

ArcGIS Pro 3.2 Issues Addressed

Each [major, minor, and patch release](#) of ArcGIS Pro includes fixes for bugs that were reported to Esri Technical Support. The bugs that were fixed in ArcGIS Pro 3.2 are listed in the table below.

ArcGIS Pro 3.2 also includes a number of enhancement requests from Technical Support that were implemented. These are listed in the table below. See the [what's new topic](#) to learn about all of the extensive new functionality added at this release.

Issues addressed at ArcGIS Pro 3.2.5

ArcGIS Pro 3.2.5 fixes the issue listed below and includes the fixes listed in the subsequent sections for ArcGIS Pro 3.2.0, 3.2.1, 3.2.2, and 3.2.3, and 3.2.4.

Issue	Description
BUG-000162109	Issues in ArcGIS Pro when decreasing the size of or improving image compression and resolution reduction capabilities when AIX files are exported from ArcGIS Pro.
BUG-000162944	The Legend tool for image services fails to print when zoomed out.
BUG-000167299	When exporting the viewshed analysis from ArcGIS Pro 3.2.2 to PDF or PNG format, the viewshed graphics are not visible.
BUG-000168093	ArcGIS Pro crashes when a group layer containing attribute rule error layers is dragged and dropped into the Input Layer parameter of the Change Version tool.
BUG-000168883	Attribute rules cannot be saved when the Arcade expression uses a feature class where the user schema has a backslash (/).
BUG-000169647	"Bad connection handle" error returned when attempting to connect to ArcGIS Pro 3.2.0 and above with a SQL Server authenticated username that is about to expire.
BUG-000170187	When creating a table or feature class using the wizard in ArcGIS Pro 3.2 within an earlier version of an enterprise geodatabase, the feature class cannot be accessed by clients using the same version of the enterprise geodatabase.
BUG-000170480	The subtype group layers, subtype group tables, and object error layers are not working against the proper version despite the Change Version tool being executed.
BUG-000170947	The HTTP in-memory response cache is overflowing, resulting in requests to not be cached.
BUG-000171641	When the Calculate Geometry geoprocessing tool is running on an enterprise geodatabase polygon feature class with attachments enabled and 65 or more records selected, the tool complete, but the values are applied to the wrong records.

Issue	Description
BUG-000172025	The error message, "ERROR 003644: A database error was encountered. Please contact your system administrator to review the server logs." is returned while upgrading an enterprise geodatabase after installing the ArcGIS Server Branch Versioning Data Consistency Patch for ArcGIS Server 11.1.
BUG-000172036	Limit record queries for feature services when opening the table for the first time.
BUG-000172037	Ignore external editing events until manually refreshing the table.
BUG-000172060	Editing branch versioned data with cascading attribute rules returns the error "ORA-00001: unique constraint violated" if the feature being edited has a large number of vertices.
BUG-000172096	Connections and locks from referenced services are never removed from Amazon Web Services (AWS) Aurora PostgreSQL geodatabase.
BUG-000172396	Adding a line event fails with the "Route does not exist for the provided date" error despite the provided date being a valid date.
BUG-000173074	The GPU usage increases and remains high when the attribute table is open.
BUG-000173367	Rebind the pipe_name variable on each execution when returning rowids to its appropriate pipe.
BUG-000173394	Unable to reconcile or post the branch versioned data containing a topology after upgrading the enterprise geodatabase in PostgreSQL.
BUG-000173426	The Calculate Magnetic Components tool fails to calculate magnetic components for dates on or after 1/1/2025.
BUG-000173998	Investigate caching spatial reference queries that have (appears to) an excessive number of calls
BUG-000174057	Registering a class as branch versioned is not creating the appropriate indexes and results in a poor database performance.
BUG-000174082	Running the Change Version geoprocessing tool from the Python notebook or window outside of ArcGIS Pro results in successful script execution; however, it does not switch the versions as expected.
BUG-000175816	ArcGIS Pro crashes when using Auto Rematch in the Rematch Addresses pane.

