

# ArcGIS Pro 2.6 Issues Addressed

Each [major, minor, and patch release](#) of ArcGIS Pro includes fixes for bugs that were reported to Esri Technical Support. The bugs that were fixed in ArcGIS Pro 2.6 are listed in the table below.

More information about an issue on the list can be found by [searching for the BUG number on the Technical Support site](#).

ArcGIS Pro 2.6 also includes extensive new functionality, which is described in the [what's new topic](#).

**Tip:**

[Upgrade your Enterprise geodatabases stored in Microsoft SQL Server](#) to take advantage of critical fixes to branch versioning.

## Issues addressed at ArcGIS Pro 2.6.10

ArcGIS Pro 2.6.10 fixes the issues listed below and includes the fixes listed under 2.6.0, 2.6.1, 2.6.2, 2.6.3, 2.6.4, 2.6.5, 2.6.6, 2.6.7, 2.6.8, and 2.6.9.

Issue	Description
BUG-000144966	ArcGIS Pro crashes when upgrading a utility network.
BUG-000147765	Certification of Microsoft ODBC Driver 18 for SQL Server connections.
BUG-000148577	The slope result between the Planar and Geodesic options in ArcGIS Pro is incorrect.
BUG-000148667	Certain feature services or map services from ArcGIS Server 11.0 cause ArcGIS Pro to stop responding.

## Issues addressed at ArcGIS Data Interoperability 2.6.1

Data Interoperability is an optional extension that can be installed on ArcGIS Pro. ArcGIS Data Interoperability 2.6 must be installed prior to version 2.6.1.

Issue	Description
BUG-000145606	Update the ArcGIS Data Interoperability extension to take advantage of the Log4J updates.

## Issues addressed at ArcGIS Pro 2.6.9

ArcGIS Pro 2.6.9 fixes the issues listed below and includes the fixes listed under 2.6.0, 2.6.1, 2.6.2, 2.6.3, 2.6.4, 2.6.5, 2.6.6, 2.6.7, and 2.6.8.

Issue	Description
BUG-000136166	ArcGIS Pro Trim Archive History geoprocessing tool and ran as Python script trims different BeforeDates when data comes from an Oracle database.
BUG-000141454	Add index hints to the update statements executed by reconcile and post operation.

Issue	Description
BUG-000141670	Common Table Expressions (CTE) query on named branch does not respect the ancestor moment in relation to default.
BUG-000144240	The Export Subnetwork tool has performance issues with certain feeders.
BUG-000144433	The Differences view in ArcGIS Pro displays changes in shape_length or shape_area after editing non-spatial attributes in a branch version.
BUG-000144636	The table name in the Attributes tree view does not match table name in Contents pane when multiple instances of the same table are in the map.
BUG-000144988	Editing a curve centerline which is not associated with a route returns a 3D error.
BUG-000145187	Without reconciling and posting, attachments added in a branch version fail to open after closing ArcGIS Pro.
BUG-000145599	Remove Log4j from GeoAnalytics Tools and Apache Spark in ArcGIS Pro. <a href="#">Learn more about BUG-000145599</a>
BUG-000145988	Deleting a version from a versioned view is slow.
BUG-000146496	The error message, "Error: Split point results in a zero length polyline" is returned when using the Split Into COGO Lines tool against a coordinate geometry (COGO)-enabled feature service.

## Issues addressed at ArcGIS Pro 2.6.8

ArcGIS Pro 2.6.8 fixes the issues listed below and includes the fixes listed under 2.6.0, 2.6.1, 2.6.2, 2.6.3, 2.6.4, 2.6.5, 2.6.6, and 2.6.7.

Issue	Description
BUG-000136365	The <b>Zoom To</b> function in the <b>Find Subnetworks</b> pane is not working.
BUG-000143125	In ArcGIS Pro, when the <b>Merge</b> command is used to merge two polylines with a common vertex, it outputs a multipart feature instead of a single feature if one of the two polylines has a non-default Z-value in any vertices.
BUG-000143466	Unregister, as branch versioned, does not complete due to an inefficient delete statement.
BUG-000143485	Updates to utility network point feature m-values using the <b>Edit Vertices</b> tool in ArcGIS Pro do not persist when saved.

## Issues addressed at ArcGIS Pro 2.6.7

ArcGIS Pro 2.6.7 fixes the issues listed below and includes the fixes listed under 2.6.0, 2.6.1, 2.6.2, 2.6.3, 2.6.4, 2.6.5, and 2.6.6.

Issue	Description
BUG-000138028	Zooming to the layer takes a longer time for hosted feature services with queries.

Issue	Description
BUG-000138552	Poor performance when placing trace locations in a utility network with a large number of subnetworks due to query of SubnetLine.
BUG-000139337	In ArcGIS Pro, when adding a layer using the ' <b>Add preset - Subtype Group Layer</b> ' option, the incorrect version name is displayed under the ' <b>Differences</b> ' tab while viewing the version changes.
BUG-000139833	Deadlocking may occur on SDE_branches and SDE_branch_tables_modified tables during simultaneous reconcile and post operations.
BUG-000139968	Upgrade can create incorrect conditional index on GDB_Locks table.
BUG-000140013	Deadlock can be encountered when multiple connections hold exclusive locks on the SDE_process_information and SDE_table_locks tables.
BUG-000140449	Connections are blocked by exclusive table lock on SDE_process_information.
BUG-000140615	Stop editing (save) is looping 10x if the call times out with a services workspace.
BUG-000140658	Optimize MapTips for the visible scale of layers.
BUG-000141777	Created dimensions are populated with Null values.

## Issues addressed at ArcGIS Pro 2.6.6

ArcGIS Pro 2.6.6 fixes the issues listed below and includes the fixes listed under 2.6.0, 2.6.1, 2.6.2, 2.6.3, 2.6.4, and 2.6.5.

Issue	Description
BUG-000131570	After applying a definition query, if a custom Arcade expression is used to symbolize the layer, the feature counts in the <b>Symbology</b> pane does not respect the definition query.
BUG-000136981	The <b>Divide</b> tool (using varying distance) does not assign the right distance values on the coordinate geometry (COGO) enabled layer.
BUG-000137547	ArcGIS Pro crashes when a client-side timeout is exceeded, and StopEditing is unable to complete.
BUG-000139157	Branch versioning lock leak occurs after <b>Conflict Manager</b> or <b>Differences</b> pane is opened.
BUG-000139527	UN: Updating attribute values takes longer than expected to complete when CAVs are present.
BUG-000139546	Features are sometimes displayed as duplicated or not displayed when editing a feature service layer.

