Not all of the analysis tools

Open in Map Viewer New Map Charlotte

Home SF Restaurants

The screenshot displays the ArcGIS Map Viewer Classic interface. At the top, there is a navigation bar with options: Home, SF Restaurants, Details, Add, Edit, Basemap, Analysis, Save, Share, Print, Directions, Measure, and Bookmarks. A search bar on the right contains the text 'Find address or place'. Below the navigation bar, there are tabs for 'About', 'Content', and 'Legend'. The 'Content' tab is active, showing a list of items: 'survey123' (checked) and 'Topographic'. The main map area shows a world map with a red dot on the West Coast of North America. A 'Save' dropdown menu is open, and the 'Save As' option is circled in red. On the right side of the map, there is a vertical toolbar with icons for zooming in (+), home, zooming out (-), and refresh.

ArcGIS Dashboards: Designing Effective Dashboards

David Nyenhuis

Soobin Choi

David Nyenhuis

Soobin Choi

Groups of Dashboards

	Snapshot Dashboards	Monitoring Dashboards
Data	A snapshot of time. Data behind dashboard doesn't update. (e.g., findings from census 2020)	Updated intermittently or regularly (every second, hour, day, or month). (e.g., field data collection, COVID case counts)
Viewing Frequency	Once	Reoccurring (e.g., always open, daily, monthly)
Purpose	Inform, explain, persuade, analyze. (They can tell a story)	Inform, flag concerns, evaluate performance measures, provide progress update, analyze.
Style	Color can be used for branding and/or to emphasize important dimensions of the data.	Muted colored maps and visualizations with areas of interest or concern highlighted.

JSON Items “File” of AGOL

- Item ID
- Standard Metadata
- Tools and Commands
- Asset Links

The screenshot shows the ArcGIS Online interface for an item titled "GIS: where are we from 2019-2020". The URL in the browser is `fleming.maps.arcgis.com/home/item.html?id=45f00d29fd9c439b837a13f38904f7a3`. The page has a navigation bar with "Home", "Gallery", "Map", "Scene", "Groups", "Content", and "Organization". Below this is a sub-navigation bar with "Overview", "Data", "Visualization", "Usage", and "Settings". The main content area includes an "Edit Thumbnail" button, a thumbnail image, a brief summary, and a description. The "Layers" section shows a layer named "WhereAreWeFrom" with options for "Open In", "Export To", "Time Settings", "Enable Attachments", "Service URL", and "Metadata". On the right side, there are several action buttons: "Open in Map Viewer", "Open in Scene Viewer", "Open in ArcGIS Desktop", "Publish", "Create View Layer", "Export Data", "Update Data", and "Share". At the bottom right, there is an "Item Information" section with a progress bar ranging from "Low" to "High".

ArcGIS Online: Use Hosted Feature Layers and Maps

02

ArcGIS Server: Publish Map Services, Use these in ArcGIS Online

03

ArcGIS Server: Administer and Manage the environment

04

ArcGIS Enterprise: Publish, administer, manage and configure

How to provide an administration experience Without risk to your academic environments?

Hands-on Administrative Experience

- Use cloud-based environment virtual-machines (AWS or GCP)
- Configure a Windows VM with ArcGIS Server as a base
- Create Image for students to start with your configured VM
- Students copy and start their own VM using your base
- Students configure their own network, provide a domain and SSL certificate
- Students then can explore the software as a full “administrator”

Help your students grow cloud skills at no cost and earn prizes on The Arcade. Play today!

Google Cloud for Faculty

Teach your students with Google Cloud and prepare them for the cloud-first world. Access Google Cloud credits, training, curriculum, and communities at no cost.

