ArcGIS Pro 3.0 Issues Addressed

Each [major, minor, and patch release](#) of ArcGIS Pro includes fixes for bugs that were reported to Esri Technical Support. The bugs that were fixed in ArcGIS Pro 3.0 are listed in the table below.

ArcGIS Pro 3.0 also includes extensive new functionality, which is described in the [what's new topic](#).

Issues addressed at ArcGIS Pro 3.0.6

ArcGIS Pro 3.0.6 fixes the issues listed below and includes the fixes listed in the subsequent sections for ArcGIS Pro 3.0.5, 3.0.4, 3.0.3, 3.0.2, 3.0.1, and 3.0.0.

Issue	Description
BUG-000144682	The calculation attribute rule incorrectly uses initial geometry when the layer is using an attribute-driven symbology.
BUG-000150723	Non-default branch versioned feature services result in missing polygons when running the Split tool in the editing toolbar.
BUG-000152000	Geometry of secured feature services added from a standalone ArcGIS Server does not render in ArcGIS Pro 3.0.x.
BUG-000152296	After editing from the ArcGIS REST Services Directory, the ArcGIS Pro session is unable to make new edits with the following error message, "object has no schema locks" for branch-versioned data is returned.
BUG-000154328	The Evaluate Rules geoprocessing tool does not consider selected rows from tables.
BUG-000155397	Error Inspector options in the UI out of sync with what is being sent to the Evaluate REST end point
BUG-000157409	Unable to change the enterprise geodatabase version more than once after using the Make Route Event Layer tool in ArcGIS Pro.
BUG-000157892	Unable to use the Alter Field geoprocessing tool to change the alias on a registered database view field in ArcGIS Pro 3.1.
BUG-000158046	The attribute rule is not triggered correctly when creating a related feature in ArcGIS Pro.
BUG-000158170	Features are sometimes not displayed or no longer selectable when editing a feature service layer.
BUG-000158561	The error message "RuntimeError: Failed to evaluate Arcade expression." is erroneously returned when running the Calculate Geometry Attributes tool against a feature service that contains attribute rules with the 'Exclude from application evaluation' option unchecked.
BUG-000158684	The error message of a constraint attribute rule is not returned when a relationship is removed if it is configured not to edit or update a specific feature or register.
BUG-000159411	The Create Hosted Imagery Layer wizard in ArcGIS Pro fails to upload data when publishing tiled or dynamic imagery layers.
BUG-000159569	Opening a web scene saved from Scene Viewer in ArcGIS Online opens with the error message "web map.External component has thrown an exception." in ArcGIS Pro on Windows 11 (for non-English operation systems).

Issues addressed at ArcGIS Pro 3.0.5

ArcGIS Pro 3.0.5 fixes the issues listed below and includes the fixes listed in the subsequent sections for ArcGIS Pro 3.0.4, 3.0.3, 3.0.2, 3.0.1, and 3.0.0.

Issue	Description
BUG-000117894	Globally unique identifier (GUID) fields cannot be used for event parameters in the Make Route Event Layer tool.
BUG-000148996	Unable to copy and paste the utility network between enterprise geodatabases with the error message, "ERROR 000260: DBMS sequence not found" returned.
BUG-000150042	The Import XML Workspace Document tool fails in ArcGIS Pro 3.0 but works in ArcGIS Pro 2.9.2.
BUG-000150887	Creating an enterprise geodatabase in SAP HANA results in the imv_view_name column in the GDB_Table_registry table only allowing 32 characters.
BUG-000150939	A feature-linked annotation in an enterprise geodatabase does not update in ArcGIS Pro 3.0 and 2.9.3 when editing the geometry of the feature it is linked to. When editing the attributes of the feature, the annotation displays the edits made.
BUG-000151010	Using a DBF file as an external table with the Attribute Table function does not work as expected in ArcGIS Pro 3.0.
BUG-000153395	Creating a 3D scene layer package from large-scale multipatch buildings causes ArcGIS Pro 3.0.2 to crash.
BUG-000153703	High random access memory (RAM) consumption and slow performance in ArcGIS Pro when working with a feature service.
BUG-000154004	Instead of returning an exception indicating the user does not have the permission to access the versioned view (_evw), the arcpy.ArcSDESQLExecute execute() method outputs a random value for 'select count(*) from .' when the user does not have the SELECT permission on the versioned view (_evw).
BUG-000154284	A view definition is not displayed for file geodatabase views.
BUG-000154923	After upgrading a PostgreSQL 10.7.1 geodatabase, editing feature classes fails due to some functions not being owned by the data owner anymore.
BUG-000156042	Passing privileges on a feature class in SAP HANA through database roles does not work in ArcGIS Pro.
BUG-000156642	An SQL Server geodatabase connection does not correctly display the list of tables in the catalog when the owner name matches the name of the database.

Issues addressed at ArcGIS Pro 3.0.4

ArcGIS Pro 3.0.4 fixes the issues listed below and includes the fixes listed in the subsequent sections for ArcGIS Pro 3.0.3, 3.0.2, 3.0.1, and 3.0.0.

Issue	Description
BUG-000140203	Using the table raster type when creating a derived mosaic dataset results in an incorrect number of records in the footprints table of the derived mosaic dataset.
BUG-000143558	In ArcGIS Pro, opening the fields view when designing fields on a feature class returns the error message, "An error occurred loading fields" when the 'Touch Keyboard and Handwriting Panel Service' Windows service is disabled.
BUG-000141134	Exporting selected records from two joined enterprise geodatabase tables in ArcGIS Pro exports only 40 records.
BUG-000144821	The Select Layer By Attribute tool selects an incomplete subset when a join between enterprise geodatabase (EGDB) data is defined.

Issue	Description
BUG-000146556	Some NetCDF data display a gap with no data at the prime meridian.
BUG-000149637	In the Workflow pane in ArcGIS Pro, jobs assigned to a group are unable to run unless the jobAssignAny privilege is enabled in the group's role. The 'Start Step' button is greyed out and the error message, "This command is currently unavailable. Unable to start a step for a job not assigned or cannot be reassigned to you." is displayed.
BUG-000150030	Publishing a Python toolbox from ArcGIS Pro 3.0 and newer to ArcGIS Enterprise 10.9.1 and older returns a 999999 error message during staging.
BUG-000150808	Archive difference (DIFF) tables should be created as global temp tables in Azure SQL Databases
BUG-000150825	The setting scale for dimension line layers is not honored when viewing the feature service in ArcGIS Pro.
BUG-000150828	Setting scale for annotation layers is not honored when viewing a feature service in ArcGIS Pro
BUG-000151277	Issue with editing traverse based records.
BUG-000151792	The Generate Routes tool creates incorrect results.
BUG-000152129	Applying raster function templates to mosaic datasets crashes ArcGIS Pro if the template is created using Vector Field symbols.
BUG-000152746	The Error Inspector does not update correctly if two instances of error layers from a validation-enabled feature service with Arcade attribute rules are present in a map.
BUG-000152782	PolygonBuilderEx.ToGeometry returns an exception, "Destination Array was not long enough. Check the destination index, length, and the array's lower bounds. (parameter 'destinationArray')".
BUG-000152786	Running the Geotagged Photos To Points geoprocessing tool is producing an error in ArcGIS Pro 3.0.
BUG-000152813	ArcGIS Pro stops responding when clicking 'Run' in the Create Routes pane.
BUG-000152963	ArcGIS Pro stops responding when exporting a layout containing the Modern Antique basemap with transparency applied to PDF.
BUG-000152993	When creating a polyline from 3D points, the extent ZMin value is set to 0.
BUG-000153009	ArcGISPortal.SignIn throws the Exception: System.AggregateException: 'A Task's exception(s) were not observed either by Waiting on the Task or accessing its Exception property.'
BUG-000153135	Editing feature layers using the Split tool and Edit Vertices tool in a mobile geodatabase returns inconsistent errors and behavior.
BUG-000153423	ArcGIS Pro crashes when sorting fields in the fields view.
BUG-000153528	Error 999999 is returned when executing an Arcade expression on batch calculation attribute rule with 'Exclude from application evaluation' enabled.
BUG-000153652	ArcGIS Pro 3.x crashes when adding an area of interest to a temporal profile.
BUG-000154043	Some candidates are not returned for inputs that do not have zones when 'Match with no zone' is set to True.
BUG-000154410	The Append or Copy Features tool is massively slower than copy, especially for dimension FeatureClasses with factors 50 up to 500 and more depending on FeatureCount.
BUG-000154543	Update Layer Data Sources tool does not support special characters.
BUG-000154544	The Import Generalization Data is not creating Simplify Tolerances correctly.
BUG-000154590	Thin Indoor Pathways fails when transitions have been modified.
BUG-000154591	Thin Indoor Pathways fails with Error 000354 when Levels NAME_SHORT values are not valid feature class names.

Issue	Description
BUG-000155200	Ensure ArcGIS Pro 3.0.x does not crash when working with 11.1 or later Knowledge Graph Server

Issues addressed at ArcGIS Pro 3.0.3

ArcGIS Pro 3.0.3 fixes the issues listed below and includes the fixes listed in the subsequent sections for ArcGIS Pro 3.0.2, 3.0.1, and 3.0.0.

Issue	Description
BUG-000139264	Arcpy.exportToTIFF() creates a different output than the Export Map functionality in ArcGIS Pro when a raster layer includes transparency.
BUG-000141160	Certain content management workflows (creating folder, file geodatabase, adding folder connection, using embedded file explorer) fail when accessed through Catalog or using the content management user interface, but succeed when a geoprocessing tool (Create Folder, Create File Geodatabase) or alternate workflow is used.
BUG-000149126	Calculate Max Elevation Figures GP tool does not consider Vertical Obstruction Features when the feature is browsed to in the UI.
BUG-000151220	Shapefiles do not draw when imported to ArcGIS Pro 2.9 and 3.0 from RemoteView 4.7.
BUG-000151616	Aggregate Polygons running for hours before finishing or not finishing at all.
BUG-000151977	The Import AIXM 5.1 Message tool in ArcGIS Pro 3.0 crashes using customer data.
BUG-000152163	Topology property page miss presents rule after adding a 0 (zero) subtype to Connection lines and validation error not show to user via UI
BUG-000152808	Microsoft .NET update results in ArcGIS Pro 2.8 and 2.9 crashing when changing symbology.
BUG-000153572	Add additional crash dump error messaging for licensing issue
BUG-000153625	Addressed OpenSSL 3.0.3 software vulnerabilities: CVE-2022-3786 & CVE-2022-3602.
BUG-000153626	Addressed third-party Curl library software vulnerabilities: CVE-2022-42915 & CVE-2022-42916.

