

ArcGIS Pro 2.7 Issues Addressed

Each [major, minor, and patch release](#) of ArcGIS Pro includes fixes for bugs that were reported to Esri Technical Support. The bugs that were fixed in ArcGIS Pro 2.7 are listed in the table below.

More information about an issue on the list can be found by [searching for the BUG number on the Technical Support site](#).

ArcGIS Pro 2.7 also includes extensive new functionality, which is described in the [what's new topic](#).

Issues addressed at ArcGIS Pro 2.7.7

ArcGIS Pro 2.7.7 fixes the issues listed below and includes the fixes listed under 2.7.0, 2.7.1, 2.7.2, 2.7.3, 2.7.4, 2.7.5, and 2.7.6.

Issue	Description
BUG-000140314	Realigning an existing centerline fails and returns the error message, "Error: Underlying DBMS error [[Microsoft][ODBC Driver 17 FOR sql Server][SQL Server] Conversion failed when converting from a character string to uniqueidentifier.] [ENGINEERING_STA_NETWORK]."
BUG-000147765	Certification of Microsoft ODBC Driver 18 for SQL Server connections.
BUG-000148577	The slope result between the Planar and Geodesic options in ArcGIS Pro is incorrect.
BUG-000148667	Certain feature services or map services from ArcGIS Server 11.0 cause ArcGIS Pro to stop responding.

Issues addressed at ArcGIS Data Interoperability 2.7.2

Data Interoperability is an optional extension that can be installed on ArcGIS Pro. ArcGIS Data Interoperability 2.7 must be installed prior to version 2.7.2. ArcGIS Data Interoperability 2.7.2 fixes the issue listed below and includes the fixes listed under ArcGIS Data Interoperability 2.7.1.

Issue	Description
BUG-000145606	Update the ArcGIS Data Interoperability extension to take advantage of the Log4J updates.

Issues addressed at ArcGIS Pro 2.7.6

ArcGIS Pro 2.7.6 fixes the issues listed below and includes the fixes listed under 2.7.0, 2.7.1, 2.7.2, 2.7.3, 2.7.4, and 2.7.5.

Issue	Description
BUG-000145599	Remove log4j from GeoAnalytics Tools and Apache Spark in ArcGIS Pro. Learn more about BUG-000145599

Issues addressed at ArcGIS Pro 2.7.5

ArcGIS Pro 2.7.5 fixes the issues listed below and includes the fixes listed under 2.7.0, 2.7.1, 2.7.2, 2.7.3, and 2.7.4.

Issue	Description
BUG-000143377	When using the Move tool and Snap To Grid option is used, the z-value of the feature being moved is set to 0. Snapping to the grid should not affect the z-value.
BUG-000143529	Error occurs when running "service area analysis" tool: Error DBMS table not found Invalid object name 'sde.sessions_137833_5'
BUG-000143779	After posting changes to a protected default version, the map display is not correctly refreshed.
BUG-000144420	Reconcile fails with collation conflict error when database collation is different than instance collation.
BUG-000145187	Without reconciling and posting, attachments added in a branch version fail to open after closing ArcGIS Pro.

Issues addressed at ArcGIS Pro 2.7.4

ArcGIS Pro 2.7.4 fixes the issues listed below and includes the fixes listed under 2.7.0, 2.7.1, 2.7.2, and 2.7.3.

Issue	Description
BUG-000131570	After applying a definition query, if a custom arcade expression is used to symbolize the layer, the feature counts in the Symbology pane does not respect the definition query.
BUG-000136981	Divide COGO lines incorrect cogo attributes for feature services.
BUG-000137081	Difference Polygon tool from Production Mapping does not honor snapping.
BUG-000137547	ArcGIS Pro crashes when client-side timeout is exceeded and stop editing cannot be completed.
BUG-000138305	Labels are placed in the wrong areas when using the Maplex Label Engine in ArcGIS Pro.
BUG-000139092	ArcGIS Pro ModelBuilder fails to run when using distances as a parameter for the Multiple Ring Buffer geoprocessing tool.
BUG-000139157	Branch Versioning lock leak occurs after Conflict Manager or Differences pane is opened.
BUG-000139546	Features are sometimes displayed as duplicated or not displayed when editing a feature service layer.
BUG-000139856	Changing the halo symbol color resets the Text Fill Symbol properties.
BUG-000139860	Enhance enable enterprise geodatabase geoprocessing tool to support new naming convention of autonomous Oracle cloud database service names.
BUG-000139968	Upgrade can create incorrect conditional index on GDB_Locks table.

Issues addressed at ArcGIS Pro 2.7.3

ArcGIS Pro 2.7.3 fixes the issues listed below and includes the fixes listed under 2.7.0, 2.7.1, and 2.7.2.

Issue	Description
BUG-000136000	The Dubai font does not reflect the correct form for the Arabic word, 'دي'.
BUG-000136365	The Zoom To function in the Find Subnetworks pane is not working.
BUG-000136412	Slow performance when changing branch versions for a single layer in the ArcGIS Pro map.
BUG-000137172	Annotations are not displayed in ArcGIS Pro 2.7 if the data is projected on the fly.
BUG-000138079	Crash occurs when "Beta: Use Unicode UTF-8 for worldwide language support" is enabled.

Issues addressed at ArcGIS Pro 2.7.2

ArcGIS Pro 2.7.2 fixes the issues listed below and includes the fixes listed under 2.7.0 and 2.7.1.

Issue	Description
BUG-000122514	In ArcGIS Pro, PDF documents created using ExportToPDF function creates a corrupt file if a basemap is present in the Map Series using Python (IDLE) and the Python window within ArcGIS Pro.
BUG-000132426	The existing cache definition does not persist when publishing from ArcGIS Pro 2.6 to ArcGIS Server.
BUG-000135154	The Spatial Join tool does not honor the processing extent of the environment settings.
BUG-000135324	Unable to create a utility network in an Azure-managed SQL Server instance.
BUG-000135542	A selection cannot be cleared using the setSelectionSet method and instead will create a new selection with zero records.
BUG-000135994	When exporting a map in ArcGIS Pro using the Image Analyst extension with List By Perspective and Set as Focus Image are selected, the exported file is blank.
BUG-000136397	The Apportion Polygon (Analysis) tool crashes ArcGIS Pro when processing data.
BUG-000136563	Parallel and Perpendicular constraints don't work for sketch segments.
BUG-000136770	Regression - A Page Query on a stand alone table stopped working.
BUG-000136807	Split Features GP tool crashes ArcGIS Pro 2.7 when executed in a model.
BUG-000136889	After upgrading enterprise geodatabase 10.7.1 to 10.8.1 and running the query to get Next_RowID, the following error message is returned: Msg 8144, Level 16, State 2, Procedure DBO.i13_get_ids, Line 0 [Batch Start Line 0] Procedure or function i13_get_ids has too many arguments specified.
BUG-000137068	Locate pane search results option to Add to Feature Class Crashes with Map Specific layer
BUG-000137089	Edit vertices tool is performing a spatial search for every vertex on the line which is selected for the operation.
BUG-000137117	Invalid Topology error with specific parallel overlay operation only on specific machines.