Apply for teaching credits

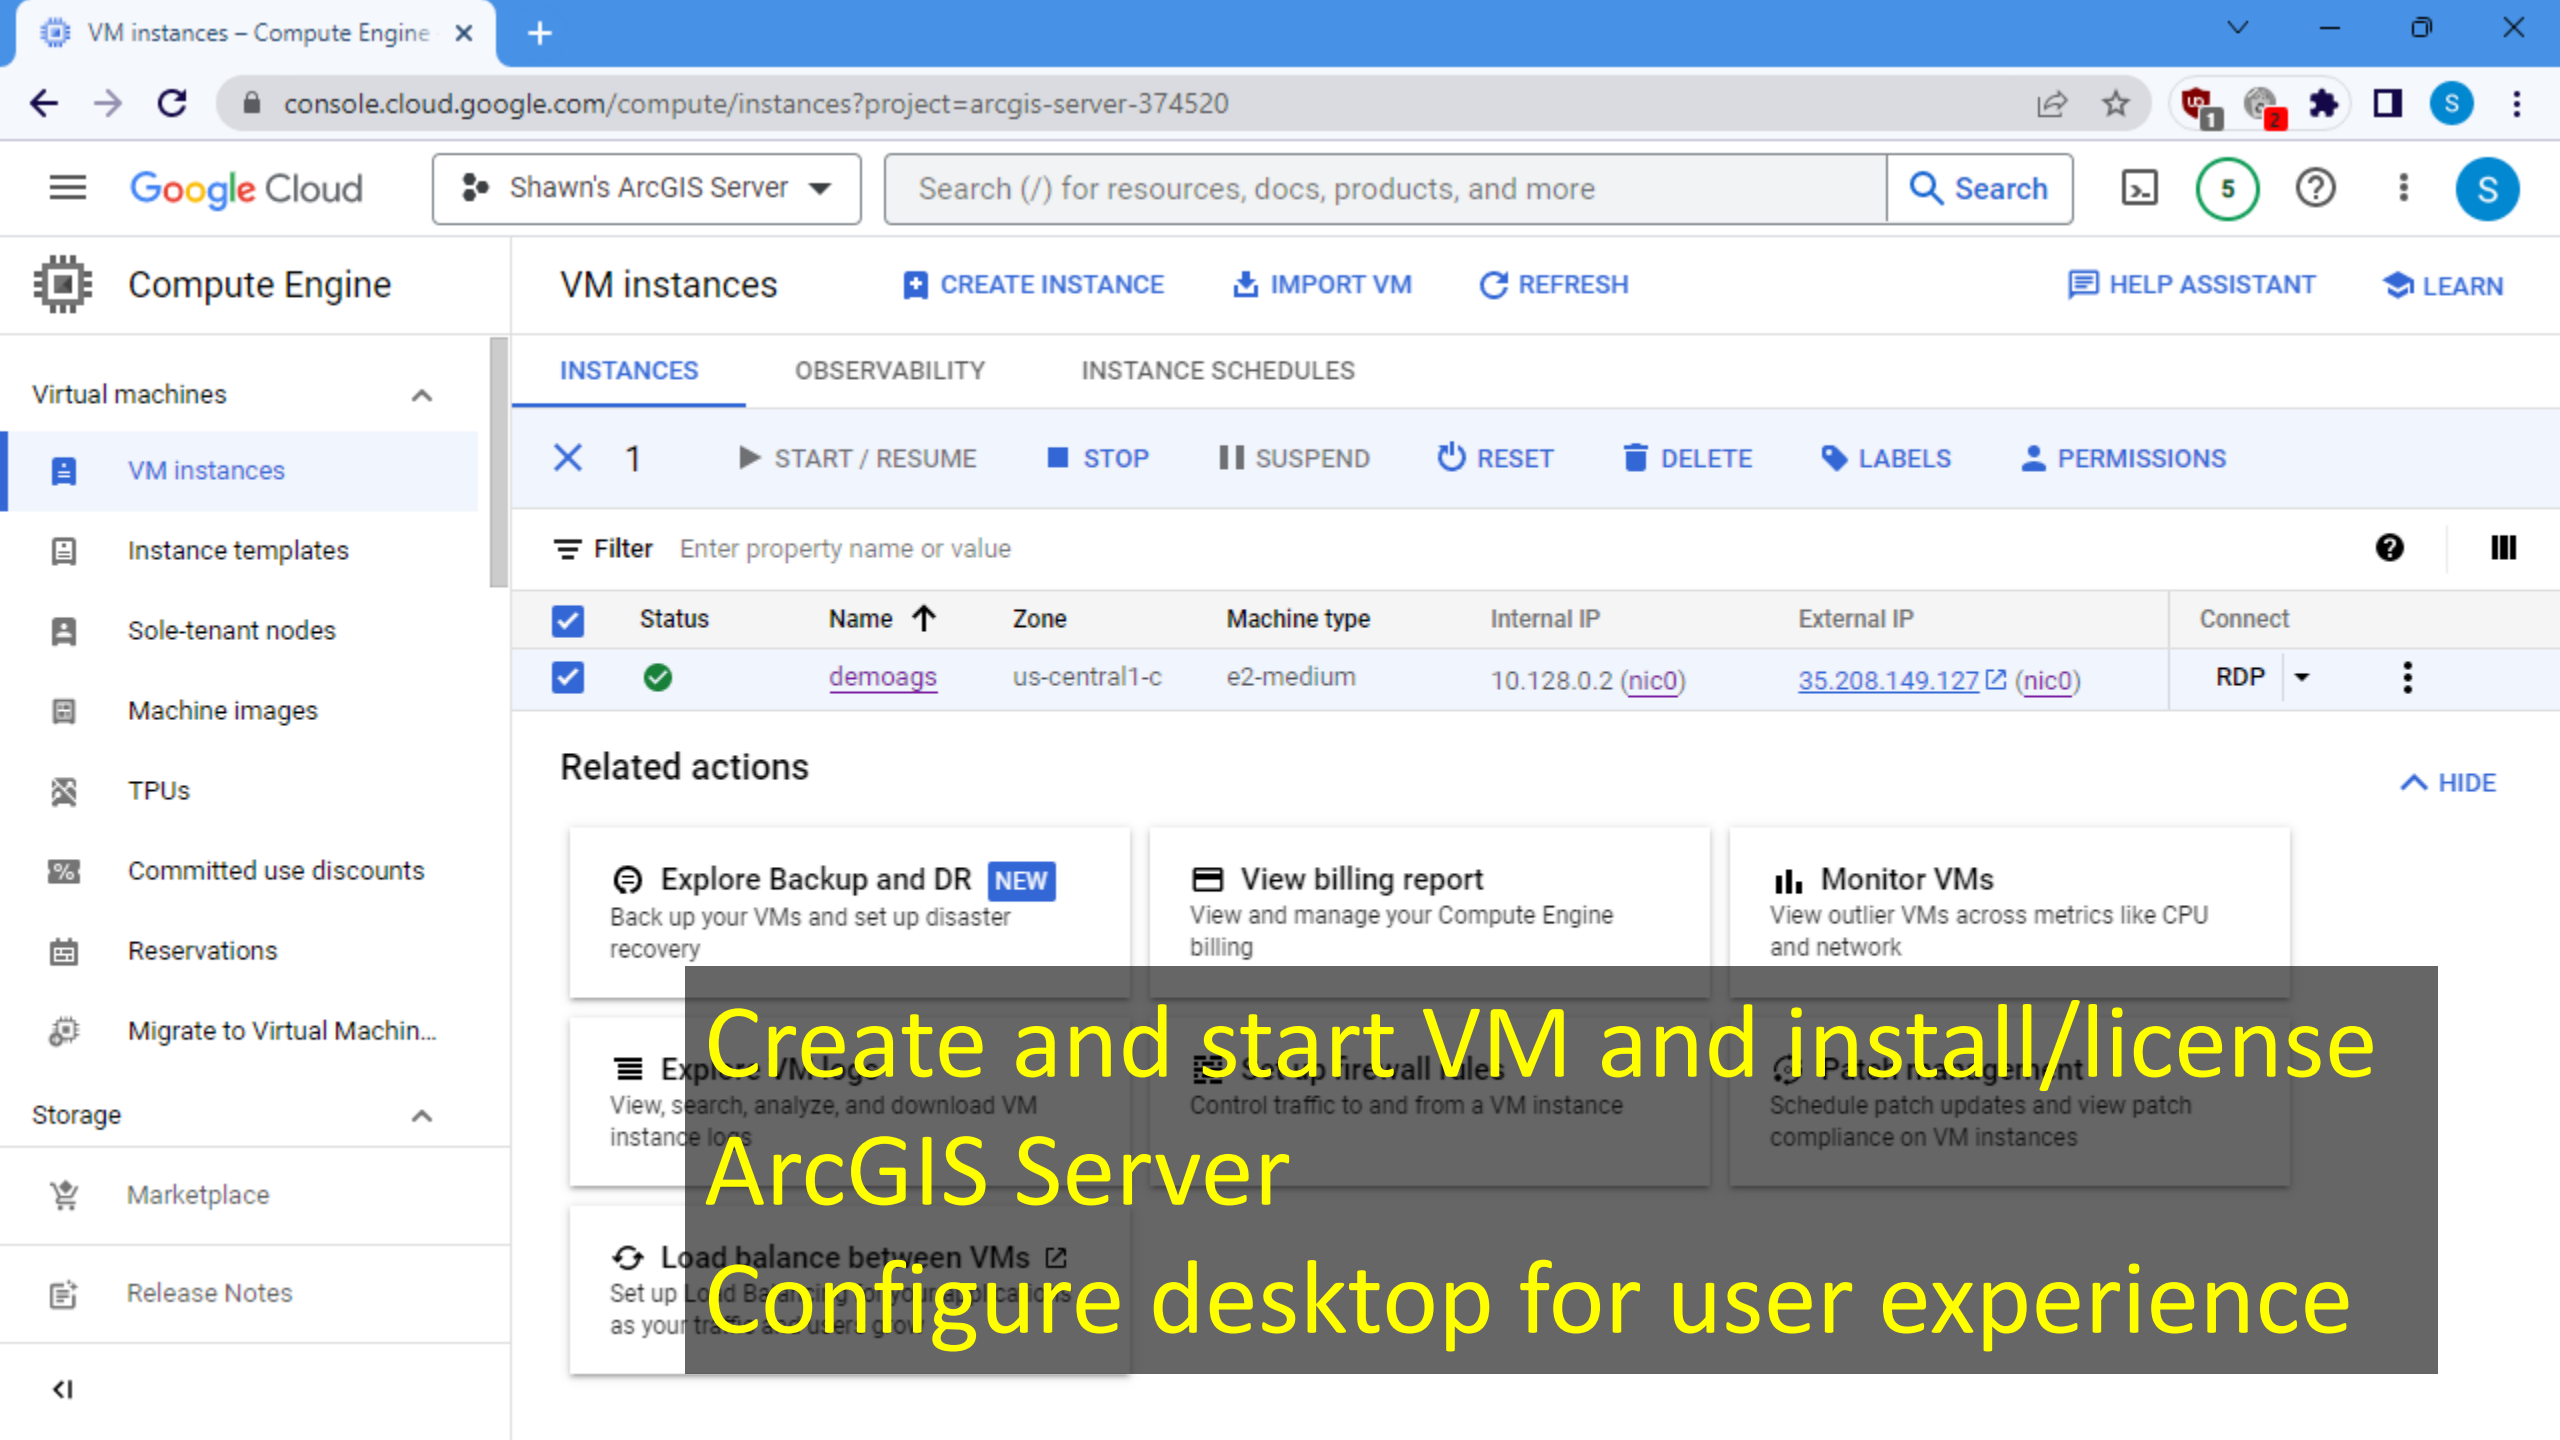

Apply for training credits

Inspire students like these who created an app to help the hearing impaired

Optional: Apply for student credits