Issues addressed at ArcGIS Data Interoperability for Pro 3.0.3

ArcGIS Data Interoperability for Pro 3.0.3 fixes the issues listed below.

Issue	Description
BUG-000152297	Python compatibility issue causes some format readers and writers to fail during translation).

Issues addressed at ArcGIS Pro 3.0.2

ArcGIS Pro 3.0.2 fixes the issues listed below and includes the fixes listed in the subsequent sections for ArcGIS Pro 3.0.1 and 3.0.0.

Issue	Description
BUG-000149595	Unable to connect to a Snowflake database from ArcGIS Pro when the password contains a semi-colon(;).
BUG-000149371	ArcGIS Pro crashes when a new feature class is created in a file geodatabase after a mosaic dataset is added to the ArcGIS Pro Contents pane from an enterprise geodatabase.
BUG-000151872	Crash when creating a new geodatabase in the same instance where an ArcGIS Pro 3.0 or higher release geodatabase named SDE exists.
BUG-000151545	ArcGIS Pro stops responding when running the Collapse Road Detail geoprocessing tool.
BUG-000149525	The Divide tool moves the endpoint of a curved line and causes dangles.
BUG-000151664	In the ground to grid corrections dialog, the user interface shows 1.0 as the scale factor when it is not 1.0.
BUG-000151640	For feature templates, renaming a layer in the Contents pane creates a new template instead of renaming it.
BUG-000146027	A SQL expression used in ArcObjects SDK (.NET) 10.4 (10.4.1) gets a different result when used in ArcObjects SDK (.NET) 10.8 (10.8.1).
BUG-000149570	Unchecking the Restrictive option is not honored when editing a branch versioned feature service with contingent values.
BUG-000149344	The database path in the properties in a mobile geodatabase layer is incorrect.
BUG-000151241	The Feature To Line error message, "ERROR 160196: Invalid Topology" is returned when running output data from the Production Mapping models.
BUG-000149899	Misleading error message and behavior in ArcGIS Pro 2.9.x (ERROR 000816: The tool is not valid.) vs. 2.8.x (00256: Server version <value> tool <value> does not have new parameter).
BUG-000151282	ArcGIS Pro crashes when panning and using roaming mode (F8) in a stereo workspace.
BUG-000151305	ArcGIS Pro stops responding when adding a raster to a map or when panning and zooming.
BUG-000149027	ArcGIS Indoors field mapping fails to write annotation data to any default fields besides Use Type field parameter.
BUG-000150207	The final release of ArcGIS Pro 3.0 is not able to load attribute tables with more than 2.5 million records at once.
BUG-000151036	The FMV Extract Video Frames To Images tool sets corner coordinate values using image resolution instead of using the known coordinates.
BUG-000151328	Extract Video Frames to Images reaches 100% but it never finishes. The tool keeps running without errors.
BUG-000151122	Exported traverse file does not contain the coordinates of the vertices in ArcGIS Pro 3.0.
BUG-000151233	Tasks in ArcGIS Pro do not open some of the editing tool panes unless the project is reopened.
BUG-000152295	Copying annotation dataset taking a much longer time than copying the same number of simple geometry features.

Issues addressed at ArcGIS Pro 3.0.1

ArcGIS Pro 3.0.1 fixes the issues listed below and includes the fixes listed in the subsequent section for ArcGIS Pro 3.0.0.

Issue	Description
BUG-000145832	An RFT saved from the symbology pane for a multidimensional raster does not display when used as a symbology template for the same layer.

Issue	Description
BUG-000150336	A crash occurs when displaying annotations stored using the SDEBINARY type.
BUG-000150564	Exporting PDFs from ArcGIS Pro 3.0 and combining them in Adobe Acrobat DC causes them to turn blank.
BUG-000150818	A picture element copied from Excel is not displaying after upgrading to ArcGIS Pro 3.0.
BUG-000150851	The application crashes after selecting a web layer or service when overwriting.
BUG-000150875	The Geostatistical Wizard removes points with selection sets and coincident point aggregation.
BUG-000150895	The ArcGIS Pro application may crash when editing annotation features.
BUG-000151195	Network analysis layers created with ArcGIS Online URL as the network data source fail to solve and returns error messages about the locate settings missing the sources key.

Issues addressed at ArcGIS Pro 3.0.0

Issue	Description
BUG-000088185	The Symbology pane must reflect absolute values for the LAS dataset layer's scan angle rendering.
BUG-000089245	Displaying digital elevation model (DEM) data in a scene in ArcGIS Pro with vertical exaggeration creates gaps in the raster layer at some places.
BUG-000095736	When importing symbology from one feature to another, adding the same feature classes to the map twice with the same name returns the error message, "ERROR 000400: Duplicate inputs are not allowed".
BUG-000107403	The Intersect 3D tool does not always generate closed multipatch output.
BUG-000108419	Saving a model using Save As with an underscore reverts to prior name of model with a '2' added at the end.
BUG-000109124	The typeIdField property in the REST endpoint is not populated with the same syntax used in the fields section.
BUG-000111693	ArcCatalog returns errors when assigning privileges to users on referenced mosaic datasets stored in enterprise geodatabases.
BUG-000112368	Raster statistics fail to update dynamically with the display extent when using stretch symbology imagery and dynamic range adjustment (DRA) in ArcGIS Pro.
BUG-000113421	Failure in importing a specific XML file with representations to a geodatabase.
BUG-000113615	Publishing a service fails if the registered data connection includes the character "ñ" and/or "§" in the database user password.
BUG-000113773	The 'Automatically convert the CAD file to a set of geodatabase feature classes' option does not work in ArcGIS Pro.
BUG-000115361	When a toolbox in ArcGIS Pro is saved using the Save As command, any model builder tools are invisible in the editor.
BUG-000115578	Several libraries and executables are compiled with ASLR disabled in ArcGIS Pro.
BUG-000115579	Several libraries and executables are compiled with DEP disabled in ArcGIS Pro.

Issue	Description
BUG-000116248	The color range applied to a portion of symbols in ArcGIS Pro is not honored.
BUG-000116752	Spaces are considered as separators for multiple tags while publishing a feature service to ArcGIS Online from ArcGIS Pro using the FeatureSharingDraft Python function.
BUG-000117281	The Make Query Layer and Make Query Table tools fail when using the unique identifier field containing a timestamp without the time zone field in the PostgreSQL database.
BUG-000117778	Maps and layouts cannot be organized when many tabs are opened in ArcGIS Pro.
BUG-000118725	Loading a multipatch layer into the Is Closed 3D tool causes crash.
BUG-000118746	Shadow offset values are rounded to the nearest whole number in PDF (Portable Document Format) file exports.
BUG-000120641	Improve the error message returned when Event ID is not mapped or generated in the Append Events tool in ArcGIS Pro 2.3.1.
BUG-000120664	The Manage Tile Cache tool fails to generate cache when using a custom tiling scheme in ArcGIS Pro.
BUG-000120826	In ArcGIS Pro 2.3.1 layout view, adding a picture by creating a bounding box causes gaps with the image and the bounding box.
BUG-000121423	In ArcGIS Pro, related records of a feature layer do not appear in the pop-up window if a join is performed on any of the feature classes involved in a relationship class.
BUG-000121639	The tile layer credits set in ArcGIS Online is displayed as OpenStreetMap in ArcGIS Pro and is not shown in ArcMap.
BUG-000121898	In the Similarity Search tool, the check box for the Collapse_Output_To_Points option is not available for the Standard license.
BUG-000122416	Changing the name of a field with an index built on causes all indexes on the table to disappear in ArcGIS Pro.
BUG-000123133	When the user is a part of more than 53 groups in the ArcGIS Enterprise portal, the Share Package tool fails and returns the following error message, "ERROR 999999: Something unexpected caused the tool to fail. Failed to execute (SharePackage)."
BUG-000123978	The Calculate Field return null values when using a comma as a decimal point.
BUG-000123993	When a relate is created in ArcGIS Pro with a Comma Separated Value (CSV) file, the Explore tool does not show related data of the CSV file.
BUG-000126185	The Qt module causes ArcGIS Pro to crash if a script is run in the Python window.
BUG-000126571	The mosaic dataset incorrectly reads the year (Date) values for Compressed ARC Digitized Raster Graphics (CADRG) images in ArcGIS Pro and ArcMap.
BUG-000127264	In ArcGIS Pro, the output of any conversion tool (when used just before the Feature Class Z To ASCII tool) with the environment setting to enable or disable Z values is not honored by the Feature Class Z To ASCII tool inside a ModelBuilder.

Issue	Description
BUG-000127840	The Alter Field tool after using the Excel to Table tool returns Error 999999 in ModelBuilder.
BUG-000129060	Parallel processing causes the Copy Raster geoprocessing tool to fail.
BUG-000129822	The KML to Layer tool does not honor the setting of the 'overwrite existing datasets' option in ArcGIS Pro.
BUG-000129896	ArcGIS Pro does not honor VBScript extra spacing in labels.
BUG-000129990	Unable to update the packages in ArcGIS Pro after the cloning environment.
BUG-000130096	Using the Register with Geodatabase tool in ArcGIS Pro fails when the query layer is supplied from the Contents pane.
BUG-000130149	ArcGIS Pro requests for the user credentials each time when opening a project with a secured service from a standalone ArcGIS Server even when checking the Save Username/Password option.
BUG-000130192	Disabling the network topology causes ArcGIS Pro 2.5 to crash when the utility network has a Z extent of NaN.
BUG-000130311	Performance issue when rendering features symbolized to vary by attribute in the ArcGIS Pro 2.5 local scene.
BUG-000130599	The MaxHeight and MaxWidth properties fail to restrict the maximum size of a ProWindow.
BUG-000131693	The Select Layer By Attributes tool fails with ERROR 000358 or ERROR 000732 when scheduled in ArcGIS Pro.
BUG-000131710	When running the Near 3D tool within ArcGIS Pro 2.5.1, it provides incorrect values within the output dataset.
BUG-000131771	Field visibility settings are not honored when using the Calculate Field tool in ArcGIS Pro.
BUG-000132004	Unable to add fields via the New Field option for hosted feature services in ArcGIS Pro with a Basic license.
BUG-000132625	A variable in ModelBuilder with a file data type does not recognize .xlsx files when navigating through the Browse... folder icon.
BUG-000132685	The output of the Layer 3D to Feature Class tool results in features being offset when the input data uses geographic coordinate system.
BUG-000133073	The Vary symbology by attribute tab does not honor the changes in the sample size parameter of 'Advanced symbology options' in ArcGIS Pro.
BUG-000133107	Undo or Redo (CTRL+Z/CTRL+Y) works only once while editing in the Format Text window of the Dynamic Text Layout element in ArcGIS Pro.
BUG-000133141	A pop-up in ArcGIS Pro displays a single space for file paths, although there are multiple spaces in the attribute table.
BUG-000133199	Unable to drag multiple layers at one time from the Contents pane into a ModelBuilder in ArcGIS Pro.
BUG-000133466	The ArcGIS Pro Python Package Manager Update tab shows packages unavailable for update.
BUG-000133710	Add the text, "All origins must be in the same time zone when solving an analysis across multiple time zones and using a time-based impedance attribute." to the ArcGIS Pro documentation.
BUG-000133717	Feature services published through Python scripting do not honor the symbology settings when the symbology is set using an Arcade expression.

