | Conformance Level | Remarks and Explanations |
|---|--------------------|---|
| | | Occasionally an error will be noted using only color. |
| | | Some links use only color to convey their role visually. |
| 1.4.2 Audio Control (Level A) | Supports | The product does not contain any audio component |
| If any audio on a Webpage plays automatically for more than 3 seconds, either a mechanism is available to pause or stop the audio, or a mechanism is available to control audio volume independently from the overall system volume level. | | that plays automatically for more than 3 seconds. |
| 1.4.3 Contrast (Minimum) (Level AA) | 9 3 S | The visual presentation of text and images of text |
| The visual presentation of text and images of text has a contrast ratio of at least 4.5:1, except for the following: | | generally has a contrast ratio of at least 4.5:1 and 3:1 for large text. However, a rating of Partially Supports has been given for the following reason(s): |
| Large Text: Large-scale text and images of large-scale text have a contrast ratio of at least 3:1; | | Some text, icons, input borders, and focus indicators have insufficient color contrast |
| Incidental: Text or images of text that are part of an inactive user interface component, that are pure decoration, that are not visible to anyone, or that are part of a picture that contains significant other visual content, have no contrast requirement. | | when compared with adjacent elements. |
| Logotypes: Text that is part of a logo or brand name has no minimum contrast requirement. | | |
| 1.4.4 Resize text (Level AA) | Partially Supports | The application is extremely dense and meant for the |
| Except for captions and images of text, text can be resized without assistive technology up to 200 percent without loss of content or functionality. | | large monitor of a desktop computer which is required to run it properly. However, a rating of Partially Supports has been given for the following reason(s): |

| Criteria | Conformance Level | Remarks and Explanations |
|---|--------------------|--|
| | | Occasionally at 200%, some text or a container element will force text overlap or be hidden off screen. |
| 1.4.5 Images of Text (Level AA) | Supports | Text is used to convey information rather than |
| If the technologies being used can achieve the visual presentation, text is used to convey information rather than images of text except for the following: | | images of text, except where a particular presentation of text is essential to the information being conveyed, such as in logotypes. |
| Customizable: The image of text can be visually customized to the user's requirements; | | |
| Essential: A particular presentation of text is essential to the information being conveyed. | | |
| Note: Logotypes (text that is part of a logo or brand name) are considered essential. | | |
| 1.4.10 Reflow (Level AA – WCAG 2.1) | Partially Supports | The application generally provides an equivalent |
| Content can be presented without loss of information or functionality, and without requiring scrolling in two dimensions for: | | responsive view to users. At the required dimensions, users will not need to scroll either horizontally or vertically. Exceptions include: |
| Vertical scrolling content at a width equivalent to 320 CSS pixels | | At extremely small viewport widths or heights, some content can become partially hidden. |
| Horizontal scrolling content at a height equivalent to 256 CSS pixels | | |
| 1. 4.11 Non-text Contrast (Level AA – WCAG 2.1) | Supports | The visual presentation of user Interface |
| The visual presentation of the following have a contrast ratio of at least 3:1 against adjacent color(s). | | components have a contrast ratio of at least 3:1 against adjacent color(s). |

| Criteria | Conformance Level | Remarks and Explanations |
|--|--------------------|--|
| [review] | | |
| 1.4.12 Text Spacing (Level AA – WCAG 2.1) | Partially Supports | In general, users can use custom text spacing |
| In content implemented using markup languages that support the following text style properties, no loss of content or functionality occurs by setting all of the following and by | | without affecting the user of the application. However, A rating of Partially Supports has been given for the following reason(s): |
| changing no other style property: | | In some instances, styles are unable to be overwritten. |
| Line height (line spacing) to at least 1.5 times the font size | | When font is increased to 200% or the |
| Spacing following paragraphs to at least 2 times the font size | | viewport is particularly small, there may be instances where some content might be partially obscured. |
| Letter spacing (tracking) to at least 0.12 times the font size | | partially obscured. |
| Word spacing to at least 0.16 times the font size. | | |
| 1.4.13 Content on Hover or Focus (Level AA – WCAG 2.1) | Supports | This product does not leverage the display of content |
| Where receiving and then removing pointer hover or keyboard focus triggers additional content to become visible and then hidden, the following are true: | | on hover or focus. |
| Dismissible: A mechanism is available to dismiss the additional content without moving pointer hover or keyboard focus, unless the additional content communicates an input error or does not obscure or replace other content | | |
| Hoverable: If pointer hover can trigger the additional content, then the pointer can be moved over the additional content without the additional content | | |

Criteria Conformance Level Remarks and Explanations

 Persistent: The additional content remains visible until the hover or focus trigger is removed, the user dismisses it, or its information is no longer valid.