Issue	Description
BUG-000137144	Reshaping a polygon causes ArcGIS Pro to crash.
BUG-000137243	The FMV Video Multiplexer in ArcGIS Pro 2.6+ fails to calculate the frame corner coordinates.
BUG-000137289	Parent_JOB value is removed after modifying job Description - Workflow Manager.
BUG-000137427	Copying shapes with user defined coordinate system can fail in an Oracle database when cluster tolerance is 0.0.
BUG-000137444	Upgrade CefSharp and CEF to 86.0.241
BUG-000137542	Grids: UI incorrectly shows the visibility settings for the previously selected label component.
BUG-000137782	Feature layer in ArcGIS Pro does not honor the definitionQuery property for existing layers in the project if no definition query is assigned to it.

Issues addressed at ArcGIS Data Interoperability 2.7.1

Data Interoperability is an optional extension that can be installed on ArcGIS Pro. ArcGIS Data Interoperability 2.7 must be installed prior to version 2.7.1.

Issue	Description
BUG-000136607	After installing ArcGIS Pro 2.7, users are unable to start Data Interoperability Workbench. The app hangs and returns a license error.

Issues addressed at ArcGIS Pro 2.7.1

ArcGIS Pro 2.7.1 fixes the issues listed below and includes the fixes listed under 2.7.0.

Issue	Description
BUG-000135206	Aggregate Polygon is hanging for this ICGC dataset
BUG-000136364	There are missing graphics in the existing ArcGIS Pro projects after the 2.7 updates. Exporting an existing layout as PDF in ArcGIS Pro 2.7 does not export rectangle frames.
BUG-000136608	Inserting layout text with spellcheck turned on causes ArcGIS Pro to crash on some non-English operating system machines.

Issues addressed at ArcGIS Pro 2.7.0

Issue	Description
BUG-000085652	Double or triple entries in Customize the Ribbon tab inside the project options.
BUG-000089776	Adding a blank line break to the beginning or end of a label expression disappears when using the Maplex Label Engine.
BUG-000098135	Add to Display - Add using actual name and not the display name.
BUG-000098749	Question mark should not flipped for RTL Hebrew LP.

Issue	Description
BUG-000100148	Add warning to Symbology pane when Show statistics is chosen and the data's records exceed the maximum sample size
BUG-000101690	The Append tool should return a better error message when it fails because the GlobalID field does not have a unique index & PreserveGlobalIds=True.
BUG-000101828	Add ability to use key numbering for all features.
BUG-000102316	ArcGIS Pro Add WMS Server Connection duplicates the request and service parameters in the URL causing the connection to fail.
BUG-000102368	New analyzer needed for popup if it contains both text and fields.
BUG-000103631	The Layer To KML tool in ArcGIS Pro does not respect the folder and subfolder structure.
BUG-000107535	There is no way to change geocoding options, such as minimum match and minimum candidate score, within the Interactive Rematch window in ArcGIS Pro.
BUG-000108431	Allow users to modify point outline for multiple symbols unique value and graduated renderers.
BUG-000108912	When applying Unique Values symbology for a raster dataset that has a colormap, colors are not retained or accurately matched with the values in the designated Value field if there are nulls.
BUG-000109143	The SOAP binary response returns an invalid byte array.
BUG-000109684	PostgreSQL: CR319333: Create a Spatial Index on a Materialized View.
BUG-000110382	Geoprocessing pane favorites still shows translated tool names after language pack has been uninstalled.
BUG-000110408	Add Locations and Calculate Locations tools do not expose the Search Query parameters in the UI.
BUG-000111662	The text of PDF files exported from ArcGIS Pro via the Export Layout button jumbles when edited in Adobe Acrobat Pro DC.
BUG-000112153	Linear Referencing: Issues with the Overlay Route Events tool.
BUG-000112790	l18N-RTL: Back/Forward arrows should not flip but functional wise needs to be reversed.
BUG-000113353	The ArcGIS Pro script tool validator does not respect the changes made to the script when using the Script Editor .
BUG-000113954	Raster to DTED (0,1, 2) tool output is incorrect for -50 Degrees South.
BUG-000114612	KML created through Layer to KML tool in ArcGIS Pro does not maintain Folder tree structure in ArcGIS Earth Layer List.
BUG-000114646	Add Join in ArcGIS Pro yields the wrong data when input as view or layer with a query.
BUG-000114846	Kml file exported from Layer to KML geoprocessing tool in ArcGIS Pro 2.1.3 opening in Google Earth as black boxes.
BUG-000114973	Pop-up in the map viewer does not show the information of related tables.

Issue	Description
BUG-000115352	Black color in RGB (0,0,0) is set as (100,100,100,0) in CMYK instead of (0,0,0,100) in ArcGIS Pro.
BUG-000115504	The ArcGIS Pro Append tool is very slow if the target feature class participates in a relationship class with messaging enabled.
BUG-000115667	Summary Statistics tool returns the error 999999 when using 29 million features as input.
BUG-000115675	Czech language characters do not display correctly in attribute tables in ArcGIS Pro 2.2, although the display is correct in the map.
BUG-000116163	In ArcGIS Pro when arcpy.env.AddOutputsToMap is set to False, the object fails to exist.
BUG-000116314	When employing Enable wrapping around the date line in ArcGIS Pro, the grid (graticule) that is applied to the wrapped map does not extend across the entire data extent.
BUG-000116921	Calculating geometry when downloading a map from ArcGIS Server fails.
BUG-000117345	Attribute pane calendar control doesn't allow dates before 01.01.100.
BUG-000117383	In ArcGIS Pro, shadows for multipatch features do not render correctly at certain map extents for specific data.
BUG-000117598	Select by attribute does not recognize Japanese characters in the attribute table.
BUG-000117716	Bulk insert/delete suggestion for apply edits optimization.
BUG-000117770	Output of a model which uses an in-line variable in the output name displays an incorrect name when the output is added to the map displays in ArcGIS Pro.
BUG-000118816	An accelerator set for the Select tool does not function.
BUG-000119135	The Geoenrichment process on a file geodatabase feature class works in Business Analyst Desktop but fails with 'Error 999999' in ArcGIS Pro.
BUG-000119894	Displayed values for fields HorizontalAlignment and VerticalAlignment do not properly describe movement of text in the annotation feature class.
BUG-000120302	The Table to Excel geoprocessing tool fails when the input table is the output table from the Make Query Table geoprocessing tool, and Use domain and subtype description is checked.
BUG-000120578	In ArcGIS Pro, editing time in a Date field using the Date Time picker from the attribute table reverts the date to the date of the current day (today).
BUG-000120906	The Apply Symbology From Layer and Make Feature Layer tools do not work in a model when the input uses an inline variable.
BUG-000121056	The LAS Dataset to Raster tool returns the following error, " ERROR 000622: Failed to execute (LAS Dataset To Raster). Parameters are not valid. ERROR 000628: Cannot set input into parameter interpolation_type. " when Interpolation_Type is set when run via ArcPy.
BUG-000121357	When using the State Plane (US feet) projection, the area value returns in Calculate Geometry and Field Calculator are different.
BUG-000121890	Feature class wizard enhancements.

