ArcGIS AllSource 1.5 Issues Addressed

Each major, minor, and patch release of ArcGIS AllSource includes fixes for issues that were reported to Esri Technical Support. The issues that were fixed in ArcGIS AllSource 1.5 and ArcGIS Pro 3.6 are listed in the table below.

Issues addressed at ArcGIS AllSource 1.5

ArcGIS AllSource 1.5 fixes the ArcGIS AllSource/ArcGIS Pro issues listed below. Click each Issue link to learn more.

Issue	Description
BUG-000088082	The WFS To Feature Class tool fails and returns the error "000366: Invalid Geometry" on a specific Web Feature Service (WFS) service.
BUG-000097156	Query layers with invalid geometry fail to return an error in ArcGIS Pro.
BUG-000097819	In ArcGIS Pro, the properties of 3D labels set in the Label Class pane are not respected in scenes.
BUG-000098586	Modifying the label properties of a feature layer in a scene view of ArcGIS Pro results in the features within that layer being redrawn.
BUG-000101653	The spread labels property is not honored in the published vector tile layer.
BUG-000103432	When attempting to publish a service from a registered data store that is connected via the geodatabase's historical version, the server fails to recognize the data as coming from a registered data store.
BUG-000104774	If a project is created from a user-created template, the setting 'Create new folder for this project' is not honored and a new folder is created.
BUG-000105752	Changing the project default geodatabase in ArcGIS Pro does not update the current and scratch Workspace environments.
BUG-000106085	If vertical extents are included in the metadata, the minimum and maximum values must differ, even when all vertices share the same elevation.
BUG-000106275	The visibility scale range is not maintained when a 2D map is converted to a 3D scene in ArcGIS Pro.
BUG-000107850	Renaming a table in the Catalog pane breaks the connection to the table added to the Contents pane and causes the error, "The table fields were not found."
BUG-000108043	The KML To Layer tool returns the error "Error 000401: No features were found for processing" when using a KML file that is not in a standard format.
BUG-000109206	Cartographic offsets applied to space-time cube features in ArcGIS Pro do not display correctly.
BUG-000110225	L10N-UI-FR: The dropdown boxes are not aligned, and some redundant colons display in front of them for the In Beyond and Out Beyond options in the Visibility Range group on the Appearance tab on the ribbon.
BUG-000111015	WFS Service either returns no features or a feature with an improper geometry when added to ArcGIS Pro.
BUG-000111568	The metadata warning does not expand the section that must be modified.

BUG-000113217	The Keyhole Markup Language (KML) layer created by adding a KML file in ArcGIS Pro shows a missing data source.
BUG-000115388	A field with float data type displays different values in the attribute table and in the Attributes pane in ArcGIS Pro.
BUG-000115576	ArcGIS Pro does not require signatures on loaded assemblies (.dll) and executable (.exe) files.
BUG-000115781	In the Layout view of ArcGIS Pro, the dimension unit of the map element is not automatically converted to the Layout default unit from the Format Element pane.
BUG-000116532	Unable to export data using ArcGIS Pro 2.2.1 from a map service published on the portal.
BUG-000116642	The Slope tool generates an anomaly when run with the geodesic method along the 90th West Meridian.
BUG-000117146	Query results are returned for a child sublayer in a group layer for a map service in ArcGIS Pro even when the parent sublayer is unchecked in the Table of Contents.
BUG-000117976	The reverse sorting does not follow the sorting order for upper-case attribute.
BUG-000118029	Changes are not retained in the ArcGIS Pro project after removing default 2D and 3D system styles from the Format Symbol mode of the Symbology pane.
BUG-000118588	The GPX to Features toolset does not return a warning if the output is set to a feature dataset with a coordinate system other than WGS84.
BUG-000120224	When publishing a hosted tile layer to ArcGIS Online from a point feature class symbolized with the heat map symbology and the Constant method in ArcGIS Pro, points located on or near the tile seams are cut off.
BUG-000120224	When publishing a hosted tile layer to ArcGIS Online from a point feature class symbolized with the heat map symbology and the Constant method in ArcGIS Pro, points located on or near the tile seams are cut off.
BUG-000120981	In ArcGIS Pro, applying an offset to symbology offsets the symbol icon in the legend without accommodating other legend items.
BUG-000121429	Creating a query layer with the 'view_extent' parameter returns a blank attribute table in ArcGIS Pro.
BUG-000121873	The functionality to fully expand or collapse a folder or geodatabase with the left and right arrows from ArcCatalog is disabled in the ArcGIS Pro Catalog pane.
BUG-000121930	The Python toolbox metadata in ArcGIS Pro 2.3.2 is slow to update in the catalog view, and changes are not immediately reflected.
BUG-000121991	Changing the position or rotation of a label class in a 3D Scene in ArcGIS Pro causes the text in preview to appear very small and unusable.
BUG-000122406	ArcGIS Pro crashes without warning when the .aprx file is saved to a directory with no available disk space.
BUG-000123758	Removing the basemap from a map when publishing only a table removes the item details causing the users to fill the item details again.
BUG-000124663	A vector tile package pop-up issue with the hollow symbology.
BUG-000124743	In ArcGIS Pro, if a feature class contains no data but has a schema with several fields, the catalog view does not display a horizontal scroll bar.
BUG-000125795	Unable to reset the data source for an ArcGIS Online hosted service in an existing ArcGIS Pro project when using two different organizations.

BUG-000126588	Editing multipatch data with a vertical exaggeration in ArcGIS Pro causes the feature to 'float' after committing the edits.
BUG-000126776	The KML To Layer tool does not honor the attributes for each record.
BUG-000126901	ArcGIS Pro does not display an error in the Analyzer window when publishing a feature class to ArcGIS Enterprise from an enterprise geodatabase whose user only has the Connect permission on the database and only the Select privilege on the feature class.
BUG-000127262	Using face culling on edited multipatch features returns the opposite effect.
BUG-000127695	Update ArcGIS Pro SQL Reference documentation for CURRENT_TIME function
BUG-000128385	Long and narrow 3D polygon features are interpolated incorrectly along North-South axis.
BUG-000128805	A query layer with a parameter defined referencing a SDO_Geometry feature class validates successfully but is not added to the map upon creation.
BUG-000129367	Labels are not displayed after zooming in to 1:10 or 1:5 when the data frame is rotated. The reference scale for the data frame is set to 1:500.
BUG-000129585	The 'All other values' class feature count present within the unique value symbology shows an incorrect value when null values are present.
BUG-000131030	The Euclidean tools in the Spatial Analyst Distance toolbox do not set the environment workspace to the current working directory as other tools do.
BUG-000131545	REST directory connections from ArcGIS Pro to ArcGIS Data Appliance do not function as intended.
BUG-000132553	The documentation for Create Vector Tile Package identifies the max_cached_scale, and min_cached_scale parameters as "Optional" but are required in the general user interface in ArcGIs Pro 2.5.2.
BUG-000132997	The selection of point features in a local scene demonstrates inconsistent behavior.
BUG-000133125	When opening Microsoft Excel, the data type changes for some fields in the .txt or .csv file generated using the 'Export Feature Attribute To ASCII' tool in ArcGIS Pro.
BUG-000133125	When opening Microsoft Excel, the data type changes for some fields in the .txt or .csv file generated using the 'Export Feature Attribute To ASCII' tool in ArcGIS Pro.
BUG-000134212	In ArcGIS Pro, the output file format for the Export Feature Attribute To ASCII tool is restricted to the TXT file.
BUG-000134212	In ArcGIS Pro, the output file format for the Export Feature Attribute To ASCII tool is restricted to the TXT file.
BUG-000134231	The WFS To Feature Class tool in ArcGIS Pro successfully executes but fails to generate a feature class when the output location is set to a feature dataset.
BUG-000134315	Styles added to Favorites are not added to new projects correctly.
BUG-000134486	The transformation from system NTF (Paris) Lambert Zone II (WKID: 27572) to Geographic Coordinate System is applied incorrectly in ArcGIS Pro.
BUG-000134570	In ArcGIS Pro, when running the Kernel Density tool with a processing extent, the output raster with the bilinear resampling type has a fuzzy appearance.
BUG-000135804	In ArcGIS Pro, the Select Layer by Attribute tool does not respect the comma delimiter when using German regional settings.