## Issues addressed at ArcGIS Pro 2.6.5

ArcGIS Pro 2.6.5 fixes the issues listed below and includes the fixes listed under 2.6.0, 2.6.1, 2.6.2, 2.6.3, and 2.6.4.

Issue	Description
BUG-000129991	Duplicate and looping requests are generated when creating new related features in a feature service using ArcGIS Pro.
BUG-000136412	Slow performance when changing branch versions for a single layer in the ArcGIS Pro map.
BUG-000137089	Edit vertices tool is performing a spatial search for every vertex on the line which is selected for the operation.
BUG-000137243	FMV Multiplexer in ArcGIS Pro 2.6 fails to calculate the frame corner coordinates.

## Issues addressed at ArcGIS Pro 2.6.4

ArcGIS Pro 2.6.4 fixes the issues listed below and includes the fixes listed under 2.6.0, 2.6.1, 2.6.2, and 2.6.3.

Issue	Description
BUG-000134496	Reconcile Versions GP tool not honoring set parameter to continue when conflicts are detected.
BUG-000134835	Cannot add a definition query in ArcGIS Pro, and an error message is returned, "There was an error with the expression."
BUG-000135097	Reconcile fails on a branch version with error "version is still in use" because the version lock on the branch version was not released after an edit session ended in a different ArcGIS Pro session.
BUG-000135227	Crash using <b>Conflicts</b> view after conflict on implicit reconcile (traditional versioning).
BUG-000135252	Adding images to a mosaic dataset on an AWS enclave using VSIS3 is not working.
BUG-000135927	Remove redundancies when saving projects to improve performance.
BUG-000135928	Inconsistent handling of network drives in the index.

## Issues addressed at ArcGIS Pro 2.6.3

ArcGIS Pro 2.6.3 fixes the issues listed below and includes the fixes listed under 2.6.0, 2.6.1, and 2.6.2.

Issue	Description
BUG-000128275	Unable to import DWG files when using CAD To Geodatabase geoprocessing tool when the value in the RefName field is more than 255 characters.
BUG-000128893	Unmapped users and roles are seen within the <b>Privileges</b> window.
BUG-000128952	Unable to delete a field with an attribute index in an SQL Server geodatabase.
BUG-000129779	Allow edit sessions based GP tools to run using Sqlite based data (Append requires an edit session in certain cases like offline mobile gdb with attachments enabled).
BUG-000130678	Georeferencing has some issues when saving.
BUG-000130888	The Register with Geodatabase tool fails when registering an empty feature class.

Issue	Description
BUG-000131812	arcpy-function <code>exportToTIFF()</code> creates wrong output in ArcGIS Pro 2.5.1 when choosing 24-BIT_TRUE_COLOR.
BUG-000132103	The Extract Values to Points tool duplicates some of the point features when working with large extent raster datasets in the 'ETRS 1989 UTM Zone 32N' coordinate system.
BUG-000132123	<b>Z Factor</b> incorrectly applied to point scene layer with VCS in Feet.
BUG-000132128	Reports: Reports from standalone tables fail to export any related reports.
BUG-000132529	Using <b>Statistics_analysis</b> tools with in memory inputs/outputs uses up a large amount of disk space.
BUG-000132731	When importing a web scene authored in AGOL that uses extrusion, the extrusion expression is BLANK in ArcGIS Pro.
BUG-000132807	The ArcGIS Pro 2.6 <b>Configure Layer for Locate</b> settings automatically set the default to <b>Equals</b> for <b>GlobalID</b> , and reverts back even when saved.
BUG-000132948	OID value is set to <NULL> for .txt using Export Tables [ i.e., Tbl2Tbl] for 2.6.3.
BUG-000133241	Loading a Revit (.rvt) file in ArcGIS Pro 2.6 returns the following error message: <b>External component has thrown an exception.</b>
BUG-000133473	Exporting to Python from ModelBuilder returns blank field mapping.
BUG-000133606	Field map truncates field names to 10 characters when output is csv.
BUG-000133698	Enable Topology with Only generate errors checked not clearing old dirty areas.
BUG-000133942	When a feature class has subtypes, but is symbolized using a non subtype field, error 00334 will appear when publishing a web layer to Portal.
BUG-000133966	Calling search in a RowEvent handler results in lost edits when saving.
BUG-000134123	Unable to view/display certain Web Map Tile Service (WMTS) in ArcGIS Pro Mapframe.
BUG-000134378	Remove upper function on GUID columns in parcel fabric queries against oracle enterprise geodatabases.
BUG-000134464	<b>Nodata</b> areas in surface or vertical raster are not dealt with correctly.
BUG-000134465	Distance tools require cell size to be defined in model chaining.
BUG-000134781	After exporting a layout via the UI, GP tools that use the map parameter type will show duplicated maps.

## Issues addressed at ArcGIS Pro 2.6.2

ArcGIS Pro 2.6.2 fixes the issues listed below and includes the fixes listed under 2.6.0 and 2.6.1.

Issue	Description
BUG-000129839	Unable to access or edit the metadata in ArcGIS Pro through the Python IDLE window.
BUG-000130219	Request for improving how ArcGIS Pro validates queries for a service.
BUG-000131067	Upgrade Dataset is slow for large annotation feature classes with inline annotation.

Issue	Description
BUG-000132711	Field Mapping in ArcGIS Pro 2.5.x / 2.6 is not working correctly with German regional settings (OS).
BUG-000132756	Unable to select coded domain values using arrow and keyboard buttons in <b>Attribute</b> pane of ArcGIS Pro.
BUG-000132845	CSV files containing fields without a name do not autopopulate the <b>X</b> and <b>Y</b> fields when using <b>Display XY Data</b> .
BUG-000132864	The Layer to KML tool in ArcGIS Pro 2.6 does not honor the feature selections, and fails to output the popups.
BUG-000132910	XYTableToPoint - Default symbology produces null label properties.
BUG-000133100	Table To Table's <b>Output Location</b> parameter browse dialog does not have <b>All Supported Types</b> .
BUG-000133474	When generating links and anchor points during <b>Align Parcels</b> sometimes anchor points are created across very small gaps where links were needed.
BUG-000133510	ArcGISPro.exe:BGLGeomChestLib -- BGLGeomChestLib!GeomChest::TBinaryTree::operator new C:\ArcGIS\BeagleGraphics\GraphicsCore\BGLGeomChestLib\tbinarytree.h @ 73
BUG-000133513	Convert Labels to Annotation - Each element of the key number label is incorrectly given the ObjectID of the base feature as the FeatureID in the annotation feature
BUG-000133548	Repathing a subtype group layer to a database with field case changes duplicates fields in the field description
BUG-000133582	Split by feature not working with points as input and line as target.
BUG-000133584	<b>MinPS</b> value is not pulling information from the input data when using Table raster type
BUG-000133589	Improving the performance of building transpose.
BUG-000133590	Points To Track Segments <b>Distance (m)</b> field values incorrect.
BUG-000133746	Roll back unregister as branch versioned when a failure occurs.