Issue	Description
BUG-000133723	In ArcGIS Pro 2.6, updating a mutable selection data with contingent values loses the sorting function of the list.
BUG-000133774	In ArcGIS Pro, the cloned Python environments are unable to be deleted if there are two cloned Python environments with the same name in different locations, and if one of the two is active.
BUG-000133896	In ModelBuilder, the Add Join tool still runs successfully after the tool validates and returns the following error messages, "ERROR 000732: Input Layer or Table View: Dataset $MB=TallThings does not exist or is not supported", and "ERROR 000732: Join Table: Dataset $MB=Tablez does not exist or is not supported."
BUG-000133929	Adding a CADRG dataset to a mosaic dataset with an existing duplicate causes the duplicate to be overwritten when the versions differ, no matter the version difference.
BUG-000133934	The ArcGIS Pro service area solve freezes when using the BA 2020 NA dataset and the date and time option.
BUG-000135023	The Append Routes geoprocessing tool fails and returns the following error, "160145: The field is not nullable.[ASSETTYPE]."
BUG-000135109	When running the Create Replica tool for the second time from the Results window, the replica data is not updated to the latest changes.
BUG-000135184	The compression quality export parameter is not honored when saving, closing, and reopening an ArcGIS Pro project in a new session.
BUG-000135186	The Embed Fonts, Export Map Georeference Information, and Simulate Overprint settings are cleared when selecting and deselecting the 'Output as image' parameter in the ArcGIS Pro export PDF setting.
BUG-000135399	Toolboxes saved in ArcGIS Pro 2.6.2 and opened in ArcMap or ArcCatalog 10.8.1 fail to display models despite being saved as the correct version.
BUG-000135738	Running the LAS Building Multipatch tool returns the following error message, "Error 999999 Something unexpected caused the tool to fail."
BUG-000135864	Sum calculations and headers are incorrect or not displayed in the ArcGIS Pro report.
BUG-000136024	Attempts to import the Field Notes template feature layer from ArcGIS Online to a local file geodatabase in ArcGIS Pro with the Feature Class To Geodatabase tool fail, and return the following warning message, "Failed to convert: (Areas. can only join an iterable."
BUG-000136166	In ArcGIS Pro, running the Python script in the Trim Archive History geoprocessing tool trims different BeforeDates when data is from an Oracle database.
BUG-000136238	Attempts to connect to a Web Map Service (WMS) show intermittent failures in ArcGIS Pro.
BUG-000136441	There are duplicate symbology colors when using critical breaks on polygons in a graduated color symbology in ArcGIS Pro.
BUG-000136675	Zooming and panning with a dynamic range adjustment (DRA) does not show changes in ranges under the Contents pane.
BUG-000136842	Using the Identify tool in the ArcGIS Server Rest API returns one result if a layer is configured as a raster layer.

Issue	Description
BUG-000136939	The error message, "Segmentation is unavailable for current Data Source" is returned when using any options in the Target Marketing toolset within the Business Analyst toolbox for ArcGIS Pro.
BUG-000137298	The error message, "ERROR 130051: Input feature class is not registered as versioned." is returned when attempting to execute Calculate Geometry for area on layers with relationships.
BUG-000137849	The Calculate Geometry Attributes geoprocessing tool fails when there is an attribute rule activated on a non-versioned feature class.
BUG-000137859	Unable to view attributes created using null geometry or no geometry in the attribute table if the attributes are stored within a GeoPackage.
BUG-000138129	Using a grid raster as an exploratory training raster in the 'Forest-based Classification and Regression' tool returns the following error message, "Problem extracting values from <path> using origin location <X,Y Coordinates. Failed to execute (Forest)."
BUG-000138174	The ArcGISPortal.GetToken() parameter returns token from another logged-in Portal.
BUG-000138242	Running the 'Polygon to Raster' geoprocessing tool on a large feature class does not honor the CELL_CENTER method parameter.
BUG-000138573	Unchecked legend items from map services are showing in exports.
BUG-000138616	When using Summary Statistics in a report, the null values of a globally unique identifier (GUID) field are not excluded from the count.
BUG-000138659	Importing to ArcGIS Pro through the Import 3D Files tool or as 3D object feature layers, large .obj files lose textures.
BUG-000138861	In ArcGIS Pro, the Cost Connectivity tool fails and returns error 999999 if the cost raster contains cell values of zero (0) instead of a proper error message.
BUG-000138955	Some multidimensional netCDF data do not load in ArcGIS Pro 2.7.
BUG-000139328	Publishing a web tool or geoprocessing service from ArcGIS Pro to ArcGIS Server automatically sets the geometry type as esriGeometryPoint or esriGeometryPolygon if the input feature class is using the point or polygon geometry.
BUG-000139354	The locator with a Point Address locator role incorrectly matches addresses in ArcGIS Pro.
BUG-000139593	The LayoutAddedEvent triggers when Export Layout is run in ArcGIS Pro.
BUG-000140419	The Buffer geoprocessing tool configured with flat end types and listed fields as dissolve type returns rounded ends when using projected coordinate systems.
BUG-000140556	ArcGIS Pro crashes when adding a sublayer of a map image layer with the linear referencing capability to the map.
BUG-000140702	Right-clicking and selecting paste does not work when attempting to paste a value into the query builder in the Select By Attributes tool.
BUG-000140769	When running the Kernel Density tool in ArcGIS Pro 2.8, the output does not cover the entire mask extent. The correct output is produced when running the same process in ArcGIS Pro 2.7.3.
BUG-000140779	When reconciling edits on a feature service with a set time zone, date type fields display incorrectly in the Conflict Manager.

Issue	Description
BUG-000140962	Editor Tracking assigns editor fields for the Creator category when Creator is set to None.
BUG-000140987	In ArcGIS Pro, unable to add a GRIB multidimensional raster to map and read its properties from the Catalog pane.
BUG-000141107	Textures are lost when importing an OBJ file with a file path containing Chinese characters.
BUG-000141183	After changing the size of the straight text, the layout element's anchor position changes.
BUG-000141203	The supportsCalculate property is set to false when bulk publishing feature services from an enterprise database.
BUG-000141235	The Create Drive-Time Areas tool fails when a public routing utility service from another portal is implemented.
BUG-000141275	Sorting order for related records (3rd listing level) set in the pop-up configuration is not honored in ArcGIS Pro.
BUG-000141315	Copying a file geodatabase into an Oracle database results in a truncated target source name for the relationship class.
BUG-000141436	The Calculate Prediction Zones tool fails to generate zones for dates at the end of the temporal range of influence when no time is set.
BUG-000141485	Unable to load ArcGIS Notebook from a Universal Naming Convention (UNC) path.
BUG-000141559	The Clip Layers tool does not work correctly in ArcGIS Pro 2.8.x for layers excluded from clipping if Layer Blend is set to a different option than Normal or Exclusion.
BUG-000141668	Dynamic labels overlap features with certain symbology when using the Maplex Label Engine.
BUG-000141723	Date field elements display database time rather than the formatted date when including the date into a report.
BUG-000141805	Unable to remove a BIM cloud connection from the Catalog pane.
BUG-000141808	The leader tolerance text to 'Automatically snap the leader to the text' is cut off when working with the French language pack.
BUG-000141824	ArcGIS World Geocoding Service API does not consider the 'searchExtent' parameter when geocoding addresses for China.
BUG-000142076	Changing the depth of a multidimensional raster layer does not display correctly in ArcGIS Pro 2.8.2.
BUG-000142107	Segment Skyline attributes do not populate when the Segment Skyline option is enabled in the Skyline tool.
BUG-000142117	The Export Raster tool in ArcGIS Pro returns the error message, "Failed to export <raster name>: Failed to export the data."
BUG-000142125	The error message, "ERROR 130051: Input feature class is not registered as versioned" is returned when running Calculate Geometry on layers containing joins stored in an enterprise geodatabase in ArcGIS Pro.
BUG-000142182	The Modify Association pane appears to succeed when creating an invalid connectivity association in a file geodatabase.
BUG-000142183	The Apply Symbology From Layer geoprocessing tool crashes with mosaic datasets when the 'Update ranges' option is selected.