BUG-000137087	Unable to add ArcGIS Online items that reference ArcGIS Server secure services to ArcGIS Pro if the ArcGIS Pro license is provided by a different ArcGIS Online organization.
BUG-000137645	When importing the Federal Geographic Data Committee (FGDC) metadata into a feature class, the field order does not match the field order displayed in the attribute table.
BUG-000137645	When importing the Federal Geographic Data Committee (FGDC) metadata into a feature class, the field order does not match the field order displayed in the attribute table.
BUG-000138072	Exporting a layout to PNG causes display discrepancies in the output file.
BUG-000138170	ArcGIS Pro downgrades the symbology with the CMYK color model when publishing vector tiles without warning.
BUG-000138431	Web Feature Service (WFS) service properties are incorrect when published with ArcGIS Pro.
BUG-000139654	A spatial index (.sbx and .sbn files) is not created when there is a %Name% in the output name of the batch geoprocessing tools in ArcGIS Pro.
BUG-000140044	ArcGIS Pro renders the wrong class when drawing quantities using graduated colors in a specific dataset.
BUG-000140094	Unable to remove the symbology heading in the Contents pane.
BUG-000140400	The Make Raster Layer geoprocessing tool does not support NITF files.
BUG-000140759	In ArcGIS Pro, renaming the normalization field is unavailable when using the Charts Primary symbology.
BUG-000140843	In ArcGIS Pro, the Upload Service Definition geoprocessing tool does not return the derived outputs of Hosted Map Service Item ID or Hosted Feature Service Item ID when uploading to the ArcGIS Enterprise portal.
BUG-000141164	The definition query in ArcGIS Pro version 2.8x does not display all values in the selected field when the data type is Text or Double.
BUG-000142095	The error message "Error 030024: insufficient number of validating points" is returned if the license for StreetMap Premium (SMP) data does not include the routing option.
BUG-000142121	Sharing a vector tile layer from large datasets with ArcGIS Pro fails.
BUG-000142928	The Lookup Spatial Analyst tool is reproducible in ArcGIS Pro 3.6, and this behavior is expected, similar to other tools. It does not present a correct layer name when an output raster is added to the map.
BUG-000142939	Arcpy.AddDataStoreItem fails to register different versions of the same database in ArcGIS Pro.
BUG-000143315	Printing layouts over 36 inches wide to the Canon iPF825 does not yield a correctly sized layout.
BUG-000144109	It is difficult to differentiate between the selected layer and edit or rename the active text in the Contents pane in both Light and Dark themes.
BUG-000144153	Hosted feature layer fields with apostrophe characters (') in the domain codes or code descriptions are sorted incorrectly in ArcGIS Pro.
BUG-000144206	When exporting a layout to PDF and the map containing KMZ data, layers that are turned off are displayed in the output.

BUG-000144244	Not all pop-up configurations are maintained when sharing a web map to ArcGIS Online. ArcGIS Online displays the default edit usernames, but not the one configured in ArcGIS Pro.
BUG-000144402	The Vertical Coordinate System NAVD88 (height) (ftUS) switches the linear unit from feet to meters after running the Raster To TIN geoprocessing tool.
BUG-000144629	The Geographically Weighted Regression (GWR) tool in ArcGIS Pro generates negative local R-Squared values.
BUG-000144834	ArcGIS Pro fails to handle a Web Map Service (WMS) portal item coming in from versions other than 1.3.0.
BUG-000144835	3D line Keyhole Markup Language (KML) data is displayed incorrectly in ArcGIS Pro when compared to ArcMap.
BUG-000145040	Service area high-precision polygons with split boundaries are no different from standard-precision polygons.
BUG-000145444	ArcGIS Pro and/or the standalone Python script (ArcPy) crash and corrupt the file geodatabase when reading a DGN file with unhandled features.
BUG-000145784	When adding a hosted feature service from ArcGIS Online in ArcGIS Pro, which is added in the group created by another organization, the following error message is returned when the license is provided by a different member of the organization: “Failed to
BUG-000146011	Unable to select polygon features enclosed inside other polygons using the Selection tool when stereo mapping.
BUG-000146742	The inline substitution workspace environment in ModelBuilder fails to detect the matching type when using Field Map to reconcile field differences.
BUG-000146840	There is some confusing label information about the Web Map Tile Service (WMTS) service layer in Properties > Source tab > Service Capabilities > Cache Scales At.
BUG-000147092	The unit settings for proportional symbols are not retained by a feature layer.
BUG-000147541	Creating a donut polygon in stereo mapping using the Split tool adds slivers between shared polygon boundaries.
BUG-000148321	The line symbol having an offset is not visible in the table of the Contents pane.
BUG-000148596	Improve the geocoding performance or accuracy for Mexican addresses.
BUG-000148783	When sorting a domain field within the attribute table on an Oracle feature class with a join, the error message "Failed to load data." is returned.
BUG-000148798	The Geographically Weighted Regression (GWR) tool returns incorrect results.
BUG-000149973	Attempting to overwrite web tools to a non-hosting ArcGIS Server returns the "Overwriting is not supported to your portal" error in ArcGIS Pro.
BUG-000150314	Applying textures to multipatch or 3D objects does not honor the 'no color' color fill.
BUG-000150774	The arcpy.da.FeatureClassToNumPyArray() function in ArcGIS Pro 3.0 truncates the field values of attributes in the text field and geometry field.
BUG-000151139	The Extract Data (Server) tool fails when 'Layers to Clip' has an annotation feature class.
BUG-000151462	Interactive object detection in ArcGIS Pro 3.0 produces incorrect results when monitor display scaling is set to more than 100%.
BUG-000151720	In an ArcGIS Pro 3D global scene, using the Military Symbology Editor's APP-6(D) symbology with the model property set to ORDERED ANCHOR POINTS,

	there is a visible deformation of features observed when moving away from the equator and approaching the pole
BUG-000151920	Joins return no matches when joining via GlobalID between a feature class in an Oracle Enterprise geodatabase and an ArcGIS Online feature service.
BUG-000152067	The Divide tool does not display the correct number of decimal places when a COGO-enabled line and the unit of foot are used.
BUG-000152149	The Watershed (Ready To Use) tool in ArcGIS Pro fails to run when the Snap Distance parameter is filled with a value.
BUG-000152660	In ArcGIS Pro, clearing the local cache automatically changes the Select cursor to the Zoom To cursor.
BUG-000152755	ArcGIS Pro returns files and directories to the ESRI3DO directory that do not match a search expression.
BUG-000152954	Unable to make changes to the rotation settings of the heading text and the data text within a table frame in ArcGIS Pro.
BUG-000153152	The default symbology for outputs of the Kernel Density tool changes when adding multiple layers to a map.
BUG-000153206	After reversing values in ArcGIS Pro for a graduated symbology, the label text is copied to a different label when editing the label in the Contents pane.
BUG-000153349	Running the Kernel Density tool from the arcpy.sa toolset outside of an ArcGIS Pro session incorrectly saves the file name of the output raster.
BUG-000153495	The ArcGIS Pro map displays a shift on changing the cache type in the layer properties.
BUG-000153649	In ArcGIS Pro 3.0, MapTips continue to display the field information for all feature layers, even though the group layer option is disabled.
BUG-000154094	The Check Geometry tool works on a feature class with errors from an OGC GeoPackage but fails when the same feature class is used as a layer.
BUG-000154347	The Append tool returns the error: "ERROR 999999: Something unexpected caused the tool to fail. Contact Esri Technical Support (http://esriurl.com/support) to Report a Bug, and refer to the error help for potential solutions or workarounds." if the target
BUG-000154668	In ArcGIS Pro, map service metadata cannot be displayed from the Contents pane.
BUG-000154863	Using Sentinel-1 synthetic aperture radar (SAR) GeoTIFF files with RasterToNumPyArray returns false values.
BUG-000154878	When running the Graphics To Features tool in ArcGIS Pro, the tool does not honor the graphic's rotation.
BUG-000155273	In ArcGIS Pro 3.0 and later (ArcGIS Pro 3.0.3), certain Python packages fail to update to the latest listed version specified within a cloned environment.
BUG-000155784	Attribute rules with the NextSequenceValue function to auto-increment field value do not work in a referenced feature service when a feature is split while editing.
BUG-000155817	The Buffer tool generates an incorrect output for line features that self-intersect when creating a buffer on one side and using the Flat parameter in ArcGIS Pro.
BUG-000155907	When the color scheme of a symbology in a scene is applied to a TIF file, the colors do not display correctly.