Issue	Description
BUG-000122240	The Iterate Rasters function in an ArcGIS Pro model performs slower than the same tool in an ArcMap model when iterating through rasters in a file geodatabase.
BUG-000122278	Layer to KML does not support a selection set on the input layer.
BUG-000122441	Error 999999 when dissolving line feature using Unsplit lines option of Dissolve and the input contains null geometry.
BUG-000123306	While adding dataset with feature class and dataset of the same name, only layer with same name as dataset is added in ArcGIS Pro.
BUG-000123330	In ArcGIS Pro Model Builder, the Table to Table tool field map options are not preserved if the output location is changed.
BUG-000123374	In ArcGIS Pro Model Builder, the Feature Class to Feature Class Field Mapping parameters are not preserved when the input feature class is changed.
BUG-000124082	Label Visibility Scales are not honored in published Vector Tile Packages/Layers from ArcGIS Pro 2.4.
BUG-000124136	Adding a layer file (.lyrx) from a folder in the Layer To KML tool in ArcGIS Pro 2.4 creates no output.
BUG-000124647	The analyzer windows does not allow to register the data source while publishing a Web Tool from an unregistered source.
BUG-000124939	The Raster Calculator tool in ArcGIS Pro returns a Signed pixel depth raster as the output of a Con expression when one of the input is a Signed pixel depth raster and Mask is used with the tool.
BUG-000125106	Tables: When using Enter to quickly edit a field, the cursor can move to the front of the existing text.
BUG-000125236	The error message, ERROR 130051: Input feature class is not registered as versioned is returned when running Calculate Geometry for area on layers containing joins.
BUG-000125406	Portal locators don't work in composite locators.
BUG-000125418	The Combine tool in ArcGIS Pro truncates the name of the input raster to 16 characters in the attribute table of the output raster.
BUG-000125789	In ArcMap and ArcGIS Pro, the Bearing Distance To Line tool generates lines having 0 degrees instead of the specified bearings when the distance exceeds the extent of the map near the North pole.
BUG-000125850	CoordinateSystemsControl does not honor vertical coordinate system settings if a different XY coordinate system is selected after selecting a vertical coordinate system.
BUG-000126050	Unable to create new feature class when map is set to ICS.
BUG-000126299	The geoprocessing service task is not updating when republishing a geoprocessing service if it uses the same name as the previous services.
BUG-000126516	In ArcGIS Pro, the Create Vector Tile Package tool does not honor the 'ArcGIS_Online_Bing_Maps_Google_Maps' scale level in the Tiling Schemes folder.
BUG-000126520	Subtypes are dropped after running the Sort geoprocessing tool in ArcGIS Pro.

Issue	Description
BUG-000126840	When layers are added to a map by the ApplySymbologyFromLayer tool in a model, an extra string '_Layer' followed by an arbitrary digit is appended to the layer name.
BUG-000127114	In ArcGIS Pro 2.4.2, the Apply Symbology From Layer tool output does not add to display in Table of Content when using the Make Feature Layer tool as the input.
BUG-000127424	U.S. address 1 Blue Slip, Brooklyn, NY 11222 returns the wrong location in world geocoding service.
BUG-000127458	Delineate TIN Data Area does not display the expected output in ArcGIS Pro.
BUG-000127545	Offset X and Offset Y of certain line features not honored by legend patches in ArcGIS Pro.
BUG-000127564	Calculate Field fails if the Calculation attribute rule is enabled and the Enable Undo option is disabled.
BUG-000127773	Saving and Closing a Georeferencing section causes shifts.
BUG-000127787	Python backstage incorrectly shows `Cannot modify the default Python environment` if you do this.
BUG-000127899	SunShadowFrequency: Start Time parameter shows Error 050153 when only date is specified.
BUG-000128146	Implement IArchivableObject so that the Layer Properties window in ArcGIS Pro displays archiving info correctly.
BUG-000128312	In ArcGIS Pro, closing the Rematch Addresses pane does not terminate the candidate information from the map view.
BUG-000128558	In Drone2Map for ArcGIS, the volume calculation results show the area but changing the unit does not dynamically change the area. However, the unit next to the area changes.
BUG-000128811	The Copy geoprocessing tool in ArcGIS Pro fails with the error " DBMS table not found [ORA-04043: object does not exist] ".
BUG-000128848	In ArcGIS Pro, an ASCII raster is not recognized if the header is in upper case.
BUG-000128978	Multiple clicks required to make the domains drop-down appear when connected to an enterprise geodatabase in ArcGIS Pro 2.5.
BUG-000128980	Using a geographic coordinate system in a local 3D scene for a specific dataset causes severe geometry issues.
BUG-000129141	The 'Model Builder' title and iterator tools are not localized in ArcGIS Pro.
BUG-000129157	When KML layers are turned on and off in a layout in ArcGIS Pro from the Contents pane, the map frame does not update which KML layers are displayed.
BUG-000129163	In ArcGIS Pro 2.5 LAS dataset points disappear when zoomed in.
BUG-000129196	The Directional Distribution (Standard Deviational Ellipse) tool does not honor the ' Output has Z value - Disabled ' ENV setting.
BUG-000129335	Error 999999 is returned, when the Multipatch feature class is used for Input Features in the Update Feature Z tool in ArcGIS Pro and ArcMap.

Issue	Description
BUG-000129416	Create Feature Class does not create output when model is run as tool; Enable Editor Tracking gives error " ERROR 000110: does not exist ".
BUG-000129457	Small shift in the location of the Measure icon when creating new events in Roads and Highways Event Editor.
BUG-000129537	Preserve SQLite does not work in the ArcGIS Pro 2.5 Consolidate Project tool.
BUG-000129589	When working with Stereo Imagery in ArcGIS Pro, the screen turns black when Hardware Anti-Aliasing is turned on.
BUG-000129607	Tables: Return better results when filtering with fields from the right side of a M:M join.
BUG-000129835	DE File parameters in a GP tool that have no filter do not show all file types in the input browser
BUG-000129991	Duplicate and looping requests are generated when creating new related features in a feature service using ArcGIS Pro.
BUG-000130073	Layout view does not honor dimension feature class angles in ArcGIS Pro 2.5.
BUG-000130127	[Data-specific] ArcGIS Pro 2.5 Cannot Convert Attached Excel Sheet with 'Excel to Table'; Multiple Runtime Errors Returned.
BUG-000130138	The World Geocoder returns a suggestion for an administrative place-name that cannot be found by the findAddressCandidate request that uses the suggestion, if a search extent is used that intersects the administrative place-name extent, but does not contain the point location associated with the magicKey.
BUG-000130158	Era is not displayed correctly when displaying Date attribute in layout with map series attribute of dynamic text.
BUG-000130166	The Field Calculator expression and code block fields are blank when input includes inline variables in ModelBuilder.
BUG-000130190	Uploading a service definition from ArcGIS Pro 2.5 (French Version) returns the following error message, "ERROR 000732: Server: the HOSTING_SERVER dataset does not exist or is not supported" . "arcpy.UploadServiceDefinition_server" function used with the "HOSTING_SERVER" parameter in the "in_server" parameter: UploadServiceDefinition_server(in_sd_file, in_server, {in_service_name}, {in_cluster}, {in_folder_type}, {in_folder}, {in_startupType}, {in_override}, {in_my_contents}, {in_public}, {in_organization}, {in_groups})
BUG-000130321	0s are cut off from home numbers in Esri World geocoder.
BUG-000130332	The Make Feature Layer tool fails with Error:000732 if it is used with a hosted feature service that contains spaces in the layer name.
BUG-000130397	Layer output names do not honor the Inline variable when ModelBuilder Iterator is used.
BUG-000130430	FeatureClass.search() returns the java.lang.NoSuchMethodError error when called in Server Object Extension (SOE) built from ArcGIS Enterprise SDK.