WCAG Principle 2: Operable

User interface components and navigation must be operable. Criteria also apply to Revised Section 508 standards for Support Documentation (602.3). Report contains Level A and AA only (Revised Section 508 does not apply to AAA).

Table 5: WCAG Principle 2 Success Criteria - Operable

| Criteria | Conformance Level | Remarks and Explanations |
|---|--------------------|---|
| 2.1.1 Keyboard (Level A) All functionality of the content is operable through a keyboard interface without requiring specific timings for individual keystrokes, except where the underlying function requires input that depends on the path of the user's movement and not just the endpoints. | Partially Supports | The content within the product is generally operable through a keyboard interface without requiring specific timings for individual keystrokes. However, a rating of Partially Supports has been given for the following reason(s): • Some controls are not part of the focus order. |
| Note 1: This exception relates to the underlying function, not the input technique. For example, if using handwriting to enter text, the input technique (handwriting) requires path-dependent input but the underlying function (text input) does not. | | At times, a dialog or pop-up may not receive focus when opened, focus may not be set explicitly when closed, or focus may not be contained in the modal until it is closed. |
| Note 2: This does not forbid and should not discourage providing mouse input or other input methods in addition to keyboard operation. | | |
| 2.1.2 No Keyboard Trap (Level A) | Supports | The product does not contain keyboard traps. |
| If keyboard focus can be moved to a component of the page using a keyboard interface, then focus can be moved away from that component using only a keyboard interface, and, if it requires more than unmodified arrow or tab keys or other standard exit methods, the user is advised of the method for moving focus away. | | |
| 2.1.4 Character Key Shortcuts (Level A – WCAG 2.1) | Supports | The product does not provide character key |
| If a keyboard shortcut is implemented in content using only letter (including upper- and lower-case letters), punctuation, | | shortcuts. |

| Criteria | Conformance Level | Remarks and Explanations |
|--|-------------------|---|
| number, or symbol characters, then at least one of the following is true: | | |
| Turn off: A mechanism is available to turn the shortcut off | | |
| Remap: A mechanism is available to remap the shortcut to use one or more non-printable keyboard characters (e.g. Ctrl, Alt, etc) | | |
| Active only on focus: The keyboard shortcut for a user interface component is only active when that component has focus. | | |
| 2.2.1 Timing Adjustable (Level A) | Supports | Authentication is revoked when the window is closed |
| For each time limit that is set by the content, at least one of the following is true: | | or after a period of inactivity which meets requirements. |
| Turn off: The user is allowed to turn off the time limit before encountering it; or | | |
| Adjust: The user is allowed to adjust the time limit before encountering it over a wide range that is at least ten times the length of the default setting; or | | |
| Extend: The user is warned before time expires and given at least 20 seconds to extend the time limit with a simple action (for example, "press the space bar"), and the user is allowed to extend the time limit at least ten times; or | | |
| Real-time Exception: The time limit is a required part of a real-time event (for example, an auction), and no alternative to the time limit is possible; or | | |
| Essential Exception: The time limit is essential and extending it would invalidate the activity; or | | |