BUG-000155958	The Distance and Direction tool does not calculate accurate measurements when creating a sector feature on a geographic coordinate system.
BUG-000156459	In ArcGIS Pro, when using the Add Rasters To Mosaic Dataset tool, checking the Calculate Statistics check box automatically checks the Estimate Mosaic Dataset Statistics check box too. However, this functionality creates wrong statistics as only the stati
BUG-000156661	Labels get rotated when the map is rotated while working with a referenced map service layer (MapServer) in ArcGIS Pro.
BUG-000157193	Metadata edits are not saved entirely in Tasks in ArcGIS Pro 3.1.
BUG-000157242	Web map shared to ArcGIS Online from ArcGIS Pro 3.1 with related records cannot be edited directly in ArcGIS Field Maps.
BUG-000157622	The project package does not include and shows broken links for CSV and text files in the ArcGIS Pro Japanese language pack.
BUG-000157622	The project package does not include and shows broken links for CSV and text files in the ArcGIS Pro Japanese language pack.
BUG-000157917	Updating Arcade Expression to the unique value symbology of a feature layer doesn't modify the symbols and turns several symbols inaccessible.
BUG-000157929	The toolboxes in an ArcGIS Pro template become corrupted if the project is saved to a network drive when a new project is created from the template.
BUG-000157934	A Web Feature Service (WFS) layer in polylines is added as a standalone table in ArcGIS Pro 3.1.1 but is displayed as a polyline layer in an ArcGIS Enterprise 11.0 web map.
BUG-000157966	ArcGIS Pro does not import a Web Map Service (WMS) service layer's transparent background.
BUG-000158060	The Features To GPX tool leaves the elevation tag in the created .gpx file empty as a non-numeric type if the elevation field is not specified and the input feature does not contain z-values.
BUG-000158109	Unable to permanently delete a raster dataset, and it is always on display. A geodatabase repair tool is required.
BUG-000158287	When setting a custom expression for symbology in ArcGIS Pro, 'console($view.scale)' returns a value of '1' regardless of the map's scale.
BUG-000158428	Unable to read SOCET SET (.sup) files with regional settings set to Spanish (Spain).
BUG-000158926	Joining database views to a shapefile results in joined fields in the Symbology pane for the Fields drop-down list containing appended _## and fails to symbolize with the warning message, "Primary symbology relies on one or more fields that are invalid.".
BUG-000159223	Subtype group layers are removed and not rendering properly in Electric Utility Network Foundation 2.2 in ArcGIS Pro 3.1.
BUG-000159246	A script tool with only a FeatureSet and a .lyrx file as default cannot be labeled starting with a number. When the label starts with a number, the Feature Set tool cannot be used to create, for example, a selection area.
BUG-000159513	There are issues with the ArcGIS Pro Identify tool while working with specific shapefiles in a local scene.
BUG-000159516	Unable to add a decimal point for the Horizontal Start Angle orientation in the Sector tab of the Distance and Direction pane.

BUG-000159647	The Kernel Density tool output does not honor the default rendering settings in ArcGIS Pro.
BUG-000159825	The ModelBuilder inline variable substitution is not honored for parameters.
BUG-000159924	When the 'No elevation source' option is enabled in the 'Map and Scene' page of the ArcGIS Pro settings, the default elevation surface data remains in a global scene converted from a 2D map.
BUG-000160252	In ArcGIS Pro 3.1, file geodatabase connections on network drives do not get copied but are referenced when saving the project as a project template.
BUG-000160256	Adding a netCDF raster into a mosaic dataset returns the error message, “Error: 8004818c: No new mosaic dataset item was added.”
BUG-000160323	The error message "Error 160228: The user does not have permission to execute the operation" is returned when running the Add Join tool on a branch version feature layer and file geodatabase feature class.
BUG-000160343	Unable to save the last folder path when importing metadata in ArcGIS Pro.
BUG-000160455	LAS files added to a catalog dataset are not visible when zoomed in below 15 m.
BUG-000161119	ArcGIS Pro returns the "Staging failed" error message and prevents publishing when attempting to share a layer with related layers or tables not present in the map, even though the publishing analyzer message returns a warning message.
BUG-000161238	The 'KMLToLayer example 2 (stand-alone script)' documentation section contains a script showing an equivalency bug with the KML To Layer geoprocessing tool.
BUG-000161369	Published vector tiles with display filters are not displayed correctly.
BUG-000161476	In ArcGIS Pro, when clicking Change data source (red exclamation point) to repair data sources in a map that includes feature classes with the same name stored in different mobile geodatabases, the data source of all the feature classes with the same name
BUG-000161675	In ArcGIS Pro, the Distance and Direction tools ignore language settings, especially for the result feature labels.
BUG-000161736	Attempting to view the metadata twice consecutively through the Contents and the Catalog pane results in failure, and the metadata is invisible.
BUG-000161810	Unable to add the Web Feature Server (WFS) layer to the map after creating a Web Feature Server (WFS) server connection.
BUG-000161838	For ICEYE, SICD, and NITF data, there is no value input for the NoData value.
BUG-000161925	The Truncate Table tool fails if the input features are in a memory workspace.
BUG-000162029	The table element on the layout disappears after running the Add Join tool for a feature class table and a standalone table.
BUG-000162140	Fail to enter a decimal point via typing in both the Observer Points and Target Points parameters on the Visibility Analysis tools in ArcGIS Pro.
BUG-000162155	Documentation for the Slope geoprocessing tool does not contain limitations for cells with different metric cell sizes in the x and y directions due to a geographic projection.
BUG-000162231	In ArcGIS Pro, polygons with a split output geometry type overlap in a service area.
BUG-000162342	The Share As Route Layer tool fails, returning the 030206 error.

BUG-000162452	Different metric display units for the map (location units) are not formatted in the same way by default. Meters use E/W and S/N, while kilometers use +/-.
BUG-000162672	In ArcGIS Pro, the symbology of the vector tile package is distorted if an offset is applied to the feature symbols.
BUG-000162755	Labels cannot be modified for more than one feature layer in a map inserted into a project from a portal connection.
BUG-000162790	The Coordinate Table To Point tool produces unexpected results in the Lon_D, Lat_D, DDLat, and DDLon fields.
BUG-000163467	When deleting a favorite database connection from a project, the database connection is also removed from the Favorites tab.
BUG-000163514	In ArcGIS Pro, the Military Grid Reference System (MGRS) grid labels do not display when the offset value on the Components tab under Appearance is negative, and the 'Clip to UTM zone boundary' check box is checked on the Options tab in the Map Grid prope
BUG-000163554	Filtering a ModelBuilder tool parameter with the Calendar date picker results in the "ERROR 160195: An invalid SQL statement was used." error message and causes the model to fail within ArcGIS Pro.
BUG-000163576	In ArcGIS Pro with a VRT raster, the pyramid resampling method is always displayed as the nearest neighbor.
BUG-000163579	Deleting a feature class from a file geodatabase takes longer when a project with feature services is opened for the first time.
BUG-000163598	Documentation regarding the migration from ArcGIS Pro 2.x to ArcGIS Pro 3.x does not mention that starting from ArcGIS Pro 3.x versions, it is not supported for the Publisher or Administrator connection when ArcGIS Server communication is set to HTTP Only
BUG-000163631	The Generate Points Along Lines tool does not generate output if run in a subprocess.
BUG-000163906	Unable to zoom closer than 1:1 in image space for imagery when the project is saved and ArcGIS Pro is closed and restarted.
BUG-000163998	Unable to share route layers with 2,000 or more stops to the ArcGIS Enterprise portal 11.0 from ArcGIS Pro 3.2.0, the "Error 030206" message is returned.
BUG-000164268	When creating a workspace and creating a mosaic dataset that is used as a source for the stereo model (or stereo visualization) with SOCET SET and using the regional configuration Spanish - Spain, the mosaic is not created and returns several errors.
BUG-000164439	When a small portion of a polygon's inner part is clipped, the z-values of the outer vertices change.
BUG-000164564	The custom SpatioTemporal Asset Catalog (STAC) connection returns the error message "Failed to add data - <STAC item ID> : Unknown error" when attempting to add data.
BUG-000164670	There is an incorrect label displayed when editing metadata with the ISO 19115-3 standard.
BUG-000164771	In ArcGIS Pro 3.2.1, the values for clustered point counts in the legend are not displayed for classes in the Contents pane.
BUG-000165053	Copying and pasting a picture element from one ArcGIS Pro project to another displays a blank element template, and the image is not displayed.

BUG-000165129	Specific combination of annotation layers published as a branch versioned feature service crashes in ArcGIS Pro when added to a map.
BUG-000165370	Inconsistent results when using CONNECT BY LEVEL in ST_Geometry queries.
BUG-000165938	ArcGIS Pro crashes when running the Features From CityEngine Rules tool in ArcGIS Pro with a multipatch and rule package (.rpk) exported from ArcGIS CityEngine as the input.
BUG-000165972	3D polygons with curves (various z-values) are displayed incorrectly in scenes.
BUG-000166072	The map and table are corrupted when saved as a new project post using the Reclassify tool in ArcGIS Pro.
BUG-000166278	The Delete Identical geoprocessing tool fails and returns the error message "Error 000224: Cannot insert features" when run in an enterprise geodatabase.
BUG-000166466	In ArcGIS Pro 3.1.x and 3.2.x, when a selection is defined for a hosted feature layer (from ArcGIS Online) with a defined time zone, the attribute table returns data for times before the query begins. The network traffic query respects the time zone until
BUG-000166739	The Export Frame tool from Full Motion Video generated an image with poor rendering quality.
BUG-000167002	The internal URL (AdminURL) for ArcGIS Server is exposed in the Web Feature Service (WFS) GetCapabilities file when publishing the WFS as referenced.
BUG-000167076	Selecting a bar in a bar chart where Variable is a date field and Aggregation is set to 'None' selects an incorrect record in the attribute table.
BUG-000167134	The MapView.Print() method returns the "System.NullReferenceException: 'Object reference not set to an instance of an object.'" and "System.Exception: 'Print service failure: Object reference not set to an instance of an object.'" exceptions when called n
BUG-000167198	The Civil 3D proxy contours do not display correctly in ArcGIS Pro.
BUG-000167259	Edits made to the field headers within the Field Mapping parameter for geoprocessing utilized in an ArcGIS Pro model are not maintained when saving, closing, and reopening the projects.
BUG-000167349	Exporting raster to PDF takes almost three times longer than exporting normal raster and six times longer than exporting vector to PDF when a raster layer is in the map.
BUG-000167466	The Locks list in the Geodatabase Administration dialog box takes a long time to load or remove locks in ArcGIS Pro 3.0.x.
BUG-000167554	An incorrect warning message is displayed when publishing a layer with a preset template from ArcGIS Pro to ArcGIS Online.
BUG-000167569	ArcGIS Pro does not show the contents of the database connection if indexing is enabled for the enterprise geodatabases.
BUG-000167793	ArcGIS Pro crashes when the Scale Range option is enabled without selecting a feature class or table.
BUG-000167923	The Generate Grid From Point or Generate Grid From Area tools return incorrect alphanumeric labeling.
BUG-000167988	In ArcGIS Pro 3.3, running the Export Features tool in ModelBuilder changes the name of the output feature class.
BUG-000168171	The CIMPATH of a dynamic text does not update when the map file (.mapx) linked to the portal item is updated in the Catalog pane.