<https://cloud.google.com/edu/faculty>

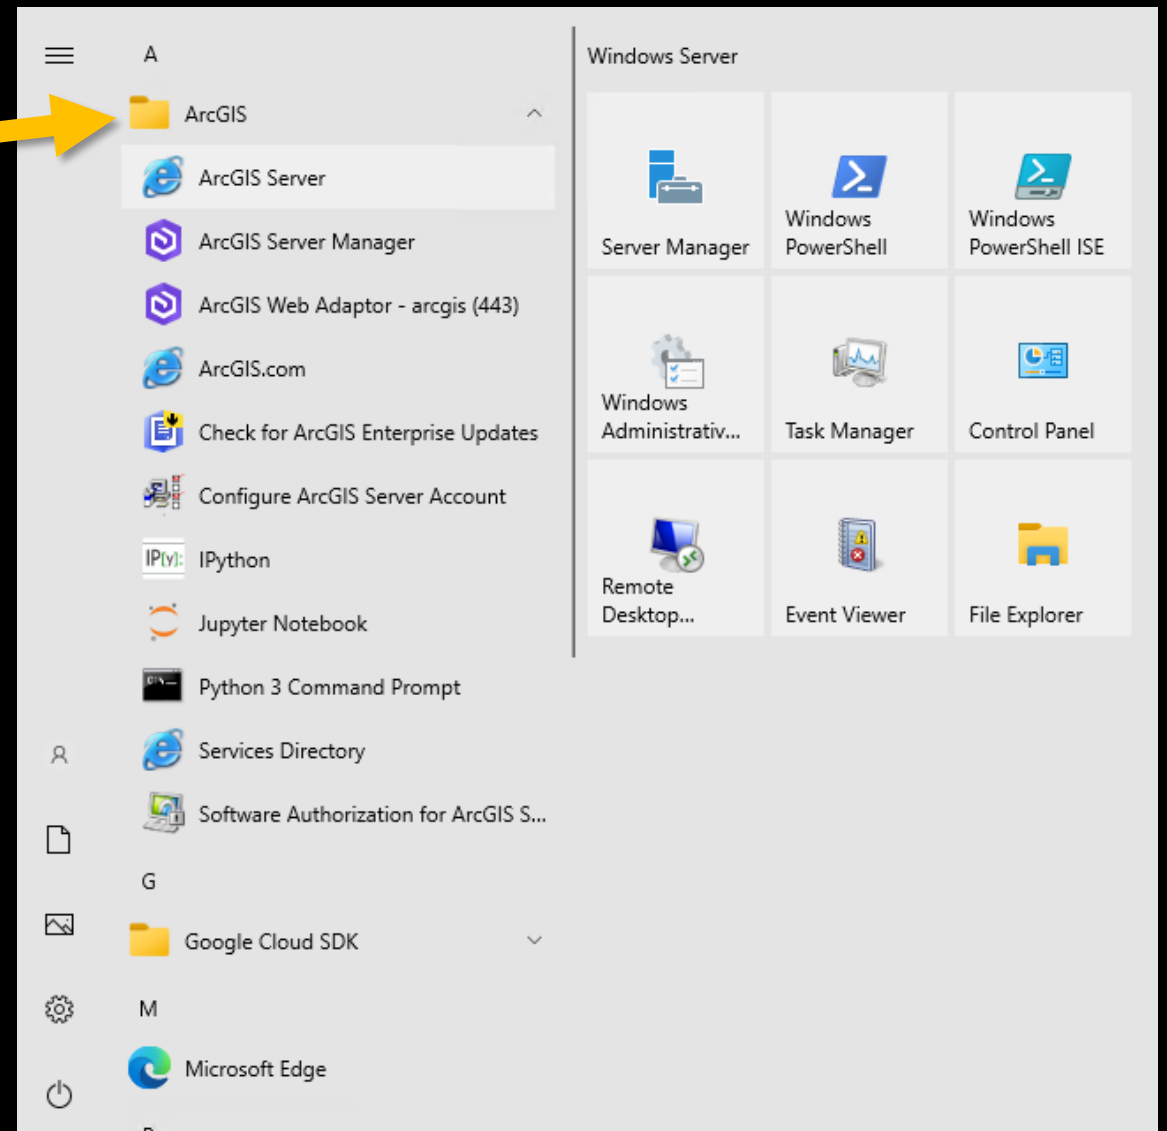

Access resources

Create and start VM and install/license
ArcGIS Server
Configure desktop for user experience

Install and license
ArcGIS Server
(non-federated)

Students will get a
copy of this Virtual
Machine as an
IMAGE

HELP ASSISTANT

ID	projects/arcgis-server-374520/roles/fleminglistvms
Role launch stage	General Availability