## Issues addressed at ArcGIS Pro 2.6.1

ArcGIS Pro 2.6.1 fixes the issues listed below and includes the fixes listed under 2.6.0.

Issue	Description
BUG-000128959	The Create Vector Tile Package tool generates incorrect levels of detail when using the flat tiling format.
BUG-000130399	ArcGIS Pro freezes while switching between the <b>Continue Feature</b> tool and <b>Buffer</b> tool in a customized ribbon.
BUG-000131968	Scheduled geoprocessing tools do not run when the data path includes Japanese language - for 2.6.1.
BUG-000132260	Create Seeds could cause ArcGIS Pro to crash in certain situations.

Issue	Description
BUG-000132305	Mobile Map Package item uploaded with Share Package missing type keywords for Navigator.
BUG-000132486	Bivariate Color symbolization doesn't work on systems with "," as decimal separator (German, Czech, French, ...).
BUG-000132660	Incorrect values of area calculated from the Calculate Geometry Attributes tool in ArcGIS Pro for 2.6.1.
BUG-000132803	Using the UK regional setting in Windows results in empty locator properties dialogue.
BUG-000132804	The ArcGIS World Geocoding Service disappears when a locator is used in a rematch and the rematch is closed.
BUG-000132805	Locators built with the Points of Interest (POI) role with precision Global Extra High should be backwards compatible.
BUG-000132857	VRP Solver Object Schema 1 (old) is not handling decimal separators correctly.
BUG-000132858	Add Vehicle Routing Problem Routes tool fails when locale uses a comma for the decimal separator and value table inputs have decimals.
BUG-000132901	In ArcGIS Pro 2.6, Table to Excel with an output format of .xlsx results in a corrupt Excel table.
BUG-000132923	Sign in fails to portals configured to use SAML authentication with PKI.
BUG-000132929	ArcGIS Pro search index is not being updated when you rename a file geodatabase.
BUG-000132983	[ArcGIS Pro] I18N-FCN: ArcGIS Pro crashes when clicking the circle icon next to the criterion in the <b>Criteria</b> list under <b>Parameters</b> tab of <b>Suitability</b> tab on <b>Suitability Modeler</b> pane.
BUG-000132984	Suitability Modeler: ArcGIS Pro crashes when transforming multiband criteria.
BUG-000132986	If the input is a mosaic layer with multiple variables, Copy Raster to multidimesional CRF will output empty variables.
BUG-000132987	Multidimensional mosaic dataset displays blank when animating with Time Slider.
BUG-000132993	Colocation Analysis tool: Incorrect results when the same input category is used as both <b>Category of Interest</b> and <b>Neighboring Category</b> for single dataset.
BUG-000133124	In ArcGIS Pro 2.6, running the Append geoprocessing tool using a map service as the input layer will crash the application.
BUG-000133081	Graphics layers crash ArcGIS Pro when switching a map to the image coordinate system.
BUG-000133082	The application will crash when a map is exported to AIX format and the label for unique value symbology is null.

## Issues addressed at ArcGIS Pro 2.6.0

Issue	Description
BUG-000082361	Zonal Histogram fails to output graph.
BUG-000085913	“Table to Domain” does not show the new domain unless the project is closed and re-opened again.
BUG-000088272	Unable to create an address locator when a view is used as the primary reference data along with an alternate name table.
BUG-000090550	Export of a particular feature class takes excessive time.
BUG-000098134	A significant drawing delay occurs when using boundary labeling on detailed feature classes.
BUG-000099887	In ArcGIS Pro, the context menus are absent from some parts of the interface when using a touchscreen device.
BUG-000103314	Configuring a feature template using the editor tracking fields results in an incorrect display in ArcGIS Pro.
BUG-000105740	ENH REQ - add ability to set default label engine and font info.
BUG-000107672	When exporting PDF files from ArcGIS Pro with different output image qualities, the basemap scale level changes, resulting in lower resolution outputs not seen in ArcMap.
BUG-000108038	ArcGIS Pro 2.0.1 allows the Assign Default To Field geoprocessing tool to run on a hosted feature service, but does not successfully create the default value for the specified field.
BUG-000108367	Indexer does not index enterprise geodatabase content.
BUG-000108748	When setting an expression as a parameter that is meant for more than one geoprocessing tool in ModelBuilder, it won't allow changing the expression after running the model the first time or running the model as a script tool.
BUG-000109203	When a model contains 2 or more Make Feature Layer tools all those tools output a feature layer with the same name.
BUG-000109755	Margins 3 - Pull Default Margins from Printer (MAP-1137).
BUG-000110559	In ArcGIS Pro, changing a field number format to rate and decimal, outlines the box in red.
BUG-000110886	Add support for graphics and text elements in Map.
BUG-000111608	Untranslated parameters - <b>Model Builder</b> tab> <b>Logical</b> > <b>If Spatial Relationship is &gt;Relationship</b>
BUG-000111629	Time: Add the ability to define a time-step interval for a layer, and use it to configure the map.
BUG-000113096	Support drag and drop of locators in ArcGIS Pro.
BUG-000113980	Tabulate Area Crashes ArcGIS Pro when a string field is used as the <b>Zone Field</b> of the <b>Input Raster or Feature Zone Data</b> .
BUG-000114525	FEATURE: Read the Appearance definition from the Revit Material -- Texture.
BUG-000114597	Field View Does Not Activate When Trying to Edit Fields in ArcGIS Pro.

