

Virtual Federal Partner Solution Fair and Partner Meeting

November 5, 2020
9:30 a.m. – 4:00 p.m. (Eastern)

Real-Time/IoT

9:45 a.m. - 11:00 a.m.

9:45 -10:00 a.m.

[Spire Global](#)

Small Satellites, endless possibilities - Using global space collected data sets within ArcGIS to track the worlds shipping, aircraft and weather

During this presentation, we will cover how Spire Global brings global AIS, ADS-B, and RO-Enabled weather forecasting into the ArcGIS ecosystem.

10:00-10:15 a.m.

[Skyline Technology Solutions](#)

Bringing Video to ESRI's products and services

Video is of increasing importance to real-time situational awareness. From fixed security cameras, traffic cameras, body-worn cameras, drone-mounted cameras, video usage, and content is exploding. Being able to ingest all the various video formats and make it sharable with your partners is essential to improving situational awareness. In this talk, you will see how Skyline Technology Solutions is working to provide a standardized approach and format to including video in the ArcGIS and other ESRI applications environment.

10:15-10:30 a.m.

[Hawkeye 360](#)

Using RF GEOINT to uncover hidden activity

Hawkeye 360's RFGeo product can help ArcGIS users discover human activity that would otherwise go unnoticed. We will demonstrate how RF activity can bring attention to illegal border crossings, highlight potential dark ship activity, and help tip and cue other satellite collection capabilities to create a richer understanding of what is going on around the world.

10:30-10:45 a.m.

[Airspace Link, Inc.](#)

Enabling Safe, Scalable UAS-based Logistics and Public Safety Operations

Airspace Link, the only Esri FAA-approved LAANC solution, can offer the Air Space Asset and Infrastructure management system that can be applied to supporting operational planning, risk management, and coordinating operations using dynamic hazard inputs while leveraging existing DoD IGI&S data.

10:45-11:00 a.m.