Issue	Description
BUG-000130488	The query is not honored when using the Tabulate Area tool in a Python script in Make Feature Layer with an SQL query.
BUG-000130501	Reclassify (Spatial Analyst) in ArcGIS Pro 2.5 does not retain inline variable paths, and automatically converts to an absolute path after the first run.
BUG-000130600	"Ready To Use" GP Service tools do not return results when run in ModelBuilder/ Python window after running first in the GP pane.
BUG-000130712	The 'Manage' functionality in ArcGIS Online web map edit interface is not available if the data sources in ArcGIS Pro are changed from locally stored data to hosted feature layers before publishing the web map.
BUG-000130742	Optimize branch versioned pagination queries when using an enterprise geodatabase in Oracle.
BUG-000130752	ArcGIS Pro creates raster attribute table (RAT) for rasters with over 16-bit depth leading to poor performance relative to ArcMap.
BUG-000130767	In ArcGIS Pro 2.5.1, unable to open the scene layer packages (.slpk) created in ArcGIS Pro 2.1 in Japanese language.
BUG-000130854	Field values that are less than or equal to one percent do not draw in a pie chart symbol.
BUG-000130869	Following the application of datum transformations to maps, the Explore tool in ArcGIS Pro returns incorrect coordinates in popups.
BUG-000130892	A scene layer published in Portal for ArcGIS has corrupted data for certain multipatch feature classes.
BUG-000130945	The Edit Raster Function (Data Management) tool does not insert the function after running successfully.
BUG-000130962	Geometric function is not applied to a Geoeye-1 mosaic dataset when orthorectified via the digital elevation model (DEM) while running the Add Rasters To Mosaic Dataset tool.
BUG-000130966	Measure values are slightly off in Roads and Highways Event Editor.
BUG-000130978	The extent of the features does not update properly after editing the vertices.
BUG-000131004	In ArcGIS Pro, ' Share as web layer ' tool does not allow to control capitalization with the same letter configuration as the existing folder while trying to create a new Location folder. [For 2.7]
BUG-000131014	When the Create LRS Event From Existing Dataset tool is used in a model in ArcGIS Pro and the input variables are set as parameters, users are unable to change the values for any inputs other than the Parent LRS Network and Event Feature class.
BUG-000131049	Data Driven Drive Times and Rings.
BUG-000131063	The Calculate Geometry Attributes tool cannot repeat the geometry property in another field in ArcGIS Pro.
BUG-000131064	When the Enable Derived Measure Fields tool is used in a model in ArcGIS Pro and the input variables are set as parameters, users are unable to change the values for any inputs other than the LRS event feature class.

Issue	Description
BUG-000131084	Create Map Tile Package should enable Antialiasing on mapdocument by default.
BUG-000131102	Exporting a layout to a PDF, JPEG, or PNG format does not retain the same side map scale.
BUG-000131199	Bar chart symbology based on joined fields does not display properly.
BUG-000131204	Addresses in Sweden have out of date postal codes.
BUG-000131211	Model edits are not reflected in the execution of a Python script tool referencing the model when tool is refreshed.
BUG-000131249	The Digital Elevation Model (DEM) enabled with the DRA symbology is printed with a tiled effect when the layout is printed from the Microsoft Print to PDF option in ArcGIS Pro.
BUG-000131268	When using the " Select Output Location " dialog for ArcGIS Pro tools, allow the name of a selected folder to populate the " Name " section of the dialog.
BUG-000131291	Group templates do not correctly account for turns when points are offset from primary line feature vertices.
BUG-000131306	The layer label options in the legend box are not honored for ArcGIS map services in the PDFs exported from ArcGIS Pro.
BUG-000131350	[Data Specific] Running the 'Spatially Constrained Multivariate Clustering' tool Against This Feature Class Produces an Out of Memory Error Regardless of Installed RAM.
BUG-000131426	Editing values for a graduated color symbology with ArcGIS Pro 2.5.1 on a French operating system (OS) does not honor the operating system (OS) decimal separator in the Windows Regional Settings .
BUG-000131452	Refresh version does not pick edits made to attribute table.
BUG-000131460	The compressed file geodatabases with attribute indexes do not display accurate data with a definition query.
BUG-000131493	Anti-aliasing Mode and Text Anti-aliasing properties don't go through the web tile layer when cached locally in ArcGIS Pro.
BUG-000131542	When publishing a web layer from ArcGIS Pro, the only Server option to choose within the " Server and Folder " section is the current hosting server and not other federated servers. [For 2.7]
BUG-000131613	When GetCount is run from stand-alone script after ConvertLabelsToAnno on a layer whose name is different than its source FC, the layer's DQ is not honored.
BUG-000131617	Unable to create a mobile map package in ArcGIS Pro, when the map contains layers from different feature datasets in the same file geodatabase and one of the feature datasets participates in topology.
BUG-000131625	The raster resolution reduces when converting a map to a scene, causing symbology issues.
BUG-000131644	Updating features in the feature layer that is joined with more than one table causes performance issues.
BUG-000131647	Performance issue when updating an SQL Server geodatabase versioned view in ArcGIS 10.8, when compared to ArcGIS 10.3.

Issue	Description
BUG-000131686	In ArcGIS Pro 2.5.1, Category Parameter in 'Geocode Address' tool is displayed Incorrectly in the Japanese version.
BUG-000131715	When using the classify symbology, select ' More > Reverse Order ' is not honored.
BUG-000131827	ArcGIS Pro reaches out to s3.amazonaws.com when more than 100 rasters are added to mosaic dataset.
BUG-000131835	Writing to a CSV file using the 'w' class in a Python script results in an incorrect data type for the last field when opened in ArcMap 10.8 and ArcGIS Pro 2.5.1.
BUG-000131848	Legends using dashed and solid lines are not displayed correctly in ArcGIS Pro as the arrangement between the solid strokes and the shape marker in the layout differs from the arrangement in the map.
BUG-000131916	Identifying on photo point in orthomapping workspace shows an incorrect DateTaken as 1/1/0001 12:00:00 AM.
BUG-000131940	Make Grids And Graticules Layer GP tool is failing with ERROR 000824: The tool is not licensed for AO11.
BUG-000131941	The area reported by the Zonal Statistics as Table tool uses the cell size of the zone raster instead of the environment Cell Size .
BUG-000131960	The getDefinition() method fails in ArcGIS Pro if the layout is imported from ArcMap with the Marker annotation.
BUG-000131961	Bar chart: Y-axis bounds not correct when using date field.
BUG-000132005	The Create Map Tile Package tool does not honor the specified extent when the extent is set to Current Display Extent .
BUG-000132010	RF - weird error message for raster input.
BUG-000132025	The symbol scale for line and polygon is not synchronized with a legend in ArcGIS Pro.
BUG-000132095	Without Selecting Features, "Select Layer By Location" fails with " ERROR 999999: Something unexpected caused the tool to fail. ".
BUG-000132170	Two Calculate Geometry Attribute tools connected one after the other in the same model cause ArcGIS Pro to crash.
BUG-000132184	When running the 'Append Routes' tool (location referencing) in Python fails, and returns the following error message, " Field 'Name' has wrong type. "
BUG-000132212	Orthomapping fails when the comma is set to decimal separator in Windows.
BUG-000132247	Publishing locator to Enterprise/Portal (federated server) is not possible in Python.
BUG-000132251	Arcpy.management.CopyFeatures fails when the input is a feature class with a join with a KEEP_COMMON join type.
BUG-000132286	Data-specific map frames in an ArcGIS Pro project utilized in a map series do not update their extents correctly.
BUG-000132295	Delete Rows tool deletes only exactly 500,000 records in a large shapefile, then fails with Error 999999.