Issue	Description
BUG-000114925	Unable to configure or search layer when a join exists on the data.
BUG-000115190	The Export Mosaic Dataset Items gives out different names to the output files when run through the UI and Python
BUG-000115270	Feature service with subtypes and attribute domains consumed in client software (ArcGIS Pro and ArcMap) displays coded values instead of descriptions.
BUG-000115301	Cannot grant Privileges to a User Defined Role using the context menu option in ArcGIS Pro.
BUG-000115693	Change Privileges UI needs to work with unregistered tables and views.
BUG-000116286	Color control for chart elements even when they can match map.
BUG-000116650	The Python script in the default toolbox of a project is appended with an invalid directory path after sharing the project as a project package.
BUG-000116815	Enable time slider when a WMS service with Time dimension is added to ArcGIS Pro.
BUG-000116854	Enhance tracing to return geometry (SDK)
BUG-000117525	Unable to publish stand-alone query tables from ArcGIS Pro to ArcGIS Online.
BUG-000117784	The Spatial Analyst Tabulate Area Tool gives incorrect results for Raster with 1/2 measure resolutions
BUG-000117829	The Zonal Statistics as Table tool shortens the length of a text field in the output table.
BUG-000118006	Add a limiter to grids and graticules that will prevent unreasonably dense intervals
BUG-000118369	Turning off the display of a subtype field causes fields with domains to display the coded value instead of the description in pop-up windows.
BUG-000118516	Database connection fails for a user who has the 'select' privilege on a faulty or missing view which is owned by another user.
BUG-000118786	Setting <b>Historical Moment</b> for SAP HANA geodatabase connection results in error when accessing <b>Geodatabase Connection Properties</b>
BUG-000118978	In ArcGIS Pro, the Region Group geoprocessing tool performance is significantly slower when the output raster is written to a file geodatabase than written directly to a folder.
BUG-000119337	The Grid Index Features geoprocessing tool generates different results when run via UI and Python if the <b>Polygon Grid Origin Coordinate</b> is modified in ArcGIS Pro.
BUG-000119998	<b>Insert &gt; Text " X O"</b> does not produce the same result in ArcGIS Pro as it does in ArcMap.
BUG-000120145	In ArcMap and ArcGIS Pro, unable to read the Variables and Dimensions from the NetCDF file if Japanese characters are present in the path or name of the netCDF file.
BUG-000120321	The Smooth Line geoprocessing tool takes longer to process in ArcGIS Pro and ArcMap 10.6.1 than in 10.6 and does not smooth out the line.
BUG-000120364	ArcGIS Pro fails to update the count for the portal items in the search result when finding more items.

Issue	Description
BUG-000120501	The Python code syntax for the 'AddPointLayerBasedSuitabilityCriteria' tool is incorrect in the documentation for this tool.
BUG-000120711	Performance issue of the Smooth Line geoprocessing tool in ArcGIS Pro 2.3.
BUG-000121146	More than six fields are not included within reports although all the fields are included for Letter, Legal, Tabloid & ANSI C templates in ArcGIS Pro.
BUG-000121311	Creating a geodatabase topology in ArcGIS Pro on a machine with German regional settings returns a corrupt topology when <b>XY Cluster Tolerance</b> uses a comma as the decimal separator.
BUG-000121923	Unable to preview the <b>Geography</b> tab of a LAS dataset under <b>View Metadata</b> in the <b>Catalog</b> pane.
BUG-000122094	The error, "Error 000964 - Specified extent is invalid." is returned when using the Extract By Mask tool within a model in ArcGIS Pro unless the <b>Extent</b> parameter is specified in the <b>Environments</b> tab.
BUG-000122208	In layout text boxes created in ArcMap using ZurichBT fonts, importing the map document (MXD) into ArcGIS Pro 2.3.2 distorts the text to the right justification.
BUG-000122694	Copy tool does not validate in ModelBuilder because output of previous process does not yet exist.
BUG-000122711	Sentinel Hub WMTS Service does not correctly render in ArcGIS Pro
BUG-000123508	Synopsis: ArcGIS Pro and ArcMap crash when adding the multiple .MH1 files into the Mosaic dataset.
BUG-000123539	'Split Point Results in Zero Length Polyline' when using the <b>Split Centerline</b> tool in ArcGIS Pro when LRS data is located in an enterprise Geodatabase.
BUG-000123722	The advanced symbology options for the <b>Vector Field</b> are not maintained after closing the <b>Symbology</b> pane.
BUG-000123763	The table in Step 7 of the Esri documentation titled 'Connect line segments for labeling' does not match the options in ArcGIS Pro 2.5.
BUG-000123788	Exporting a layout from ArcGIS Pro 2.4 to a raster-based file that contains a raster with DRA (dynamic range adjustment) with a higher than 150 dpi causes striping or blocking in the result.
BUG-000123810	No option to invert a rasters statistics to change its display in ArcGIS Pro.
BUG-000123905	Some machines do not show picture attachments.
BUG-000124629	FeatureLayer in Timbalai 1948 / RSO Borneo (m) (WKID 29873) disappears from SceneView when zooming in.
BUG-000125043	When renaming an item in the <b>Contents</b> and <b>Catalog</b> pane, the minus sign from the Numeric keypad acts as a shortcut key to contract the items.
BUG-000125083	Trace fails to execute (2 parameters are missing or invalid) when start location tables are missing from project.

Issue	Description
BUG-000125201	In ArcGIS Pro while exporting a scene with a HillShade service from ArcGIS Living Atlas, a small portion of tiles from the HillShade service are not generated at specific view angles with higher dots per inch (DPI).
BUG-000125254	ArcGIS Pro does not correctly export Gradient fill symbology in a PDF if the coordinate system of the map is WGS 1984.
BUG-000125280	Running the Surface Difference tool in ArcGIS Pro with the optional 'Output Raster' parameter used will produce an error and a proper output will not be created.
BUG-000125284	Swizzling of the msd is changing the order of the fields in the layer.
BUG-000125329	The Create Vector Tile Package tool does not honor the river placement setup.
BUG-000125336	Publishing a service using ArcPy does not include a custom image thumbnail.
BUG-000125524	The Visibility tool help has an error in the <b>Data Type</b> field in the <b>Syntax</b> section.
BUG-000125592	Create LRS Network from Existing Dataset tool fails if XY Tolerance/Resolution are in degrees
BUG-000125668	Selections are not maintained when using the Save To Layer File tool in ArcGIS Pro.
BUG-000125852	When the Geometric, and the Mask functions are applied on a Worldview-3 Pansharpen raster product and the output layer is exported as a TIF, the background values turn into zero values.
BUG-000125888	SQL reference for query expressions used in ArcGIS
BUG-000126043	Text contents are not preserved when exporting Layout as PDF from ArcGIS Pro.
BUG-000126065	Python out of memory error for simplify polygons with large datasets
BUG-000126179	SQL functions using the ST_Geometry type fail with the " <b>ORA-06520: PL/SQL: Error loading external library</b> " error message on Oracle Solaris 11.3 OS - Oracle 18c Database - 10.7.1 Enterprise Geodatabase environments.
BUG-000126223	The Create Fishnet tool does not work as expected when a variable is defined as a workspace.
BUG-000126241	Network dataset fails to build or builds with errors, when base speed field in street profiles table for historical traffic analysis contains zeroes.
BUG-000126299	The geoprocessing service task is not updating when republishing a geoprocessing service if it uses the same name as the previous services.
BUG-000126302	When a traditionally versioned enterprise geodatabase is selected as the input, publishing the Reconcile Versions geoprocessing service as a web tool fails returning the following error, " <b>00150: Tool Reconcile Versions requires an enterprise geodatabase.</b> "
BUG-000126315	RebuildAddressLocator fails for new ArcGIS Pro locators built with EGDB data from Python
BUG-000126373	The Create Vector Tile Package tool fails to run correctly in Python or a <b>Python</b> window when the machine time is set to Polish.