Description

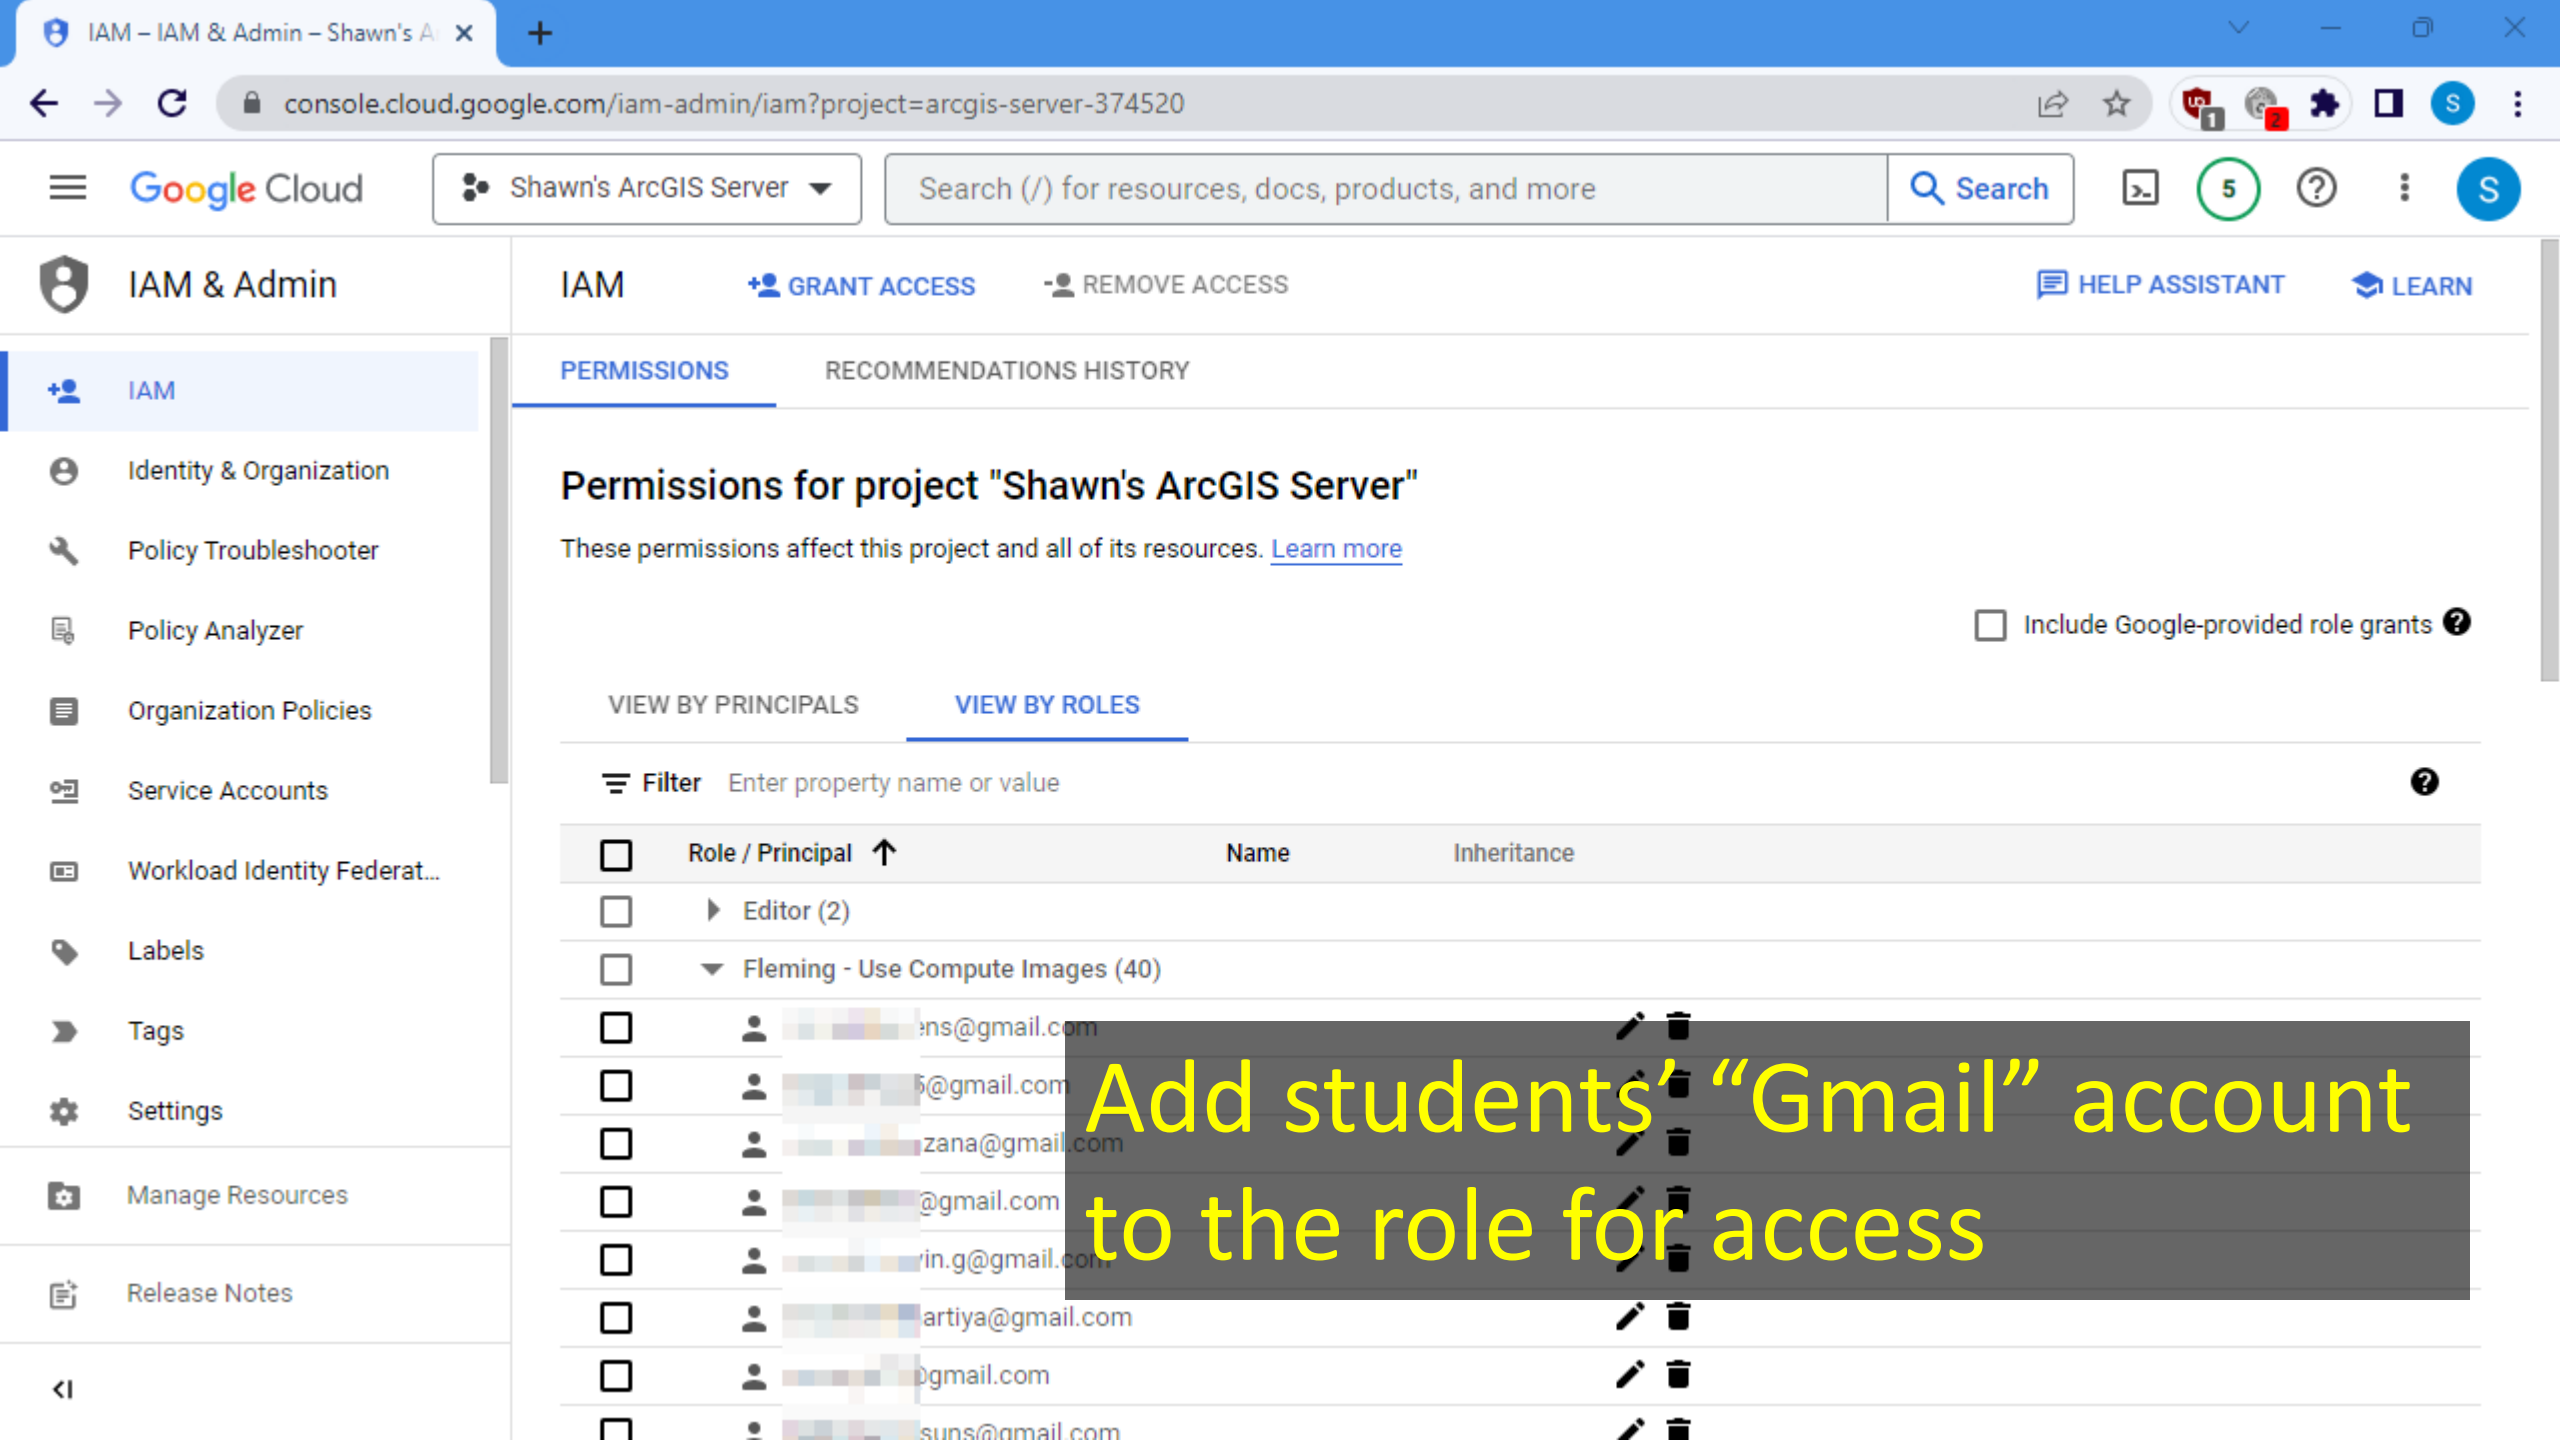

Allows access to compute engine images to deploy into their own account

10 assigned permissions

- compute.images.get
- compute.images.getFromFamily
- compute.images.list
- compute.images.useReadOnly
- resourcemanager.projects.get
- serviceusage.services.get
- serviceusage.services.list
- storage.buckets.get
- storage.objects.get
- storage.objects.list

i Some permissions might be associated with and checked by third parties. These permissions contain the third party's service and domain name in the permission prefix.

Create a Security Role to allow only Students to "see" configured Image

Permissions for project "Shawn's ArcGIS Server"

These permissions affect this project and all of its resources. [Learn more](#)

Geom99-ArcGIS Server on GCP
Creating an image and logging in on Google Cloud Platform

Contents

Getting GCP Credit and Creating your First Project.....	2
Create a GCP Project (if needed)	2
Run a GCP Virtual Machine to test ArcGIS Server.....	3
Part 1: Setting a GCP Firewall Rule to allow ArcGIS Server Management Ports.....	13
Part 2: Setting a Windows Firewall Rule to allow ArcGIS Server Management Ports	14
Starting an existing/shut down Virtual Machine on GCP	17
Remote Desktop to a Virtual Machine Desktop	18
Turning off the VM when not in use.....	23
Turn off using a Windows Desktop Console	23
Turning off using the GCP Compute Engine Console (recommended method)	25