BUG-000168289	In ArcGIS Pro, the Delete option is available in an offline mode on a feature service with the Delete mode being disabled.
BUG-000168381	In ArcGIS Pro, an indexing task can be created even if it is turned off within Pro.settingsConfig during deployment, when indexing options are accessed.
BUG-000168426	In ArcGIS Pro 3.3 or 3.4, when a feature in a (temporary) layer made up of selected features (created by first making a selection of features on a feature layer using Select By Attributes, right-clicking the layer, and then clicking Selection and Make Lay
BUG-000168527	An OGC API Server connection with an API key in a custom parameter does not include the custom parameter in subsequent request headers when adding a layer to the map.
BUG-000168758	After setting a custom thumbnail for a script in ArcGIS Pro, when clicking View Metadata in the future, the custom thumbnail photo does not show until the script item is clicked.
BUG-000168999	In ArcGIS Pro, the map layout legend does not honor the elevation dynamic range.
BUG-000169103	The output of the Buffer tool is wrong and inconsistent when the value for Distance [value or field] is negative and Side Type is set to OUTSIDE_ONLY.
BUG-000169220	In ArcGIS Pro 3.3.1 and ArcGIS Pro 3.2.2 report templates, referencing field names with numbers, such as Facility2 or Facility2_, does not display the field values in the output.
BUG-000169412	Updating true curves in an offline map in ArcGIS Pro does not produce an error when 'Allow update of true curves' is disabled on the hosted feature layer.
BUG-000169420	The ArcGIS Pro ModelBuilder input variables are unsourced when running after an upgrade when the input variable references a file path.
BUG-000169488	ArcGIS Pro crashes while registering the feature dataset as traditionally versioned when geodatabase system table versions have a large number of records.
BUG-000169613	Interactive selection does not work when no color symbology is applied to a circular symbol in ArcGIS Pro.
BUG-000169652	Exporting the layout to PDF runs endlessly when the data is symbolized with the Gradient Border, No Fill, ready-made symbol.
BUG-000169823	When using bivariate colors symbology with a quantile classification method, breakpoint values fall outside the range of the map symbology.
BUG-000169934	AutoCAD block attribute tag visibility states are not honored when displayed in ArcGIS Pro.
BUG-000169961	When adding a new folder in ArcGIS Pro through Add Folder Connection, the incorrect date under Date Modified displays initially.
BUG-000170222	Modifying the vertices of a polyline in a utility network layer in a local or global scene in ArcGIS Pro does not work.
BUG-000170592	The ArcGIS Pro's Dynamic Range Adjustment (DRA) function is highlighted as enabled for raster symbology not supporting DRA.
BUG-000170644	Setting the color model to CMYK in both map view and layout view results in color discrepancy when using raster data in ArcGIS Pro.
BUG-000170658	The Symbology Display filter option in ArcGIS Pro does not work for heat map symbology.

BUG-000170736	The Add Join tool becomes grayed out each time attempting to run the ModelBuilder after closing ArcGIS Pro.
BUG-000170821	Unable to mark errors as an exception after installing ArcGIS Server 10.9.1 Utility Network and Data Management Patch 7.
BUG-000170863	In ArcGIS Pro, when attempting to save a definition query with specific numbers in an Oracle enterprise geodatabase, the numbers do not display.
BUG-000170942	The parcel data quality Too Short layer incorrectly applies labeling expression.
BUG-000171031	Rotation of grid labeling in layouts is not applicable in ArcGIS Pro.
BUG-000171091	The Replace Geometry tool is being used to trace the largest feature rather than the intended feature.
BUG-000171129	Calculating the value of the model builder with data type 'cadena' (string) in ArcGIS Pro 2.9.12 gives an error opening in a 3.3.2 version of ArcGIS Pro.
BUG-000171129	Calculating the value of the model builder with data type 'cadena' (string) in ArcGIS Pro 2.9.12 gives an error opening in a 3.3.2 version of ArcGIS Pro.
BUG-000171331	There is no documentation explaining the differences between the Radial Line of Sight ribbon and the geoprocessing tools in ArcGIS Pro.
BUG-000171540	Deleting a vertex in a Bezier curve segment converts it to a straight line for a graphic layer.
BUG-000171639	The Create Space Time Cube By Aggregating Points tool returns an insufficient memory error.
BUG-000171639	The Create Space Time Cube By Aggregating Points tool returns an insufficient memory error.
BUG-000171641	When the Calculate Geometry Attributes tool is running on an enterprise geodatabase polygon feature class with attachments enabled and 65 or more records selected, the tool completes, but the values are applied to the wrong records.
BUG-000171657	Custom field values are not displayed in locator results when using German language settings in ArcGIS Pro with the Street Address role in the Create Locator tool.
BUG-000171721	The Simplify Building tool does not work as expected.
BUG-000171905	Reference scale on selection drawing in ArcGIS Pro
BUG-000171937	Layers do not display in ArcGIS Pro when filtering by a category with a comma in its name.
BUG-000172034	The warning message, "Primary symbology relies on one or more fields that are invalid" is returned when applying the Graduated Colors symbology in ArcGIS Pro on an enterprise geodatabase feature class with a join associated with a standalone table present
BUG-000172055	Parallel editing in the Stereo Map view is not possible in ArcGIS Pro.
BUG-000172215	Inconsistent geometry display for mixed geometry in the Open Geospatial Consortium (OGC) API services using ArcGIS Pro.
BUG-000172374	Resolve Building Conflict tool creates a conflict when orientation is set to true.
BUG-000172402	When using the Iterate Feature Classes tool in combination with the Append tool in ModelBuilder, attributes fail to carry over from the source table to the target table.

BUG-000172424	Date and Date Only fields without time information are shown with time in popups when published to ArcGIS Enterprise 11.3 portal and viewed in ArcGIS Pro.
BUG-000172433	Creating a thumbnail does not create a new thumbnail in the ArcGIS Pro metadata.
BUG-000172572	Previously searched latitude and longitude values in the Go To XY tool are swapped.
BUG-000172709	The Generate Definition Query From Selection geoprocessing tool includes a toggle button to deselect selections, which causes the tool to fail.
BUG-000172811	In ArcGIS Pro 3.4, the Geodesic Viewshed (Spatial Analyst) tool returns incorrect results if a Digital Elevation Model (DEM) is clipped or the extent is otherwise limited prior to processing.
BUG-000172812	In ArcGIS Pro, the Input Video File parameter in the Video Multiplexer tool does not support .csv, .gpx, and .json file types.
BUG-000172958	A custom style added to an ArcGIS Pro project is not displayed in the symbol gallery of the Symbology pane.
BUG-000173084	The Categories option disappears from the filters list after performing a search in the Portal > My Organization section of the ArcGIS Pro Catalog pane.
BUG-000173114	The Delete Rows geoprocessing tool completes successfully, but the data is not deleted and remains in the table.
BUG-000173121	ArcGIS Pro crashes when moving the Data Engineering view.
BUG-000173203	Installing PyTorch in a cloned Python environment via the ArcGIS Pro Package Manager fails with a LibMambaUnsatisfiableError due to unmet dependencies.
BUG-000173315	When running a ModelBuilder tool in ArcGIS Pro that includes the 'Excel to Table' geoprocessing tool, the 'Row to Use as Field Names' parameter cannot be modified from its default value.
BUG-000173333	Records from the source and target linear referencing system (LRS) datasets are duplicated when using the Append tool.
BUG-000173369	Branch versioned feature service (data in Oracle relational database management system) queries time out when using Shape__Area in the where clause.
BUG-000173372	Unable to publish joined feature layers as a map image when sourced from two different databases in ArcGIS Pro.
BUG-000173393	Polygons with gradient stroke symbology are incorrectly bounded by a thin black line in the exported PDF.
BUG-000173514	The ArcGIS Pro Catalog view fails to display the pop-up information when selecting features on the Geography tab.
BUG-000173528	After using the Table To Relationship Class tool, the relationship class does not display in the Attribute pane.
BUG-000173537	When using the Delete Identical geoprocessing tool on fields with the data type Big Integer, Date Only, Time Only, or Timestamp Offset, the error message, “Error 003911: The field is not of type SHORT | LONG|FLOAT|DOUBLE|TEXT| DATE| GEOMETRY|GUID” is retu
BUG-000173545	Creating a mosaic dataset in a mobile geodatabase fails with the error, “ERROR 999999: Something unexpected caused the tool to fail”.
BUG-000173659	The Validate Topology tool does not work with ArcGIS Server 10.9.1 Utility Network and Data Management Patch 7.

