

ArcGIS Pro 2.8 Issues Addressed

Each [major, minor, and patch release](#) of ArcGIS Pro includes fixes for bugs that were reported to Esri Technical Support. The bugs that were fixed in ArcGIS Pro 2.8 are listed in the table below.

More information about an issue on the list can be found by [searching for the BUG number on the Technical Support site](#).

ArcGIS Pro 2.8 also includes extensive new functionality, which is described in the [what's new topic](#).

Tip:

[Upgrade any enterprise geodatabases stored in Microsoft SQL Server](#) to take advantage of critical fixes to branch versioning.

Issues addressed at ArcGIS Pro 2.8.7

ArcGIS Pro 2.8.7 fixes the issues listed below and includes the fixes listed under 2.8.0, 2.8.1, 2.8.2, 2.8.3, 2.8.4, 2.8.5, and 2.8.6.

Issue	Description
BUG-000140314	Realigning an existing centerline fails and returns the error message, "Error: Underlying DBMS error [[Microsoft][ODBC Driver 17 FOR sql Server][SQL Server] Conversion failed when converting from a character string to uniqueidentifier.] [ENGINEERING_STA_NETWORK]."
BUG-000147765	Certification of Microsoft ODBC Driver 18 for SQL Server connections.
BUG-000148577	The slope result between the Planar and Geodesic options in ArcGIS Pro is incorrect.
BUG-000148667	Certain feature services or map services from ArcGIS Server 11.0 cause ArcGIS Pro to stop responding.

Issues addressed at ArcGIS Data Interoperability 2.8.1

Data Interoperability is an optional extension that can be installed on ArcGIS Pro. ArcGIS Data Interoperability 2.8 must be installed prior to version 2.8.1.

Issue	Description
BUG-000145606	Update the ArcGIS Data Interoperability extension to take advantage of the Log4J updates.

Issues addressed at ArcGIS Pro 2.8.6

ArcGIS Pro 2.8.6 fixes the issues listed below and includes the fixes listed under 2.8.0, 2.8.1, 2.8.2, 2.8.3, 2.8.4, and 2.8.5.

Issue	Description
BUG-000145599	Remove log4j from GeoAnalytics Tools and Apache Spark in ArcGIS Pro. Learn more about BUG-000145599

Issues addressed at ArcGIS Pro 2.8.5

ArcGIS Pro 2.8.5 fixes the issues listed below and includes the fixes listed under 2.8.0, 2.8.1, 2.8.2, 2.8.3, and 2.8.4.

Issue	Description
BUG-000143377	When using the Move tool and Snap To Grid option is used, the z-value of the feature being moved is set to 0. Snapping to the grid should not affect the z-value.
BUG-000143529	Error occurs when running "service area analysis" tool: Error DBMS table not found Invalid object name 'sde.sessions_137833_5'
BUG-000143779	After posting changes to a protected default version, the map display is not correctly refreshed.
BUG-000144420	Reconcile fails with collation conflict error when database collation is different than instance collation.
BUG-000145187	Without reconciling and posting, attachments added in a branch version fail to open after closing ArcGIS Pro.
BUG-000145600	Log4J - Update Log4J to version 2.17.1 in the Python module SAS-ArcGIS Bridge (SASPY).

Issues addressed at ArcGIS Pro 2.8.4

ArcGIS Pro 2.8.4 fixes the issues listed below and includes the fixes listed under 2.8.0, 2.8.1, 2.8.2, and 2.8.3.

Issue	Description
BUG-000142990	ArcGIS Pro stops responding when selecting the dropdown in the grid after adding a custom style file.
BUG-000144415	Unable to publish to servers secured with PKI prior to federation with a PKI secured portal.

Issues addressed at ArcGIS Pro 2.8.3

ArcGIS Pro 2.8.3 fixes the issues listed below and includes the fixes listed under 2.8.0, 2.8.1, and 2.8.2.

Issue	Description
BUG-000139337	In ArcGIS Pro, when adding a layer using the Add Preset - Subtype Group Layer option, the incorrect version name is displayed under the Differences tab while viewing the version changes.
BUG-000140709	Big Data Connection (BDC) tools fail on parquet format containing a boolean field in a string array.
BUG-000141336	Rendering 3D building data in ArcGIS Pro 2.8 and 2.8.1 is much slower than rendering data in ArcGIS Pro 2.7.
BUG-000141777	Created dimensions are populated with Null values.
BUG-000142198	Duplicate permission granted during upgrade can cause failure when SQL Server geodatabase is AWS RDS instance.
BUG-000142306	Blending modes set on WebMap layers are not imported into ArcGIS Pro

Issues addressed at ArcGIS Pro 2.8.2

ArcGIS Pro 2.8.2 fixes the issues listed below and includes the fixes listed under 2.8.0 and 2.8.1.

Issue	Description
BUG-000098213	Coded value domains are automatically sorted in ascending order of domain descriptions when accessing them through the attribute table in ArcGIS Pro.
BUG-000126867	The <code>arcpy.server.StageService</code> function in ArcGIS Pro's Python installation throws Error 999999 if the previous function run was <code>arcpy.CreateGeocodeSDDraft</code> and the <code>copy_data_to_server</code> variable is <code>False</code> .
BUG-000137947	An imported ArcMap traverse that is a non-loop cannot have a closing location set if the traverse is being digitized and the desired closing location has a mis-close distance smaller than 0.01 meters.
BUG-000138331	The XY Table To Point tool fails to convert coordinates at (0,0).
BUG-000138634	Unable to publish Azure PostgreSQL referenced data to ArcGIS Enterprise from ArcGIS Pro 2.7.x.
BUG-000138695	Geoprocessing tools fail when using map service layer URL as input.
BUG-000138750	ERROR 999999 using Contains relationship in Select by location when selecting features are points and a search distance is used.
BUG-000138807	In ArcGIS Pro, an error message "Move failed. The coordinates or measures are out of bounds" returns when moving an annotation feature and snapping it to underlying features.