Open ArcGIS Server REST Service directory with self-signed certificate	26

Students are provided with step-by-step instructions

Week 7 and 8: ArcGIS Server on Google Cloud Platform

Start your own ArcGIS Server on GCP

Start Start using your own ArcGIS Server hosted on the Google Cloud Platform (GCP). You first will request a \$50 academic credit from google using the instructions which should cover all your use here.

- Video 1: Requesting credits (should have been completed last week): <https://youtu.be/...>
- Video 2: Creating and using the provided image: <https://youtu.be/...>
- Video 3: Using DuckDNS to create free DNS entry pointing to temporary IP address: <https://youtu.be/...>
- Video 4: Optional step to obtain SSL certificate, see recommended section of checklist!

Key Details

VM Image Username and Password Defaults:

Windows Username: student

Windows Password: *reset using instructions provided*

ArcGIS Server Username: siteadmin

ArcGIS Server Password: [blurred]

It's running, now what?

Now that it is running "play" with your VM, testing out different items. Just remember, once your VM is shut down it will no longer respond to requests (since it isn't listening when off!). Continue with the checklist here, as they require this service to be running to complete.

Students are also provided an overview in a LMS checklist, walk-through videos and support during scheduled labs

This site is protected by reCAPTCHA and the Google Privacy Policy and Terms of Service apply.

