

GAS UTILITIES: ASSET MANAGEMENT

Modernizes How Utilities Manage Assets

Life-Cycle Management

- Connects disparate asset systems
- Unifies life cycle around location
- Defines network and environmental relationships
- Embraces real-time inputs

Performance Assessment

- Visualizes vulnerabilities
- Uncovers financial and operational relationships
- Evaluates asset performance and activities
- Predicts failures with AI/ML

Asset Transparency

- Simplifies data collection
- Speeds inspections and maintenance tasks
- Unifies field and office staff
- Bridges workflow steps with location

SYSTEM OF RECORD