Issue	Description
BUG-000139342	CalculateGeometry and arcpy ToCoordinateString only support getting DMS and other coordinate notation from WGS84 GCS, which requires a transformation that provides different coordinates than produced in ArcMap.
BUG-000139954	ArcGIS Pro 2.8 fails to append the Date field to a hosted feature layer on certain accounts.
BUG-000140067	The Activate Record of Selected Feature is grayed out in ArcGIS Pro 2.8.
BUG-000140196	Signing in via browser fails when ArcGIS Pro is installed on a per-user basis, uninstalled, and reinstalled as a per-machine installation.
BUG-000140227	Upon upgrading to ArcGIS Pro 2.8, the photo attachments do not display when the attachments are exported into a report.
BUG-000140262	Unable to move graphic labels in the Layout view when the map is rotated in ArcGIS Pro 2.8.
BUG-000140372	Constraint attribute rule does not consider subtype on insert.
BUG-000140438	Create Trace Network fails with Error 160084: " Cannot create a dirty area outside the topology's spatial domain. ".
BUG-000140449	Connections blocked by exclusive table lock on sde_process_information.
BUG-000140539	STIntersects() queries do not use the spatial index.
BUG-000140615	Stop editing (save) is looping 10x if the call times out with a services workspace.
BUG-000140616	OD Cost Matrix analysis that works in ArcGIS Pro 2.7 fails in ArcGIS Pro 2.8.
BUG-000140617	Layer.LongName isn't working for layer files that use .LYR file extension
BUG-000140623	The ExportToPDF method fails if the Layout includes layers labelled with Simple or Advanced Python Expressions. Reproducible just in ArcGIS Pro 2.8.
BUG-000140819	ArcGIS Pro with a French language pack crashes when opening any locator properties
BUG-000140851	Label overlapping 1000 weight feature.
BUG-000140933	Two-point lines tool should not deactivate when pressing Escape if first vertex exists.
BUG-000141015	ArcGIS Pro 2.8.1 does not honor the active environment set through Python Package Manager, and causes the active environment to be reset to the base arcgispro-py3.
BUG-000141102	Configurations may fail to load or crash, and second instances of ArcGIS Pro running the configuration may fail to load.
BUG-000141200	Mini-help does not launch localized help in 2.8.
BUG-000141318	The Classify Objects for Deep Learning tool does not complete when using large data.
BUG-000141600	Unable to sign in to ArcGIS Online from ArcGIS Pro with a Facebook account.
BUG-000142037	Upgrade the embedded Chromium browser to version 90.6.70.

Issues addressed at ArcGIS Pro 2.8.1

ArcGIS Pro 2.8.1 fixes the issues listed below and includes the fixes listed under 2.8.0.

Issue	Description
BUG-000136563	In ArcGIS Pro, lines do not snap for parallel or perpendicular functions with newly created line segments.
BUG-000137977	Copy and paste of a topology dataset does not preserve the global IDs or Editor Tracking fields.
BUG-000139092	ArcGIS Pro ModelBuilder fails to run when using distances as a parameter for the Multiple Ring Buffer geoprocessing tool.
BUG-000139391	SkySat imagery fails to add to a mosaic dataset.
BUG-000139833	Deadlocking may occur on SDE_branches & SDE_branch_tables_modified tables during simultaneous reconcile and post operations.
BUG-000139936	ArcGIS Pro may crash on startup after upgrading to ArcGIS Pro 2.8, crashing with the exception "System.MissingFieldException" and the message " Field not found: 'Lucene.Net.Analysis.StopAnalyzer.ENGLISH_STOP_WORDS_SET'. "
BUG-000140013	Dead lock can be encountered when multiple connections hold exclusive locks on the sde_process_information and sde_table_locks tables.
BUG-000140182	Data Engineering - New layers created from tools in DE are not added to map.
BUG-000140184	Image Information pane: crash caused by referenced elevation.
BUG-000140206	Indoors Python GP tools cannot find Indoors license when portal uses IWA authentication.
BUG-000140289	Incorrect URL generated for Autodesk Construction Cloud projects.
BUG-000140319	When using a Named User license the deep learning inference tools fail when trying to run on GPU.

Issues addressed at ArcGIS Pro 2.8.0

Issue	Description
BUG-000082194	Please make the legend of result data in TOC localizable for Spatial Stats system script tools
BUG-000087890	In French language operating system (OS) and localized French ArcGIS Desktop, labels placed with Street placement on severe curves are unplaced.
BUG-000090075	CR317981 - Please modify alignment of the Japanese message in Create Space Time Cube Tool.
BUG-000095108	Untranslated drop-down of fieldMapping in merge_management and merge_management.
BUG-000095821	pointFromAngleAndDistance and AngleAndDistanceTo with PLANAR option doesn't give right output.

Issue	Description
BUG-000099980	CR346071 - UI: the layer legends of output from Emerging Hot Spot Analysis tool are not localized.
BUG-000100236	In ModelBuilder, the Project and Define Projection tools do not recognize spatial reference arguments generated by the Calculate Value tool.
BUG-000102071	FCN: The tools dropdown panel in Analysis tab is pinned to the system Desktop after pressing "Win + D" hotkey on the keyboard.
BUG-000102339	Removing layers from a scene with visibility turned off causes the display to refresh.
BUG-000102484	Backslashes in layer & group layer names confuse <code>layer.name</code> and <code>layer.longName</code> .
BUG-000104200	Calculating a polygon length and area using Python in the Field Calculator fails to update the values when the feature class is joined with a table.
BUG-000110228	In ArcGIS Pro, the Direction option does not work properly when the operating system uses German language.
BUG-000110435	Arcpy.mp does not contain time functions to control the time slider as found in Arcpy.mapping.
BUG-000110767	Calculate Field(s) geoprocessing tools allow field values to be calculated that are not part of a range or coded value domain applied to the calculated field, and there is no way for users to validate features.
BUG-000111328	A misleading error message is returned when creating PostgreSQL geodatabase from ArcGIS Pro 2.1 when Visual C++ 2017 Redistributable Package (x64) is missing.
BUG-000111467	Line orientations are not maintained for labels placed on lines when cooking vector tiles.
BUG-000112135	Data rendering in ArcGIS Pro takes longer than ArcMap when the datasets come from SDE.
BUG-000112214	KMZ files created with "3D features" using "Layer to KML" tool don't display features in ArcGIS Pro (2.1.x onwards).
BUG-000112482	If a <code>.csv</code> or <code>.xls</code> is located in a folder whose name includes a comma then the Field Map parameters in the Table To Table tool are not populated.
BUG-000112514	Unable to preview a layer in Catalog View when the ' Make newly added layer visible by default ' option is unchecked.
BUG-000112695	Swipe doesn't work on if you open a new map and Swipe is the active tool.
BUG-000113044	The KML To Layer geoprocessing tool in ArcGIS Pro produces inconsistent outputs.
BUG-000114618	The Make Route Event Layer tool fails when field names and aliases of input event table does not match in ArcGIS Pro.
BUG-000115357	<code>arcpy.mp.CreateWebLayerSDDraft</code> in Pro 2.2 does not honor the <code>enable_editing=True</code> parameter when publishing the SD file to AGOL.
BUG-000115948	4: BUG-000115948 [Popup] - The coded value is displayed instead of description of the coded value description in the pop-up window.
BUG-000116153	Calling the ArcGIS Pro model using Python script deletes the outputs.
BUG-000116566	Data exclusion causes issues with headers appearing in legends (data specific).