Students use DuckDNS to have domain name for dynamically-assigned IP address

```

C:\Users\student\Downloads\win-acme\wacs.exe

A simple Windows ACMEv2 client (WACS)
Software version 2.1.23.1315 (release, pluggable, standalone, 64-bit)
Connecting to https://acme-v02.api.letsencrypt.org/...
Connection OK!
Scheduled task looks healthy
Please report issues at https://github.com/win-acme/win-acme

N: Create certificate (default settings)
M: Create certificate (full options)
R: Run renewals (0 currently due)
A: Manage renewals (1 total)
O: More options...
Q: Quit

Please choose from the menu: _
  
```

Students must use LetsEncrypt to get an SSL certificate

How to video: <https://youtu.be/V2o07DMyNkc>

What Now?

- Students have their own fully-functioning live ArcGIS Server to explore
- They can publish various types of data to the server
- Use these published services in ArcGIS Online, explore all functionality and options in the publishing and maintenance
- They also experience the versatility of cloud enterprise architecture

Publishing to ArcGIS Server Walkthrough:

<https://youtu.be/nIRIZN9ECwY>

Bogotá, Colombia

SOME OF MY GIS CLASS ONLINE RESOURCES

Rodolfo Franco
GIS Professor
District University
Bogotá, Colombia

MY GIS CLASS CONTEXT

Forest engineering career

10 semesters career (5 years)

GIS course is in the fourth semester

Preview: cartography and remote sensing

Many years ago this class was optional, now it's required

In Colombia there are good job opportunities in GIS

MY MAIN ONLINE RESOURCES TO SUPPORT MY CLASS ARE:

- A YOU TUBE CHANNEL
- A WEB PAGE
- A STUDENT'S GALLERY
- WEBMAPS AND INSTANT APPS
- OTHER ESRI SERVICES

A YOUTUBE CHANNEL

More than 432 videos about GIS since 2014

Rodolfo Franco

@rodolfo.franco 22.2K subscribers 583 videos

Canal Youtube del profesor Rodolfo Franco, Especialista en Sistemas de In...