Issue	Description
BUG-000126379	In the <b>Modify Features</b> pane, tool groups do not stay collapsed when changing between 'My tools' and 'All tools'.
BUG-000126380	Using the Ctrl key and collapsing a tool group in the <b>Modify Features</b> pane does not collapse all groups the same way as the items in the <b>Contents</b> pane.
BUG-000126396	The VRP solver needs to allow time-window breaks when the depots and orders have different TimeZoneIDs, provided that all depots and orders have the same current UTC offset and DST rules
BUG-000126405	Running Aggregate Polygons tool sometimes Crashes or fails with 999999 with specific data that was clipped.
BUG-000126430	In ArcMap and ArcGIS Pro, the Convert Coordinate Notation tool populates all the " values with the values in the previous record if the output is a shapefile.
BUG-000126489	Generate Routes incorrectly updates the Order ID of a route post realignment
BUG-000126511	The legend does not honor the raster function symbology when printing with PrintingTools 10.7.1.
BUG-000126520	Subtypes are dropped after running the Sort geoprocessing tool in ArcGIS Pro.
BUG-000126540	GeoJSON roundtrip (features-to-geojson-to-features) fails for polygons due to Shape_Length and Shape_Area fields
BUG-000126597	Filter arcade function claims that this function returns a FeatureSet object at <a href="https://developers.arcgis.com/arcade/function-reference/data_functions/#filter">https://developers.arcgis.com/arcade/function-reference/data_functions/#filter</a> , this is not the case.
BUG-000126702	Mosaic datasets are not included in search results unless the keyword "mosaic" is provided
BUG-000126769	EnrichLayer returns zeroes for ' <b>2019 Dom Tapestry Segment Name</b> ' and ' <b>2019 Dominant Tapestry Segment</b> ' if input is StdGeo
BUG-000126815	When using the Calculate Geometry Attributes tool following the Select Layer By Attribute in ModelBuilder, if the input for the Select Layer By Attribute tool is a point feature class, the target field does not offer a drop-down to select fields from the selected feature.
BUG-000126871	SDK: Provide access to feature cursors
BUG-000126883	GeoTIFF images with the WGS_1984 Mercator_2SP projection do not line up
BUG-000126900	Using CreateLRSNetwork tool as a stand-alone Python Script fails if specified input is a feature dataset
BUG-000126908	In ArcGIS Pro ModelBuilder, when an inline variable substitution is used with the Make Feature Layer tool and the Resolve Building Conflicts tool, the model does not validate properly.
BUG-000126964	Save To Layer File tool <b>Output Layer</b> parameter validates inline variable workspaces incorrectly.
BUG-000127016	The <b>Select Layer By Location</b> tool in ModelBuilder forwards all objects if inline variable substitution is used in the input data path.

Issue	Description
BUG-000127025	In ArcGIS Pro, Create Vector Tile Index tool does not create the output in the chosen feature dataset.
BUG-000127029	Reconcile/post using a geoprocessing tool fails to update an archive class of a PostGIS table.
BUG-000127034	An incorrect symbol is rendered in ArcGIS Online Map Viewer when a layer with a picture fill is published from ArcGIS Pro.
BUG-000127140	Performance issue when reprojecting vector tile basemaps
BUG-000127173	ArcGIS Pro's handling of group layer transparency is unexpected (it propagates transparency to the sublayers)
BUG-000127230	Sharing parameters are ignored when publishing a service to Portal using the <code> arcpy.UploadServiceDefinition</code> tool.
BUG-000127255	Error when attempting to import Topology rules with ArcGIS Pro.
BUG-000127257	ArcGIS Pro does not allow publishing of Geocoding Services to a standalone ArcGIS Server if the user is not signed in to a Portal for ArcGIS or ArcGIS Online
BUG-000127293	Modified line width for the output profile line is not reflected in the Profile Graph chart in ArcGIS Pro.
BUG-000127329	In ArcGIS Pro, it is not possible to set a decimal value to the <b>Separation</b> property for features with hatched filled symbology.
BUG-000127332	Edit the silent authorization documentation.
BUG-000127459	Using Tab key to delete a numeric field value and move to next column does not commit the change in the <b>Attribute</b> Pane, but it does in the Attribute Table.
BUG-000127493	Scaling multiple 3D multipatch layers together does not work as expected.
BUG-000127498	In ArcGIS Pro, unable to replace ß (german character) with ss character while renaming feature class
BUG-000127512	Visible field selection on a feature class with a joined table resets to all fields checked as visible, and the default field order when the field properties are closed and reopened.
BUG-000127587	ArcGIS Pro: in ModelBuilder the tools Dissolve and Unsplit Line stops the execution of the model without error if output feature class is empty.
BUG-000127602	In ArcGIS Pro, if a transparency is set on a hosted feature layer and the basemap is disabled, the 'Clip the outline of features' option is not honored when the layout is exported to PDF.
BUG-000127604	Feature template is not respecting the settings for the reference scale.
BUG-000127606	In ArcGIS Pro Zonal Statistics as Table tool, generates output for only one record from the data, if 'Terrain' data from Living Atlas Layers in ArcGIS Online is used as an input raster for the tool
BUG-000127738	Thailand Language is not readable when exported ModelBuilder as .pdf file
BUG-000127750	ModelBuilder tool "Create Feature Class" fails to validate and overwrite