Issue	Description
BUG-000116612	Exporting this map to PDF at any appreciable DPI to a vector format results in issues (unreadable PDF).
BUG-000116699	Mobile geodatabase layers with fields marked not visible still show those fields in GP field lists.
BUG-000117831	The export capability is not honored when using the FeatureSharingDraft Python function in ArcGIS Pro and set the allowExporting parameter as True.
BUG-000117878	Slow rendering of a multipatch feature class in a 3D scene in ArcGIS Pro with the data stored in an enterprise geodatabase.
BUG-000118833	Running Disable Attachments tool does not update the layer correctly.
BUG-000119507	Graphic buffer does not honor the Long data type as the variable in Model Builder.
BUG-000120149	Labeling based on a rotation field is not shown correctly in a vector tile package.
BUG-000120183	Output Derived Feature Set parameters are not added to map after running in iterative model and collecting in_memory paths.
BUG-000120203	The Package Map tool in ArcGIS Pro fails to package a .msd file despite enabling Support ArcGIS Runtime and Reference all Data for Runtime in the parameters..
BUG-000120272	The Join Field tool displays incorrect number of fields in the Input Join Field drop-down when joining two raster tables in ArcGIS Pro 2.3.
BUG-000120581	Multiple layers selected in a map, when dragged into a new map do not retain the layer order as in the previous map in the new map in ArcGIS Pro 2.3.1.
BUG-000120804	In ArcGIS Pro, when using the Configure Pop-ups window (Title Options tab), the layer name containing underscores do not show the first underscore.
BUG-000121204	Looping through the Make Feature Layer, Select By Location , and Select By Attribute tools in a script tool leads to slower performance in ArcGIS Pro than ArcMap.
BUG-000121722	The Layer To KML tool folder path is not honored.
BUG-000121791	Field name is converted to lower case when running a geoprocessing service published from a model in ArcMap.
BUG-000121840	Layers published with symbol levels turned on, fail to print in the ArcGIS Online default print service.
BUG-000122289	The Feature Class to Feature Class tool in ArcGIS Pro does not accept the updated field length unless clicked on any other field. -2.8
BUG-000122514	In ArcGIS Pro, PDF documents created using ExportToPDF function creates a corrupt file if a basemap is present in the Map Series using Python (IDLE) and the Python window within ArcGIS Pro.
BUG-000122595	Support simple line-offset for vector tiles.
BUG-000122846	Abbreviation Dictionary fails to load when a table is added from an enterprise geodatabase in ArcGIS Pro.

Issue	Description
BUG-000122926	Unwanted line appear when zooming in and out contour with stroke layer and offset effect symbology in ArcGIS Pro 2.4
BUG-000123491	In ArcGIS Pro and ArcMap, a tile layer taken offline is not visible when zoomed in to a larger scale.
BUG-000123536	Some of the line features are not selected when using the line symbol with an arrow.
BUG-000123653	The If Data Type Is logical operator does not filter shapefiles vs feature classes when the Boolean operator is true.
BUG-000123732	The date and editor tracking fields in a hosted feature class are causing an issue when opened in ArcGIS Pro but works in ArcMap.
BUG-000123745	The functionalities of No and Cancel options in the Close Georeferencing dialog box while georeferencing the Revit data are not clear.
BUG-000124297	In ArcGIS Pro, setting the expression type to 'SQL' within the Field Calculator tool inserts a text value with double quotes instead of single quotes.
BUG-000124466	While running Python script in ArcGIS Pro with Japanese language pack, utf (non-ASCII) characters not decoded correctly is returned along with Python traceback.
BUG-000124648	In ArcGIS Pro 2.4.1, symbol layer styles set for are not applied to all unique value symbols when Add All Values is clicked through the Symbology pane.
BUG-000125032	Tool fails when the OS decimal separator is set ArcGIS Server to ',' rather than '.' when publishing a map service to a standalone.
BUG-000125523	'Data Type' field in the 'Syntax' section has incorrect information in the 'Visibility' (3D Analyst) tool help documentation, for both ArcGIS Desktop and ArcGIS Pro.
BUG-000125569	Unable to select multiple LAS layers and create a group layer from the Contents pane in ArcGIS Pro.
BUG-000125637	MakeNetCDFRasterLayer fails to open a netCDF file with .nc4 as file extension; occasionally crashes with the input file extension renamed to .nc.
BUG-000125881	In the ArcGIS Pro Contents pane, the symbology icon reverts from a no fill to a colored fill when the transparency on an imagery layer is increased.
BUG-000126571	Mosaic Dataset incorrectly reads the year (Date) values for CADRG Images in ArcGIS Pro and ArcMap.
BUG-000126690	While using the intersect() method and arcpy.da.insertcursor(), ArcGIS Pro creates a point at an offset of the intersection, if a true curve is present in the data.
BUG-000126783	The SOAP QueryFeatureData requests fail for services published with ArcGIS Pro.
BUG-000127517	The ArcGIS Pro Convert Labels To Annotation tool does not honor the constraints set by the time slider.
BUG-000127664	Attachments: Tab not visible in attributes if layer has a join.
BUG-000128147	GeoPandas module fails to install from ArcGIS Pro 2.4.3 Python Package Manager .

Issue	Description
BUG-000128403	The ' Horizontal ' and ' Straight ' curvature modes for annotation become unavailable at times.
BUG-000128441	The Generate Points Along Lines tool does not generate Z- or M-enabled points when the lines being analyzed are Z- or M-enabled.
BUG-000128469	Unclassed colors symbology set on the data does not carry through to the vector tile package.
BUG-000128506	arcpy.SetLogHistory not respected.
BUG-000128600	In ArcGIS Pro 2.4.2 and 2.4.3, variable substitutions create null attribute values when using the Append tool in ModelBuilder.
BUG-000128869	The font in the messages window is different and cluttered in Japanese version of ArcGIS Pro 2.5 after any geoprocessing tool is executed.
BUG-000129018	Color ramp picker performance.
BUG-000129233	Join Field tool does not honor selection in Join Table.
BUG-000129262	The Divide a polygon by a value edit tool is artificially restricted to 100 multiple features.
BUG-000129312	Pop-ups do not display for Route Event Layers when a pop-up expression exists.
BUG-000129363	In a customized ribbon, adding the snapping commands does not show the enabled or disabled user interface when clicked on.
BUG-000129378	NoData cells in 32-bit integer grids are automatically populated with the value 2.14748e+10 after converting to NetCDF and then back to raster.
BUG-000129504	In the text field calculation in a table, the value 000000001 is added to the following Arcade expression, Text(Round(64.89567,5)).
BUG-000129535	In ArcGIS Pro, the 'Zonal Statistics as Table' tool cuts the length of the string field in the output table if the string field contains a 2-bit character, such as a Japanese character.
BUG-000129627	The 'Calculate Field' tool fails to execute and returns the error message, " 000310: The Field name must not start with a number. "
BUG-000129658	Text files and standalone tables such as CSV files are unable to repair the broken links in bulk although all the data is stored in the same file path.
BUG-000129715	Highway shields custom label (based on emf) offsets from feature.
BUG-000129893	The word "Today" is used in GP history even though a long-running tool completed more than a day later.
BUG-000130436	Rematch Address pane deselects all options of pop-up information within the Explore cursor/tool in ArcGIS Pro.
BUG-000130556	GetCapabilities returns incorrect bound coordinates for WFS 1.00 when ArcGIS Server Security 2020 Update Patch is installed.
BUG-000130556	GetFeature response returns incorrect bounding box coordinates for the Web Feature Service (WFS) version 1.0.0.