Issue	Description
BUG-000142227	Overlying dialog windows hinders the 'ArcGIS Project: Save Changes to' dialog from working correctly.
BUG-000142271	Field Calculator with Python 3 as the expression type changes the decimals in ArcGIS Pro.
BUG-000142304	Additional TrueType Fonts (.TTF) installed on a machine and used in ArcGIS Pro display dots above and/or below, and/or adjacent to various characters of a label when a halo with no transparency is applied.
BUG-000142319	Issue with the zoom-in function while having a map in a rotated state where it is zoomed out instead.
BUG-000142398	Esri China basemaps from Tianditu Web Map Tile Service (WMTS) fail to load in ArcGIS Pro, as it appears there are two parameters for tokens.
BUG-000142441	The attachment is not retained when running a feature service through ModelBuilder.
BUG-000142463	Clicking the Previous Extent tool in the Quick Access Toolbar does not return to the previous extent.
BUG-000142466	In ArcGIS Pro, the Construct Sight Lines tool does not recognize the correct elevation value for the Target Height Field parameter with a float field type.
BUG-000142500	Federal Geographic Data Committee (FGDC) metadata elements are lost when upgrading to the ArcGIS metadata format.
BUG-000142525	When word wrapping is enabled, table frame columns are not vertically balanced as expected, and some field rows are missing.
BUG-000142545	In ArcGIS Pro, running arcpy.management.CalculateFields() returns the error message, "Error 000735: Value is required" when passing a value table to the fields parameter.
BUG-000142552	Layer search does not work as expected in ArcGIS Pro when the data is stored in an enterprise geodatabase.
BUG-000142556	ArcGIS Pro report does not print the field values with domain attached, unless a subtype field is included in the report.
BUG-000142584	In a model in ArcGIS Pro, when the Select Layer By Location tool's Layer With Selection output variable is set to 'Add To Display', the name of the layer added to the map is derived from the Output Layer Names output variable.
BUG-000142713	The error message, "ERROR 000824: The tool is not licensed. Failed to execute (CreateThiessenPolygons)" is returned when executing the Neighborhood Summary Statistics tool with a Basic license in ArcGIS Pro.
BUG-000142798	ArcGIS Pro does not retain the Open Sans font as the Text Symbol Font.
BUG-000142814	The Linear Burn type does not have georeferencing information in PDF when using the WGS 1984 Web Mercator (Auxiliary Sphere) projection.
BUG-000142821	Unable to modify the default values for the legend item properties if the layer name is empty in ArcGIS Pro.
BUG-000142879	When trying to calculate the field of a joined hosted feature layer, the error message, "Error 999999: Something unexpected caused the tool to fail" is returned.
BUG-000142997	In ArcGIS Pro, the multidimensional raster layer only displays NoData with certain netCDF files.

Issue	Description
BUG-000143017	When adding custom raster function templates to ArcGIS Online, the raster data does not honor the image display configuration.
BUG-000143077	ArcGIS Pro 2.8.x Python Package Manager is unable to install GeoPandas.
BUG-000143130	In ArcGIS Pro, after running the Convert Time Field tool in a standalone Excel table with the Enable Undo check box unchecked, the table view cannot be opened and the error message, "An expected field was not found or could not be retrieved properly." is returned.
BUG-000143151	Using ST_Geometry increases the processing time when creating a join from a feature class to a table.
BUG-000143229	ArcGIS Pro does not parse dynamic job property tokens in ArcGIS Workflow Manager (Classic).
BUG-000143285	An error is returned while creating a query layer in a geodatabase on the Microsoft Azure SQL Server instance with the Lithuanian_CI_AS collation.
BUG-000143289	In ArcGIS Pro 2.9, the layout element returns incorrect values when rotated.
BUG-000143326	ArcGIS Pro 2.8.1 incorrectly interprets or imports U and V components when adding GRIB data while ArcMap 10.8.1 interprets correctly.
BUG-000143389	When performing a join in ArcGIS Pro, the matching join field name displays intermittently with changed cases.
BUG-000143393	When publishing from ArcGIS Pro 2.8.3 to ArcGIS Image Server 10.9, ArcGIS Server folders are not visible in the Publish Image Server window.
BUG-000143414	Loading the Configure Pop-ups pane for a web map with a custom field order only displays the original field order.
BUG-000143425	The Multipart To Singlepart tool does not generate all of the expected results.
BUG-000143430	The Eyedropper tool in the Symbology pane does not work when the Symbology pane is set to auto-hide.
BUG-000143455	There are empty output and lack of output display when converting multipatch features to KMZ in ArcGIS Pro 2.7.2, 2.8, 2.8.1, and 2.8.3.
BUG-000143478	Error 999999 is returned when trying to convert the LAS files in format 1.4 to an earlier format using the Convert LAS tool in ArcGIS Pro.
BUG-000143485	Updates to utility network point feature m-values using the Edit Vertices tool in ArcGIS Pro do not persist when saved.
BUG-000143529	The error is returned when running the Service Area analysis tool, "Error DBMS table not found Invalid object name 'sde.sessions_137833_5'".
BUG-000143543	The Python 3 runtime in ArcGIS Pro 2.7 and above crashes when attempting to create a service definition file (.sd) of the Workflow Manager (Classic) service type by using the createSD method of the WorkflowConnection object.
BUG-000143548	The error message, "The connection property set was missing a required property or the property value was unrecognized" is returned when attempting to create a project or map package in ArcGIS Pro.
BUG-000143587	Using a group template to create features in Gas Utility Network does not establish connectivity between a network line and a midspan device.

Issue	Description
BUG-000143589	Geodatabase.ApplyEdits() returns the following error message, "GeodatabaseRowException: A requested row object could not be located" when applying edits to a utility network in ArcGIS Pro 2.8.x.
BUG-000143599	The annotation sublayer's Layer IDs are not in sequential order when published from ArcGIS Pro.
BUG-000143601	The Extract by Attribute (Spatial Analyst - Toolset/ Extraction) tool is not working correctly in ArcGIS Pro 2.8.3 or ArcGIS Pro 2.9 Beta if a comma is defined as the decimal delimiter in the region settings of the operating system (OS).
BUG-000143605	The Raster Calculator tool fails to execute in a model with an iterator when the layer name in 'Map Algebra expression' contains the '%' symbol in ArcGIS Pro.
BUG-000143614	The Add Variable Based Suitability Criteria (Business Analyst) tool fails when using variables from a Statistical Data Collection (SDCX) layer.
BUG-000143639	In ArcGIS Online, when using a routing service with a custom travel mode, the Generate Service Areas tool presents a disk output when ring output is selected.
BUG-000143655	Memory leak due to the panning cartographic representations causes ArcMap to crash.
BUG-000143659	Error writing i3sREST with international characters to Amazon Web Services (AWS), Alibaba, or Google Cloud Store.
BUG-000143686	Unable to use the output of the Trace tool as an input for analysis in IDLE (Integrated Development Environment).
BUG-000143779	After posting changes to a protected default version, the map display is not correctly refreshed.
BUG-000143782	Unable to view description information for an output generated in ArcGIS Pro using the Layer To KML tool.
BUG-000143788	Unable to run the 'Export as Graphics' option on a data containing Japanese characters when the extension is .png or .jpeg.
BUG-000143805	Merge parcel features with an active record performs much more slowly than when no active record is set.
BUG-000143839	Tables created from PgAdmin or PostgreSQL using Chinese characters are not visible under the database in ArcMap.
BUG-000143877	The Feature to NetCDF tool returns the error message, "Error: 999999" when an input of 40,000 records and 3 dimensions are added to the data.
BUG-000143892	Reconcile fails with the error message, "An expected field was not found" returned on Utility Network version 3.
BUG-000143910	The Merge tool in ArcGIS Pro produces a table with <Null> values when the input tables are browsed from a disk.
BUG-000143931	There is a difference in the naming convention between ArcGIS Pro 2.5 and ArcGIS Pro 2.8.3 for the font directories of custom fonts in vector tile packages.
BUG-000143940	The Validate Network Topology tool does not include the success flag to statusUrl when run asynchronously and Success = true.

Issue	Description
BUG-000143972	The Package Map tool in ArcGIS Pro fails to create a map package (.mpkx) to be used with ArcGIS Runtime Local Server when the 'Reference all data for Runtime' check box is checked.
BUG-000143987	The group sharing configuration is not maintained when overwriting a service after switching the active portal.
BUG-000143994	When using the JSON To Features (Conversion) geoprocessing tool, field types and text field lengths for the output feature class are changed from the original data. Add a note regarding limitations in documentation or revise the tool to not modify the schema.
BUG-000144001	Enriching a trade ring in ArcGIS Pro using a statistical data collection calculation variable sourced from Portal for ArcGIS results in the error message, "ERROR: 999999" is returned if the calculation results in zero.
BUG-000144029	ArcGIS Pro freezes and crashes when exporting mosaic imagery to TIFF format.
BUG-000144030	The Spatially Constrained Multivariate Clustering tool creates '(' point symbology after the first 30 point symbols.
BUG-000144038	When exporting a data clock, calendar heat chart, or matrix heat chart in ArcGIS Pro as a graphic, the chart does not export the file in a .png or .jpeg format.
BUG-000144087	Running the Repair Geometry tool on a multipoint feature class causes ArcGIS Pro to crash.
BUG-000144103	The ImportAixm51 function imports embedded fixToleranceArea instead of trajectory into AIS.ProcedureLeg.
BUG-000144159	The Pivot Table geoprocessing tool does not work as expected.
BUG-000144178	In ArcGIS Pro 2.8.x, the horizontal scroll bar does not allow scrolling over an entirely new section of columns at a time, as previously possible in ArcGIS Pro 2.7.x.
BUG-000144198	Using a non-multidimensional raster as an input for the Summarize Categorical Raster tool crashes ArcGIS Pro.
BUG-000144200	The 'Modified in this version' option for the Error Inspector is not displayed after changing version from one child version to another from the Contents pane in ArcGIS Pro.
BUG-000144209	Unable to enable time on a related table in ArcGIS Pro.
BUG-000144240	The Export Subnetwork tool has performance issues with certain feeders.
BUG-000144263	The time slider does not display the data if the regional format is set in Thai (Thailand).
BUG-000144269	When the regional settings of the PC are set to decimal symbol ',' and digit grouping symbol '.' the Find Local Peaks Or Valleys tool returns the following error message, "could not convert string to float".
BUG-000144322	When using the Skyline Graph tool, the Base Visibility Angle user interface validator returns an incorrect error message.
BUG-000144330	When using the Skyline Graph tool, the Output Graph Image title is auto-populated with extra and unnecessary characters.
BUG-000144332	Maps containing in-memory layers are copied when layouts are copied and pasted.

