

Esri State & Local Brief

A brief collection of curated content for health and human services professionals

A Shining Moment for GIS: Responding to COVID-19 with Maps

More than six months into the COVID-19 pandemic, the virus continues to spread across the globe. Through it all, people—from government officials to residents—have turned to maps to make sense of uncertainty, focus and target response efforts, provide a platform for collaboration, and monitor and adapt to rapidly changing environmental conditions.