Issue	Description
BUG-000132299	Extract Multivalued to Points uses wrong default extent.
BUG-000132319	Received warning when displaying symbology of a raster layer as a vector field using a custom symbology with a manual class interval break in ArcGIS Pro.
BUG-000132397	A custom Z Max value for a feature class is not honored and is reverted back to the default value, 900719925479.099, when creating a feature class in ArcGIS Pro 2.6.
BUG-000132426	Check for orphaned cache while publishing to standalone server.
BUG-000132428	Map name is not updated when overwriting a map service in ArcGIS Pro.
BUG-000132487	When entering values manually in double precision fields in ArcGIS Pro, the values beyond eight decimal places are lost.
BUG-000132522	Build overview on a mosaic dataset makes a request to s3.amazonaws.com, which is a security problem.
BUG-000132530	Add Join does not respect more than 200 joined records per feature in a One to Many join.
BUG-000132570	In ArcGIS Pro, the definition query on a layer with 'is equal to' or 'less than or equal to' is not respected for any decimal values less than one.
BUG-000132585	ArcGIS Pro crashes when running Import S-100 Cell with 1000MB+ ENC file.
BUG-000132635	PostgreSQL: PostgreSQL server fails and kills the connection when geometry column has mix entities.
BUG-000132641	Setting a Ground Control Point when georeferencing an image is not accepted if Add Control Points is clicked once.
BUG-000132649	When using the pie chart symbology with the sum of selected fields for size type, the operation fails if an enterprise geodatabase feature class contains a join.
BUG-000132671	Splitting features creates extra features with null geometry.
BUG-000132678	Creating a feature dataset is grayed out in the context menu when using a ArcGIS Pro Basic license.
BUG-000132682	In an ArcGIS Pro project, renaming a feature class within a feature dataset changes the source of the layers.
BUG-000132695	Layout titles are truncated at periods in PDF name when exported to PDF (e.g., layout named Figure 4-3. Nevada DWR Groundwater basins in the Vicinity of the Study Area is exported as Figure 4-3.pdf).
BUG-000132706	Inserting a TIFF into a report or layout results in incorrect behavior on export.
BUG-000132712	Spellcheck Proofing Language - " Match Microsoft Windows " works in English and not in Czech.
BUG-000132715	Copy/Paste fails when taken from a geoprocessing tool parameter.
BUG-000132744	The min() Arcade function is listed when selecting the date filter for the expression in the Calculate Field geoprocessing tool in ArcGIS Pro.
BUG-000132751	Optimize SQL statements for branch versioned queries when using an enterprise geodatabase in Oracle.

Issue	Description
BUG-000132752	Poor Scene performance when using large datasets while not using available machine resources.
BUG-000132789	LAS Pyramid: Reduce temp disk cache size and process time during build for very large datasets.
BUG-000132794	In ArcGIS Pro 2.6, renaming a FC in a FDS changes the layers' FC name, alias, and Geometry type of all other FCs in the FDS to the renamed FC.
BUG-000132799	REGRESSION: Export multiple PDFs no longer displaying progress as it does with 2.5.
BUG-000132812	Clipped contours are not shareable.
BUG-000132813	Geoid Height only accepts integers.
BUG-000132814	[Drone2Map for ArcGIS] I18N-HCS: Untranslated strings " Property " and " Value " in Elevation Profile panel.
BUG-000132815	Missing scrollbar from Mensuration pane.
BUG-000132816	Can run processing without repathing images.
BUG-000132817	[Drone2Map for ArcGIS] I18N-HCS: Untranslated string Unknown in Mensuration pane.
BUG-000132818	[Drone2Map for ArcGIS] I18N-HCS: Untranslated string in Region, Select and Operations ToolTips in Edit ribbon.
BUG-000132819	[Drone2Map for ArcGIS] I18N-HCS: Untranslated " Click the Edit button to enable this command " string in Create Features and Modify Features ToolTips.
BUG-000132820	[Drone2Map for ArcGIS] I18N-HCS: Untranslated string " Meter " in Options dialog.
BUG-000132821	Processing Report stays open when switching projects.
BUG-000132822	Processing templates created in 2.1 or lower not working correctly in 2.2 or later.
BUG-000132825	ArcGIS Pro Map LR tools don't work after layer's broken data source is repaired.
BUG-000132836	Most tools are missing in GP tools search control in JA/zh-CN/zh-TW language packs. Popular Geoprocessing Tools shows an empty list under Customize the Ribbon option in the Japanese environment in ArcGIS Pro.
BUG-000132865	FAA 18B Reviewer Batch job contains duplicate checks for some feature classes handled by the <code>Airspace.rbj</code> . Only Airfield feature dataset items should be included in <code>Airfield.rbj</code> .
BUG-000132867	When exporting in parallel view, the resulting image is a lot more zoomed than the setting, but when switch to export in perspective view, the image size same as setting.
BUG-000132873	Deep Learning: Train Deep Learning tool needs to support <code>KITTI_Rectangles</code> MetadataFormat.
BUG-000132877	In the documentation for the <code>ImportDocument</code> method, please update the <code>reuse_existing_maps</code> parameter explanation.
BUG-000132887	The electric subnet lines and electric lines do not overlap when the UN is in a GCS.

Issue	Description
BUG-000132892	The web map tile service (WMTS) layer is not displayed when changing the image format from PNG to JPEG in ArcGIS Pro.
BUG-000132894	Custom expressions do not display in ArcGIS Pro 2.6 pop-ups if the ' Use the layer's visible fields ' option is checked.
BUG-000132938	FAA 18B Reviewer Batch Jobs should use Overlap checks instead of Intersect checks.
BUG-000132952	Viewshed 2 produces incorrect results when more than 8 observer points exist.
BUG-000132956	The Maximum Likelihood classifier generates a poorly classified raster in ArcGIS Pro 2.6.
BUG-000132961	Can't reopen the Python window if it was closed while in an infinite loop.
BUG-000132968	FAA 13A OIS tool needs to be updated to Engineering Brief 99A.
BUG-000132979	When a service is published, ArcGIS Server 10.8.1 mixes up feature classes with the same name from two different schemas.
BUG-000132982	Geocoding fails when the input features are multi-part line segments.
BUG-000133004	Airfield.rbj, MarkingLine group has a check titled, ' Invalid Geometry on MarkingArea ', which should be ' Invalid Geometry on MarkingLine '.
BUG-000133008	Using the " Only show features visible in the map extent " on a raster with a value that displays " all other values " omits that value it from the legend in ArcGIS Pro 2.6.
BUG-000133011	Solution for "003049: The account logged into portal is not licensed with the ArcGIS Utility Network user type extension." should include reference to ArcGIS platform compatibility for a utility network
BUG-000133015	Specifying output coordinates in an environment settings to other than ' Same as Input ' produces incorrectly rounded of resolution and tolerance values for ArcMap and ArcGIS Pro geoprocessing tools.
BUG-000133020	A valid pixel cache location shows up as a broken path when viewed in the Repair Mosaic Dataset Paths tool.
BUG-000133021	When the storage location for a Pixel Cache is changed in the Add Rasters To Mosaic Dataset tool, the path location given by Repair Mosaic Dataset Paths still points to the temp folder in the user profile.
BUG-000133052	Building Scene Layer Partial update.
BUG-000133058	Fix Airfield.rbj - RunwayArrestingArea does Not Overlap Runway - remove the Not operator and change the Title of the check.
BUG-000133072	The import AIXM/Derive Airspace Geometry functionality should identify data issues to avoid processing failure.-ArcGIS Pro.
BUG-000133102	" Display links on map " button will crash ArcGIS Pro 2.6 if Map and Feature Class have different projections.
BUG-000133105	"Generate Routes" tool from the Location Referencing toolbox returns Error 999999 when used on an LRS Network dataset in ArcGIS Pro versions after 2.4.3.