Issue	Description
BUG-000144339	The Merge Divided Roads tool creates an output table displaying three or four input road segments contributing to a single output road segment in some areas.
BUG-000144346	The Append tool skips matching attributes for additional feature classes after the first with the NO_TEST option but works in ArcMap.
BUG-000144352	Version independent note for the Trim Archive History geoprocessing tool help.
BUG-000144357	When running Append Events for non-alpha routes, the action fails and the error message, "Error: 999999" is returned.
BUG-000144361	The documentation for the Db2 geodatabase must include information that TEMPORARY TABLESPACE (and USE privilege for it) is necessary for some geodatabase operation to succeed.
BUG-000144366	The Table Compare tool fails on database views.
BUG-000144370	Save web map creates from a Web Coverage Service (WCS) instead of referencing the Web Coverage Service (WCS) endpoint in the web map.
BUG-000144376	The Create Parcel Records tool hangs at 91% for days when the tool is used for 10 Mio Parcels.
BUG-000144415	Unable to publish to servers secured with PKI prior to federation with a PKI secured portal.
BUG-000144420	Reconcile fails with a collation conflict error when a database collation is different than an instance collation.
BUG-000144443	Some suggestions may vanish and reappear or show incorrect results after certain characters are reached within a locator.
BUG-000144500	Deep Learning inference tools fail when input is a public tiled imagery layer that is using the JPEG compression and used by a different organization.
BUG-000144501	Deep Learning inference tools, such as Classify Pixels, and Detect Change returns the error message, "ERROR 001009: The raster dataset is not a mosaic raster dataset" when the input is a folder containing an image.
BUG-000144520	When two or more map frames are in a layout and either the linked map frame extent or the linked map frame center map constraint is used, the intersecting layer appears to be cleared when switching from one map frame to another under the Contents pane.
BUG-000144522	ArcGIS Pro crashes when using the 'Create 3D Object Scene Layer Package' tool.
BUG-000144527	The legend patches from the ArcGIS Living Atlas of the World layers appear smaller when exported to PDF.
BUG-000144529	The dirty area renderer for terrain datasets is missing in ArcGIS Pro.
BUG-000144534	Creating geoprocessing services that have a defined input parameter schema in a Python toolbox causes ArcGIS Pro to crash.
BUG-000144542	The symbology applied in an input layer using the Import option in the Appearance tab changes the pop-ups configured based on the symbology layer.
BUG-000144547	The 'move edits to base' option does not list in Manage Properties for Registered As Versioned (Traditional) once the dataset is set versioned with move edits to base.

Issue	Description
BUG-000144561	The Python window calls to FindSpaceTimeMatches returns the error, "ERROR 000735: primary_start_date_field: Value is required."
BUG-000144585	An error message, "Invalid characters in the Workspace" is returned when creating the Spatial ETL tool with a non-Latin alphabet in ArcGIS Pro 2.9.0.
BUG-000144596	The Zoom To Layer functionality does not account for a definition query in ArcGIS Pro 2.9 when data is stored in an enterprise geodatabase.
BUG-000144632	The feature created using the Create Features tool does not show in the Attributes window of ArcGIS Pro 2.9 if the feature class has a definition query defined.
BUG-000144636	The table name in the Attributes tree view does not match with the table name in Contents pane when multiple instances of the same table are in the map.
BUG-000144659	Unable to render a preview image when more than 1,000 datasets are selected in a mosaic dataset.
BUG-000144666	In ArcGIS Pro, the long-running Save Edits operation in a branch version returns the following error message, "Save Edits Failed."
BUG-000144689	When an export map request that includes a definition expression on an invalid map layer is performed on a dynamic map service, the service returns incorrect query results until it is restarted.
BUG-000144695	When using the Calculate Field tool, there is a conflict between the date and text fields when the date field is used as the first parameter of a method created in the code block.
BUG-000144700	When reconciling, the following error message is returned, "ERROR: Insufficient permissions [StructureBoundary]" if the service is published by a database user without permissions to a utility network present in the same database by another database user
BUG-000144715	In ArcGIS Pro 2.8.x and 2.9, listLayers()" in a map returns corrupt layers for annotation class (sub) layers, if sub-layer index greater than 9.
BUG-000144716	In ArcGIS Pro 2.9, adding a web feature service (WFS) layer to a map displays a standalone table instead of the feature layer.
BUG-000144728	The Terrain and Obstacle Profile element displays multiple runway centerlines when running the Generate OIS Profile Data tool with the Sample Runway Features option enabled.
BUG-000144745	Installing an earlier version of a Python package fails, and the current version is installed instead.
BUG-000144795	In ArcGIS Pro, the raster layers are not correctly displayed with CMYK values although color management is enabled.
BUG-000144804	Polygons with the Split output geometry type overlap in a service area.
BUG-000144815	The service area solver creates polygons with null geometry for a combination of polygon detail options, overlap options, and the trim distance.
BUG-000144821	The Select Layer By Attribute tool selects an incomplete subset when a join between enterprise geodatabase (EGDB) data is defined.
BUG-000144828	Versioning a feature class with a Spatial Index V2 index type returns the following error message, "ORA-02327: cannot create index on expression with datatype ADT."

Issue	Description
BUG-000144865	Lines from a service area with a Split output geometry type are not as expected.
BUG-000144871	When reverse geocoding using the Chinese geocoder, the following error message, "Error 200: unable to parse" is returned intermittently.
BUG-000144876	The error message, "There was a problem in sending the error report." is returned when submitting ArcGIS Pro crash dumps within a certain size range.
BUG-000144877	Running the Update Subnetwork tool does not propagate the network attribute values into a configured field.
BUG-000144881	The Enable Editor Tracking tool incorrectly moves Last Editor Field into Creator Field if Creator Field is left empty.
BUG-000144917	Unable to apply 3D symbology files if the file names include Japanese characters.
BUG-000144951	The profile view of a layout is exported incorrectly from ArcGIS Pro.
BUG-000144963	The Share as Web Layer option fails and returns the error message, "Federated server not available" when ArcGIS Enterprise is federated with port 6443 and the ArcGIS Server WebAdaptor access is disabled.
BUG-000144966	ArcGIS Pro crashes when upgrading a utility network.
BUG-000144967	The Python script fails in ArcGIS Pro 2.9, but runs in ArcGIS Pro 2.8.
BUG-000144972	The Table To Table tool in ArcGIS Pro 2.9 creates a table in DBF format rather than CSV format when the output name is fully uppercase.
BUG-000144983	The Run Generalization script tool does not execute when the language in ArcGIS Pro is set to German.
BUG-000144988	Editing a curve centerline not associated with a route returns a 3D error message.
BUG-000144993	In ArcGIS Pro, the Divide tool gives an incorrect preview for the Proportional Area method and does not divide the features if a geographic coordinate system is used.
BUG-000144999	ArcGIS Pro stops responding when executing the Thin Spot Heights geoprocessing tool.
BUG-000145008	The Generate Topographic Contours script does not execute on a machine running ArcGIS Server 10.9.1 when using the ArcGIS Pro-based runtime engine.
BUG-000145031	The Resample tool in ModelBuilder reverts to the original cell size if the input raster name variable is changed.
BUG-000145043	The ArcGIS Pro documentation in the Japanese language does not contain 'Licensing information' for all tools.
BUG-000145058	For map services published from ArcGIS Pro, edits made to datasets from file geodatabases can return stale query results.
BUG-000145121	Unable to put a margin greater than 100% when attempting to constraint secondary map frame extents to the main map frame extent.
BUG-000145132	ArcGIS Pro allows publishing a database view in an editable feature service if it is not registered with the geodatabase.
BUG-000145172	When the X or Y column of a XY Event layer is based on a feature class, publishing the map as a feature service fails staging and no analyzer warning is returned.

Issue	Description
BUG-000145186	Exporting selected features from a joined layer in ArcGIS Pro 2.9 generates Null values in the resulting layer's attribute table's joined fields.
BUG-000145187	Without reconciling and posting, the attachments added to a branch version fail to open after closing ArcGIS Pro.
BUG-000145244	The PDF To TIFF (Conversion) tool fails if the region format is set to Spanish and the decimal separator set to ','. When the region format is changed to the regional setting and the decimal separator is set as '.', the tool works on the second run, no ma
BUG-000145253	Overwriting a hosted feature layer on ArcGIS Online from ArcGIS Pro fails and deletes the initial hosted feature layer.
BUG-000145258	Slow performance occurs with the Calculate Geometry Attributes geoprocessing tool in ArcGIS Pro.
BUG-000145295	The input fields for the Geocode Addresses tool within ModelBuilder reset upon validating the model.
BUG-000145298	Printing a 11x17 layout map series directly from ArcGIS Pro shifts the map frames about an inch to the right.
BUG-000145300	A parcel type line feature class does not draw on a map and contains a parcel polygon symbology when the parcel type feature class contain subtypes.
BUG-000145322	The Update Subnetwork tool fails and return the error message, "Error 999999: Arithmetic overflow error converting float to data type numeric."
BUG-000145324	In ArcGIS Pro, importing tables to a geodatabase from Revit files fails and returns an error message when using the Table to Geodatabase tool in a geoprocessing model which is run for the second time. Restarting ArcGIS Pro is needed after each run.
BUG-000145329	Racing conditions cause data loss in certain cases when a large number of concurrent edits are performed on the default version.
BUG-000145334	A dirty area returns "Status 9" after validation when the errors are created (expect '8').
BUG-000145341	Include more details in the documentation on acceptable rasters for the Boundary Clean tool in ArcGIS Pro.
BUG-000145350	ModelBuilder does not accept the inline variable as a valid input if the Reclassify Field tool is used.
BUG-000145356	The Export Data Changes Message tool has inconsistent behavior depending on the delta file's path length.
BUG-000145357	Propagation is not working correctly for lines connected to the same terminal on a device with multiple terminals.
BUG-000145363	Log4J - ArcGIS Workflow Manager Server.
BUG-000145364	Running the Add Attribute Rule tool headlessly and via the design view bypasses the name and description character length limits.
BUG-000145368	ArcGIS Pro crashes when a LiDAR data without statistics is provided as an input for the Prepare Point Cloud Training Data tool.
BUG-000145396	Update the parameter names in the Select By Attributes tool in ArcGIS Pro to match the upper case and lower case letters.
BUG-000145398	Valid annotation features are failing to upgrade with the Upgrade Dataset tool in certain cases.