Issue	Description
BUG-000130776	Locator created with the Create Locator tool in ArcGIS Pro matches false street intersections with higher scores.
BUG-000130845	Unable to open attribute table in Pro client for WFS layer published from an enterprise gdb (data specific).
BUG-000131076	In ArcGIS REST API geocoding, finding the address point for particular location of a specific area "Garden city, Idaho" does not return the coordinates for street entrance regardless of setting the parameter to "locationType=street".
BUG-000131129	Geojson to Features conversion produces empty output when geojson file has an unrecognized property.
BUG-000131189	Running the Calculate Field geoprocessing tool twice on existing fields, without either saving or discarding edits, fails on the hosted feature services and on feature classes.
BUG-000131527	Extrusions in ArcScene using the scene option for Vertical Exaggeration are not correctly translated when importing the SXD file into ArcGIS Pro.
BUG-000131570	After applying a definition query, if a custom Arcade expression is used to symbolize the layer, the feature counts in the symbology pane does not respect the definition query.
BUG-000131904	The Chinese PinYin text is not arranging accordingly when inputting a sentence in Add field in ArcGIS Pro.
BUG-000131945	Textured 3D models from ArcGIS Pro published in multipatches are incorrectly displayed in ArcGIS Enterprise Scene Viewer.
BUG-000131957	In ArcGIS Pro, when a Python toolbox tool sidebar help image is set and saved, the image disappears.
BUG-000132094	Update the documentation of the 'Generate File Geodatabase License ' tool, as using ' ArcGIS Administrator ' is misleading.
BUG-000132242	UC - only base and mid point leader styles are respecting the leader tolerance
BUG-000132398	Append after Copy Features in a model will not validate with ERROR 000584 Implementation of this Tool's Validate is invalid.
BUG-000132457	The Validate Scene Layer package fails with a warning, URL " for resource layer.store.rootNode may not be supported by Esri products. (Compatible alternative would be: './nodes/root').
BUG-000132566	ArcGIS Desktop crashes while restarting Edit session when compiled with custom selection extension and autoLoad="True"
BUG-000132636	Copying domains from one geodatabase to another is slower when using the ArcGIS Pro SDK compared to ArcObjects.
BUG-000132644	SynchronizeMosaicDataset fails with an error message, " Error: 8004205a: Unable to load remotely built mosaic dataset items ".
BUG-000132934	Update documentation in that spatial reference properties available for geographic coordinate systems can still be obtained from items with projected coordinate systems in ArcPy.

Issue	Description
BUG-000132941	Buffer and FC2FC error when using a table view from Iterate Row Selection as input (regression from ArcGIS Pro 2.5 and ArcMap).
BUG-000133013	ArcGIS Pro crashes when installed on a Windows 10 machine with a German system locale.
BUG-000133027	The 'Append Annotation Feature Classes' tool in ArcGIS Pro does not generate a log file as mentioned in Error 000278 .
BUG-000133060	The sharing analysis error message for error 00252 redirects to the documentation for error 00255 .
BUG-000133152	GP service tools process all features, not just those within the selection layer (NOT selection set).
BUG-000133221	The Learn ArcGIS tutorial “ Use Deep Learning to Assess Palm Tree Health ” does not produce optimal results with the given settings in ArcGIS Pro 2.6.
BUG-000133243	Adding a web feature service with an authkey to ArcGIS Pro returns the following error message, " WFSLibStreamReader::Init() failed. "
BUG-000133289	Adding attribute indexes to ArcGIS system managed columns prevents unregistering as branch versioning and disable archiving.
BUG-000133368	Publishing a service and creating a folder with commas in the name result in separate folders when publishing again.
BUG-000133405	Schema locks remain in input and output geodatabase after running a tool and deleting the result object in Python
BUG-000133498	ArcGIS Server does not release requests correctly when the user's session limit is reached in an Oracle Solaris environment.
BUG-000133531	Voxels generated from the Table to NetCDF tool draw incorrectly when the RD New coordinate system is used.
BUG-000133640	LAS dataset Describe property does not adequately handle values beyond unsigned 32-bit range.
BUG-000133681	Log-in credentials are required to access publicly shared data with the Single Use license in ArcGIS Pro.
BUG-000133748	Using the Files filter with the Analyze Tools For Pro tool, the name of a Python script file doesn't appear in the Name text box when you click it in the contents list.
BUG-000133791	Points in a point feature class projecting on the fly to Natural Earth II do not render in southern latitudes.
BUG-000133845	When using Shape .Area field in Label expressions or where-clause, labels are not displayed in a Map Service published from ArcGIS Pro.
BUG-000133945	The Train Deep Learning Model tool fails in a disconnected environment.
BUG-000133973	In ArcGIS Pro 2.6.x, the KML To Layer tool outputs all features of an input selection layer, despite the selection layer being a subset of features.
BUG-000133978	Unable to execute the ' Export Report to PDF ' ArcPy function outside of the ArcGIS Pro environment.

Issue	Description
BUG-000133981	When using the 'Calculate Field' tool with a defined Python function, exporting it as a Python command or as a Python script (from the geoprocessing history) results in improperly formatted code.
BUG-000133994	When using the Select By Location tool with the provided data, the wrong features are selected based on the selection type.
BUG-000134033	In ArcGIS Pro, the Set Data Source function does not change the data source of the layers when the database connection is from a user who is not the data owner.
BUG-000134035	The Create Random Points tool in ArcGIS Pro does not create any point features within a constraining area even though the constraining feature has available space beyond the minimum allowed distance.
BUG-000134069	Full Metadata Summary does carry over in the " Share As Web Layer " pane in ArcGIS Pro.
BUG-000134070	In ArcGIS Pro, it takes 20 to 30 seconds to load and draw over 480 layout elements after each pan or zoom.
BUG-000134116	Allow animated symbology to be animated when exported as an animation in ArcGIS Pro.
BUG-000134156	The zoomToBookmark method does not honor bookmark rotation.
BUG-000134213	Creating a spectral profile graph is slow when selecting the segments from a segmented layer.
BUG-000134244	DATA SPECIFIC - Zonal Statistics as Table tool fails with 999999 error or completes for only a subset of the input zone features.
BUG-000134364	The Simplify Line tool returns a message of out of memory or crashes ArcGIS Pro when running on data containing a large number of features.
BUG-000134375	In ArcGIS Pro, some of the features are missing in the output SLPK file generated using the 'Create 3D Object Scene Layer Package' tool.
BUG-000134439	Small circular features are created when reshaping a line with the End Point Arc Segment editing method while the data is in WGS 1984 (GCS) and the map frame is in Web Mercator (PCS) .
BUG-000134584	The Derive Event Measures tool does not return the measure values for a line event.
BUG-000134621	In ArcGIS Pro 2.6 and higher, the 'Convert Coordinate Notation' tool displays wrong values when the selected output coordinate format is USNG (US National Grid) .
BUG-000134644	Generate Calibration Points geoprocessing tool generates incorrect points if routes geometry is faulty.
BUG-000134652	Dissolve fails with ERROR 999999 with memory\FC input and five + TEXT Dissolve Fields .
BUG-000134661	Unable to rematch using Pick from Map icon when Rematch Addresses Panes is unpinned.
BUG-000134689	ArcGIS Pro makes several requests to each ArcGIS Server site federated with an active portal when opening the ' Share As Web Map ' pane, causing slow performance for portals with multiple federated servers.
BUG-000134695	Attribute table docking appearance in ArcGIS Pro 2.5 or 2.6 is not consistent when opened as opposed to the previous version.