Issue	Description
BUG-000133128	ArcGIS Pro 2.6 crashes when the Field Mapping parameter is added from the Create Locator tool.
BUG-000133129	SQL functions using the ST_Geometry type fail on Oracle Solaris 5.11 11.4 OS - Oracle 19c Database - versions 10.8 and 10.8.1 Enterprise Geodatabase environments with the following error message, " ORA-06520: PL/SQL: Error loading external library. "
BUG-000133148	In the documentation for Feature Level Masking in ArcGIS Pro, please add some information on which order the feature classes must be to make the Many-To-Many Relationship Class.
BUG-000133153	ArcSDESQLExecute - replace SE_connection_create with SE_connection_create_extendedW to support extended connection string properties.
BUG-000133165	The duplicate field returns zero values when the Spatial Join tool is run for the second time.
BUG-000133166	Map frames in an ArcGIS Pro 2.6 map series project do not maintain the correct extents when exported to layouts.
BUG-000133184	Generate Drive Time Trade Areas in ArcGIS Pro 2.6 errors when Driving Time distance is greater than 300 mins and Distance is greater than 1000 Miles.
BUG-000133187	Using Table to Table in ModelBuilder with an OLE DB Connection input table creates only ObjectID field in output.
BUG-000133193	Reassign Route operation to split a route without recalibrating downstream assigns incorrect measure values to the output routes.
BUG-000133211	The functionality of the ' Make Selected Visible ' button was not communicated properly in Esri help documentation.
BUG-000133252	The ArcGIS Pro metadata editor doesn't update the metadata to include the identifier of the metadata style used when editing an item's metadata.
BUG-000133266	FMV Video Multiplexer does not return correct video metadata output when the region format settings are English (Denmark).
BUG-000133298	ArcGIS Pro 2.6 crashes when adding a pan-sharpened national imagery transmission format (NITF) while in the focus view of a panchromatic NITF layer.
BUG-000133316	Reassign that splits a route followed by recalibration violates 'Stay Put' event behavior.
BUG-000133327	CustomizeOIS, custom JSON files created with the Turkish region settings in Windows do not work properly in the obstruction identification surfaces (OIS) tool.
BUG-000133334	The "Create the Indoors Network" documentation page misleads users to assume the Thin Indoor Pathways tool still creates the final Network Dataset.
BUG-000133350	Attributes with values equal or less than 1% are not displayed properly when the Pie Chart symbology is assigned.
BUG-000133395	Python window_ using Send to Python window of Calculate Field History item with code clock generates syntax that fails with " SyntaxError: EOL while scanning string literal " cause it's split over 2 lines.

Issue	Description
BUG-000133440	Locate Route and Measures tool button fails to dock permanently on the Quick Access Toolbar in ArcGIS Pro.
BUG-000133458	Output Products from ArcGIS Drone2Map 2.2 are located roughly 30,000 meters from the photo points and flight lines when GCPs in a planar coordinated system are used.
BUG-000133459	Append tool with target in a geometric network causes ArcGIS Pro to crash.
BUG-000133472	Editing DWG in AutoCAD Civil 3D, saving edits, and zooming to data in ArcGIS Pro shifts the position of the data.
BUG-000133474	ALIGN: Anchor Points are being created where Links should be.
BUG-000133483	The Copy Lines To tool fails when the target line feature class has more fields than the source feature class.
BUG-000133528	Encounter ' Invalid Query ' warning when verifying the SQL Query- RunwayEnd - Non-critical check in the FAA18B Airfield.rbj.
BUG-000133531	Voxels generated from the Table to NetCDF tool draw incorrectly when the RD New coordinate system is used.
BUG-000133538	After updating to version 1.8.2 of the ArcGIS API for Python, Notebooks display incorrectly in ArcGIS Pro 2.6.1 partly off-screen.
BUG-000133540	Joining ArcGIS Online feature layers in ArcGIS Pro produces layers that follow the test feature class name (a number) instead of the name of the service, returning the error message, " The Field name must not start with a number. "
BUG-000133541	Unable to create an empty checkout replica using a definition query.
BUG-000133580	After grouping a text box in the map frame of a layout view, the X/Y interval values can only be edited once.
BUG-000133594	Entities or relationships in link charts crash in ArcGIS Pro 2.6.1.
BUG-000133596	ArcGIS Drone2Map Japanese Language pack 2.0 is installed even after downloading the ArcGIS Drone2Map Japanese Language pack 2.2 from My Esri.
BUG-000133635	Slow performance when using the Merge tool to edit more than 100 values in unique symbology in ArcGIS Pro 2.6.
BUG-000133636	Related Reports fail to export data if the relate is built GlobalID to Guid.
BUG-000133664	- The 'Table To Domain' GP Tool in ArcGIS Pro will Crash the Client if the ' Input Table ' Parameter is a Feature Service URL when the Tool is Run.
BUG-000133703	ArcGIS Pro 2.6.1 ' Display XY Data ' fails when field names have non-Latin characters.
BUG-000133709	ArcGIS Pro does not validate complex SQL queries while the underlying database management system (DBMS) does.
BUG-000133718	Feature Classes set as Extended Property Tables in a Workflow Manager (Classic) do not appear in the " Extended Properties Tab " of the Job View in ArcGIS Pro 2.6.1.
BUG-000133719	Error 999999 when using the Classify Raster tool in ArcGIS Pro 2.6, after upgrading from ArcGIS Pro 2.5.

Issue	Description
BUG-000133721	In ArcGIS Pro, removing built-in tabs under the Customize the Ribbon options after importing a customization file, causes all tabs to disappear.
BUG-000133729	TextElement.elementHeight crashes as web tool on 10.8.1 standalone server with web adaptor.
BUG-000133730	ArcGIS Pro cannot add a connection to a portal that is configured with a SAML Identity Provider that has multi factor authentication (one-time password).
BUG-000133732	When loading TXT or CSV files in ArcGIS Pro, numeric values having three decimal places are not correctly interpreted. Numeric values with fewer or more decimal places are correctly interpreted.
BUG-000133746	Roll back unregister as branch versioned when a failure occurs.
BUG-000133748	Unable to find Toolboxes with the 'Analyze Tools For Pro' tool when using the Browse Folder function in ArcGIS Pro.
BUG-000133803	Locator Properties - Crash with custom Locator and German Language Settings.
BUG-000133804	Null records from the joined CSV table change to '0' when exported from ArcGIS Pro.
BUG-000133821	Error 500: error in handling operation validateNewTopology if ArcGIS Server 10.8 Utility Network Update Subnetwork Patch is installed.
BUG-000133832	Disable adjust altitude if the user has control points that aren't in noConv VCS.
BUG-000133833	Do not delete DM and Project Data until re-processing starts.
BUG-000133834	Import camera model does not work.
BUG-000133835	Import from hosted feature layer radio button should be disabled if no sharing portal.
BUG-000133859	ArcGIS Pro Data Reviewer Domain rule is missing " Search Goal " from pane.
BUG-000133866	Event layers and table views added from an OLE DB connection in an Untitled project break when the project is saved.
BUG-000133870	When labeling objects using ' Label Objects for Deep Learning ' of an image service, the error message, " Labeled sample objects could not be saved for the run. " is returned.
BUG-000133876	The Update By Alternate ID Fields tool does not populate edge fields in ArcGIS Pro 2.6.x.
BUG-000133910	Adding a new feature that inserts a vertex to existing feature in a service with both Utility Network and Location Referencing System layers fails with a locks error.
BUG-000133912	Legends for tile layers from ArcGIS Server 10.7.1 and earlier don't show up in print service outputs.
BUG-000133963	Point placement zones are not followed in order.
BUG-000133971	The 'Build Multidimensional Info' tool output is incorrect and does not create new columns in ArcGIS Pro 2.6.
BUG-000133990	The Attribute pane in ArcGIS Pro can't tell the difference between a STRING and a CLOB, which can cause a crash.
BUG-000133995	ArcGIS Pro project crashes upon opening.