Issues addressed at ArcGIS Pro 3.2.4

ArcGIS Pro 3.2.4 fixes the issue listed below and includes the fixes listed in the subsequent sections for ArcGIS Pro 3.2.0, 3.2.1, 3.2.2, and 3.2.3.

Issue	Description
BUG-000137374	After splitting features created from a layer view with a view definition, one part of the Split Features does not display on the map instead of splitting the features into two or more features.
BUG-000151643	ArcGIS to better support 'Always On load Balancing'.
BUG-000152559	The date of the new feature class from the template is changed from 01/01/1970 to 30/12/1899 with a feature service referencing a geodatabase.
BUG-000155401	The Error Inspector returns the error message, "Edit operation failed. The server took too long to answer. The client has timed out. (status code 28)." when running validation rules on a branch feature service in ArcGIS Pro.
BUG-000158635	An unexpected null value error is sometimes returned during an attribute rule execution on the registered feature service (Oracle and PostgreSQL) when the first Arcade function is on a FeatureSet obtained from a geometry function such as Intersect.
BUG-000158798	An event layer takes a long time to be loaded in ArcGIS Pro compared to previous versions.
BUG-000161519	In a utility network, an edit fails when attempting to delete overlapping midspan vertices, and the error message, "Modify vertices failed. ERROR: Unable to complete operation., Operation rolled back., Operation rolled back." is returned.
BUG-000161861	The Select By Location tool is incorrectly selecting features in different subtype group layers.
BUG-000162021	Dashed lines are misaligned when vertices are added along a line and moved in small amounts. This issue affects both polygons and lines.
BUG-000162058	When the workflow of the Run Pro GP Tool step is used with the workflow of the Question step within a job in ArcGIS Pro, the Question step pauses and fails to display the question automatically even when the Automatic option is selected.
BUG-000162571	Features with an attachment larger than 1GB fail to publish as hosted feature layers and leave orphaned tables in the ArcGIS Data Store.
BUG-000162793	After appending parcels to a fabric, lines produced by building the fabric have gaps between some lines and parcels.
BUG-000162813	The Feature on Feature check returns results for features that do not participate in the rule.
BUG-000163058	When using ArcPy in a Python script, copying a feature class which has global IDs and inserting the feature class into a new one with the same schema takes more time than one without global IDs. The data size

Issue	Description
	also increases significantly disproportionate for feature classes with global IDs. This also becomes more prominent with large datasets.
BUG-000163072	When running the Build Parcel Fabric tool, Error 000952 and Error 999999 are returned.
BUG-000163254	In ArcGIS Pro, rebuilding a spatial index on a branch versioned feature class changes the index properties from ALLOW_PAGE_LOCKS = OFF to ALLOW_PAGE_LOCKS = ON.
BUG-000163487	The Create Database User tool fails on SAP HANA databases in ArcGIS Pro 3.2 and ArcGIS Pro 3.3.
BUG-000163636	Improve the Change Version tool by caching attribute rules.
BUG-000163707	Split editing operations on non-default branch-versioned feature services result in an error when not all target features are intersected by input features.
BUG-000163841	While closing ArcGIS Pro, after clicking 'No' to save edits and clicking 'Cancel' to save the project, features no longer draw, and an error is returned in the Notifications pane.
BUG-000164049	The Version Changes window does not display update differences when OID is selected.
BUG-000164147	ArcGIS Pro crashes when appending after a join in ModelBuilder.
BUG-000164263	The Import Parcel Fabric Points geoprocessing tool does not update extended attributes.
BUG-000164305	The Change Version tool leaves a lock behind on a child version if the branch versioned utility network layers are added as subtype group layers.
BUG-000164803	When editing a feature service published from branch-versioned data, the Planarize tool does not delete coincident line segments if line features are COGO enabled and COGO attributes are populated.
BUG-000164915	ArcGIS Pro 3.2.1 crashes when the Distance option is used in the portal's Create Buffers tool with ArcGIS Enterprise 10.9.1 as an active portal.
BUG-000164955	Allow altering certain field properties when assigned to an attribute rule.
BUG-000165670	Modifications made to the ArcGIS Pro editing workspace during an active edit session with versioned data return the error message, "Database error during feature draw. Target state not found in the STATES table".
BUG-000165688	Enabling topology for the utility network (UN) data from the SAP HANA database causes ArcGIS Pro to crash.
BUG-000166238	Dimensions are not created correctly when projected on the fly.
BUG-000166688	Running the Migrate Object ID To 64 Bit tool can recreate the branch versioned class indexes incorrectly.