Issue	Description
BUG-000145440	Moving a toolbox using the Save As option causes the custom models to not load properly in ModelBuilder.
BUG-000145459	In ArcGIS Pro, the Make Building Layer tool fails and returns the following error message, "999999: something unexpected caused the tool to fail" when an IFC dataset is set as the 'Input Feature Dataset' parameter in the tool.
BUG-000145485	When an apostrophe (') is used in #Description of the Python script in an advanced labeling expression in ArcGIS Pro 2.9, the error message, "Invalid Expression. NameError: name 'FindLabel' is not defined" is returned.
BUG-000145486	The Share As Route Layers tool returns the "Error 030200" error message when sharing a solved vehicle routing problem layer.
BUG-000145516	Inserting multiple shapefiles as the input of the Append tool returns the error message, "The shape type of <> is not the same as that of previously entered datasets."
BUG-000145523	When adding a web feature service (WFS) to an ArcGIS Pro map, the error message, "Error: Cannot create a table with duplicate column" is returned.
BUG-000145524	ArcGIS Pro's Community Profile report does not abide by the transparency property applied to a hosted feature layer.
BUG-000145529	The Extract Values to Points tool fails and returns the following error message, "Error 010005: Unable to allocate memory when points fall outside of the raster."
BUG-000145596	The Antialiasing mode configured in ArcGIS Pro is not honored in the ArcGIS Server REST endpoint.
BUG-000145598	When repeatedly rearranging the order of a group of point layers in a web map published to Portal for ArcGIS 10.9 or 10.9.1 and subsequently saving in ArcGIS Pro 2.9.0, each layer's symbology is gradually distorted or blurred.
BUG-000145599	Remove Log4j from GeoAnalytics Tools and Apache Spark in ArcGIS Pro.
BUG-000145600	Log4J - Update Log4J in the Python module SAS-ArcGIS Bridge (SASPY).
BUG-000145606	Update the ArcGIS Data Interoperability extension to take advantage of the Log4J updates.
BUG-000145655	The fields of the ACE_Attributes in an AutoCAD DWG file are blank when the file is added to ArcGIS Pro.
BUG-000145680	The GRIB2 data is unable to be opened nor added in ArcGIS Pro.
BUG-000145734	When upgrading the geodatabase to 10.9.1/2.9, the problems are not correctly detected and result in the SDE-Repository corruption of the upgrades.
BUG-000145735	Update the ArcGIS Data Reviewer documentation to include information indicating a Standard license is required when using the new Data Reviewer Ready to Use Rules.
BUG-000145742	In ArcGIS Pro 2.9, saved tables within the Weighted Overlay geoprocessing tool are not displayed in the 'Select weighted overlay table to be loaded' window.
BUG-000145757	It is possible to truncate a feature service with the Truncate Table tool.
BUG-000145760	The Calculate Geometry tool fails, and returns a traceback error message in ArcGIS Pro 2.9 when the feature class has an attribute rule.

Issue	Description
BUG-000145762	The route's geometry does not match the route's attribute information in the ArcGIS Enterprise 10.9.1 Network Analyst Vehicle Routing Problem (VRP) solver.
BUG-000145780	Overwriting an ArcGIS Online hosted feature layer that contains layer views fails when ArcGIS Pro is not logged in to the item owner's account.
BUG-000145808	In ArcGIS Pro, the Import AIXM 5.1 Message tool is not importing any airspace data from customer-supplied messages.
BUG-000145816	The Project tool enlarged the SLPK file created from the Create Integrated Mesh Scene Layer Package tool with no texture optimization.
BUG-000145898	Clipping an annotation layer returns an error message, "Application has stopped working".
BUG-000145921	The following error message, "Error 999999" is returned when using the Copy Parcels tool with data with editor tracking disabled.
BUG-000145933	A hosted vector tile layer does not display at certain zoom levels in the ArcGIS Field Maps mobile app.
BUG-000145954	Editor tracking values are not preserved when the Copy Parcels (Parcel) tool is run with an input parcel fabric layer that has selected polygons.
BUG-000145972	When loading band_1 of a new TIFF file, selecting 'Yes' to calculate statistics crashes ArcGIS Pro.
BUG-000146003	Joining a versioned feature class with a table containing the feature class's name in its name fails and returns an error message.
BUG-000146006	A VRP solver object initialized using an ArcGIS portal URL does not map time window fields on Orders, resulting in no solution or an invalid solution.
BUG-000146031	Quick Import contains a string (,,"_FME_DATASET_IS_SOURCE_true"), and fails to open the Specify Data Source dialog box.
BUG-000146098	After running the Add Join tool and exporting the joined data to a new feature class through the export feature, the attribute values change to <Null> in ArcGIS Pro 2.9.1.
BUG-000146110	Creating a map package in ArcGIS Pro fails when the map contains a layer referencing a feature class with a German umlaut like ä, ö, and ü in its name.
BUG-000146144	The 'Nearby Restaurants' Infographic template fails through the Summary Reports tool when the Business Analyst Data Source is set to the 2021 installed Canada Dataset.
BUG-000146160	In ArcGIS Pro 2.9.1, when the decimal separator is set to comma, the Calculate Geometry Attributes tool fails on a float or double field and returns the following error message, "Calculate Geometry Attributes failed".
BUG-000146207	ArcGIS field data types documentation states acceptable inputs for Scale of Double Data Types are 0+. However, using 0 in both the Add Field geoprocessing tool and attribute table returns the error message, "Cannot add field (field name) to (feature class)."
BUG-000146210	The total number of training blocks being processed is incorrectly calculated in the Train Point Cloud Classification Model tool.

Issue	Description
BUG-000146211	An error message is returned in the ArcGIS Pro LAS dataset pyramid when pyramid-building fails due to tree architecture reaching its maximum number of levels.
BUG-000146231	In ArcGIS Drone2Map, when a project is in a CRS with US Survey Foot units, the Volume tool only acknowledges the DTM as the elevation surface.
BUG-000146235	A crash is encountered when attempting to draw LAS dataset points.
BUG-000146237	The simple line callouts with geometry do not upgrade or display in ArcGIS Pro.
BUG-000146238	The Transfer Attributes (Editing) tool does not transfer true curves in ArcGIS Pro.
BUG-000146250	The documentation does not state that navigating to the Execution option is required to import a script in a toolbox in ArcGIS Pro 2.9.x.
BUG-000146309	In ArcGIS Pro, the dynamic scale does not update upon switching the map to an existing bookmark.
BUG-000146342	The Utility Network service fails to start with the error message, "The dataset name is invalid" returned.
BUG-000146357	Pop-ups do not display for sub-type group layers when the Explore tool is set to 'Visible layers' and the layer is not selectable.
BUG-000146370	When saving the Environments settings from the Analysis ribbon to preserve the Global IDs prior to creating a new model and only when running the model from the Task Scheduler inside ArcGIS Pro, the Environments settings are not honored and the Global IDs
BUG-000146391	The cartographic realignment of a route with a high number of vertices and multiple time slices is taking an excessive amount of time to complete.
BUG-000146454	In ArcGIS Pro 2.9.1, copying and pasting a map with a query layer produces a broken data source for the query layer in the copied map.
BUG-000146481	Some operations against feature services with branch versioned data that use asynchronous processing are being allowed for portal users that are not version administrators when the default version has protected access.
BUG-000146484	The Calculate Geometry tool fails when using an enterprise geodatabase connection with Windows operating system authentication.
BUG-000146492	Buffer calculations use the U.S. survey foot when converting units between imperial and metric, which is to be deprecated this year.
BUG-000146494	The Spatial Join tool merges fields instead of append in ArcGIS Pro.
BUG-000146496	The error message, "Error: Split point results in a zero length polyline" is returned when using the Split Into COGO Lines tool against a coordinate geometry (COGO)-enabled feature service.
BUG-000146497	When opening a new project in ArcGIS Pro 2.9.1, after saving and reopening the project, Styles under the Catalog pane are broken and have to be repaired.
BUG-000146505	The cursor of the Reshape tool changes when executing it multiple times in ArcGIS Pro.
BUG-000146516	Error codes are required in the Analyze Airport Features tool to inform users of the missing required schema.

Issue	Description
BUG-000146518	In the ArcGIS Pro 2.9 Analyze Airport Features help document, the usage point incorrectly mentions Input Runway Features for the Airport Control Point schema.
BUG-000146519	In the Analyze Airport Features help documentation, the output fields, AGL, MSL, and VUOM, are not explained.
BUG-000146520	The Analyze Airport Features populates VUOM in meters in the output table but all inputs have vertical units in Foot_US.
BUG-000146530	Feature class with the WGS 1984 projection fails to export the upper section when the map frame is set to the Wagner VII projection at the 1:40,000,000 scale.
BUG-000146572	The Update Subnetworks geoprocessing tool for a specific subnetwork fails with the error message, "Error 999999, Error: Unexpected Operation" returned.
BUG-000146576	Geocode services published from locators supporting a single feature type do not return records unless the Feature Type parameter is specified during reverse geocoding.
BUG-000146606	The 'Ignore Invalid Locations' option in the Network Analyst solver is not honored for locations beyond a specified search tolerance.
BUG-000146610	A segment from the branch versioned scenario documentation is misleading and requires adjustment.
BUG-000146618	ArcGIS Pro crashes when executing the Match Layer Symbology To A Style tool within a script tool.
BUG-000146639	The WFS To Feature Class tool fails when the input layer has a field name with double underscores.
BUG-000146650	The contingent values are not ported over when switching from the default version to a child version using the Contents pane.
BUG-000146664	ArcGIS Pro label properties fail and the labels disappear after importing a symbology from the ArcMap .lyr file.
BUG-000146673	The points do not display at certain scales when viewed in a stereo map.
BUG-000146677	The GetZsFromSurfaceAsync method does not produce the correct values compared to the Add Surface Information geoprocessing tool.
BUG-000146699	Incorrect variable use in the sample code from the import and copy metadata section in the documentation.
BUG-000146727	ArcGIS Pro 2.9.1 crashes after switching the language to Czech when editing the metadata.
BUG-000146729	The hyperlink in the pop-up is not clickable when the folder path has non-Latin characters.
BUG-000146745	Creating mobile map packages fails for a large area with ArcGIS StreetMap Premium data from ArcGIS Online.
BUG-000146749	When trying to view geodatabase connection properties for a database connection without a saved username or password, ArcGIS Pro 2.9.1 crashes.
BUG-000146752	Relating a branch versioned point to a related table record in a child version does not display in the Version Changes window when the relationship class is attributed.