Issue	Description
BUG-000134020	Fields shifted for dataset with join after change version.
BUG-000134055	"Statistics" operation response from image service Rest API has a typo.
BUG-000134058	The error message, " ERROR 999999: Something unexpected caused the tool to fail " is returned when running the Add Rasters To Mosaic Dataset tool as part of dynamic mosaic creation in ArcGIS Drone2Map.
BUG-000134060	Unable to run Calculate Fields or Calculate Geometry Attributes, in ArcGIS Pro 2.6.1 on local copy (Download Map) of a feature layer when attachments are enabled.
BUG-000134080	The ' Cut Fill ' tool does not work when only a 3D Analyst License is assigned for ArcGIS Pro.
BUG-000134111	Empty output created using LASD on Stack Profile GP tool.
BUG-000134120	LSA : Adjustment reports failure on referenced fabric, though log file indicates convergence.
BUG-000134125	The Documentation on adding default locators in ArcMap does not provide enough specification on correct parameter configuration and limitations when adding a geocode service.
BUG-000134200	XMP data incorrectly written to .p4d file with DJI RTK Drone.
BUG-000134219	Killtask.exe as called in a customAction in the ArcGIS Pro 2.6 installer is unsigned.
BUG-000134271	Value of " Date exported " is not correct in the output file
BUG-000134287	Import AIXM 5.1 Message GP tool should not convey to the user that it has successfully succeeded when using a blank target geodatabase.
BUG-000134293	Template attributes lost on bulk updating template properties.
BUG-000134294	Table To Table tool in the Model Builder is removing the fields from an Excel table in the Field Map section of the tool.
BUG-000134302	Import AIXM 5.1 Message GP tool does not correctly import geometry.
BUG-000134312	Documentation for Editing thematic and classified pixels missing clarification.
BUG-000134314	Project recovery saves are triggering save edits when " Save edits when saving a project " is turned on in Editing Options .
BUG-000134341	The Calculate Geometry tool does not return Decimal Degrees when used on a feature class using UTM for a coordinate system.
BUG-000134378	Remove upper function on GUID columns in parcel fabric queries against Oracle enterprise geodatabases.
BUG-000134402	Simplify Polygon Crash Issue 1791.
BUG-000134430	Unable to edit graduated color values in ArcGIS Pro if the operating system language is Swedish with 'point' as the decimal symbol.
BUG-000134473	Unable to access StreetMap Premium Custom Roads 2020 Network Dataset properties in ArcGIS Pro.

Issue	Description
BUG-000134496	Reconcile Versions GP tool not honoring set parameter to continue when conflicts are detected.
BUG-000134515	Running the Layer To KML tool in ArcGIS Pro 2.6 and above produces a 1 KB output when the layer is a map service.
BUG-000134547	RepositoryManager shutdown hazard.
BUG-000134617	Brick textures in the Revit model are slanted when imported into ArcGIS Pro.
BUG-000134624	When exporting a layout with a map containing a New Link Chart an " object reference not set to an instance of the object " appears.
BUG-000134717	Unable to overwrite a service in a standalone ArcGIS Server from ArcGIS Pro if it is in a folder named 'services'.
BUG-000134763	ArcGIS Pro crashes after certain ground control points (GCPs) are imported into an ortho mapping workspace.
BUG-000134797	DEMs not added back to map when Keep on Map is selected.
BUG-000134798	DTM User Defined GSD can be set lower than ortho GSD causing processing to fail.
BUG-000134799	Mensuration results missing after applying filter.
BUG-000134800	Clip Area in shapefile format may not appear in file browser.
BUG-000134801	Folders not refreshed when importing from hosted feature layer.
BUG-000134802	Image Links Editor zooms to center of image instead of view.
BUG-000134803	Text in Description Text Boxes does not start on first line.
BUG-000134804	Semicolon in project name causes processing to fail.
BUG-000134805	Options values cannot be zero.
BUG-000134806	Processing fails if GCP have zero accuracy.
BUG-000134807	Point measurement Z unit not translated in French LP.
BUG-000134808	Setting ortho to User Defined GSD turns off DEM products.
BUG-000134809	Issues deleting products from disk.
BUG-000134810	Long incorrectly translated in French LP.
BUG-000134811	Filter by Extent on elevation profile chart does not work.
BUG-000134835	Cannot add a definition query in ArcGIS Pro, and an error message is returned, "There was an error with the expression."
BUG-000134901	Values for wcs:coverageid needs to be a NCName type value.
BUG-000134904	In RA cluster, CRF creation is failing as all workers doesn't have access to the scratch folder.
BUG-000134907	WCS getcoverage call should take translated chars.
BUG-000134908	ClassifyObjects service tool does not utilize GPU.

Issue	Description
BUG-000134950	Crash occurs when reconcile is executed while the destination table is not registered as versioned.
BUG-000134954	Reconciling multiple versions in the utility network using the Reconcile Versions tool crashes the ArcSOC . exe instance.
BUG-000134965	Blind SQL Injection in orderBy clause.
BUG-000135031	Documentation Error in ArcGIS Pro Create Point Cloud Scene Layer Package tool for the default values of XY Max Error(m) and Z Max Error (m) .
BUG-000135041	Running the Darcy Velocity tool in ArcGIS Pro 2.6.2 crashes the client.
BUG-000135088	FAA FAR 77 tool at 2.6.2 is not using Custom JSON value for Primary Surface width.
BUG-000135097	Reconcile fails on a branch version with error "version is still in use" because the version lock on the branch version was not released after an edit session ended in a different ArcGIS Pro session
BUG-000135117	Updating the subnetwork on a geographic coordinate system (GCS) spatial reference utility network fails the second time for short lines.
BUG-000135127	The directions window in ArcGIS Pro used to display the Junction name in Pro 2.5.2, but no longer does so in Pro 2.6 or later
BUG-000135148	Extract Multi Values to Points GP tool results in -9999 (no data) in ArcGIS Pro.
BUG-000135152	In ArcGIS Pro ModelBuilder if Delete Intermediate Data is not enabled and the model runs in Edit mode, Delete Intermediate Data becomes enabled for subsequent runs
BUG-000135227	Crash using Conflicts view after conflict on implicit reconcile (traditional versioning).
BUG-000135256	[ORACLE] Using shape . area in a definition query with pagination fails on a branch versioned feature class.
BUG-000135314	MultipatchBuilderEx does not set the spatial reference when calling ToGeometry.
BUG-000135328	Reconcile fails on a branch version with error "A row with this OID already exists"
BUG-000135340	Preferred label names do not show up in the locator properties for StreetMap Premium locators.
BUG-000135403	Importing an ArcMap 10.8 map document maintained from earlier versions causes ArcGIS Pro to stop responding.
BUG-000135927	Remove redundancies when saving projects to improve performance
ENH-000091645	Please provide a means of forcing key numbers to draw regardless of the map scale and level of data clustering/overlap.
ENH-000098015	Create an Eye Dropper tool in ArcGIS Pro.
ENH-000101112	Split: Allow for splitting of vertical 3D line segments using the Split Features tool and the Split Line tool in ArcGIS Pro.
ENH-000103234	Add "Only display these scales when zooming" functionality to ArcGIS Pro.
ENH-000104393	Allows users to specify a name and displayName for parameters in ModelBuilder.

