

Esri Defense & Intelligence Fourth Quarter eBrief

Hi,

This past quarter, we were thrilled to be back at in-person events to support our customers and the great work you all are doing. Come join us at the [Esri Federal GIS 2022 Conference](#) is on February 8-9, 2022! We are looking forward to seeing all of you in person in Washington DC early next year!

In this edition of our newsletter, we would like to highlight the work by Janes, Quiet Professionals, and the defense mapping experts who provided hope for Afghans attempting to flee the country in the aftermath of the American withdrawal.

We love hearing about how you are embracing geospatial technology into your workflow. If you would like to share your story, please feel free to [submit it here](#), or if you have any questions regarding the technology featured in this edition of the e-brief, please feel free to respond to this email.

Stay safe,

Esri Defense and Intel Team

Community News

After the Evacuation of Afghanistan, Offering Hope to Those Left Behind

Prompted by requests from US servicemembers, defense mapping experts at two companies—Janes and Quiet Professionals—turned to geographic information system (GIS) technology to monitor the situation and help connect people to ways out. The experts' adroit handling of maps and location intelligence is providing a solid foundation for the work of other groups extracting people from Afghanistan.

Future Impacts of GeoAI on Mapping

An exciting recent addition to automation has been the introduction of artificial intelligence (AI), deep learning (DL), and geospatial artificial intelligence (GeoAI). These new technologies, when paired with human operators, are ushering in exciting capabilities that were previously considered possible only in science fiction.

Bookmarks in ArcGIS Earth

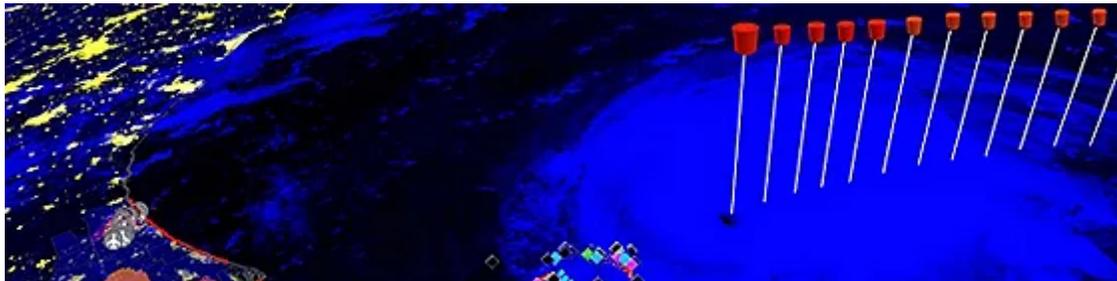

Bookmarks are another one of the great features that we have incorporated in ArcGIS Earth. With bookmarks, you can save your favorite spots around the planet while browsing the geography, then click on the thumbnail to fly back to that location.

Using ArcGIS Earth for Humanitarian Assistance and Disaster Response

ArcGIS Earth ingests data in different formats, allowing users to explore areas of interest in 3D. All this powerful functionality makes ArcGIS Earth an ideal tool for supporting humanitarian assistance and disaster response (HADR) missions.

Project Geospatial Interview

Introducing Dr. Tara Mott

During the US Geospatial Intelligence Foundation (USGIF) GEOINT 2021 Symposium, Project Geospatial interviewed Dr. Tara Mott from Esri on her thoughts about the symposium and the future of St. Louis's geospatial industry scene.

Resources

Discovering ArcGIS Earth

ArcGIS Earth handles protected services at all network levels for customers behind the firewall, and enables saving and sharing from disconnected environments. ArcGIS Earth also supports the security protocols you trust.

Migrating Geospatial Intelligence to ArcGIS Pro

Facing ever-increasing amounts of geospatial data, the intelligence community continues to build out its

modern geospatial infrastructure with a GIS cloud. ArcGIS Pro is cloud native, making it a natural tool for geospatial intelligence (GEOINT) professionals to deliver on current and future GEOINT needs.