| Criteria | Conformance Level | Remarks and Explanations |
|---|-------------------|---|
| 20 Hour Exception: The time limit is longer than 20 hours. | | |
| Note: This success criterion helps ensure that users can complete tasks without unexpected changes in content or context that are a result of a time limit. This success criterion should be considered in conjunction with Success Criterion 3.2.1, which puts limits on changes of content or context as a result of user action. | | |
| 2.2.2 Pause, Stop, Hide (Level A) | Supports | The product does not contain moving, blinking, or |
| For moving, blinking, scrolling, or auto-updating information, all of the following are true: | | scrolling content, or synchronized media. |
| Moving, blinking, scrolling: For any moving, blinking or scrolling information that (1) starts automatically, (2) lasts more than five seconds, and (3) is presented in parallel with other content, there is a mechanism for the user to pause, stop, or hide it unless the movement, blinking, or scrolling is part of an activity where it is essential; and | | |
| Auto-updating: For any auto-updating information that (1) starts automatically and (2) is presented in parallel with other content, there is a mechanism for the user to pause, stop, or hide it or to control the frequency of the update unless the auto-updating is part of an activity where it is essential. | | |
| 2.3.1 Three Flashes or Below Threshold (Level A) | Supports | The product does not contain flashing content. |
| Webpages do not contain anything that flashes more than three times in any one second period, or the flash is below the general flash and red flash thresholds. | | |

| Criteria | Conformance Level | Remarks and Explanations |
|---|--------------------|--|
| 2.4.1 Bypass Blocks (Level A) A mechanism is available to bypass blocks of content that are repeated on multiple Webpages. | Supports | This product's design and use aligns more closely with an application than a webpage. As such, it has menus with default hidden submenus which can be expanded or hidden as needed. Different processes will also show or hide different menu items, which limits the number of items visible at any given time. |
| 2.4.2 Page Titled (Level A) Webpages have titles that describe topic or purpose. | Partially Supports | This product's design and use aligns more closely with an application than a webpage. As such, the page title is updated while moving through it to align with accessibility best practices. However, A rating of Partially Supports has been given for the following reason(s): |
| | | These updates are not always as informative as they should be. |
| 2.4.3 Focus Order (Level A) If a Webpage can be navigated sequentially and the navigation sequences affect meaning or operation, focusable components receive focus in an order that preserves meaning and operability. | Partially Supports | Most components receive focus in an order that preserves meaning and operability. However, a rating of Partially Supports has been given for the following reason(s): • Infrequently, a set of buttons will be coded and displayed in a different order. |
| 2.4.4 Link Purpose (In Context) (Level A) The purpose of each link can be determined from the link text alone or from the link text together with its programmatically determined link context, except where the purpose of the link would be ambiguous to users in general. | Partially Supports | In general, links are understandable in context. However, a rating of Partially Supports has been given for the following reason(s): • Occasionally a link may have the same accessible name as another link that goes elsewhere or uses generic text which isn't meaningful. |

| Criteria | Conformance Level | Remarks and Explanations |
|---|--------------------|--|
| 2.4.5 Multiple Ways (Level AA) More than one way is available to locate a Webpage within a set of Webpages except where the Webpage is the result of, or a step in, a process. | Not Applicable | This product's is a single page application whose design, and use aligns more closely with an application than a webpage. As such, Multiple Ways in not applicable. |
| 2.4.6 Headings and Labels (Level AA) Headings and labels describe topic or purpose. | Partially Supports | Most content headings and labels that exist within the product are descriptive and unique. However, a rating of Partially Supports has been given for the following reason(s): |
| | | Some form fields lack unique, visible, and programmatically discernable accessible name. |
| | | Some headings convey their roles only visually |
| 2.4.7 Focus Visible (Level AA) Any keyboard operable user interface has a mode of operation where the keyboard focus indicator is visible. | Partially Supports | For most of the components, the keyboard focus is indicated visually. However, a rating of Partially Supports has been given for the following reason(s): |
| | | Infrequently, a focus indicator may not be present or may not meet contrast requirements. |
| 2.5.1 Pointer Gestures (Level A – WCAG 2.1) | Supports | The product does not rely on multipoint or path- |
| All functionality that uses multipoint or path-based gestures for operation can be operated with a single pointer without a path-based gesture, unless a multipoint or path-based gesture is essential. | | based gestures for operation. |
| 2.5.2 Pointer Cancellation (Level A – WCAG 2.1) | Supports | Product functions that use a single pointer are |
| For functionality that can be operated using a single pointer, at least one of the following is true: | | completed when the user releases the pointer. |