BUG-000173670	When using a selection layer in ArcGIS Pro 3.4 and selecting a subset of features, the 'Show selected features' option in the attribute table does not honor the selected records
BUG-000173674	In ArcGIS Pro 3.4, the Contour (Spatial Analyst) tool returns the error "Error 010667: Statistics are not up to date", when using a mosaic dataset in UTM 10N as input.
BUG-000173745	The error message, "Failed to create output feature class" is returned when creating a feature-linked annotation feature class in a branch versioned dataset
BUG-000173784	The Distance Accumulation raster analysis tool in ArcGIS Online Map Viewer produces incomplete results when compared to the output in ArcGIS Pro.
BUG-000173798	The French language pack does not recognize the Geodatabase Version History date field while trying to open database properties, and the following error message, "String was not recognized as a valid DateTime." is returned.
BUG-000173882	The Append tool with the update options fails to update existing fields in the target feature.
BUG-000174007	Arcade expressions used in the Rotation section of the ArcGIS Pro Feature Layer Symbology properties do not return correct angle measurements.
BUG-000174043	ArcPy should not allow editing a branch-versioned workspace without properly starting an edit session on the branch.
BUG-000174112	The error message "Unknown Parameter Offset" is returned when adding an Open Geospatial Consortium (OGC) API - Features layer in ArcGIS Pro.
BUG-000174199	Entering a domain name longer than 255 characters causes ArcGIS Pro 3.4 to crash.
BUG-000174238	In ArcGIS Pro, editing the Draw Order Weight field in the catalog datasets has no effect when using an enterprise geodatabase.
BUG-000174372	When running the Zonal Histogram tool, large integer fields do not display in the output when required.
BUG-000174428	Using solid fill and shape marker layers in symbology with a rotated map frame causes a shift in the PDF file when viewed in Adobe Reader.
BUG-000174433	In ArcGIS Pro, the calculation of the geodesic feature class with arcs is inaccurate.
BUG-000174523	Cartographic Information Model (CIM)-based code affecting the custom subtype group layer display name in the Pop-up window after running the script in ArcGIS Notebooks
BUG-000174533	Using the Rebuild Address Locator tool with locators that are part of a composite locator fails with the error 999999.
BUG-000174675	Labels are not displayed above vertical lines.
BUG-000174682	States for non-versioned editing get created when the default version's state changes after the initial use in a non-versioned editing session.
BUG-000174695	The symbols' color of CAD data in the Contents pane does not match the color visible on the map, and the 'Line width' value is visible as '0.1 m'.
BUG-000174854	"Error 000798: Invalid areal unit value" is returned when running the Calculate Geometry Attributes tool on a shapefile with the Square Internal Nautical Miles option for the Area Unit parameter in ArcGIS Pro.
BUG-000174899	The Geocode Table tool does not honor the selection criteria configured in the composite locator.

BUG-000174967	Pop-ups for the output of the Count Overlapping Features geoprocessing tool only displays a text as {Notes}, and all other attribute information is absent.
BUG-000175019	When running the Trace Downstream geoprocessing tool in ArcGIS Pro, the tool accepts a maximum of 350 points, although the documentation states it can accept up to 1,000 points.
BUG-000175102	The label heading fails to word-wrap when the label arrangement is set to Description | Patch | Label.
BUG-000175113	Poor performance is observed in ArcGIS Pro when a left outer join is performed on a file geodatabase, and the join field has an index on the left table but no index on the right table.
BUG-000175123	The Error Inspector becomes out of sync with the map when topology from a SQLite Geodatabase is removed and re-added to a map as the user Validates Topology at the using the map's extent.
BUG-000175155	The check marks for the attribute settings are not retained in the properties window of a model.
BUG-000175162	Labels on a tile layer edited through Vector Style Editor display as {_name} when added to ArcGIS Pro 3.4 and later versions.
BUG-000175244	The offset distance calculation using the Arcade function and coordinate system requirements returns incorrect values.
BUG-000175333	Editing annotation feature classes with the UpdateCursor function makes the feature disappear and sets the shape_length and shape_area field values to zero.
BUG-000175334	Updating font attributes on annotation features using ArcPy UpdateCursor does not reflect on the map font, only on the attribute table.
BUG-000175345	ArcGIS Drone2Map 2024.2.1 crashes without generating a dmp file when processing thermal imagery from the DJI Matrice 30T when the DJI Camera Support Plug-in is installed.
BUG-000175368	Discrepancy in statistic and count field calculations for adjacent polygons using the Dissolve Boundaries tool
BUG-000175385	When detecting windows using the Object Detection tool in the 3D exploratory analysis tool, the symbol size differs from the actual object size.
BUG-000175386	Attempts to run the ArcPy syntax for the Rebuild Address Locator geoprocessing tool from the Python IDLE (Integrated Development and Learning Environment) to rebuild a locator returns the error message "Error: 000005: Could not open the address locator" i
BUG-000175437	The snapping options do not display when the map frame is activated within the layout.
BUG-000175447	In ArcGIS Pro, relative paths in pop-ups do not work if the project folder is moved to a shared folder.
BUG-000175460	When copying and pasting a Network Analyst route analysis layer including full parenthesis in one of the Cost fields, the pasted Route Analysis layer fields will be null.
BUG-000175464	When running the Add Surface Information tool with a Concurrent Use license and Spatial Analyst extension, an error is returned saying 3D Analyst must be enabled. The tool should work successfully with only a Spatial Analyst license. The error occurs spec

BUG-000175519	When attempting to split a polygon from a hosted feature layer in ArcGIS Online using ArcGIS Pro, the application crashes.
BUG-000175529	The Block Statistics tool returns incorrect sum results.
BUG-000175598	ArcGIS Pro greys out while trying to update the records flagged in the Error Inspector pane after running the Evaluate Rules tool on parcel fabric data.
BUG-000175662	Upgrading an annotation feature class version from ArcGIS Desktop to ArcGIS Pro 3.x corrupts the annotation feature class and shows lines associated with a few feature records.
BUG-000175710	The Raster to Polygon tool in ArcGIS Pro adds a .shp extension to the output file name when converting a raster file to a polygon feature class for a mobile geodatabase.
BUG-000175722	In ArcGIS Pro, when using the Edit Vertices tool to edit edges with geodatabase topology enabled, the "Building topology" message frequently appears when clicking on the edges.
BUG-000175817	The Cut Fill tool returns the 000224 error when using UTM or State Plane coordinate systems.
BUG-000175818	The Cut Fill tool returns the 999999 error when using the Web Mercator coordinate system.
BUG-000175855	In ArcGIS Pro 3.4.3, the Kernel Density (Spatial Analyst) tool fails to honor the area units set in the tool when a custom projection with a custom linear unit is used for the input.
BUG-000175868	In ArcGIS Pro, when adjusting multiple settings within the legend item properties, only the first change is applied successfully. Any subsequent modifications within the same session are not retained unless the settings window is closed and reopened betwe
BUG-000175936	When a raster exceeds the image service's 'Maximum download size per request' (MB) parameter, the image does not display in 'Download Raster' or state that the image is too large. Instead, it returns the message, "Check if rasters are accessible and 'Down
BUG-000175954	When exporting a layout in a large format such as A1 or A0 in ArcGIS Pro, custom dotted symbology may not render correctly, resulting in poor-quality output.
BUG-000175981	Changing the border style of the legend does not work.
BUG-000175983	Closed 3D solids from AutoCAD appear as not-closed in ArcGIS Pro when checked with the Is Closed 3D tool.
BUG-000175992	The ArcPy memory workspace does not consistently return correct rows when using a where clause with arcpy.da.SearchCursor.
BUG-000176070	Network Common Data Form (NetCDF) rasters are not rendering when added directly to a mosaic dataset.
BUG-000176079	Nulls being displayed as values or zeros in Temporal Profiles in ArcGIS Pro.
BUG-000176098	The SQL Server wait event resource_semaphore contention encountered due to branch versioned queries on large tables with low selectivity results in the optimizer generating massive memory grants.
BUG-000176121	In ArcGIS Pro 3.4.3, a calibration workflow in Ortho Mapping and the ArcGIS Reality for ArcGIS Pro extension displays incorrect band names during the calibration process.