Issue	Description
BUG-000166701	Upgrading a geodatabase must resolve branch versioning metadata and data inconsistencies.
BUG-000166809	The Join Features tool consistently excludes features with specific attributes from the output file.
BUG-000167096	Editing traditionally versioned data in a single workspace edit session results in a notification database error when a feature drawing HY008 Operation is canceled.
BUG-000167150	Using the RegisterWithGeodatabase function on a database view in ArcGIS Pro 3.2 and later, makes it inaccessible for ArcGIS Desktop 10.8.2.
BUG-000167185	Unable to save a raster function in the Raster Functions pane on the Project tab as expected in ArcGIS Pro 3.2.2.
BUG-000167241	Unable to create a feature-linked annotation with a branch versioned dataset.
BUG-000167251	In ArcGIS Pro 3.2, Snowflake data is no longer listed under new database connections.
BUG-000167508	Unable to open a map containing new layer types.
BUG-000167613	ArcGIS Workflow Manager Server does not clear geodatabase locks on a branch-versioned feature service when the ArcGIS Pro step is paused or stopped.
BUG-000168722	Enhance the performance of the asynchronous applyEdits operation status check.
BUG-000168781	Fix memory leak when executing SQL using OCI.
BUG-000168848	Related records do not display in the Attributes window for feature classes participating in a trace network.
BUG-000169310	Update the 'Add Portal Items to Catalog Dataset' tool to write JSON inside the cd_itemsource attribute, conforming to the ArcGIS API for JavaScript specifications.
BUG-000169662	The Space Time Kernel Density tool is generating incorrect results.
BUG-000176117	Stop querying for all fields if they aren't visible in a service.

Issues addressed at ArcGIS Pro 3.2.3

ArcGIS Pro 3.2.3 fixes the issue listed below and includes the fixes listed in the subsequent sections for ArcGIS Pro 3.2.0, 3.2.1, and 3.2.2.

Issue	Description
BUG-000167216	Failed to register with geodatabase a spatial table in SDO_GEOMETRY or a spatial view if login contain character \$ like gen\$env and returns the error, "Only the data owner may execute register with geodatabase."

Issues addressed at ArcGIS Pro 3.2.2

ArcGIS Pro 3.2.2 fixes the issues listed below and includes the fixes listed in the subsequent sections for ArcGIS Pro 3.2.0 and 3.2.1.

Issue	Description
BUG-000147443	Improve Trim Archive History Geoprocessing tool to filter out duplicate trim attempts
BUG-000152055	Unable to see differences in the Differences view when the layer has a join in ArcGIS Pro.
BUG-000153273	Using the Edit Vertices tool to edit the location of utility network features moves the selected feature along with all associated features.
BUG-000154971	In ArcGIS Pro, after editing a feature service referencing registered data from a PostgreSQL geodatabase for the first time, a dirty area is not displayed.
BUG-000155010	The STArea() field displays different values based on the table view mode (For example, the Show All Records and Show Selected Records mode).
BUG-000156435	In IDLE, when two Join Field operations are performed on the same feature class or the Join Features tool is used twice, the process fails on the second attempt.
BUG-000158240	When creating an elevation profile, ArcGIS Pro fails to use the elevation source layer added to the ground if it is a dynamic image service.
BUG-000162106	ArcGIS Pro stops responding when running the Save Toolbox To Version tool and the output toolbox's name contains special characters.
BUG-000162114	When using the Aviation tools in ArcGIS Pro, the Terrain and Obstacle Profile element is unable to display when the regional format is set to Turkish.
BUG-000162118	In ArcGIS Pro, when a layer is symbolized by unique values from a joined field, the error message "Requested operation could not be completed" is returned when the joined table is stored in a database and the database is not an enterprise geodatabase.
BUG-000162448	The Simplify By Straight Lines And Circular Arcs (SLACA) tool collapses 'donut-type' polygons. Running the Simplify By Straight Lines And Circular Arcs (Editing) tool on 'donut-type' polygons, geometry is turned to donut holes if the parcels have donut holes in them. The output polygon area is reduced to the donut hole area.
BUG-000162466	The Align Parcels tool does not merge coincident points when projecting spontaneously.
BUG-000162762	The arcpy.management.ExportDataChangeMessage function leaves temporary files, filling up the C drive.
BUG-000162843	The PDFs exported with Simulate Overprint with the spot-replaced colors attribute, produce missing features and incorrect color values.