| Criteria | Conformance Level | Remarks and Explanations |
|---|--------------------|--|
| No Down-Event: The down-event of the pointer is not used to execute any part of the function | | |
| Abort or Undo: Completion of the function is on the up- event, and a mechanism is available to abort the function before completion or to undo the function after completion | | |
| Up Reversal: The up-event reverses any outcome of the preceding down-event | | |
| Essential: Completing the function on the down-event is essential | | |
| 2.5.3 Label in Name (Level A – WCAG 2.1) | Partially Supports | For user interface components with labels that |
| For user interface components with labels that include text or images of text, the name contains the text that is presented visually. | | include text or images of text, in most cases the name contains the text presented visually. However, a rating of Partially Supports has been given for the following reason(s): |
| | | Some form fields and/ or controls lack unique, visible, and programmatically discernable accessible name. |
| 2.5.4 Motion Actuation (Level A – WCAG 2.1) | Supports | The product does not provide functionality that can be operated by device motion or user motion. |
| Functionality that can be operated by device motion or user motion can also be operated by user interface components and responding to the motion can be disabled to prevent accidental actuation, except when: | | |
| Supported Interface: The motion is used to operate functionality through an accessibility supported interface | | |
| Essential: The motion is essential for the function and doing so would invalidate the activity | | |

WCAG Principle 3: Understandable

Information and the operation of user interface must be understandable. Criteria also apply to Revised Section 508 standards for Support Documentation (602.3). Report contains Level A and AA only (Revised Section 508 does not apply to AAA).

Table 6: WCAG Principle 3 Success Criteria - Understandable

| Criteria | Conformance Level | Remarks and Explanations |
|---|-------------------|--|
| 3.1.1 Language of Page (Level A) The default human language of each Webpage can be programmatically determined. | Supports | Each page has the lang attribute on the HTML tag which sets the default language (generally 'en-us'). |
| 3.1.2 Language of Parts (Level AA) The human language of each passage or phrase in the content can be programmatically determined except for proper names, technical terms, words of indeterminate language, and words or phrases that have become part of the vernacular of the immediately surrounding text. | Supports | No relevant instances were found during testing. |
| 3.2.1 On Focus (Level A) When any component receives focus, it does not initiate a change of context. | Supports | When any user interface components within the product receive focus, it does not initiate a change of context. |
| 3.2.2 On Input (Level A) Changing the setting of any user interface component does not automatically cause a change of context unless the user has been advised of the behavior before using the component. | Supports | Changing the setting of user interface components within the product does not automatically cause a change of context unless the user has been advised of the behavior before using the component. |
| 3.2.3 Consistent Navigation (Level AA) Navigational mechanisms that are repeated on multiple Webpages within a set of Webpages occur in the same relative order each time they are repeated, unless a change is initiated by the user. | Supports | This product's design and use aligns more closely with an application than a webpage. As such, it has very little navigation. However, when present, it is labeled consistently and found in the same area(s) of the page as expected. |

| Criteria | Conformance Level | Remarks and Explanations |
|--|--------------------|---|
| 3.2.4 Consistent Identification (Level AA) Components that have the same functionality within a set of Webpages are identified consistently. | Partially Supports | In general, elements which serve the same purpose are consistently identified the same way. However, a rating of Partially Supports has been given for the following reason(s): |
| | | Some elements lack a programmatically discernable name, role, and/ or state. |
| 3.3.1 Error Identification (Level A) If an input error is automatically detected, the item that is in error is identified and the error is described to the user in text. | Partially Supports | Errors are often visible and programmatically associated with their input. However, A rating of Partially Supports has been given for the following reason(s): |
| | | Some errors are not programmatically associated with their input |
| | | Some errors are conveyed using only color |
| 3.3.2 Labels or Instructions (Level A) Labels or instructions are provided when content requires user input. | Partially Supports | In most cases, the product provides labels and/or instructions for user input. However, a rating of Partially Supports has been given for the following reason(s): • In some instances, controls are missing their programmatically discernable and/ or visible label. |