BUG-000176136	The Create Overpass and Create Underpass tools do not create adequate masking of roads at complex junctions.
BUG-000176142	The tooltip for the Clear Highlighted tool in the ArcGIS Pro attribute table provides an incorrect description of its functionality.
BUG-000176205	When the data owner's name of a feature class contains a hyphen, ArcGIS Pro adds extra double quotation marks in the definition query.
BUG-000176227	ArcGIS Pro 3.4.3 // Import 3D Objects fails without error message when importing .obj file from DJI Terra.
BUG-000176227	ArcGIS Pro 3.4.3 // Import 3D Objects fails without error message when importing .obj file from DJI Terra.
BUG-000176232	The Paste Special Template method should support preserving source attributes when inheriting the target's domain or subtype.
BUG-000176257	Adding a GeoParquet file to a map fails with "Failed to add data: <Filename>".
BUG-000176287	The Detect Objects From Point Cloud Using Trained Model tool fails with error 999999 in ArcGIS Pro 3.x with messages pointing to the voxel size being too big.
BUG-000176315	The GetEstimates request on the feature service is causing significant performance issues when opening an ArcGIS Pro map containing referenced feature services.
BUG-000176440	The feature class spatial index is dropped and recreated when using the InsertCursor class from the Data Access module for inserting new records in ArcGIS Pro 3.5.
BUG-000176462	Delete operation takes more time to process if ArcGIS Pro is in English compared to Czech or any other language.
BUG-000176465	The Symbology pane is not displayed for more than a fraction of a second, showing glitching behavior.
BUG-000176490	Stacked charts are not equally distributed in ArcGIS Pro when null values are present in the attribute table.
BUG-000176547	Searching for an EPSG code directly opens the entry within coordinate system search, but when searching with a unique string, the CRS tree has to be opened manually.
BUG-000176553	Georeferenced PDF exports of a layout incorrectly display the halo sizes for symbols in ArcGIS Pro 3.5.
BUG-000176553	Georeferenced PDF exports of a layout incorrectly display the halo sizes for symbols in ArcGIS Pro 3.5.
BUG-000176570	A validation attribute rule checking for null geometry results in ArcGIS Pro crashing.
BUG-000176603	When a chart is rotated in ArcGIS Pro, the text element parameters associated with the x-axis do not honor the changes made through the Chart Properties pane.
BUG-000176615	In ArcGIS Pro 3.5, related tables for hosted feature layers fail to open when prompted.
BUG-000176636	In ModelBuilder, the Export Table tool resets the field map parameters to the default setting instead of using the parameters defined after saving and closing ArcGIS Pro.
BUG-000176641	The Upgrade Dataset tool does not allow ArcGIS Pro 2.x annotation with an existing TextStyle field to be upgraded.

BUG-000176642	Training a point cloud–based deep learning model fails on ArcGIS Server 11.5.
BUG-000176644	The Calculate Field tool does not honor active selections and layer filters when using a SQL expression on file geodatabase data, resulting in calculations on all rows.
BUG-000176662	JSON files are not accepted in the Linear Spectral Unmixing (Image Analyst) tool despite being listed as a supported format in the documentation.
BUG-000176674	Fail to calculate a field in a non-versioned feature class with a joined standalone table when the editing option is set to 'Single workspace edit session'.
BUG-000176689	An error message, "Underlying DBMS error[Unknown error, SQLSTATE=]" is returned when trying to connect to Microsoft Azure Cosmos DB for PostgreSQL in ArcGIS Pro.
BUG-000176706	The German language pack does not recognize the Geodatabase Version History date field while trying to open the database properties, and the following error message, "String was not recognized as a valid DateTime." is returned.
BUG-000176733	Adding an OGC API Feature service from the Catalog pane crashes ArcGIS Pro 3.5.
BUG-000176737	Exporting OGC-API-Featurelayer into a MEMORY-Workspace crashes ArcGIS Pro when a Filter is applied
BUG-000176744	Avoid branch versioning reconcile serialization lock errors
BUG-000176750	The Catalog view in ArcGIS Pro 3.5 does not support preview for stand-alone tables.
BUG-000176763	The Error Inspector shows empty error layer records after closing and re-opening the Error Inspector pane when there is a topology present.
BUG-000176825	Evaluate operation is adding OBJECTIDs to the selection set one at a time.
BUG-000176860	ArcGIS Pro hangs in layout view when the reference scale of the map is changed and the map series is activated.
BUG-000176872	Features in ArcGIS Pro can be missing or out of sync with recent edits if the local cache is discarded by the system.
BUG-000176877	In ArcGIS Pro 3.5, the 'Modified in this version' option in the Error Inspector pane is not honored when switching between named versions.
BUG-000176884	The VectorTileService (.json) works correctly in ArcGIS Pro 3.2 and 3.3 but fails to draw completely in ArcGIS Pro 3.4 and 3.5.
BUG-000176901	In ArcGIS Pro, when extracting buildings with level of detail (LOD) 1.3, the Extract LOD2 Buildings tool fails and crashes ArcGIS Pro.
BUG-000176913	Multiple layers within group layers nested in other group layers cannot be dragged into geoprocessing tools from the Contents pane.
BUG-000176927	Inefficient branch versioning queries with log files and predicate filters are impacting performance and scalability.
BUG-000176930	Gradient stroke symbology in ArcGIS Pro 3.5 causes geometry distortion when exporting layouts (PDF).
BUG-000176964	A definition query triggers an invalid syntax error when a field value associated with a coded-value domain containing a comma (,) is used.
BUG-000176975	Data Exclusion is not working.

BUG-000177001	When using the Select tool through the user interface (UI) or ArcPy to create a subset selection expected to produce no output or selection, the input selection is retained with no warning or error message, unlike in ArcMap.
BUG-000177018	When run on features modified in this version, evaluate rules operation assembles selection sets for layers without attribute rules configured on them.
BUG-000177028	ArcGIS Pro crashes when changing data sources in the catalog view, and the path for a new path is put in manually and is then validated and applied.
BUG-000177038	In ArcGIS Pro 3.5, the ArcGIS Reality for ArcGIS Pro extension allows export of 3D products when processing multispectral data, but the output is unable to be added to a map.
BUG-000177058	In ArcGIS Pro 3.5.1, the Extract LOD2 Buildings (3D Analyst) tool causes ArcGIS Pro to crash when the input DSM has an undefined spatial reference.
BUG-000177119	Unable to create label classes for web map with subtype group layers in ArcGIS Pro.
BUG-000177135	The address geocoding process using the ArcGIS StreetMap Premium USA locator crashes when the Country or Region parameter is set to the United States.
BUG-000177152	Polygons with cutout geometry and z-values of -100,000 cannot be copied into map services or synced. An error message returns during the sync process.
BUG-000177161	In ArcGIS Pro, when layers have identical names, importing symbology applies it to the wrong layers, specifically the first matching one, leaving the intended layer unchanged.
BUG-000177179	The Python expressions accessed via the Recent button in the Calculate Field tool consistently lose the first line of the expression when executed.
BUG-000177183	The Select By Attributes tool query returns partial results for layers sourced from SQL Server.
BUG-000177186	Dropping connections to an Azure SQL Server enterprise geodatabase is not possible through ArcGIS software, even when using the Azure SQL admin account.
BUG-000177201	ArcGIS Pro 3.5.1 fails to display attributes for Web Feature Service (WFS) layers.
BUG-000177228	When printing a MAP_ONLY georeferenced TIFF using the ExportWebMap Task, and the extent crosses the international dateline (±180°), the service injects a WKT-based custom projection with a shifted Central Meridian into the Web_Map_as_JSON. While the PDF o
BUG-000177234	Connection to a third-party WMS, WFS, OGC, and WMTS in MercatorNet endpoints server displays a certificates dialog box in ArcGIS Pro.
BUG-000177235	When generating a 3D tile integrated mesh in ArcGIS Drone2Map, it does not appear in the expected location.
BUG-000177286	The attribute values set within the feature templates for a hosted feature layer in ArcGIS Online are not retained when accessed in ArcGIS Pro.
BUG-000177314	Update the stored procedures for geodatabase metadata updates in the default transaction to use autonomous transactions.
BUG-000177317	Remove the call to obtain the DEFAULT version's state ID.
BUG-000177332	In the ArcGIS Pro Symbology pane, changing the color scheme for the unique values symbology only happens for one value, not the entire list, due to an automatic selection placed on the first row of the symbology classes.