Issue	Description
BUG-000162878	Export Features in ArcGIS Pro does not support editing field properties when exporting from ArcGIS Online hosted feature service.
BUG-000163060	The Export Data Change Messages geoprocessing tool causes ArcGIS Pro to crash when the output change file path uses a Universal Naming Convention (UNC) to export a file geodatabase.
BUG-000163123	The arcpy.management.ImportMessage function leaves behind temporary files when it is not run in ArcGIS Pro.
BUG-000163124	The median values for an even number of records are incorrect when calculated using data engineering.
BUG-000163239	The Distance Allocation geoprocessing tool crashes when the source raster dataset does not have an attribute table.
BUG-000163247	In ArcGIS Pro 3.2, clicking a feature with the Explore tool active does not display attributes from a related table unless the table is added to the map. Meanwhile, in ArcGIS Pro 3.1.3, the table does not need to be added to the map for the related record attributes to be displayed.
BUG-000163266	The TableDefinition.FindField() method is not working in the SQLite database in ArcGIS Pro SDK 3.2.
BUG-000163333	The Export Geodatabase To S-57 (Maritime) tool fails with errors while it is executed successfully in previous versions.
BUG-000163453	In the multiple workspace edit session (Default setting) in ArcGIS Pro 3.2 (When the 'Enable and disable editing from the Edit tab' check box is unchecked), the file geodatabase edits are required to be saved or discarded before moving on to an enterprise workspace, because the unsaved edits prevent further edits to be made in the same file geodatabase workspace.
BUG-000163593	Key processing is impacted in dockpanes that host WinForms-based content.
BUG-000163604	In ArcGIS Workflow Manager (Classic), ArcGIS Pro crashes when clicking on an area of interest in an embedded map.
BUG-000163827	The Train Point Cloud Classification Model tool fails with Error 032659.
BUG-000163835	ArcGIS Pro crashes when accessing error layers from ArcGIS Data Reviewer after using the 'Polygon Gap is Sliver' check.
BUG-000163860	The Generate Schema Report tool fails when run against a feature dataset with a parcel fabric that has a parcel type and 'Use for administrative boundary' enabled.
BUG-000163925	arcpy.mp MoveLayer RuntimeError for BuildingLayers
BUG-000163967	ArcGIS Pro stops responding when running the Build Network tool.
BUG-000164021	The Cell items in the ArcGIS Business Analyst Pro infographic editor table menu are not translated to Japanese.
BUG-000164136	The Optimal Path As Line tool can get stuck in an infinite loop.

Issue	Description
BUG-000164164	The Solar Radiation tools from a custom Python script tool or a Python toolbox crash.
BUG-000164394	The analysis from the Feature Solar Radiation tool results in all zeros.

Issues addressed at ArcGIS Pro 3.2.1

ArcGIS Pro 3.2.1 fixes the issues listed below and includes the fixes listed in the subsequent section for ArcGIS Pro 3.2.0.

