

# TELECOMMUNICATIONS: PLANNING & ENGINEERING

Modeling Complete Communication  
Networks

## Digital Twin & Connectivity

- Models the entire network
- Real world spatially accurate PNI
- Complete digital twin (OSP & ISP, 2D & 3D)
- Supports best practices and industry standards

SYSTEM OF RECORD

## Remote Engineering & Collaboration

- Presents network data to any device
- Simplifies data capture
- Offers common understanding to all
- Automates network design

SYSTEM OF ENGAGEMENT

## Location Intelligence & Strategic Planning

- Evaluates network forecasting and capacity
- Visualizes customer and network behavior
- Optimizes big data analysis
- Maximizes return on investments

SYSTEM OF INSIGHT

**DESIGN AND BUILD  
NETWORKS MORE EFFICIENTLY**
