

Esri at DISTRIBUTECH 2020

Geoenabling the Modern Utility

Henry B. Gonzales Convention Center | San Antonio, Texas | January 28-30, 2020

3GIS

Wednesday January 29 – 1:00pm – 1:20pm in the Esri Demo Theater (Booth #2047)

Presentation Title

Accelerating Speed to Activation

Description

Getting your city ready for 5G services means you need to build a foundation of fiber that will support the complexity of cell sites, small cells, DAS and FTTP networks. Managing the complexity of the fiber plant is challenging when faster network design and construction is needed to deliver the infrastructure your customers need in the modern city. This session will discuss the approaches for using 3-GIS, an Esri-based network management software as a fundamental collaboration tool between planners, designers, and carriers to build networks faster to build and maintain an accurate data model and system of record so you can activate services faster.