22k subscribers from many countries

The topics are ArcGIS Pro, ARCGIS Desktop, Arcgis Online and others themes

Tutorial ARCGIS Volumen I - Rodolfo Franco

Tutorial ARCGIS Volumen II - Rodolfo Franco

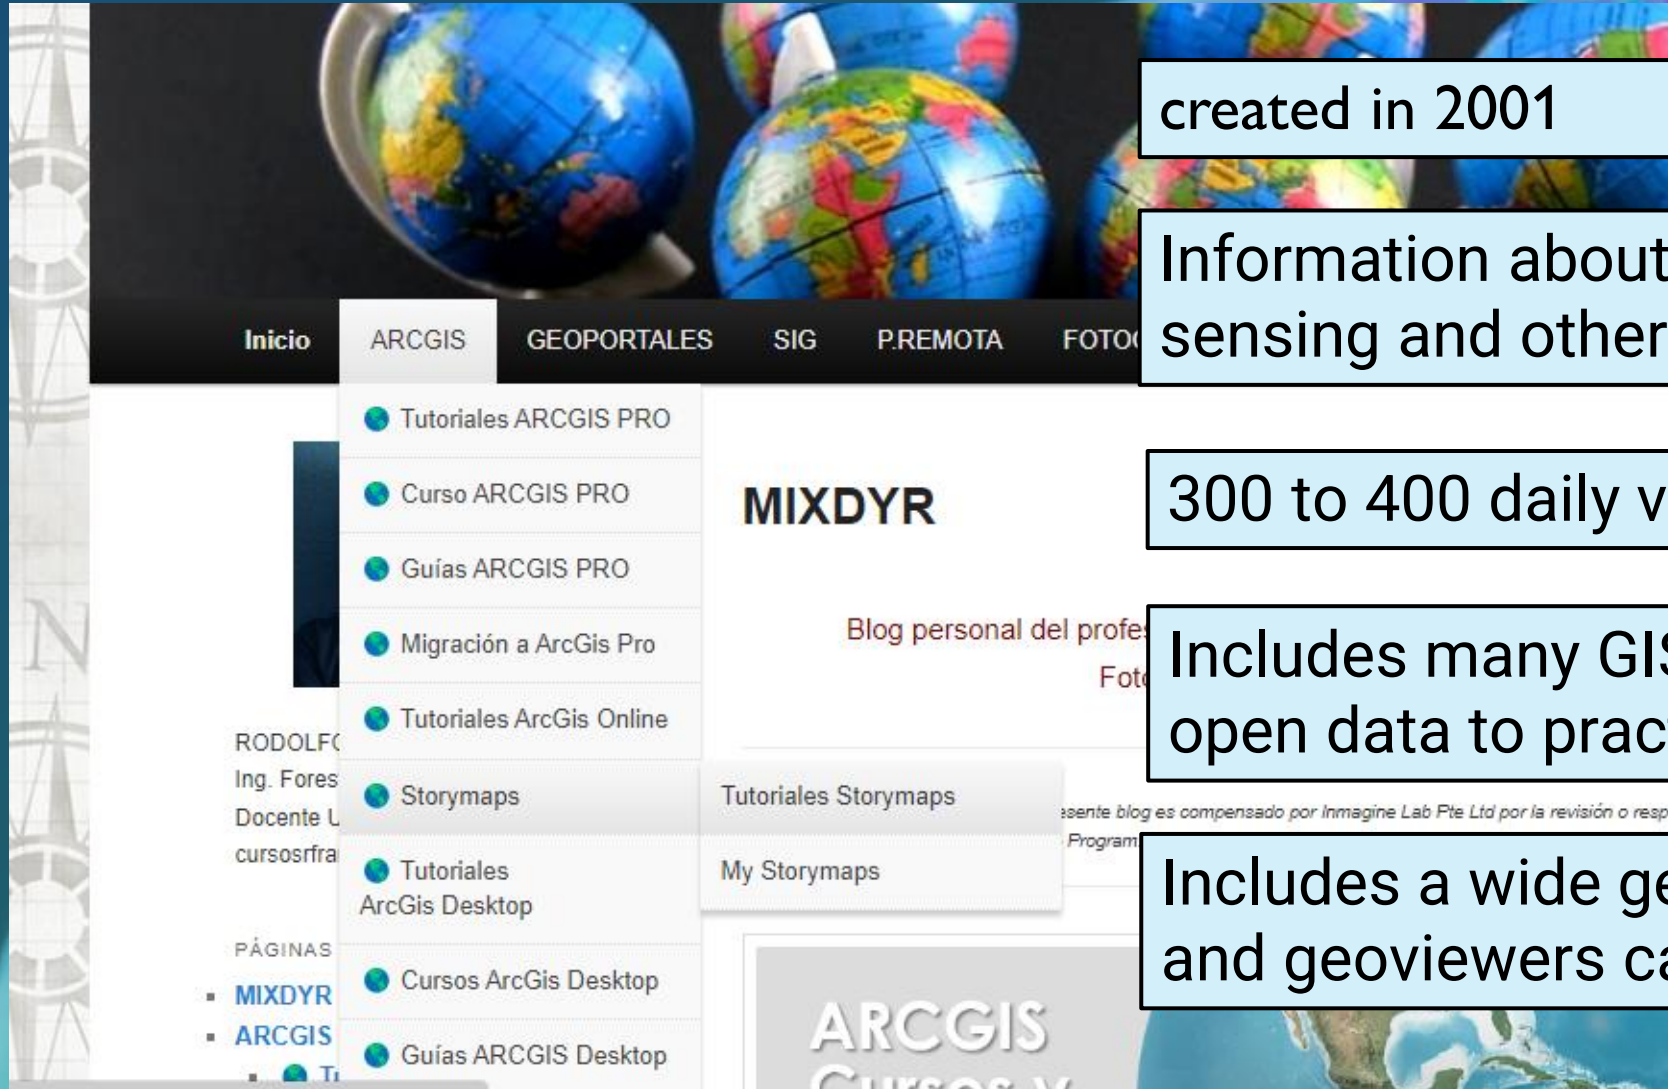

Tutorial ARCGIS Volumen III - Rodolfo Franco

Now also includes some shorts

Spanish language

A WEBPAGE

created in 2001

Information about GIS, Remote sensing and other topics

300 to 400 daily visits

Includes many GIS open data to practice

Includes a wide geoportal and geoviewers catalog

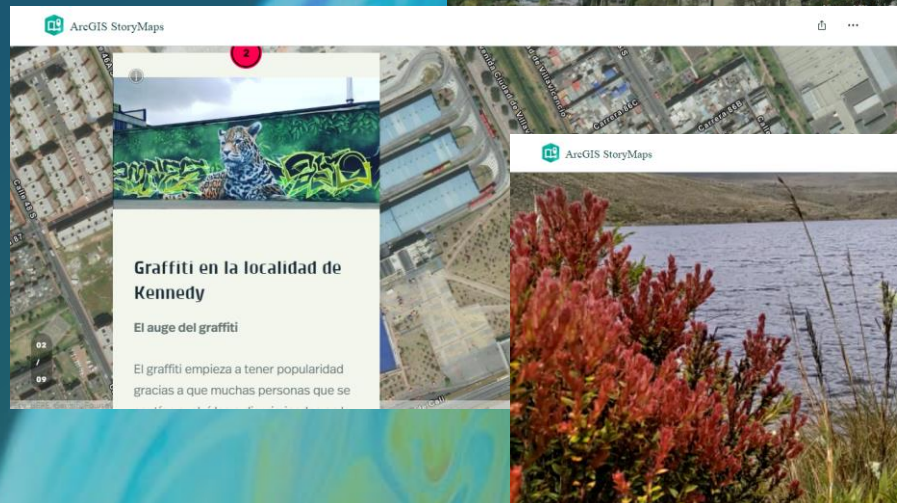

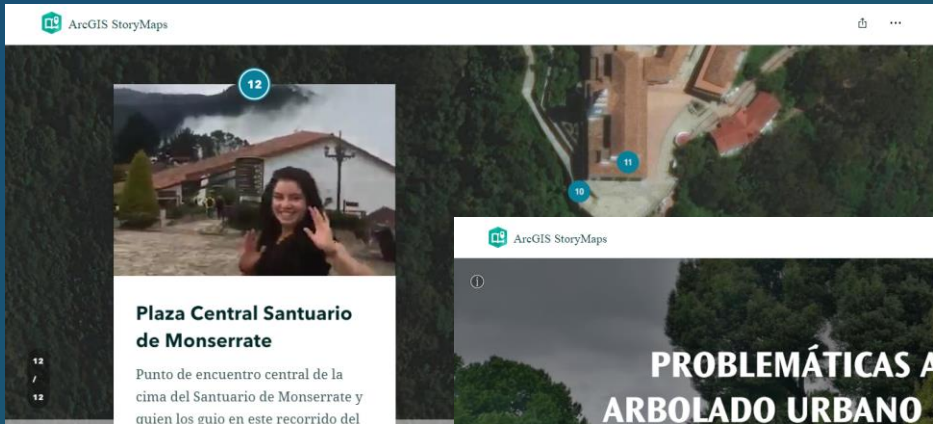

A STUDENT'S STORYMAPS GALLERY

It's a gallery is for selected works

The purpose is to motivate the use of storymaps

Students choose free topics as their hobbies and skills

it's also a media to share works in another courses

WEBMAPS AND INSTANT APPS

I show students how easy it is to create content online using instant apps

ESRI templates are easy, fast, and intuitive to use

Students take advantage of having an educational account