| Criteria | Conformance Level | Remarks and Explanations |
|---|--------------------|--|
| 3.3.3 Error Suggestion (Level AA) | Partially Supports | In general, instructions are available for fields that |
| If an input error is automatically detected and suggestions for correction are known, then the suggestions are provided to the user, unless it would jeopardize the security or purpose of the content. | | require complex information and errors provide further refined information. However, a rating of Partially Supports has been given for the following reason(s): |
| | | Some errors are not programmatically associated to their fields |
| 3.3.4 Error Prevention (Legal, Financial, Data) (Level AA) | Supports | The product does not cause legal commitments or financial transactions for the user to occur, does not modify or delete user-controllable data in data storage systems, and does not submit user test responses, unless submissions are reversible, checked, and/or confirmed by the user. |
| For Webpages that cause legal commitments or financial transactions for the user to occur, that modify or delete user-controllable data in data storage systems, or that submit user test responses, at least one of the following is true: | | |
| Reversible: Submissions are reversible. | | checked, drid/or committed by the door. |
| Checked: Data entered by the user is checked for input errors and the user is provided an opportunity to correct them. | | |
| Confirmed: A mechanism is available for reviewing, confirming, and correcting information before finalizing the submission. | | |

WCAG Principle 4: Robust

Content must be robust enough that it can be interpreted reliably by a wide variety of user agents, including assistive technologies. Criteria also apply to Revised Section 508 standards for Support Documentation (602.3). Report contains Level A and AA only (Revised Section 508 does not apply to AAA).

Table 7: WCAG Principle 4 Success Criteria - Robust

| Criteria | Conformance Level | Remarks and Explanations |
|---|--------------------|---|
| 4.1.1 Parsing (Level A) In content implemented using markup languages, elements have complete start and end tags, elements are nested according to their specifications, elements do not contain duplicate attributes, and any IDs are unique, except where the | Partially Supports | The product's various components are generally compliant with their relevant standards. However, A rating of Partially Supports has been given for the following reason(s): • Some elements lack a programmatically |
| specifications allow these features. Note: Start and end tags that are missing a critical character in their formation, such as a closing angle bracket or a mismatched attribute value quotation mark are not complete. | | discernable name, role, and/or state. In some instances, duplicate ids will appear in the DOM. |
| 4.1.2 Name, Role, Value (Level A) | Partially Supports | Some ARIA patterns are not fully implemented or have been implemented incorrectly. In general, the product has been developed using |
| For all user interface components (including but not limited to: form elements, links and components generated by scripts), the name and role can be programmatically determined; states, properties, and values that can be set by the user can be programmatically set; and notification of changes to these items is available to user agents, including assistive technologies. | Partially Supports | native, semantic HTML5 elements. Where needed, ARIA has been used to ensure names, roles, and states are programmatically available. However, A rating of Partially Supports has been given for the following reason(s): • Some elements lack a programmatically |
| Note: This success criterion is primarily for Web authors who develop or script their own user interface components. For example, standard HTML controls already meet this success criterion when used according to specification. | | discernable name, role, and/or state. Some ARIA patterns are not fully implemented or have been implemented incorrectly. |

| Criteria | Conformance Level | Remarks and Explanations |
|---|--------------------|---|
| 4.1.3 Status Messages (Level AA – WCAG 2.1) In content implemented using markup languages, status messages can be programmatically determined through role or properties such that they can be presented to the user by assistive technologies without receiving focus. | Partially Supports | In content implemented using markup languages, status messages can be programmatically determined through role or properties such that they can be presented to the user by assistive technology without receiving focus. However, a rating of Partially Supports has been given for the following reason(s): |
| | | Infrequently, changes on contrast are not conveyed programmatically to non-visual users. |

Revised Section 508 Report

Chapter 3: Functional Performance Criteria

Table 8: Revised Section 508 Chapter 3 - Functional Performance Criteria

| Criteria | Conformance Level | Remarks and Explanations |
|---|--------------------|--|
| 302.1 Without Vision Where a visual mode of operation is provided, ICT shall provide | Partially Supports | A rating of Partially Supports has been given due to the following related WCAG criteria: |
| at least one mode of operation that does not require user vision. | | 1.1.1 Non-text Content (Level A) 1.3.1 Info and Relationships (Level A) 2.1.1 Keyboard (Level A) 2.4.2 Page Titled (Level A) 2.4.4 Link Purpose (In Context) (Level A) 2.4.6 Headings and Labels (Level AA) 2.5.3 Label in Name (Level A) |
| | | 3.3.1 Error Identification (Level A) 3.2.4 Consistent Identification (Level AA) 3.3.2 Labels or Instructions (Level A) 3.3.3 Error Suggestion (Level AA) 4.1.1 Parsing (Level A) 4.1.2 Name, Role, Value (Level A) 4.1.3 Status Messages (Level AA 2.1 only) |
| 302.2 With Limited Vision | Partially Supports | A rating of Partially Supports has been given due to the following related WCAG criteria: |