BUG-000177337	Domains sort incorrectly for utility network services.
BUG-000177344	The current documentation for sharing a web scene layer leads users to believe that 'Reference registered data' is selectable to publish a scene layer package (.slpk) file to the portal using referenced data, but that is not an option for selection. To pu
BUG-000177371	ArcGIS Pro adds the token parameter twice to Web Map Services (WMS) added to ArcGIS Pro through the Basemap Gallery from ArcGIS Online.
BUG-000177376	Address security issue in jupyter_core.
BUG-000177418	The Pan and Zoom tools in an active layout in ArcGIS Pro 3.5.x cause the map view to revert to the previous extent.
BUG-000177427	When using the Human Geography basemap in ArcGIS Pro 3.5 and ArcGIS Pro 3.5.1, the halo effect causes overlapping of alphabets in the labels.
BUG-000177433	Unexpected layer extent updates occur due to improper initialization of m-value when updating the layer's metadata.
BUG-000177443	Clicking the Technical Support button on the Help tab in ArcGIS Pro directs to a webpage no longer exists.
BUG-000177448	The database view with a non-unique ID field causes the Select By Location tool to return the error message "ERROR 999999: Something unexpected caused the tool to fail".
BUG-000177461	Constraint rules trigger an error in ArcGIS Pro, but the data is not rolled back in the SAP Hana enterprise geodatabase.
BUG-000177492	Web Map Service (WMS) services added to ArcGIS Online as an item, with a token as a custom parameter, work in Map Viewer but not in ArcGIS Pro.
BUG-000177512	Selecting multiple picture elements triggers an automatic change to dynamic pictures.
BUG-000177535	The Extract LAS geoprocessing tool in ArcGIS Pro does not respect the Extraction Boundary parameter if the LAS file is not added to a map or run through the Create LAS Dataset geoprocessing tool first.
BUG-000177538	ArcGIS Pro crashes when entering a native NT path into a SuggestionPopup.
BUG-000177611	The report freezes and the application flashes when attempting to move the same related report twice in a row.
BUG-000177631	Certain workflows involving query layers and the Locate pane may cause ArcGIS Pro to crash.
BUG-000177633	Error 999999 returns when running the Import 3D Objects tool through a Python script in IDLE if the Output 3D Object Feature Class parameter is set to an existing feature class.
BUG-000177636	The tooltips in the Focal Statistics geoprocessing tool need to be updated to reflect the correct information present in the Esri documentation.
BUG-000177705	The Interpolate Shape tool returns error 999999 when using a terrain dataset stored in a file geodatabase.
BUG-000177773	When exporting a layout with map series enabled in ArcGIS Pro, setting the output file name as .pdf with no prefix returns the warning "The location does not exist or is an invalid path".
BUG-000177777	The ArcGIS Pro taskbar icon is no longer readable after opening a project.
BUG-000177786	ArcGIS Pro prompts for each edited feature to confirm network source status, generating more queries than necessary.

BUG-000177837	The Convert Temporal Field tool failed to load data when using a date output field type.
BUG-000177893	DJI M3T camera is the same for RGB and thermal imaging in ArcGIS Reality Products.
BUG-000178012	Missing fields are observed before and after the Revit to geodatabase conversion across ArcGIS Pro 3.1.x and ArcGIS Pro 3.5.2.
BUG-000178045	ArcGIS Pro crashes when accessing the Catalog View table tab of the Elasticsearch database layer.
BUG-000178053	Transforming the horizontal coordinate system of LAS datasets using the Create Point Cloud Scene Layer Content tool results in spatial misalignment.
BUG-000178069	Attempting to create bar charts from the Data Engineering menu using date/time data types will cause ArcGIS Pro to crash.
BUG-000178076	When time is enabled on a feature layer sourced from an Elasticsearch database, the layer is no longer displayed on the map and returns the error message "An invalid SQL statement was used. Bad syntax in the request. (Status code 400)".
BUG-000178083	When opening the Locate pane by going to the Locate drop-down in the ArcGIS Pro Map tab and clicking Layer Search, the Locate pane opens in the Locate tab instead of the Layer Search tab if the Locate pane is being opened for the first time in an ArcGIS P
BUG-000178104	In ArcGIS Pro, edits made to a layer are not reflected when certain parameters are changed in the Options dialog box and the project is opened from Recent Projects.
BUG-000178116	Custom Adobe fonts added to a layout in ArcGIS Pro are stretched when the layout is exported and opened in Adobe Illustrator.
BUG-000178118	ArcGIS Pro crashes when geocoding geoprocessing tools are canceled.
BUG-000178132	GeometryObjectException: Cannot convert geo coordinate string to xy-coordinates.
BUG-000178161	In ArcGIS Pro, the 'Display units' option in the Map Frame Extent dialog box is hidden when the project contains a large number of layers in the Contents pane.
BUG-000178162	The Download Rasters geoprocessing tool fails when using the Python environment of ArcGIS Server 11.5 but works when using the Python environment of ArcGIS Server 11.3.
BUG-000178177	Some WFS services do not work in ArcGIS Pro 3.5.2 because the query string in the server URL is truncated in the server connection.
BUG-000178238	DWG and DXF files saved in AutoCAD 2012 version 1024 do not display in ArcGIS Pro.
BUG-000178292	The map series export files property unexpectedly switches to the Multiple Files option.
BUG-000178345	The map service crashes upon start in ArcGIS Enterprise deployed on SAP S/4HANA with HANA Cloud when the ArcGIS Server log level is set to Debug.
BUG-000178371	Applying a symbology with multiple marker symbol layers to a hosted feature layer from an existing layer causes performance issues in ArcGIS Pro.
BUG-000178437	The Video Multiplexer tool outputs a .ts file that does not properly display VMTI features.

BUG-000178437	The Video Multiplexer tool outputs a .ts file that does not properly display VMTI features.
BUG-000178460	The Replace Colors tool does not honor the color profile set in the project and map settings.
BUG-000178471	Symbology for grouped layout elements containing a legend does not update dynamically on the pages of a map series.
BUG-000178503	The Solve tool fails and the error messages "Access denied" and "empty geometry error" are returned when configuring the Output Type parameter to Lines and the 'Geometry at Overlaps' parameter to Overlap in the Make Service Area Analysis Layer geoprocessi
BUG-000178519	The Raster Solar Radiation tool generates inconsistent output values, with noticeably higher values in the North compared to the South.
BUG-000178547	The French translation in the field report section of ArcGIS Pro is incorrect.
BUG-000178572	The Change Version function does not honor the current version if the version name contains parentheses, in both Traditional and Branch versioning.
BUG-000178578	The Simplify Shared Edges tool creates self-intersecting polygons for some polygons with holes.
BUG-000178622	Reconcile fails in unique cases where the version was created, modified, or reconciled within the initial ten minutes of creation.
BUG-000178646	When overwriting a referenced feature service using a different Administrator account, newly added layers are displayed in the map service but do not show up in the feature service in the ArcGIS Enterprise portal.
BUG-000178670	A crash occurs when using the Create Locator tool in ArcGIS Pro with the Postal Locality role.
BUG-000178709	Edits are not saved after using the Continue Feature tool to modify a polyline in a utility network layer, whether in a local or global scene.
BUG-000178715	Some edit operations in the Change Version dialog box cause unexpected version difference requests to be sent.
BUG-000178724	Closing the Version Changes window during an insert causes subsequent inserts to throw unexpected version differences requests when using a topology.
BUG-000178747	Features from a subtype group layer disappear when using the Move, Rotate, or Scale tools in a local or global 3D scene.
BUG-000178749	For shapefiles and feature class point data in WGS 1984, when entering an Edit Vertices session, selecting within a cell alters the value by rounding it to 9 decimal places even though the location units are set to 10 decimal places.
BUG-000178783	When publishing a DWG file from ArcGIS Pro to ArcGIS Online, some features are missing and display no Shape_Length value.
BUG-000178787	When 'Enable color management' is toggled on, labels do not display on the map or layout in ArcGIS Pro.
BUG-000178861	The Update Application Date (UADT) field is being populated by the Issue Date (ISDT) and displaying the wrong date in the Data Set Identification (DSID), Layer Properties, for ENC/S-57 data.
BUG-000178868	Issue with the XYTableToPoint function and arcpy.env.extent = "MAXOF".
BUG-000178898	In an ENC layer, when a depth contour is rendered with safety contour symbology, the contour is no longer selectable.

