

Location intelligence in your business apps: Making intelligent enterprise tangible

Ruth Eberhart, Director Postal Industry, SAP

ESRI Postal and Parcel Location Intelligence Summit Oct. 10th 2018

Vision of Intelligent Postal Services - what, how, why

Leveraging IoT and Coordination and Optimization Technology to become responsive and resilient

Invest in postal automation

- **✓OCR** in Sorting
- ✓ Self-service kiosk
- ✓ Planning based on History

Less-labour intensive

Proactive, customer oriented

(Present)

Provide customer options

- Diversify offerings and customer service
- ✓ Real-time monitoring
- ✓ No-touch invoicing

Become the trusted orchestrator

- Provide predictive B2Me convenience
- Real-time profit and margin management
- Collaborative deliveries using digital twins and digital wallets

Predictive B2Me

(Future)

DATA: THE DIGITAL CURRENCY

Data is Everywhere

Enterprise | Cloud | Social Legacy Systems

4,300% Increase in Annual Data Production by 2020

New Demands

Real-time | Streaming
High Velocity
Artificial Intelligence
Machine Learning

40% Increase in Labor Productivity

New Data Sources

Internet of Things
Customer Behavior
Geo-Spatial
Video

200 Billion IoT Devices by 2020

Transform Data into Insight

Act in the Moment

Innovate without Constraints

The Challenge: Silos create an incomplete picture

Enterprise Applications

- Business data: Customer, Subcontractor, PoS, TMS, T&T, Financial
- Master data
- Analytical data

Unstructured

- Social networks
- Photos & Videos
- Bio-metrics

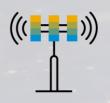

GIS Systems

- Geographical data and layers
- Networks
- Maps and topologies

Engineering Systems

- Diagrams
- 2D & 3D
- Animations

Sensors & Devices

- Streaming
- Telemetry
- Location, health and status

Earth Observations

- Land use
- Weather & climate data
- Surface condition data

The Solution: Combine and process all data for real-time insights

e.g. Transportation Management Optimization

Bridging the silos between GIS and Enterprise Systems

Geo Driven Insights are real and impactful

NANJING

CITY OF EMPERORS

Real-time and interactive digital map that runs 24/7 in the City Intelligence Operations Center in Nanjing

Chinese Electric Power Corporation

Monitoring the transportation
Ensure delivery on time
Manage volume increases with
same or smaller number of
planners – less manual

Real-time Situational Awareness

Service the Segment of One

Intelligent supply chain and delivery

Digital services and new business models in business networks

Customer Centricity

Smart postal products

Let's connect it to your business problems:

What do you want to have happened for your customers, employees, contractors, owner?

For it to be useful it needs to be like what?

Thank you.