Issue	Description
BUG-000127751	ModelBuilder tool "Feature Class to Feature Class" fails to validate and overwrite
BUG-000127763	Sorting a feature class by an integer field that contains null values correctly sorts records containing numeric values, but appears to randomly intersperse the null records
BUG-000127779	Documentation does not explain the case of near intersections in ArcGIS Pro address locators.
BUG-000127784	The <b>Split</b> tool fails with various issues on a feature class if a geographic coordinate system is used and the resolution or tolerance values do not follow best practices.
BUG-000127844	Duplicating a Preset Template does not create a proper copy
BUG-000127866	The legend in ArcGIS Pro layout does not honor the <b>Dynamic Range Adjustment (DRA)</b> for the Stretched renderer.
BUG-000127882	Animation: Support "inclusive" and "exclusive" parameters for time animations on export
BUG-000127915	Inconsistent behavior renaming items in the <b>Catalog</b> pane and the <b>Contents</b> pane for the <b>Catalog</b> view
BUG-000127916	ArcGIS Pro: Dragging a layerfile where no credentials are saved in the database connection file onto a map in a blank, existing project no database connection dialog is displayed.
BUG-000127964	Unable to rename a database, toolbox, or folder by clicking the <b>Contents</b> pane in ArcGIS Pro.
BUG-000128033	The Rebuild Address Locator tool causes the configuration properties to revert back to defaults for locators created through the Create Locator tool
BUG-000128075	Users with the Viewer role can make edits using LRServer and Async GP tools
BUG-000128144	Imported geometries into families (generic model) are not displaying properly.
BUG-000128174	ArcGISPro.exe:ArcGIS.Desktop.Sharing.dll -- ArcGIS.Desktop.Sharing.dll!ArcGIS.Desktop.Sharing.GPSharingWebTool ViewModel+b__1()
BUG-000128311	Annotation edit tool: selecting annotation with the annotation edit tool removes some formatting.
BUG-000128312	Closing the ' <b>Rematch Address</b> ' pane does not terminate the candidate information from the map view in ArcGIS Pro.
BUG-000128381	One-way replica synchronization fails with error: 'Synchronize Replica Failed [...] Table not registered [PEA.GDB_TEMP_USER_IDS]'
BUG-000128447	The export layout does not support the clipping option into the map series if transparency is applied to the last layers in ArcGIS Pro.
BUG-000128473	Upper values are not editable for the custom symbol type in the <b>Vector Field</b> symbology.
BUG-000128570	Changing the Color scheme (ramp) of a classified raster alters the Data Exclusion values.
BUG-000128626	Reshape tool fails to create curves from the existing features on a hosted feature service added from ArcGIS Online to ArcGIS Pro.

Issue	Description
BUG-000128627	The custom projections added to <b>Favorites</b> in the map properties are not maintained in the <b>Favorites</b> list in ArcGIS Pro.
BUG-000128655	Some scalable vector graphics (SVG) appear stretched in ArcGIS Pro.
BUG-000128688	The <b>Group layer name</b> option in the <b>Format Legend Item</b> window is grayed out in ArcGIS Pro 2.5 if the layer is not the first in the table of contents.
BUG-000128690	In ArcGIS Pro 2.5 exporting a large custom sized layout (100x100) with 300 DPI results in an empty export
BUG-000128739	The 'Usage' section of the help for the Identify Narrow Polygons GP tool needs to be updated.
BUG-000128773	ArcGIS Pro Scheduled Tasks does not run on Hosted Feature Services unless the full Rest Service URL is in the input.
BUG-000128791	When in Text-Editing mode, <b>Edit</b> , <b>Arrange</b> , and <b>Anchors</b> are not grayed out despite not applying to text symbols.
BUG-000128817	Alternate symbols in scale ranges re-order themselves in the UI
BUG-000128831	<b>Stretched</b> renderer is missing the <b>Advanced Labeling</b>
BUG-000128870	Area identified as a narrow area in ArcMap is no longer identified as a narrow area by the Identify Narrow Polygons GP tool in ArcGIS Pro.
BUG-000128970	Dynamic text and Magnetic Declination values are incorrect.
BUG-000128974	Creating a polygon feature of type <b>Circle</b> does not honor the <b>Radius</b> value set after specifying the Absolute X,Y point
BUG-000128985	MultipartBuilder.RemoveSegment method is returning incorrect results when the closeGap parameter is set to false and segment to remove is an interior segment.
BUG-000129004	Exporting a map to JPEG does not honor the selection if there is a route event layer in the selection.
BUG-000129049	The selection does not show in the layer added to display from ModelBuilder using the select layer by attribute tool in ArcGIS Pro
BUG-000129063	AutoCAD group entities are failing to load in our MSC feature classes.
BUG-000129094	Moving a feature place the feature in wrong place, if the data and map have different coordinate system
BUG-000129096	Text symbol alignment settings in the legend of a layout are not honored when exported from ArcGIS Pro 2.5.
BUG-000129130	The Train Deep Learning Model tool does not recognize the output of the Export Training Data For Deep Learning tool if <b>Meta Data Format</b> is set to KITTI Labels. Change the default Meta Data Format in Export Training Data For Deep Learning tool to PASCAL Visual Object Classes.
BUG-000129157	When KML layers are turned on and off in a layout in ArcGIS Pro from the <b>Contents</b> pane, the map frame does not update which KML layers are displayed.

Issue	Description
BUG-000129176	Exporting to PDF from ArcGIS Pro 2.5 with clipped extents and a transparent background exports with solid colors (non-transparent).
BUG-000129204	Slow performance in the Select by Attributes tool for a feature class.
BUG-000129255	Run Apply Event Behaviors tool will acquire additional Event locks
BUG-000129272	The Synchronize Changes geoprocessing tool fails in ArcGIS Pro 2.5 when using a geodata service.
BUG-000129303	Sync failure on feature layers that have had many edits applied
BUG-000129354	ArcGIS Pro adds Z-enabled features to new feature class created from table when no Z values are present or specified.
BUG-000129433	Exporting the pie chart in the layout to PNG or JPEG duplicates chart
BUG-000129453	When running a service area analysis in ArcGIS Pro with <b>High Precision polygons</b> , if the cutoff value is a greater distance than to the edge of the network from your facility point, and the trim polygon distance is either the same as the cutoff value, or a slightly smaller value, the resulting polygon is inaccurate and has streaking lines.
BUG-000129503	Map image layer item thumbnails are red when published to 10.6.1
BUG-000129524	Create feature fails when attribute values do not fall within domain
BUG-000129535	In ArcGIS Pro, the 'Zonal Statistics as Table' tool cuts the length of the string field in the output table if the string field contains a 2-bit character, such as a Japanese character.
BUG-000129789	When adding a new relationship feature, please make it the selected item in the tree view
BUG-000129804	Feature Services hosted in Spatiotemporal component of ArcGIS Data Store gives rectangles (aggregated view) instead of points while printing as PDF in Portal for ArcGIS.
BUG-000129828	Enabling an Azure SQL Database with Hebrew_CI_AS Collation as an enterprise geodatabase in ArcGIS Pro and ArcMap fails with ERROR: Cannot resolve the collation conflict between "Hebrew_CI_AS" and "SQL_Latin1_General_CI_AS" in the equal to operation.
BUG-000129510	The Portal for ArcGIS <b>'Calculate Density'</b> analysis tool fails if the input is a feature layer that references enterprise data or copied to the server.
BUG-000129611	When importing multiple layouts, if the ArcGISProject object is set to CURRENT and the reuse_existing_maps parameter is set to True, multiple copies of the same map are imported.
BUG-000129678	" <b>Defined interval</b> " method for TIN, terrain, and LAS dataset class breaks renderers do not work.
BUG-000129899	The Export Layout method is not working in the PDF format in ArcGIS Pro SDK 2.5.
BUG-000129913	Attachments added to ArcGIS Online hosted feature services do not appear in reports generated in ArcGIS Pro 2.5.
BUG-000129999	Running the <b>Create Reviewer Session</b> custom step object via Workflow Manager requires elevated privileges if the data workspace's DEFAULT version is set to protected.