Issue	Description
BUG-000134845	Detect Feature Changes in ArcGIS Pro has erratic results depending on the change tolerance value.
BUG-000134942	In ArcGIS Pro 2.6.2, the Convert Coordinate Notation tool generates a 16-digit output for the MGRS coordinate format.
BUG-000134894	Dynamic Text boxes with defined values display additional values that are not displayed in the ArcGIS Pro layout view when exported to PDF.
BUG-000134952	The ArcGIS Pipeline Referencing event quality control in ArcGIS Event Editor shows a visual offset between the event feature and the gap or overlap graphic layer.
BUG-000134971	Editing pixel using “ Pixel editor ” on CRF raster causes edits to be applied incorrectly and damages the underlying CRF data.
BUG-000135005	In ArcGIS Pro, using Zoom To on the Locate tool's results returns an inappropriate extent.
BUG-000135026	The output Keyhole Markup Language zipped or compressed file (KMZ) does not contain any photos when using the ArcGIS Pro 'Layer To KML' tool on a photo attachment.
BUG-000135037	The date formats which use two digits for the year sometimes cause the metadata in ArcMap and ArcGIS Pro to display the wrong year.
BUG-000135127	The directions window in ArcGIS Pro used to display the Junction name in Pro 2.5.2, but no longer does so in Pro 2.6 or later.
BUG-000135138	RowCursor not correctly returning data using SpatialQueryFilter.OutputSpatialReference.
BUG-000135141	Feature templates: default values for subtypes are null in a feature service.
BUG-000135143	The Rotated Linear tool does not display correctly in ArcGIS Pro.
BUG-000135154	The Spatial Join tool does not honor the processing extent of the environment settings.
BUG-000135206	Aggregate Polygon is hanging for this ICGC dataset.
BUG-000135216	Specifying a filter containing 'OR' in a GetFeature request to a web feature service does not use the attribute index on the underlying data for a query when using the OR operator.
BUG-000135324	Unable to create a utility network in an Azure-managed SQL Server instance.
BUG-000135352	Saving MRF edits makes the raster disappear.
BUG-000135383	The elevation layer does not work correctly after using a vertical exaggeration in ArcGIS Pro.
BUG-000135415	The ST_AREA() and ST_INTERSECTION() functions fail and return the error message "ORA-20813: Invalid polygon closure", for specific geometries.
BUG-000135422	measureToGeometry function does not return correct linear geometry when applied to a Line-enabled Network with Roads and Highways REST API.
BUG-000135427	If gpkg_extension and spatial indexes are absent from geopackage files they will not work as expected in ArcGIS.
BUG-000135437	When sharing a geoprocessing result which contains a map with a raster layer, as a web tool to Portal for ArcGIS or ArcGIS Enterprise, the resulting web tool does not have tasks or

Issue	Description
	tools. The map service is successfully published with no warnings or error messages after selecting ' Analyze. '
BUG-000135453	Configured SymbolLevels on a Service get's ignored once a DynamicLayers-Request is done.
BUG-000135493	Unable to remove the complete Geoprocessing History of scheduled tasks when the task has been run more than 1000 times.
BUG-000135497	Popups: Autoselect the M-aware value when value is right-clicked when trying to copy.
BUG-000135539	Duplicate vertices appear behind the Scene Viewer when using the Edit Vertices tool in a scene.
BUG-000135541	The setSelectionSet method does not clear a selection when no parameters are set.
BUG-000135542	A selection cannot be cleared using the setSelectionSet method and instead will create a new selection with zero records.
BUG-000135606	When using the feature class to feature class tool, if setting an environmental processing extent, the tool ignores the WHERE expression when processing the tool.
BUG-000135609	The exported layout of the 3D Scene using the eye-dome lighting effect shows the incorrect results.
BUG-000135664	Update tooltip string for Facilities on the LA ribbon.
BUG-000135668	Unable to import fields from a shapefile when using Create Feature Class and Create Table Wizards.
BUG-000135703	When adding multiple HJ 1A images to a mosaic dataset, only one image is added.
BUG-000135751	Feature Class To Feature Class - CAD Feature Class - SQL Expression is not processed.
BUG-000135763	'ERROR 030206: An unexpected error occurred during tool execution' when using the Generate Service Areas from Ready to Use Tools in ArcGIS Pro.
BUG-000135773	BUG: Geometry (Dimensions are reduce to 1/3 of the actual size) is affected when the UNITS of the Revit file are set to Decimal Feet.
BUG-000135801	Locators using UNITS with strings do not return results for suggestions.
BUG-000135835	Data Specific: Some datasets fail to run in a python script with Error 99999 due to data corruption caused by the arcpy data management tools.
BUG-000135890	Not able to properly import an MXD that contains Raster Tile Layers.
BUG-000135939	Unable to validate a model which contains the Resolve Building Conflicts tool in ArcGIS Pro.
BUG-000135961	BUG: Corrupted download of BIM 360 Files using BCC - Esri Case #02643844.
BUG-000135974	SDK: Cannot edit nonversioned SDE feature classes that participate in composite relationships.
BUG-000135992	A geocodeAddress request including the parameter "&outFields=ResultID" causes all returned ResultID values to be 0.