BUG-000178901	The elevation surface with the Slovenia 1996 coordinate system disappears when zooming in to large scales in ArcGIS Pro but works fine in Map Viewer (Portal for ArcGIS).
BUG-000179000	In ArcGIS Pro, when using the MOD function in the Select by Attributes tool to identify integer values within a feature class from a file geodatabase, records with non-integer values are incorrectly selected.
BUG-000179014	Memory leak when changing selected datasets in ArcGIS Pro's Catalog View Geography tab.
BUG-000179078	An Arcade attribute rule using a spatial intersection between two polygon layers fails in ArcGIS Pro 3.5.2, ArcGIS Enterprise 11.3, and ArcGIS Enterprise 11.5, returning the error message "Arcade error: Spatial reference expected".
BUG-000179103	The leader line shifts position when the associated Straight text element is edited.
BUG-000179221	Blob fields always return conflicts despite the edits being the same.
BUG-000179226	The BIM cloud connection cannot log in to ArcGIS Hub from Europe, Australia, or the USA.
BUG-000179271	The line chart guides shift forward in time upon exporting to graphics in ArcGIS Pro 3.5.3.
BUG-000179322	Evaluate calls differences on unmodified classes.
BUG-000179542	ArcGIS Pro 3.5.3: ArcGIS Pro fails to recognize the camera parameters for the DJI M3TD sensor.
BUG-000179563	Attribute rule analyzer runs slowly on large workspaces.
BUG-000179583	When isLocked="true" is configured, the environment variable %USERNAME% in the path configuration options of Pro.settingsConfig is not replaced with the current username in the Options dialog box.
BUG-000179646	The Stream Link tool does not assign unique IDs to streams under certain conditions.
BUG-000179683	Geoprocessing tools using arcpy.nax.ClosestFacility take 10 times as long to run in ArcGIS Pro 3.5.
BUG-000179728	When a Barlow Condensed font is used for labels on a map in ArcGIS Pro, the letter J is missing if it is the only character of a label for a feature.
BUG-000179739	In portal projects, creating a new database connection for the default geodatabase fails and returns the error message "HRESULT E_FAIL has been returned from a call to a COM component."
BUG-000179787	A feature layer of a feature class with the pipe symbol “|” in the name, which is changed automatically to an underscore by ArcGIS Pro during publishing, cannot be overwritten.
BUG-000179807	ArcGIS Pro crashes while running the Layer To KML tool on a hosted feature service with multipart features and domains applied.
BUG-000179882	Duplicate features are produced when creating new features in a published trace network.
BUG-000179957	ArcGIS Pro crashes when adding a topology layer from Favorites to a map while the Error Inspector pane is open.
BUG-000180131	Using the Length3D() Arcade function in an attribute rule or the Calculate Field tool fails when applied to features containing curve geometry (arc).
BUG-000180302	The Labeling Summary report returns errors for valid advanced expressions.

BUG-000180338	In ArcGIS Pro, adding a vertex to a utility network line in a 3D scene also creates unintended vertices on other vertically aligned, parallel lines that share the same connectivity rules.
ENH-000104050	Provide further explanation of the ArcGISIndexingServer executable in the ArcGIS Pro install documentation.
ENH-000117077	Improve the documentation for ERROR 030024: Solve returned a failure.
ENH-000118513	Enable copying and pasting feature class without having to turn on the layers.
ENH-000120343	Introduce configuration options for single-line spacing in the text field of pop-ups in the ArcGIS Pro desktop client.
ENH-000120343	Introduce configuration options for single-line spacing in the text field of pop-ups in the ArcGIS Pro desktop client.
ENH-000120406	Allow ArcGIS Pro to handle the 302 redirect from the Azure Application Proxy pre-authentication.
ENH-000121539	Allow ArcGIS Pro to handle user names, schema names and database names longer than 31 characters for DBMSs that support this functionality.
ENH-000122654	Implement the ability to manage elevation layer properties using ArcPy
ENH-000123984	Allow for WFS properties such as "ONDEMAND" mode and "MAXFEATURES" to be set in the user interface of ArcGIS Pro when defining the WFS connection rather than after the layer is added and allow for the paging of results from the WFS Service.
ENH-000124716	Create an option for Brazil to be a country listed in the Create Locator tool in ArcGIS Pro.
ENH-000129989	Provide a functionality to create 'CreateGISServerConnectionFile' using arcpy in ArcGIS Pro.
ENH-000133386	Request to add input options for Add Fields (multiple) in ArcGIS Pro.
ENH-000136323	Add support to ArcGIS Pro to allow for login to ArcGIS Enterprise deployments that are fronted by a reverse-proxy with a pre-authentication step, where the initial request to /sharing returns a 302.
ENH-000137287	Please improve the Service Area polygon generation algorithm when using the Split option so that inaccessible areas are not included
ENH-000138410	Provide the ability to edit the attribute field names displayed in the Table of contents when “Charts” is selected as a symbology in ArcGIS Pro.
ENH-000139289	Allow Option to Reference Registered Data Source When Sharing Web Scene that include 3D Feature Classes or 2D Raster Layers
ENH-000142406	In ArcGIS Pro, Allow the Usage of Moving Average Lines in Additional Charts other than Single Series Temporal Bar Charts
ENH-000142828	Please consider an addition to the Breaks class in VRP analysis to allow a location to be specified.
ENH-000143045	Please improve messaging of Set LAS Class Codes Using Features tool
ENH-000143456	Allow the creation of a report with more than one column in ArcGIS Pro.
ENH-000146759	User would like to display and process .LAZ files without first converting to LAS in ArcGIS
ENH-000148592	Create an option for the Download Map method in ArcGIS Pro to have a checkbox to only import related features in the attached tables.
ENH-000149928	Add the ability to export the records in the Error Inspector table to an Excel spreadsheet in ArcGIS Pro

ENH-000153957	Provide the functionality to create a single 3D format for all the features using the ‘Add 3D Formats to Multipatch’ Tool.
ENH-000154134	Report with 3D Scene doesn't display the correct data when report is exported
ENH-000155162	Provide documentation on what testing is done regarding Deep Learning products in Virtual and Cloud based environments
ENH-000155521	Please allow use of traffic data when creating network datasets in ArcGIS Pro.
ENH-000155610	Add Specific recommendations for text length to the documentation for the GeoAI Deep Learning Model
ENH-000155762	Provide the option to show Style (.stylx) file names to Color Schemes in the Symbology pane of ArcGIS Pro.
ENH-000156443	Add descriptive text for each metadata field in ArcGIS Pro
ENH-000158691	Please include an option to import symbology for a TIN Layer in ArcGIS Pro.
ENH-000162148	Refine the Slope calculation method to include calculations for cells that are not square and have a different metric cellsize in x and y direction
ENH-000162334	Add a way to turn on/ off layers in the Contents pane listed per feature dataset
ENH-000163034	When exporting a single page of a map series via Export Layout in ArcGIS Pro 3.2, the suffix of the page name or number is not added to the output’s filename.
ENH-000164195	Provide functionality to import the Symbol IDs in ArcGIS Pro from another feature class as the equivalent functionality is available in ArcMap
ENH-000164533	Provide the capability to update the legend patch shape to all the classes within a Feature class at the same time in the Symbology pane instead of changing it one by one.
ENH-000165831	Show a warning message after users run "Generate a schema report" with a folder(workspace) which contains only shape file.
ENH-000165892	Add a Mailing Labels template to the list of Esri default templates for reports in ArcGIS Pro.
ENH-000165941	Allow for the ability to pan and zoom in outside the bounds of a model within ModelBuilder in ArcGIS Pro.
ENH-000166500	Update the Introduction to BIM data documentation to clarify how the ExteriorShell feature class is created in ArcGIS Pro to identify adjusting the models
ENH-000166991	Provide 'optional' prompt to add exported data to the map as a layer in ArcGIS Pro.
ENH-000167397	Provide documentation clarification regarding the order in which the 'Iterate Feature Classes' model only tool reads through the input workspace or feature dataset.
ENH-000169154	CAD to Geodatabase tool unable to correctly import boolean fields into ArcGIS Pro
ENH-000169499	Draw and label functionality within Find Routes pane
ENH-000169586	Add the ability to add vertical grid lines to charts in ArcGIS Pro.
ENH-000169913	Ability to view SAR Imagery with an Orientation of Shadows Down and freely rotate the Image in the Map.
ENH-000170969	Make the layer symbol in the table of contents (TOC) in ArcGIS Pro show the entire symbol when offset is applied

ENH-000171981	Provide the functionality of navigating the ArcGIS Pro map view using 'Scroll Bars' .
ENH-000173496	Provide ability to publish 64-bit field from ArcGIS Pro to Portal as web map with sync enabled
ENH-000173510	Please clarify analysis limits when using ArcGIS Online for certain network analysis operations
ENH-000174822	Snapping is deactivated when Streaming is activated in ArcGIS Pro
ENH-000175591	Support functionality to accept 12/31/9999 as a date in ArcGIS Pro for date field types.
ENH-000176027	In the Tile LAS tool, under the Tiling Options heading, provide users with either input validation or a tooltip message if the entered values for the Tile Width and/or Tile Height are too large or would potentially modify the output dataset.
ENH-000176279	Give users the ability to use Add Date Attributes (Crime Analysis and Safety) on high precision data
ENH-000176599	Clarify the use of the parameter “Angle tolerance” when symbol effect “Add control points” is used
ENH-000176600	Allow raster statistics, including Dynamic Range Adjustment (DRA) stretch, to be exported as XML in ArcGIS Pro with complete statistics and histogram
ENH-000177275	ArcGIS Pro – add the possibility to remove spaces in MGRS coordinates in dynamic text elements