Issue	Description
BUG-000130000	Closest point on the polygon outline anchor point does not give expected results
BUG-000130008	arcpy.Describe(parameters[1].value[0][0]).fields is not working as expected in ModelBuilder.
BUG-000130012	[IGN] Maplex word spreading is inconsistent when labeling lines.
BUG-000130019	[IGN] Maplex - Line river label overlapping street weighted 999 unnecessarily
BUG-000130049	The Eliminate tool does not accept either feature layer or feature class in ModelBuilder when an inline variable substitution is used for the input.
BUG-000130068	When creating a grid in ArcGIS Pro, if the East and West labels are set to vertical, the offset option does not ensure the labels are inside the map if a negative value is used.
BUG-000130075	Object Classification for Deep Learning fails with duplicate fields error when executed twice.
BUG-000130089	Inability to query more than 500 features from REST endpoint ExportMap, if the map service has the feature binning enabled.
BUG-000130102	AUS/NZL PointAddress locator does not return city/locality in labels
BUG-000130107	The Extract LAS tool does not allow for setting of a transformation (XY or VCS) in the Output Coordinate System environment setting.
BUG-000130196	The Create Feature Locator tool in ArcGIS Pro does not work with French language pack.
BUG-000130218	It is not possible to add unlisted values for <b>Unique Symbology</b> to an empty, preexisting feature class.
BUG-000130251	The firstly added custom output field to the primary table of a polygon feature class with the metro area role in a locator does not display any data and display incorrect information with a value of zero when added another custom output field to it.
BUG-000130306	Bad coded domain values displayed in fgdb for diagram features
BUG-000130316	<b>Select by location - Intersect</b> selects points that don't intersect the polygons
BUG-000130347	Tables: Refresh the table view to show the updated FID values after shapefile edits are saved
BUG-000130502	Error 000852 Cannot add field to when attempting to add a non-nullable Date field to a feature class stored in a DB2 geodatabase
BUG-000130519	<b>Identify</b> for TIN not working with German language pack
BUG-000130589	The Calculate Field tool in ArcGIS Pro 2.5 erroneously allows users to add new fields with special characters to an ArcGIS Online hosted feature layer. This makes the layer unusable and the fields cannot be deleted.
BUG-000130680	Classifying a feature class/raster layer using manual breaks does not accept the input if the decimal separator is different than the standard one set for the operating system.
BUG-000130730	ModelBuilder -Exporting Model Which Contains Script Tool (e.g. Add Geometry Attributes or Calculate Geometry Attributes) to Python File Exports Incorrect Code

Issue	Description
BUG-000130752	ArcGIS Pro creates raster attribute table (RAT) for rasters with over 16 bit depth leading to poor performance relative to ArcMap.
BUG-000130757	Features that vary by size and color attributes disappear when panning or zooming.
BUG-000130800	Printed layouts generated in ArcGIS Pro 2.5.1 include their Web Map Services (WMS) in legends even if the legend item is deactivated in the <b>Contents</b> pane.
BUG-000130840	Running the TIN To Raster tool from a model does not allow user defined values for <b>Sampling Value</b> when it is set as a model parameter.
BUG-000130901	Select Layer By Location GP tool is slow for feature service layers with a definition query
BUG-000131147	Changing subtypes and accepting defaults will replace not nullable field values with an empty character at ArcGIS Pro 2.5
BUG-000131203	ArcGIS Pro 2.5.1 crashes when running Generate Rubbersheet Links tool with a particular batch of data.
BUG-000131213	Publishing a branch versioned dataset as a feature service with Version Management capabilities fails when the registered data store is Microsoft Azure Database for PostgreSQL.
BUG-000131284	ArcGIS Pro handles WFS URL requests differently than WMS URL requests
BUG-000131332	Batch geocoding addresses with units has poor match rate and performance when locator is based on data in an enterprise geodatabase
BUG-000131335	The Import Territory Solution geoprocessing tool gives “ <b>Error 999999: Something unexpected caused the tool to fail</b> ” when using a double field in the ‘ID_Field’ Parameter.
BUG-000131347	Centerline feature class that is currently/has been associated with an LRS is uneditable within ArcGIS Pro when unversioned
BUG-000131410	<b>Invalid Events</b> check reports incorrect measure values in measure gap scenario
BUG-000131411	<b>Evaluate Polyline Length</b> check with <b>Segments</b> option enabled fails to validate multipart features in Attribute (validation) rule workflows
BUG-000131412	<b>Polyline or Path Closes on Self</b> check does not detect closed features in Attribute (constraint) rule workflows
BUG-000131413	Errors not detected when <b>Subtype</b> filter is applied in Attribute (validation) rules
BUG-000131414	Update <b>Duplicate Vertex</b> check to find only contiguous vertices in the tolerance distance in batch job executions
BUG-000131415	Evaluate REST operation is not detecting errors when using <b>Selection</b> parameter with Reviewer-based Attribute (validation) rules
BUG-000131416	Evaluate REST operation is skipping feature classes that contain Attribute (validation) rules
BUG-000131417	<b>Evaluate Polyline Length</b> check is not returning error results in multiple scenarios