| Criteria | Conformance Level | Remarks and Explanations |
|---|--------------------|---|
| Where a visual mode of operation is provided, ICT shall provide | | 1.1.1 Non-text Content (Level A) |
| at least one mode of operation that enables users to make use of limited vision. | | 1.3.1 <u>Info and Relationships (Level A)</u> |
| | | 1.4.1 <u>Use of Color (Level A)</u> |
| | | 1.4.3 <u>Contrast (Minimum) (Level AA)</u> |
| | | 1.4.4 Resize Text (Level AA) |
| | | 1.4.10 <u>Reflow (Level AA 2.1 only)</u> |
| | | 1.4.12 <u>Text Spacing (Level AA 2.1 only)</u> |
| | | 2.1.1 <u>Keyboard (Level A)</u> |
| | | • 2.4.3 Focus Order (Level A) |
| | | 2.4.6 <u>Headings and Labels (Level AA)</u> |
| | | 2.4.7 <u>Focus Visible (Level AA)</u> |

| 603.2 Information on Accessibility and Compatibility Features | Not Applicable | This product report is not impacted by Chapters 4 and 5 (as described in 602.2). |
| ICT support services shall include information on the accessibility and compatibility features required by 602.2. | | |
| 603.3 Accommodation of Communication Needs | Supports | Technical support is available directly to the user for |
| Support services shall be provided directly to the user or through a referral to a point of contact. Such ICT support services shall accommodate the communication needs of individuals with disabilities. | | this product, and Esri Accessibility contact information is provided in this report. |

EN 301 549 Report

Chapter 4: Functional Performance Statements (FPS)

Table 10: EN 301 549 Chapter 4 - Functional Performance Statements

| Criteria | Conformance Level | Remarks and Explanations |
|--|--------------------|---|
| 4.2.1 Usage Without Vision Where ICT provides visual modes of operation, the ICT provides at least one mode of operation that does not require vision. This is essential for users without vision and benefits many more users in different situations. | Partially Supports | A rating of Partially Supports has been given due to the following related WCAG criteria: |
| | | • 1.1.1 Non-text Content (Level A) |
| | | • 1.3.1 Info and Relationships (Level A) |
| | | • 2.1.1 Keyboard (Level A) |
| | | 2.4.2 <u>Page Titled (Level A)</u> |
| | | 2.4.4 <u>Link Purpose (In Context) (Level A)</u> |
| | | 2.4.6 <u>Headings and Labels (Level AA)</u> |
| | | • 2.5.3 <u>Label in Name (Level A)</u> |
| | | • 3.3.1 <u>Error Identification (Level A)</u> |
| | | 3.2.4 <u>Consistent Identification (Level AA)</u> |
| | | 3.3.2 <u>Labels or Instructions (Level A)</u> |
| | | 3.3.3 <u>Error Suggestion (Level AA)</u> |
| | | 4.1.1 <u>Parsing (Level A)</u> |
| | | 4.1.2 <u>Name, Role, Value (Level A)</u> |
| | | 4.1.3 <u>Status Messages (Level AA 2.1 only)</u> |
| 4.2.2 Usage With Limited Vision Where ICT provides visual modes of operation, the ICT provides features that enable users to make better use of their limited | Partially Supports | A rating of Partially Supports has been given due to the following related WCAG criteria: |