Issue	Description
BUG-000135994	When exporting a map in ArcGIS Pro using the Image Analyst extension with List By Perspective and Set as Focus Image are selected, the exported file is blank.
BUG-000136000	Dubai font is not reflecting the correct form for a certain Arabic word "بي"..
BUG-000136064	Unable to open the attribute table of the ERDAS IMAGINE raster data.
BUG-000136072	Plugin data sources don't work with Export.
BUG-000136077	Labels with the Halo option enabled on ArcGIS Pro scenes will generate a thin black outline that cannot be removed.
BUG-000136102	EucDistance method in IDistanceOp Interface throws an "Attempted to read or write protected memory" error when the AvoidDataConversion property in IRasterAnalysisGlobalEnvironment Interface is set to true.
BUG-000136107	The Update Subnetwork tool fails and returns the error message, "ERROR 001400: The server took too long to answer. The client has timed out. (status code 28). Failed to execute (UpdateSubnetwork)."
BUG-000136131	In ArcGIS Pro, ListFeatureClasses() creates a lock which cannot be deleted with shutil.rmtree().
BUG-000136147	Time: Table min max query should be backed by QueryStatistics.
BUG-000136174	Batch exporting CSV files using the Table To Table geoprocessing tool shows null values in ArcGIS Pro.
BUG-000136207	[Doc] Incorrect property name for 'singlelineInputField'.
BUG-000136229	Minimum Bounding Geometry does not write key fields when target is EGDB.
BUG-000136331	When using inline variable substitution for the input raster or feature mask data parameter in the Extract by Mask tool, the tool fails stating the input does not exist.
BUG-000136361	Multiple attachments are not included in the Layer To KML output when viewed in various applications.
BUG-000136364	Export clone is dropping lines for some projects.
BUG-000136365	The Zoom To function in the Find Subnetworks pane is not working.
BUG-000136376	[New issue for tracking in 2.8] - BUG-000136376 The exported RGB Rasters with Stretch symbology from the table of contents in ArcGIS Pro with the 'Use renderer' option are black with all the pixel values equal to zero.
BUG-000136392	Encounter error 'The operation was attempted on an empty geometry' when executing Fill Gaps GP tool.
BUG-000136397	The Apportion Polygon (Analysis) tool crashes ArcGIS Pro when processing data.
BUG-000136411	Create Locator locators using alternate street names using a Many to One join, results in searches only returned for the first feature in that join.
BUG-000136412	Slow performance when changing branch versions for a single layer in the ArcGIS Pro map.
BUG-000136413	Table Alias Name is not saved when creating table in geodatabase on catalog in ArcGIS Pro.

Issue	Description
BUG-000136414	Unable to run the 'Remove Overlap (multiple)' tool with a basic license, and the following error message is returned, " 000824: The tool is not licensed. "
BUG-000136481	In ArcGIS Pro 2.7, unable to drag a layer to an empty legend in the Contents pane.
BUG-000136504	The ' Trace selected features only ' check box option for the Trace tool is automatically checked.
BUG-000136535	Allow partially registered spatial tables to be fully registered with the geodatabase.
BUG-000136536	In ArcGIS Pro 2.7, adding a WFS layer to a map displays a standalone table only instead of the feature layer.
BUG-000136563	Parallel and Perpendicular constraints don't work for sketch segments.
BUG-000136588	Error 999999 and Warning 003217 creating a shapefile with Create Feature Class and Environment setting " Transfer Geodatabase Field Properties " checked
BUG-000136627	Diagnose Version Tables and Repair Version Tables fail and return Error 999999 when the sde_tables_locks table has the tables_locks_fk foreign key constraint.
BUG-000136640	esri Raster Grid dataset's pixel type property is "Unsigned Integer" at ArcGIS Desktop version 10.0 , but changes to "Signed Integer" at version 10.8.1
BUG-000136662	After removing a route from a VRP analysis, if the analysis is re-run, the directions will only show for 1 of the routes.
BUG-000136666	Using a Secured Locator from Enterprise 10.8.1, Added to ArcGIS Online, and consumed in ArcGIS Pro 2.7 crashes ArcGIS Pro.
BUG-000136668	The addDataFromPath method fails with a runtime error when the path contains a single forward slash.
BUG-000136670	Locating a layer by feature class and migrating between the layout and the map removes the layer from the locators.
BUG-000136679	ArcGIS Pro does not append custom parameters to the WMTS GET requests.
BUG-000136680	Doc - Discuss use cases for modifying branch versioned data via GP client/server.
BUG-000136702	"Excel To Table" script tool fails after upgrading xLrd library from default 1.2.0 version to 2.0.1 version. This library upgrades automatically when using Python Package Manager or "conda install" to install/upgrade both the pandas and psycopg2 python packages. XLRD doc on not supporting .xlsx in 2.0.1 https://xlrd.readthedocs.io/en/latest/ .
BUG-000136707	When using offsets on the new locators in ArcGIS Pro which are built from a street address to geocode addresses, the measurement of the offset points is incorrect.
BUG-000136717	Label visibility range on vector tile package does not match the label visibility range set in the map in ArcGIS Pro.
BUG-000136767	Create Feature Locator does not honor Search Fields if the Alias Name and Field Name do not match in ArcGIS Pro.
BUG-000136770	REGRESSION - A Page Query on a stand alone table stopped working.
BUG-000136781	Certain Web Map Tile Service (WMTS) layers are not rendered completely in ArcGIS Pro.

Issue	Description
BUG-000136789	In the documentation for Generate Service Areas (Ready to Use), under Syntax, the Time_of_Day parameter is not listed as optional. In ArcGIS Pro the parameter is listed as optional in the tool GUI.
BUG-000136791	Select Layer By Location omits Bezier curves in InputFC when Selecting Features contain Bezier curves.
BUG-000136807	Split Features GP tool crashes ArcGIS Pro 2.7 when executed in a model.
BUG-000136835	Infographics Hangs When Running ' Compare Selected Features ' With Non-English Display Language.
BUG-000136841	Edit Vertices of Linear Dimension--will reorient dimension if extension lines are not upward.
BUG-000136858	The EnvelopeIntersects in the Geometry function for Arcade expressions is not available in the ArcGIS Pro 2.7 user interface.
BUG-000136864	Unable to turn off snapping for dimension layer in ArcGIS Pro.
BUG-000136874	The ' Select only invalid objects ' option does not work with standalone tables in ArcGIS Pro.
BUG-000136889	After upgrading Enterprise Geodatabase 10.7.1 to 10.8.1 and running the query to get Next_RowID, the following error message is returned: Msg 8144, Level 16, State 2, Procedure DBO.i13_get_ids, Line 0 [Batch Start Line 0] Procedure or function i13_get_ids has too many arguments specified.
BUG-000136892	When a -1 is returned to ArcGIS Pro the conflict resolution dialog is unable to properly present the conflicts.
BUG-000136906	The results of the 'Create LRS' tool yield different Z tolerance and Z resolution in the geodatabase, compared to the default for both values presented in the tool interface.
BUG-000136913	In ArcGIS Pro, geoprocessing using a SQLite database is slower than using a file geodatabase.
BUG-000136960	A TXT or CSV input table incorrectly interprets values with three decimal places when using comma separator.
BUG-000136961	Missing glass curtain wall feature class when loading a Revit (.rvt) file in ArcGIS Pro 2.7.
BUG-000136979	Validate Network Topology incorrectly allocating large amounts of memory impacting server soc mem usage.
BUG-000136981	Divide COGO lines incorrect cogo attributes for feature services
BUG-000137028	A specific .mxd (Map Exchange Document) file causes ArcGIS Pro and ArcMap to crash.
BUG-000137037	In ModelBuilder, if the value of a variable parameter of a super-model is set with the name of the variable within its submodel, ArcGIS Pro crashes.
BUG-000137060	The Contour (Spatial Analyst) tool returns a 999999 error message when using an empty raster as input.
BUG-000137081	Difference Polygon tool from Production Mapping does not honor snapping.