Issue	Description
BUG-000131418	<b>Duplicate Vertex, Evaluate Polygon Perimeter and Area, Evaluate Polyline Length, and Feature on Feature</b> checks are returning incorrect results in Attribute (constraint) rules
BUG-000131450	<b>Feature on Feature</b> check's <b>Features to Compare</b> control does not populate with region formats that use decimal comma separator
BUG-000131528	[NIM089771] tag is ignoring spaces if there is more than one space in a row
BUG-000131673	Performance issue with 10.8 Geocoding Services for locators created with the Create Locator tool
BUG-000134463	Cost Path and Cost Path As Polyline do not work when the input destination raster has a cell size that is different from other inputs.
ENH-000087698	Provide the ability to change the color of the vertices while editing in ArcGIS Pro.
ENH-000102134	When performing <b>Delete items</b> in portal connection of ArcGIS Pro, to display the item name in the dialog box of confirmation message.
ENH-000103836	Popups: Allow reordering of the <b>Fields</b> list in the popup configuration pane
ENH-000106201	Provide functionality with the <b>Locate</b> tool in ArcGIS Pro similar to the <b>Find</b> tool in ArcMap in regards to what match results get returned and the " <b>Show All Candidates</b> " setting.
ENH-000106896	Add an optional Boolean parameter to carry over input attributes to the output table for the Bearing Distance To Line, Table To Ellipse, and XY To Line geoprocessing tools.
ENH-000106918	Add "Custom Overlay Grid" to the Layout options for Grids/Graticules in ArcGIS Pro.
ENH-000108429	In ArcGIS Pro, provide a property in Vector Tile format that can maintain the <b>Block Progression</b> setting to turn individual characters of labels upright.
ENH-000109103	Create hachures between the tops and bottoms of slope lines
ENH-000109150	Clarify inputs for the Set Mosaic Dataset Properties geoprocessing tool's <b>Order Field</b> parameter
ENH-000109467	Add AutoCAD 3D Solid entity support into ArcGIS Pro without Data Interoperability extension.
ENH-000112436	Have the ability to overwrite Web Tools from ArcGIS Pro to Portal
ENH-000114361	Provide the ability to select a field for each axis when creating a custom overlay grid in ArcGIS Pro
ENH-000115158	Provide option to save intermediate data while being ran through a geoprocessing tool window
ENH-000116406	Provide the ability to click features and obtain COGO measurements in ArcGIS Pro.
ENH-000116495	Allow users to replace data source paths for all the layers in the map (MAP-1328)
ENH-000117363	When importing map files (.mapx) or layout files (.pagx) both the file extensions are shown while browsing in ArcGIS Pro, only respective files are to be shown in the window while browsing.
ENH-000117489	Map Series - control export page order based on " <b>Group By</b> "

Issue	Description
ENH-000117638	Convert ArcMap layout's Neatline into a rectangle graphic in ArcGIS Pro when importing layouts
ENH-000117670	Include "isFeatureLayer" layer property on annotation subclass layers.
ENH-000117676	Allow for multiple Positions for labels that combine best position, centering, left and right placement to account for label overlap
ENH-000118963	ArcGIS Pro should allow search for the content within a portal group.
ENH-000119370	Improve searching, sorting, and filtering to find portal items you want to use.
ENH-000119438	Make item or owner URL, and local item file paths a clickable link both in the browse dialog details panel and the <b>Catalog</b> view and pane popup
ENH-000119472	The ability to export the layout in ArcGIS Pro to a .pagx file through Python
ENH-000120715	Type string shown for portal items doesn't indicate when a feature layer is a view layer
ENH-000120835	Spatial Reference - ability to modify a Map's spatial reference and transformations
ENH-000121518	Add overwrite functionality for Imagery Layers in ArcGIS Pro
ENH-000121879	Doc - ENH-000121879 Branch Versioning and Portal documentation enhancements
ENH-000122593	Add support for fully adjustable stereo cursor Z sensitivity
ENH-000122597	ArcGIS Pro Image Analyst: Change color of Stereo Cursor
ENH-000123476	Allow Event Layers made from Make XY Event Layer tool to have their positions moved by changing the XY coordinate entry in their attribute table.
ENH-000123878	ArcGIS Pro and ArcGIS Desktop do not recognize a large number of CADRG/ECRG file types by default.
ENH-000124322	Expose Reconcile ConflictDetectionType and ConflictResolutionType in the ArcGIS Pro SDK
ENH-000124426	Save Variable List from Data Browser
ENH-000124884	SDK: Add VersionManager .GetVersionNames( ) method to return a list of version names without instantiating a collection of Version objects
ENH-000125361	Allow ArcGIS Pro to access Portal via a web proxy with IWA where Pro and Portal reside in different domains
ENH-000125381	Composite should allow for the ability to disable reverse geocoding of specific locators
ENH-000125481	Support partial feature results in ArcGIS Pro (gdbFN-954)
ENH-000125522	No warning message when deleting a map or layout
ENH-000125682	[ENH-000088596] Tables: Enhancement: Allow a way to quickly see a field that is indexed in ArcGIS Pro (like the * in arcmap).
ENH-000125878	Provide the Ability of the <b>Attributes</b> Pane to show a count/number of attachments for a selected feature.

Issue	Description
ENH-000126441	Allow for full use of fields used in constituent locators when reverse geocoding in a composite locator
ENH-000126831	Support multiple structural attachments for a single device
ENH-000126968	Parcel points are not created for connection lines when building a parcel fabric in ArcGIS Pro.
ENH-000127007	Add the ability to change the spatial reference of a locator created with the Create Locator tool from the properties dialog
ENH-000127081	Request to add the 'Convert marker symbol to polygons' option when exporting to PDF in ArcGIS Pro, as is available in ArcMap
ENH-000127307	ArcGIS Pro documentation states web layers behave like file geodatabase feature classes when used in ArcGIS Pro, but lacks information on how to utilize them in python that comes with the software.
ENH-000127548	Requesting a functionality to support & return duplicate addresses using New Locators if same street is present in two or more different locations.
ENH-000127558	Allow to Scale Annotation Features using ArcGIS Pro's Scale tool ( <b>Edit tab - Modify Features pane - Alignment Group</b> ).
ENH-000127867	Inserting a new break value for a raster dataset using the <b>Manual Interval Classified</b> renderer should place the new color according to the Color Ramp.
ENH-000128260	Use Chromium Embedded Framework for sign in dialog instead of IE
ENH-000128556	Elevation surfaces that are far away from the camera/observer point are drawn at reduced resolution
ENH-000128731	Reports: Support related-reports within the Details section of a sub-report using a relationship class
ENH-000129216	Exporting a CSV table from ArcGIS should include a CRLF value on the last record to prevent read/write issues from third-party applications
ENH-000129306	store the "user.config" files in AppData\Roaming instead of AppData\Local
ENH-000129348	Cannot drag-drop items from within Favorited containers to a other Panes or Views
ENH-000129502	Add the capability to enter a unit address in the format of unit# Street# when creating Australian Address Locator.
ENH-000129533	New path for exporting layout location in ArcGIS Pro 2.5 does not synchronize with folder icon.
ENH-000131144	Geojson to Features tool errors when first feature has short string attribute (10 chars) and next feature has long string (1000 chars)
NIM061499	Create Locator tool should work when using joined data
NIM080452	Write correct values on altitude tags for a KML when exporting Multipatch to Collada.