Issue	Description
BUG-000146772	Unregistering a feature class as a versioned data removes the updates to the default data version.
BUG-000146789	The Export Subnetwork tool fails and returns the error message, "Operation is only allowed by the owner of the version" unless the user is the owner of the version or the version access is public.
BUG-000146802	The Disable Network Topology tool succeeds but leaves the topology in an enabled state.
BUG-000146831	For Expat (aka libexpat) versions before 2.4.4, there is a signed integer overflow in XML_GetBuffer for configurations with a nonzero XML_CONTEXT_BYTES.
BUG-000146832	OpenSSL before 1.1.1L has a critical security vulnerability.
BUG-000146833	When attempting to open a table from a Snowflake cloud environment running on Windows in Spanish version in ArcGIS Pro, it fails with the error message, "Failed to open table. The number of points is less than required for feature."
BUG-000146889	The Import Associations tool fails with the error message, "Error 000192: Invalid value for ASSOCIATIONTYPE" when using the Utility Network Package tools.
BUG-000146893	Slow performance in ArcGIS Pro 2.9.1 when using the Aggregate Polygons (Cartography Tools) geoprocessing tool but takes seconds to complete the process in ArcMap 10.8.1.
BUG-000146920	Attempting to publish a web layer with a tile cache from ArcGIS Pro to ArcGIS Online generates an error if the map frame name contains a trailing space.
BUG-000146934	Semicolon delimited files with decimal values in certain formats (#.###, ##.###, ###.###) are not imported correctly in ArcGIS Pro 2.9.
BUG-000146959	When exporting rasters from a mosaic dataset using the Export Raster pane, deselecting build pyramids is re-selected when the Output Format is changed.
BUG-000146968	Exporting a raster with the transparency setting configured to a PDF file format in ArcGIS Pro 2.9.1 results in an opaque output.
BUG-000146996	The Add Surface Information (Spatial Analyst) tool does not work unless a 3D Analyst license is assigned.
BUG-000146998	Restoring a row via Conflict Manager can create scenario where dirty areas become out of sync.
BUG-000147004	The features in the Web Feature Service (WFS) are rendered on the map at the wrong location when the service is published in the ArcGIS Enterprise 10.9.1 portal.
BUG-000147006	Unable to type in or change the dots per inch (DPI) when using ArcGIS Drone2Map to export a map to PDF, even though the documentation says it is possible.
BUG-000147010	In ArcGIS Pro 2.6.8, the error message, "Realign Route failed unexpectedly" is returned with the Engineering network.
BUG-000147014	Switching options for 'Allow Null' in ArcGIS Pro field design crashes the client when working with SQL Server geodatabase.

Issue	Description
BUG-000147030	ArcGIS Pro 2.9.x crashes when running the Create Cloud Storage Connection File geoprocessing tool.
BUG-000147040	The Split Features tool fails with the error message, "There was an error during processing."
BUG-000147058	The ArcGIS REST API, Vehicle Routing Problem (VRP) is returning incorrect departure and arrival time values after latest update to StreetMap Premium Data.
BUG-000147086	The "Warning 240005" warning message is untranslated in ArcGIS Pro although a Japanese language pack is installed.
BUG-000147089	Snapping stops working after using the Edit Vertices or Move tool with a specific workflow.
BUG-000147104	The Extract Values to Points tool runs on empty input and returns the error message, "ERROR 999999."
BUG-000147126	Changing the name of the Details Field Value text in the Contents pane corrupts the PDF export.
BUG-000147130	ArcGIS Pro crashes when running the Collapse Road Detail geoprocessing tool.
BUG-000147141	After using the Align Parcels tool, certain areas from one parcel type polygon feature class are moved and become unaligned with another parcel type polygon feature class.
BUG-000147165	Date and time values do not get converted to UTC for XY Event layer when the source is a query layer.
BUG-000147175	Include the example 'D' as a valid result for the 'Intersect' method under the 'Select multipoint using multipoint' spatial relationship in ArcGIS Pro's 'Select By Location graphic examples' help documentation.
BUG-000147186	The Export Subnetwork tool causes ArcGIS Pro to crash if the text fields included in the Result Fields parameter contain a domain.
BUG-000147212	A shapefile disappears from the map after joining it with a .dbf file stored in the same folder.
BUG-000147233	The Manage Records pane returns duplicate results when the search is repeated.
BUG-000147344	arcpy.CalculateGeometryAttributes_management moves data when input features are in memory and a coordinate system parameter is used with another coordinate system.
BUG-000147431	LRS Editing tools do not recognize selected centerlines when loaded more than once into a map.
BUG-000147465	The camera.setExtent script does not zoom to a layer correctly in ArcGIS Pro 2.9.
BUG-000147510	When using ArcGIS Pro 2.9.x to view a database table or view that is not owned by the current login account, one of the following error messages is returned, "DBMS table not found [ORA-00942: table or view does not exist]" or "Failed to open table."
BUG-000147547	ArcGIS Pro fails to include field length when adding the global unit identifier (GUID) fields to ArcGIS Online hosted services.
BUG-000147555	Unable to edit vertices in a utility network when the map projection is different than the layer's projection.

Issue	Description
BUG-000147630	Using the Modify Associations pane in a versioned data results in a long delay, and fails with a deadlock error.
BUG-000147671	The "Error 999999" error message is returned when running the Particle Track tool with the optional Output track polyline features parameter kept empty.
BUG-000147682	The error message, "An unknown error occurred while changing the database version" is returned when changing the version of two maps that contain the same versioned data from the same data source.
BUG-000147698	32-bit floating point NITF files do not open in ArcGIS Pro.
BUG-000147746	A conversion to a Keyhole Markup Language (KML) file does not pick up the feature name from the display field correctly and shows up as 'Placemark' when read in ArcGIS, and 'No Name' when read in Google apps.
BUG-000147765	Certification of Microsoft ODBC Driver 18 for SQL Server connections.
BUG-000147789	Unable to edit the attribute table for branch versioned feature services when two feature services are from the same source and one of them has the editor information capability (realm) enabled on ArcGIS Server Manager.
BUG-000147792	The 'linkage' tags in the MD_DigitalTransferOptions section are missing when exporting metadata in the ISO 19115-3 format.
BUG-000147808	The Layer 3D To Feature Class tool shows "Tool is not licensed" when opening it with an ArcGIS Pro Basic license.
BUG-000147820	When running the Refresh Excel tool, the tool fails to execute and the error message, "ERROR 999999: Something unexpected caused the tool to fail. Contact Esri Technical Support (http://esriurl.com/support) to Report a Bug, and refer to the error help for potential solutions or workarounds" is returned.
BUG-000147834	Attachments added to a branch service using Map Viewer in Portal for ArcGIS is not shown in ArcGIS Pro after a refresh.
BUG-000147851	The label is broken into new lines when using the custom Arcade expression in Map Viewer.
BUG-000147861	Creating an association through an attribute rule fails with the error message, "unknown error" in an SQL Server Enterprise environment. The server incorrectly reports that the association already exists.
BUG-000147899	The Import Message tool fails when the delta file uses a long file pathname.
BUG-000147966	Unable to select a geodata service for the relative replica connection using ArcGIS Pro.
BUG-000147975	Some Canadian addresses have the incorrect X and Y coordinate results when using the findAddressCandidates operation in the ArcGIS World Geocoding Service.
BUG-000147993	Overwriting the hosted feature service in Portal for ArcGIS 10.9.1 created from a CSV file utilizing Military Grid Reference System (MGRS) addresses is unsuccessful and crashes the service.
BUG-000148005	Unable to set values 0 in the 'Left House Number From' or 'Right House Number From' field when creating a custom street address locator in ArcGIS Pro.

Issue	Description
BUG-000148055	In ArcGIS Pro 2.9.2, the Network Common Data Form (netCDF) layer added to the mosaic dataset displays in an incorrect location with an incorrect shape and spatial extent.
BUG-000148057	The error message, "Compress edits in Default version before unregistering" is not displayed when unregistering a feature dataset in ArcGIS Pro.
BUG-000148070	Missing geometry for some features after running the Export Subnetwork tool with the Include Geometry parameter enabled.
BUG-000148075	Features disappear when zooming in and out after completing the edits.
BUG-000148090	The ArcGIS Pro Calculate Field expression type defaults to SQL for branch version feature services (which support SQL expressions) and returns the incorrect error "002118: Operation not supported on a table that has archiving enabled."
BUG-000148098	Unable to set the ArcGIS Pro default font to Microsoft JhengHei in a Chinese environment.
BUG-000148116	The AddRastersToMosaicDataset command is inoperable after upgrading to ArcGIS Image Server 10.9.1 in Python 3.x.
BUG-000148136	Unable to upgrade a Postgres enterprise geodatabase in Amazon Web Services (AWS) Relational Database Service (RDS) and returns the following error, "Error: -25 ERROR: must be the owner of relation i14. The sde user cannot perform the upgrade. A user with dbo privileges is required."
BUG-000148177	When using the New Big Data Connection dialog box to connect to the dataset and setting the spatial reference of the geometry to either MGI 1901 Slovene National Grid (WKID 3912) or Slovenia 1996 Slovene National Grid (WKID 3794), the Big Data feature class projects to the wrong country, Italy, instead of Slovenia.
BUG-000148178	The Sun Shadow Frequency tool in ArcGIS Pro fails with error 999999 when using certain multipatch features.
BUG-000148203	The ArcGIS Business Analyst data source cannot be selected when the language setting in ArcGIS Pro is set to Japanese.
BUG-000148241	When exporting a map to PDF with the 'PDF Layers and Features Attributes' option enabled, a different domain's code appears instead of the description.
BUG-000148265	Layout exports fail to render layers when the map includes a specific layer with a definition query.
BUG-000148266	In ArcGIS Pro 2.9.2, MapTips do not display for the Preset Subtype group.
BUG-000148331	The IsDirty property is not set to 'True' after editing an embedded tier in the utility network. Subsequently, Subnetwork Name for lower tiers is not updated, even after running Update Subnetwork.
BUG-000148339	When printing a map image in ArcGIS Enterprise 10.9.1 without a legend, the /legend method is still called in the request and causes performance issues.
BUG-000148384	The exportImage operation fails on an image service published from a mosaic dataset built with OptimizeRasters raster proxies.