| Criteria | Conformance Level | Remarks and Explanations |
|---|--------------------|---|
| vision. This is essential for users with limited vision and benefits | | 1.1.1 Non-text Content (Level A) |
| many more users in different situations. | | 1.3.1 Info and Relationships (Level A) |
| | | 1.4.1 <u>Use of Color (Level A)</u> |
| | | 1.4.3 <u>Contrast (Minimum) (Level AA)</u> |
| | | 1.4.4 <u>Resize Text (Level AA)</u> |
| | | 1.4.10 <u>Reflow (Level AA 2.1 only)</u> |
| | | 1.4.12 <u>Text Spacing (Level AA 2.1 only)</u> |
| | | 2.1.1 <u>Keyboard (Level A)</u> |
| | | • 2.4.3 Focus Order (Level A) |
| | | 2.4.6 <u>Headings and Labels (Level AA)</u> |
| | | 2.4.7 <u>Focus Visible (Level AA)</u> |
| | | 3.2.4 Consistent Identification (Level AA) |
| | | 3.3.1 <u>Error Identification (Level A)</u> |
| | | 3.3.2 <u>Labels or Instructions (Level A)</u> |
| 4.2.3 Usage Without Perception of Color Where ICT provides visual modes of operation, the ICT provides | Partially Supports | A rating of Partially Supports has been given due to the following related WCAG criteria: |
| a visual mode of operation that does not require user perception | | 1.4.1 <u>Use of Color (Level A)</u> |
| of color. This is essential for users with limited color perception and benefits many more users in different | | 1.4.3 Contrast (Minimum) (Level AA) |
| situations. | | 2.4.7 Focus Visible (Level AA) |
| | | 3.3.1 Error Identification (Level A) |
| | | • 4.1.3 Status Messages (Level AA 2.1 only) |
| 4.2.4 Usage Without Hearing | Supports | The product does not require the use of hearing. |

| Criteria | Conformance Level | Remarks and Explanations |
|---|-------------------|---|
| Where ICT provides auditory modes of operation, the ICT provides at least one mode of operation that does not require hearing. This is essential for users without hearing and benefits many more users in different situations. | | |
| 4.2.5 Usage With Limited Hearing | Supports | The product does not require the use of hearing. |
| Where ICT provides auditory modes of operation, the ICT provides enhanced audio features. This is essential for users with limited hearing and benefits many more users in different situations. | | |
| 4.2.6 Usage With No or Limited Vocal Capacity | Supports | The product is usable by those with no or limited vocal capability. |
| Where ICT requires vocal input from users, the ICT provides at least one mode of operation that does not require them to generate vocal output. This is essential users with no or limited vocal capability and benefits many more users in different situations. | | |

| Criteria | Conformance Level | Remarks and Explanations |
|--|--------------------|---|
| 4.2.7 Usage With Limited Manipulation or Strength Where ICT requires manual actions, the ICT provides features that enable users to make use of the ICT through alternative actions not requiring manipulation, simultaneous action or hand strength. This is essential for users with limited manipulation or strength and benefits many more users in different situations. | Partially Supports | A rating of Partially Supports has been given due to the following related WCAG criteria: 1.3.1 Info and Relationships (Level A) 1.3.2 Meaningful Sequence (Level A) 2.1.1 Keyboard (Level A) |
| | | 2.4.3 Focus Order (Level A) 2.4.6 Headings and Labels (Level AA) 2.4.7 Focus Visible (Level AA) 2.5.3 Label in Name (Level A 2.1 only) 3.2.4 Consistent Identification (Level AA) 4.1.1 Parsing (Level A) 4.1.2 Name, Role, Value (Level A) |
| 4.2.8 Usage With Limited Reach Where ICT products are free-standing or installed, all the elements required for operation will need to be within reach of all users. This is essential for users with limited reach and benefits many more users in different situations. | Partially Supports | A rating of Partially Supports has been given due to the following related WCAG criteria: 1.3.1 Info and Relationships (Level A) 1.3.2 Meaningful Sequence (Level A) 2.1.1 Keyboard (Level A) 2.4.3 Focus Order (Level A) 2.4.6 Headings and Labels (Level AA) 2.5.3 Label in Name (Level A 2.1 only) |
| 4.2.9 Minimize Photosensitive Seizure Triggers Where ICT provides visual modes of operation, the ICT provides at least one mode of operation that minimizes the potential for | Supports | The product does not contain photosensitive seizure triggers or flashing content. |