Issue	Description
BUG-000137089	Edit vertices tool is performing a spatial search for every vertex on the line which is selected for the operation.
BUG-000137139	Optimize UpdateAssociationInfo function by splitting the query to discover from/toglobalid associations.
BUG-000137165	Running a simple script in ArcGIS Pro 2.6.3 works but causes a crash in ArcGIS Pro 2.7.
BUG-000137172	Annotations are not displayed in ArcGIS Pro 2.7 if the data is projected on-the-fly.
BUG-000137200	FacilityID is not populated in the output Line attribute table generated by a ServiceArea analysis using the arcgis.com network dataset. Fields in the output Polygon and Line tables are not generated as described in the documentation.
BUG-000137228	Image service export image operation does not honor bilinear resampling method on some mosaic datasets with a specific property.
BUG-000137243	FMV Multiplexer in ArcGIS Pro 2.6+ fails to calculate the frame corner coordinates .
BUG-000137265	The ArcGIS Pro report fails to draw a chart element when the vertical guides in a chart are based on a date field.
BUG-000137289	Parent_ JOB value is removed after modifying job Description - Workflow Manager.
BUG-000137317	ArcGIS Pro sometimes crash when running Check Geometry, or Repair Geometry against a feature class with an active join.
BUG-000137321	Smooth Line Geoprocessing tool hangs on "Cancelling" for upwards of 10 minutes after cancelling, sometimes resulting ArcGIS Pro to have to undergo a forced closure with task manager.
BUG-000137327	"Select Layer by Location" fails with ERROR 160244 "Object has no schema lock" when provided 2 FCs that have different SR are added in specific order
BUG-000137339	Resolve Building Conflicts tool in ArcGIS Pro shows incorrect error message for not having an attribute driven symbology when setting up the symbology size based on the attributes.
BUG-000137341	The Split (Analysis) tool's documentation states that setting the Parallel Processing Factor environment to 100 will cause parallel processing to be enabled, but it does not mention how many logical processors will be used.
BUG-000137342	Please clarify the Parallel Processing Factor (Environment setting) documentation on the usage of 'cores' and 'processors'.
BUG-000137346	Crash occurs when reconcile is executed while the intermediate table is not registered as versioned.
BUG-000137400	Distribute should take into account the potential space of dynamic elements (ex: legends).
BUG-000137410	Schedule a model does not work in French and few other (not all) language packs, when using specific monthly or daily scheduling options.
BUG-000137427	Copying shapes with user defined coordinate system can fail in an Oracle database when cluster tolerance is 0.0.
BUG-000137430	In ArcGIS Pro editing mode, selecting the ' Intersection ' tool from the ' Construction ' toolbar of the ' Reshape ' tool does not display virtual intersection lines on the map frame.

Issue	Description
BUG-000137431	Rendering w/LYRX: Slope ' Percent Rise ' renders as degrees.
BUG-000137494	Labels for classified raster symbology that have reversed values do not maintain changes to label names.
BUG-000137520	Unable to Masking Specific Symbol Layer Groups inside the same Group Layer.
BUG-000137533	The menu in the Reviewer Results window is not usable because it displays momentarily on ArcGIS Pro 2.7.X.
BUG-000137547	ArcGIS Pro crashes when client-side timeout is exceeded and stop editing cannot be completed.
BUG-000137552	Fill Gaps GP tool will not fill enclosed gaps between two features in the same feature class when the Fill Option parameter is set to Fill By Length .
BUG-000137556	GP-Tool "Create Replica" returns ERROR 000782 when used from Python Window or from Pro SDK after editing non-versioned data.
BUG-000137570	ArcGIS Pro crashes during the reconcile process when a replacement is saved for a conflict and a replacement is selected again.
BUG-000137598	ArcMap GDB Annotations with horizontal Alignment set to ' Full ' and edited baseline sketch are not correctly displayed in ArcGIS Pro
BUG-000137660	When attempting to Save an Offline Service Definition in ArcGIS Pro it will fail with a generic "Error."
BUG-000137771	CreateWebLayerSDDraft does not honor allow_exporting and enable_sync parameters.
BUG-000137789	Connection to a database or Create Enterprise Geodatabase - ArcGIS Pro crashes without any error message, if username with domain is longer than 30 characters.
BUG-000137851	In ArcGIS Pro 2.7.1, the reordering field is not maintained in the field map when exporting features to file geodatabases or shapefiles.
BUG-000137867	New metadata types are missing from the Export Training Data tab in the Label Objects for Deep Learning tool.
BUG-000137870	Editing annotation feature class causes ArcGIS Pro to crash.
BUG-000137881	Sort Coded Value Domain fails to correctly sort coded value domains by description in ArcGIS Pro.
BUG-000137902	Importing a large CSV file directly into ArcGIS Pro using the Table To Table conversion tool results in data inaccuracies in the output with no warning triggered in the tool.
BUG-000137937	The text in the ArcGIS Pro Pop-up pane is blurred in a 14-inch display with an integrated graphics card.
BUG-000137939	The Locate tool does not return address suggestions when using a locator from an ArcGIS Server connection that is not federated with the active portal in ArcGIS Pro.
BUG-000138033	Branch versioning post (reconcile and post) operations acquire or escalate locks leading to deadlocking scenarios.
BUG-000138044	Unable to select graphic labels on the Layout view when the map is rotated on ArcGIS Pro.