Issue	Description
BUG-000148390	Setting M-values to a polyline feature in ArcGIS Pro places the values in the wrong order.
BUG-000148399	Using NcML data as an input OPeNDAP URL for the Make OPeNDAP Raster Layer (Multidimension) geoprocessing tool causes ArcGIS Pro to crash.
BUG-000148419	ArcGIS Pro 2.9.x crashes when using the Reconcile option on the Versioning tab if the Version Changes window is opened.
BUG-000148467	A service created with the SDO_GEOMETRY data type and referencing a non-enterprise geodatabase fails to query when using both the Geometry and the Output Statistics parameters.
BUG-000148474	In ArcGIS Pro 2.9.2, the error message, "Edit operation failed. The row contains a bad value. [LAYER]The row contains a bad value [FIELD]," is returned when entering long strings in the fields with newly expanded Length values in the Attribute pane.
BUG-000148495	Hydrology tools (Fill, Flow Direction, and Flow Accumulation) hang when run in ArcGIS Pro 2.9.2 on Windows 11.
BUG-000148576	The following French geocoding logic: BIS, TER, QUATER, and QUINQUIES are not recognized as part of the house number.
BUG-000148577	The slope result between the planar and geodesic options in ArcGIS Pro is incorrect.
BUG-000148583	The error message, "Error 002777 The name is invalid" is returned when saving a locator with a period between the pathname in the Create Locator tool.
BUG-000148590	Provide the ability to run the Integrate tool on two-point curves such that the curves are not lost or straightened.
BUG-000148624	Running the Directional Distribution tool creates ellipsoids with sharp corners and flat edges.
BUG-000148664	In ArcGIS Pro, the user type extension check is still available when connecting to Portal for ArcGIS 11.0.
BUG-000148727	The Reverse Values operation in the raster symbology is not applied in Map Viewer although the symbology changes in the Symbology and Contents panes.
BUG-000148866	FirstName issues in French geocoding logic.
BUG-000148890	In ArcGIS Pro, splitting features from a hosted feature service deletes the values in the attribute table when a domain is assigned.
BUG-000148909	When the polygon hatched fill symbols are used, Export Map to PDF results in display errors in PDF. The map is rotated and the exported map extent only shows some parts of the polygons.
BUG-000148920	When using the utility network's Remove Association tool, the edit operation fails when attempting to remove the association through the Attributes pane.
BUG-000148939	Number 11 vs french word 'onze' is not available in French geocoding logic.
BUG-000149079	Exporting a model to Python results in an additional .tbx extension in the path to the toolbox.
BUG-000149081	The error message, "Error 030206" is returned when attempting to share a route analysis layer based on an ArcGIS StreetMap Premium routing network dataset to a client portal.

Issue	Description
BUG-000149159	The Map Production System (MPS) app fails to generate annotation features.
BUG-000149259	Publishing a MapImageService with a Clustering-Symbology fails in an operating system with decimal characters other than '.'.
BUG-000149375	ArcGIS Pro fails to open the attribute table of text files that require delimited field names.
BUG-000149386	Clustering does not work when using shared instances.
BUG-000149452	Dividing an ArcGIS Parcel Fabric returns the "Divide Features failed" error message in ArcGIS Pro 2.9.2 and ArcGIS Enterprise 10.9.1 when dividing a parcel alongside an active record.
BUG-000149479	Output attribute values from the 'Extract Values to Points' tool are shifted to one field to the right.
BUG-000149497	When importing associations, logically deleted records must be filtered during duplication check with Utility Network 4.
BUG-000149552	The map service outStat fails for the SDO geometry storage type.
ENH-000105410	'LAS Building Multipatch' tool doesn't support building footprint features that have true curves in them
ENH-000109762	Allow editing in Arcgis Pro the high and low values of the stretch renderer
ENH-000115683	Provide Conda Error messages in the python package manager interface in ArcGIS Pro
ENH-000117079	Provide the same editing options under ArcGIS Pro's Configuration > Operations that are available in ArcGIS Online and ArcGIS Enterprise.
ENH-000120269	Extend the "Transfer field domain description" geoprocessing environment option to include Enterprise databases (non-geodatabase).
ENH-000120281	ArcGIS Pro 2.4 is unable to use old Python environments yielding warning for Version Mismatch. Please allow future upgrades of ArcGIS Pro to also include previous python environments in the process.
ENH-000125074	In ArcGIS Pro, provide the ability to copy complete path of the Feature class (including it's name) either through the Feature class properties displaying the location to be copied or selecting the layer that displays the path in an address bar.
ENH-000125535	Support connection via Azure AD and with multi-factor authentication (MFA) from ArcGIS to Azure SQL Database
ENH-000126573	In ArcGIS Pro, there is no way to see the size of individual feature layers in a file geodatabase within the Catalog View
ENH-000127015	Allow GeoJSON file format as an input in the FeatureSet.load function.
ENH-000129305	Add functionality to automatically clear display cache when closing project for ArcGIS Pro. ArcGIS Pro required automatically clear display cache while the program close a project or opening new project.
ENH-000130577	Add the ability to see Server connection information in the Favorites window and via detailed popups in ArcGIS Pro
ENH-000132684	Provide a tool that can identify what version of ArcGIS Pro used to create the project.
ENH-000132874	Provide symbology options, to show color ramps and values in farenheit and celsius, for thermal imagery (FLIR) which is processed using Drone2Map for ArcGIS.

Issue	Description
ENH-000133464	ArcGIS Pro Python Manager requires refreshing after Adding package to update the Add and Installed Pages. Automatically update the Add and Installed ArcGIS Pro Python Manager pages
ENH-000133689	Expand Summary Statistics functionality to support concatenation of multiple string/text fields.
ENH-000133728	Provide the ability to preserve the configuration of Select By Location and Select by Attributes option after closing the selection window in ArcGIS Pro.
ENH-000134724	In the Geocoding REST API, the findAdressCandidate operation does not give the full name of a Country, but only the country code.
ENH-000135067	Allow option change the source of related reports without having to rebuild the entire report.
ENH-000137863	Provide the ability to upload custom print templates directly through ArcGIS Enterprise and ArcGIS Online organizations.
ENH-000138029	The documentation for the Geographically Weighted Regression tool needs to clarify what 'Limited' functionality is at a Basic or Standard License level when we do not have a Spatial Analyst or a Geostatistical Analyst License.
ENH-000138126	Allow the Share Package ArcGIS Pro geoprocessing tool to be used in Python without traditional username/password Portal authentication.
ENH-000138205	Include a link or explanation that covers the expected format of a traverse file in the ArcGIS Pro "Import or export a traverse file" documentation
ENH-000138309	Provide a better error message when a Python Toolbox is chosen Default toolbox in ArcGIS Pro
ENH-000138369	Improve documentation for Viewshed 2 to include potential limitations regarding performance after updating GPU
ENH-000138588	Provide an option to mask voxel data when importing for a more accurate interpolation in ArcGIS Pro
ENH-000138712	Request to allow the option to change the flash color or make the flash cross hair appear brightly in ArcGIS Pro
ENH-000139239	When exporting data from the Contents tab in ArcGIS Pro, allow for the Output location file explorer to show and select existing shapefiles for easy overwriting, like in ArcMap.
ENH-000139531	Improve Cancel Performance for Feature Class to Feature Class.
ENH-000139988	Please improve the error message returned when running the Create Integrated Mesh Scene Layer Package geoprocessing tool.
ENH-000140163	In the Image Service Parameters table, under Has Live Data, alternative actions which are important, are not mentioned.
ENH-000140409	Allow users to select a version of Collada when using Multipatch to Collada in ArcGIS Pro
ENH-000140641	Improve Esri documentation on configuring the ExtProc with libst_shapelib.so for an Oracle database within a Solaris Operating System
ENH-000140760	Provide the ability to create a new group layer using arcpy.
ENH-000141201	Allow disabled output fields set in the locator properties to also be disabled in the Detailed View results from the locate tool.

Issue	Description
ENH-000142351	Provide equivalency between ArcGIS Pro & ArcPy to achieve the Overwrite Web Tool workflow.
ENH-000142354	Add new PCS to the Projection Engine for Ontario province, Canada that utilizes the GCS EPSG:8252
ENH-000142648	User receives a transformation warning when opening an existing ArcGIS Pro project containing an HDF multi band raster file that is projected in GCTP. There are no transformations available for these types of datasets and user has to re-add data into the
ENH-000142686	Please provide Pro documentation for Lidar surface constraints, including limitations for what visualizations support surface constraints
ENH-000142791	Add the functionality to create custom settings in the Export Map pane, similar to the custom ratios in the Export Movie pane.
ENH-000143115	Improve UX for none-Supported 3D Symbol (GLB/GLTF 1.0)
ENH-000143128	Product File installers when executed through command line do not honor custom location specified for the INSTALLDIR parameter.
ENH-000143382	Provide the ability to support XMP format in GeoTagged Photos To Points geoprocessing tool in ArcGIS Pro.
ENH-000143423	Display More Obvious Credit Consumption Warning Window for ArcGIS Pro Tools and Processes that Consume Credits
ENH-000143549	Provide the ability for attribute table selections to be automatically cleared when the user creates/applies a new definition query.
ENH-000144669	Request for an additional setting to be added to the Locator Properties pane in which all units will be suggested once the base/main address is fully typed out.
ENH-000145210	Replace the older datum transformation (8968-69) for the new datum transformation (9751-52) for datum 1225. This has been corrected on the EPSG website.
ENH-000145273	Please update the error message for the Fill Missing Values tool to specify that this will not work if polygons are not contiguous.
ENH-000146161	Misleading error message "Geodatabase must be enabled as geodatabase admin user" when enabling Enterprise Geodatabase
ENH-000146253	Calculate Geometry tool Property should take into account the output coordinate system
ENH-000146383	LRS service on ArcGIS Server 10.8.1- Handle invalid "routeId" & "toRouteId" location parameters via REST endpoint without logging .MapServer crash Error
ENH-000147057	Geoprocessing tools that perform unit conversions should provide the option to use International or US Survey imperial units (rather than using US Survey units by default)
ENH-000147202	In An ArcGIS Pro Layout, Allow ability to separate the Service Credits Logo, from the Service Layer Credits text.
ENH-000147368	Provide the ability to choose which transformation you want to use when running the Calculate Geometry Tool inside of the attribute table of ArcGIS Pro
ENH-000149917	Enable automatic updating of a Measure values in a Centerline feature class when running LRS editing tools