| Criteria | Conformance Level | Remarks and Explanations |
|---|--------------------|---|
| triggering photosensitive seizures. This is essential for users with photosensitive seizure triggers. | | |
| 4.2.10 Usage With Limited Cognition, Language, or Learning | Partially Supports | A rating of Partially Supports has been given due to the following related WCAG criteria: |
| The ICT provides features and/or presentation that makes it | | 1.1.1 Non-text Content (Level A) |
| simpler and easier to understand, operate and use. This is essential for users with limited cognition, language or learning, | | 1.3.1 <u>Info and Relationships (Level A)</u> |
| and benefits many more users in different situations. | | 2.1.1 <u>Keyboard (Level A)</u> |
| | | 2.4.4 <u>Link Purpose (In Context) (Level A)</u> |
| | | 2.4.6 <u>Headings and Labels (Level AA)</u> |
| | | 2.4.7 <u>Focus Visible (Level AA)</u> |
| | | 3.2.4 Consistent Identification (Level AA) |
| | | 3.3.1 <u>Error Identification (Level A)</u> |
| | | 3.3.2 <u>Labels or Instructions (Level A)</u> |
| | | 4.1.1 Parsing (Level A) |
| | | 4.1.2 Name, Role, Value (Level A) |
| 4.2.11 Privacy Where ICT provides features for accessibility, the ICT maintains the privacy of users of these features at the same level as other users. | Supports | The product does not cause legal commitments or financial transactions for the user to occur, does not modify or delete user-controllable data in data storage systems, and does not submit user test responses. No spoken version of characters being mashed is available. Use of headphones is not restricted in any way. |

Chapter 5: Generic Requirements

ArcGIS Enterprise is not impacted by Chapter 5: Generic Requirements. This section has been removed from the report.

Chapter 6: ICT with Two-Way Voice Communication

ArcGIS Enterprise is not impacted by Chapter 6: ICT with Two-Way Voice Communication. This section has been removed from the report.

<u>Chapter 7</u>: ICT with Video Capabilities

ArcGIS Enterprise is not impacted by Chapter 7: ICT with Voice Capabilities. This section has been removed from the report.

Chapter 8: Hardware

ArcGIS Enterprise is not impacted by Chapter 8: Hardware. This section has been removed from the report.

Chapter 9: Web (see WCAG section)

This section has been removed from the report.

Chapter 10: Non-Web Documents

ArcGIS Enterprise is not impacted by Chapter 10: Non-Web Documents. This section has been removed from the report.

Chapter 11: Software

ArcGIS Enterprise is not impacted by Chapter 11: Software. This section has been removed from the report.

<u>Chapter 12</u>: Documentation and Support Services

The language included in this section is based on an internal evaluation of the ArcGIS Enterprise support documentation and services.

Table 11: EN 301 549 Chapter 12 - Documentation and Support Services

| Criteria | Conformance Level | Remarks and Explanations |
|---|--------------------|--|
| 12.1 Product Documentation | | |
| 12.1.1 Accessibility and Compatibility Features | Partially Supports | Web-based electronic support documentation is available for this product. |
| Product documentation provided with the ICT whether provided separately or integrated within the ICT shall list and explain how to use the accessibility and compatibility features of the ICT. | | |
| 12.1.2 Accessible Documentation | Supports | Web-based electronic support documentation is available for this product. |
| Product documentation provided with the ICT shall be made available in at least one of the following electronic formats: web or non-web. | | |
| 12.2 Support Services | | |
| 12.2.2 Information on Accessibility and Compatibility Features | Supports | Technical support is available directly to the user for this product, and Esri Accessibility contact information is provided in this report. |
| ICT support services shall provide information on the accessibility and compatibility features that are mentioned in the product documentation. | | |
| 12.2.3 Effective Communication | Supports | Technical support is available directly to the user for this product, and Esri Accessibility contact information is provided in this report. |
| ICT support services shall accommodate the communication needs of individuals with disabilities either directly or through a referral point. | | |

| Criteria | Conformance Level | Remarks and Explanations |
|--|-------------------|---|
| 12.2.4 Accessible Documentation Documentation provided by support services shall be made available in at least one of the following electronic formats: web or non-web. | Supports | Web-based electronic support documentation is available for this product. |