Issue	Description
BUG-000138079	Crash occurs when "Beta: Use Unicode UTF-8 for worldwide language support" is enabled.
BUG-000138203	ArcGIS Pro crashes when attempting to manipulate the historical archive of a feature class.
BUG-000138213	ev2p does not work when input points have an active join.
BUG-000138288	Map.moveLayer method in arcpy.mp is not moving layers correctly in some workflows.
BUG-000138305	Labels are placed in the wrong areas when using the Maplex Label Engine in ArcGIS Pro.
BUG-000138332	ArcGIS Pro disables users from selecting a non-hosting federated server when overwriting a service if the web adaptors for the hosting federated server are installed on the same machine.
BUG-000138339	Shortest Path trace displays 999999 when Path Direction not specified.
BUG-000138344	ArcGIS Pro must be failed to execute the Import 3D Files tool when it is configured with a named user license type and not assigned with a ArcGIS 3D Analyst extensionlicense.
BUG-000138346	Unable to export images to the mosaic dataset while executing "Export Frames" options in FMV Tab in ArcGIS Pro.
BUG-000138389	Export to SD: Fails intermittently on multi node site.
BUG-000138408	There are missing elements in a specific layout exported from ArcGIS Pro.
BUG-000138544	Point Address Locator Roles Created with ArcGIS Pro 2.7.2 Provide Duplicate Suggestions After Typing in a House Number.
BUG-000138554	Map services published from ArcGIS Pro does not apply time zone offset in some of its operations.
BUG-000138593	Red exclamation with message reading "This member cannot be found at the location specified." appears for Annotation Feature Classes under the "List by Editing" option of the "Contents" pane in ArcGIS Pro 2.7.x.
BUG-000138632	When opening a CSV files with semicolon as field separator and comma as decimal separator in ArcGIS Pro, numeric values having three decimal places are not correctly interpreted.
BUG-000138644	Add sqlFormat to map service query operation to allow passing in standard sql even when useStandardizedQueries is turned off.
BUG-000138647	Support percentile in map service outStatistics operation for datasets off file geodatabase.
BUG-000138656	Unable to load Terrain Dataset into ArcGIS Pro without 3D Analyst license
BUG-000138710	[Data-Specific] Reproducible Data for ArcGIS Pro File Geodatabase Attribute Index Crash.
BUG-000138748	Sequential Numbering tool: Does not accept 10+ characters
BUG-000138791	After selecting the 'Save transformed dataset when model is run' option, selecting 'Run' causes ArcGIS Pro to crash.
BUG-000138862	ArcGIS Pro "Cost Connectivity (Spatial Analyst)" vs. "Kostenkonnektivität (Spatial Analyst)" - tool reference for German translation contains error
BUG-000138893	Updated attachments don't save for hosted AGO services

Issue	Description
BUG-000138913	Export MGCP metadata GP tool needs to be updated Pro
BUG-000138980	In some cases Pro crashes when you zoom in into the chart
BUG-000138998	Export Infographic fails for Dynamic HTML
BUG-000139085	Suitability Modeler : Crash when using Scene Layer Type = 3DObject
BUG-000139157	Branch Versioning lock leak occurs after Conflict Manager or Differences pane is opened.
BUG-000139348	Project tool writes out normalReferenceFrame incorrectly in s1pk projected from web mercator to wgs 1984.
BUG-000139546	Features may disappear or appear duplicated when editing a feature service layer.
ENH-000085561	In ArcGIS Pro provide an ability to view Quick Access/Favorite locations including Recent Places, Network, Libraries, etc as seen in ArcMap.
ENH-000101745	Difficult to work with mapped drives accessing long UNC paths in the browse dialog box. Solutions available in the OS aren't available in Pro.
ENH-000103118	Time: Users want to display only the time records on Date Type Field in ArcGIS Pro.
ENH-000107183	Allow 'Remove Attachments' tool to remove attachments from a hosted feature service in ArcGIS Pro 2.0.
ENH-000109774	Provide a warning message to the user when sharing a web layer with a popup containing a link to a local path.
ENH-000111499	Add in ArcGIS Pro 2.1 similar functionality of ArcMap to select a dominant graphic element to align all other selected graphics.
ENH-000111649	Provide support for expressions in vector tile style sheets.
ENH-000113609	Add the Copy Map to Clipboard functionality on ArcGIS Pro.
ENH-000113617	In ArcPy.Da.update cursor documentation include an example that contains usage of Prefix/postfix SQL Clause.
ENH-000118346	Inline variable substitution documentation for ArcMap does not indicate that there are any limitations to using inline variable substitution with List Variables.
ENH-000124063	Provide the ability to copy the items from the layout view by dragging and dropping while holding down the CTRL key.
ENH-000124218	Support for Time.
ENH-000124393	Selection: Add optional hatching / fill for "selected features" feedback for polygons.
ENH-000125143	Enrich Layer (Advanced) for Local Data should support point feature layers.
ENH-000125899	Add a ' List by Filtered Layers ' option in the ArcGIS Pro Contents pane.
ENH-000126787	Please provide examples for the Emerging Hot Spot Analysis tool.
ENH-000127183	Unable to set a coordinate system for input data in the tool Convert LAS in ArcGIS Pro.
ENH-000127453	Request to update the vector tiles label documentation to include more details.
ENH-000129614	Buffer3D: improve handling of problematic line buffering.

Issue	Description
ENH-000130133	Add documentation for the ArcGIS Business Analyst Pro Enrich Layer tool with a list of variables in the proper syntax for this tool.
ENH-000130265	Option to hide the timestamp from displaying in the date field of the Attribute Table in ArcGIS Pro.
ENH-000130534	No available documentation for 'convert to a basemap' function in ArcGIS Pro projects.
ENH-000131220	When using a script tool in a Model with an iterator, the model will continue to run even after encountering an error message.
ENH-000131816	When migrating models from ArcMap to ArcGIS Pro, data sourced from the 'database connections' folder is no longer valid in ArcGIS Pro.
ENH-000131818	Adding transformation which converts NAVD 1988 units?
ENH-000132535	Provide a tool in ArcGIS Pro that works like Network Identity tool in ArcMap.
ENH-000133209	Allow the Detect Objects tool to utilize the Mask Environment setting in ArcGIS Pro.
ENH-000134049	Provide a method in the ArcGIS Pro SDK's GeometryEngine class to find the bearing between 2 points on a WGS1984 spheroid.
ENH-000134135	Change in-memory datasets to return a proper Geodatabase rather than an UnknownDatastore.
ENH-000134161	Add a workflow example to Profile Viewing documentation that shows users how to make accurate vertical measurements in a 3D scene.
ENH-000134332	Allow the on-screen Navigator to be enabled/disabled in utility network diagrams by clicking on the Navigator button on the View tab, in the Navigation group.
ENH-000134862	Show attribute information when scrolling through attribute table in ArcGIS Pro.
ENH-000135056	Calculate Polygon Main Angle tool in ArcGIS Pro should be able to function on more diverse feature classes.
ENH-000135388	Requesting to update the help page for 'Add Rasters To Mosaic Dataset' tool to also be applicable to the interactive version of the tool, and not just the arcpy version.
ENH-000136185	Support for secure OGC service should be noted in the ArcGIS Pro Documentation.
ENH-000136220	Improve the 'Vertical Connectivity' section of the 'Understand Connectivity' Network Dataset documentation.
ENH-000136615	Enable Anti-Aliasing as a parameter for Manage Cache Tiles in ArcGIS Pro
ENH-000136786	GPT Points Solar Radiation (Spatial Analyst), should output columns that have interval numbers or time information.
ENH-000136900	The spatial rules in SCAMIN xml should support conditions with point features.
ENH-000137486	Exporting an S-57 Product/ENC Export error message "no features found" is not informative. Tool should report the features that are missing (e.g. Feature M_NSYS is missing).
ENH-000138241	The Convert Labels To Annotation GP tool should return a warning instead of an error when labeling is not enabled for all layers in a map.

Issue	Description
NIM083258	Dot density symbology in a map service is not honored in web client legends.
NIM103379	Insert Values control does not respect definition query set on layer.