Issue	Description
ENH-000104514	Add SQLite field name character limits to "Defining Fields in Tables" documentation.
ENH-000113891	Provide a mechanism for GIS administrators to deploy user.config settings to their users.
ENH-000115605	Implement an option with vector tiles to allow labels with a rotation to rotate with the map frame in ArcGIS Pro.
ENH-000116144	Provide the ability to use scroll bars in a Layout page in ArcGIS Pro.
ENH-000117152	Create example Python code within <code>arcpy.PointGeometry()</code> documentation for working with Z values.
ENH-000118587	Clarify the difference between what is returned by the <code>SHAPE@XY</code> and <code>SHAPE@TRUECENTROID</code> tokens when in a cursor on a feature layer.
ENH-000119240	New Iterate Layers tool.
ENH-000119387	Support elevation surface (image services) input to Interpolate Shape tool, the way many other non-3danalyst tools already do.
ENH-000121619	Update the Drone2Map "Manage GCP's" documentation to explain the adjustment behavior.
ENH-000121681	ACS variables are available in ArcGIS Pro (using Enrich Layer) but their Margin of Error Variables are not available. The same is available in ArcMap.
ENH-000123564	Enable ' Unclassed Colors ' symbology to be programmatically refreshed to update ranges/labels.
ENH-000123878	Part Two: ENH-000123878 ArcGIS for Desktop does not recognize a large number of CADRG/ECRG file types by default.
ENH-000123889	Navigation: Include (optional) coordinate text with Go To XY map graphics.
ENH-000123922	Update the ArcGIS World Geocoding Service for the Texas area in United States.
ENH-000124489	Tools that automatically apply the same symbology as the input (Copy Features, etc.) should write that symbology to dataset metadata.
ENH-000124822	Please provide an ability to an admin user to edit Metadata for a web layer in ArcGIS Pro.
ENH-000125511	Assign the icons for the context menu commands for turning all layers on/off when multiple layers are selected.
ENH-000126127	Update How Line Density works documentation to clarify neighborhood nature of output.
ENH-000126402	Support saving service definition files.
ENH-000126486	Implement the ArcGIS Pro SDK for accessing a map layer's metadata.
ENH-000126917	SDK- No way to convert Map Coordinates to Page Layout Coordinates.
ENH-000128036	Implement documentation regarding functionality for Arcade's console data function in ArcGIS Pro.
ENH-000128400	Add the measurement type to the <code>PointGeometry.distanceTo()</code> ArcPy method documentation.
ENH-000129413	Add the Enable Geodatabase tool to the Database context menu.

Issue	Description
ENH-000129486	Provide the ability to trace multiple traverse lines regardless of the lines COGO values when tracing existing parcel lines in ArcGIS Pro.
ENH-000129496	REPLICATION: Add register existing data option to Create Replica GP tool.
ENH-000129692	Update the "Temporal data in separate tables" documentation to state specifically what storage format the data needs to be in for the Add Join tool to work.
ENH-000129873	Editing requests being made to feature services should be batched to improve performance.
ENH-000130023	[IGN][ENH] - Maplex - Prioritize straighter sections of unladdered contours.
ENH-000130083	Add additional leader line anchor point for ' Inside the Boundary '.
ENH-000130506	Please update the documentation for the BA Generate Desire Lines tool to give the eligible distance_type values.
ENH-000130516	CR338946 - Add Definition tab to properties page for views.
ENH-000130847	ANNO - Alignment set to center when it should be left or right for anno outside of polygons.
ENH-000131038	The tool dialogue for the Geographically Weighted Regression (GWR) tool within this tutorial is very different from what is shown for the tool in ArcGIS Pro 2.5.1. https://desktop.arcgis.com/en/analytics/case-studies/fair-lending-3-pro-workflow.htm .
ENH-000131094	Update the 'Keep your locator up to date' document to include path to the server directory.
ENH-000131308	Add raster layers contained in Map Services to a Map in ArcGIS Pro as an individual layer using the layer ID REST URL for the service.
ENH-000131321	Add option to Write GeoTiff Tags to ArcPy's Layout.exportToTiff method in ArcGIS Pro.
ENH-000131486	FEATURE: Read "Structural" information for walls as attributes.
ENH-000131487	FEATURE: Read the Attributes for the Materials and Finishes table (Walls & Floors).
ENH-000131572	Add a linked section in core DBMS system requirements documentation to requirements/limitation for databases in the cloud.
ENH-000131738	Add a scroll bar to the Evaluate Sites wizard's step 2 in ArcGIS Pro.
ENH-000131883	Allow the use of the autosave feature in ArcGIS Notebooks.
ENH-000131928	Add information to the help page for the Generate Points From Business Listings that if there are selected features on the layer used for the Input Search Features that only the selected features will be used.
ENH-000131929	Add option to choose which output fields to return for geocoding a table.
ENH-000131996	Update the INSPIRE metadata documentation and workflows through ArcGIS Pro to be compliant with INSPIRE validator.
ENH-000132232	The ability to allow spaces in field and table names in ArcGIS Pro.

Issue	Description
ENH-000132328	Modify the documentation to state that OS authentication is not supported when connecting to PostgreSQL databases in the cloud.
ENH-000132797	Do not execute a 'create table tst_tab' and 'drop table tst_tab' SQL query when connecting as a read-only user to an Oracle Database within ArcGIS Pro.
ENH-000132827	Support and expose additional properties in the properties dialog.
ENH-000132955	Include reference to the ability to stop a Python script while running in the ArcGIS Pro Python window.
ENH-000133197	Update to the Help documentation relating to: https://pro.arcgis.com/en/pro-app/help/projects/connect-to-bim-cloud-connection.htm to include steps that are required on the BIM 360 side.
ENH-000133401	Improve selection in Version Changes dialog.
ENH-000134554	Request to add samples code in the pro snippets for Snap_edit geoprocessing tool.
ENH-000134664	Add that the option in ArcGIS Pro's Geoprocessing Options to 'add datasets to an open map' overrides ArcGIS Pro SDK's GPExecuteToolFlags to the documentation.
ENH-000134673	Group Template duplicate—Editing builders loses feature template until close/reopen.
ENH-000135087	CR335908 - For Database views update the properties page title bar to display as view properties (accessed via the Project pane).
NIM088920	A bug in polar projection NIM088920.
NIM103597	Permissions are not propagated to an intermediate table of the second M: N relationship class.