Issue	Description
BUG-000145006	In ArcGIS Pro, using a UNC (Universal Naming Convention) path displays a slower performance than a mapped drive path compared to ArcMap.
BUG-000153115	The ArcGIS Maps SDK for JavaScript Editor widget does not respect the feature template on a hosted feature layer.
BUG-000158118	Creating a new model fails in ArcGIS Pro with the new toolbox (.atbx) format on a network drive.
BUG-000160944	Unable to register an external table that contains the GDB_GEOMATTR_DATA column with an enterprise geodatabase.
BUG-000161858	Deleting a point in a utility network with the Edit Vertices tool selected causes ArcGIS Pro to crash.
BUG-000162168	The COGO-enabled traverse stores the incorrect distance in the Distance field when the feature class is projected on the fly.
BUG-000162322	The Detect Bright Ocean Objects tool output has bugs.
BUG-000162324	In ArcGIS Pro, the Export Raster function crashes for newer Capella data layers.
BUG-000162828	When using PostgreSQL, fail to delete the topology feature in BigOID mode.
BUG-000162829	PostgreSQL returns FDO_E_ROW_OID_OVERFLOW for UpdateGeometry
BUG-000163950	Some geoprocessing tools are not translated to the Czech language.

Issues addressed at ArcGIS Pro 3.2.0

ArcGIS Pro 3.2.0 fixes the issues and adds the enhancements listed below.

Issue	Description
BUG-000094097	The code block of the Calculate Field tool does not get updated when importing a calculation file for the tool in a model created in ArcMap.
BUG-000100896	adding new groups in the customize GP gallery window until they are off screen results in the label for the last group displaying outside the window
BUG-000106534	An error is returned when executing the Truncate Table tool against a non-versioned feature class with attachments in ArcGIS Pro 2.0.
BUG-000106610	AddDeleteFieldToFromFeatureClass ArcGIS Pro SDK community sample 2.0 hangs if the button is clicked without opening an attribute table.
BUG-000109285	No exception is returned and the function becomes unusable after certain ArcPy functions are called incorrectly.
BUG-000109315	The buffered gradient fill for a shape marker of a point symbol in ArcGIS Pro is not honored if the outer color is set as No Color.
BUG-000109404	Standalone scripts for adding a Python toolbox (.pyt) using the arcpy.AddToolbox function fails with the following error message, "Toolbox does not exist" returned when using the variable 'toolbox' to define the toolbox path or any other value in the scri
BUG-000110112	Pro 2.1 does not display Vector Product Format (VPF) data which is supported in ArcGIS Desktop.
BUG-000110128	Unable to apply a map to the return Layout object of the ConvertLayoutToFileToLayout method.
BUG-000110323	More clarification about using the Delete tool in the ArcGIS Pro documentation.
BUG-000111714	A green warning message, "Could not analyze datasets DatabaseName.DataOwner.FeatureClass. (You might not have sufficient permissions.)" is returned when working with the Esri Binary data type.
BUG-000112429	When adding a custom toolbox to a new project in ArcGIS Pro 2.1.2, the toolbox does not display in Toolboxes in the Geoprocessing pane.
BUG-000113870	In ArcGIS Pro, layers using the grouped Unique Values symbology published to ArcGIS Online as a hosted feature layer do not retain the grouped symbology when brought back to ArcGIS Pro from the Portal tab.
BUG-000113925	When using multi-field requests with the ArcGIS World Geocoding Service, there are accuracy problems with specific Chinese addresses.

Issue	Description
BUG-000114174	2525c symbols fail to render properly.
BUG-000116016	The ArcGIS Online World Geocoding Service incorrectly plots locations matched to Black Mountain Rd, San Diego, CA.
BUG-000116032	When a script is run that creates domains in a feature class, these domains are successfully created. If a second script is run that creates additional domains, these domains would not appear until ArcGIS Pro is closed and relaunched.
BUG-000116094	Running the 'listSymbolsFromGallery' method through a Python script from a Python toolbox in ArcGIS Pro fails to identify symbols from a custom-style file saved to a folder location.
BUG-000118545	The geoprocessing window in ArcGIS Pro does not always cursor into a newly added field when the Enter key is used on tools that accept several entries for one parameter.
BUG-000119155	When deleting a join used in a definition query, no features are drawn to the map and no warning or information is shown as to why this is happening.
BUG-000119867	Attempts to return connectionProperties from a map service layer file (.lyrx) using ArcPy resulted in an error.
BUG-000120040	The Summarize Within tool fails when the Summary Fields parameter is specified as an enterprise geodatabase shape field.
BUG-000121975	Unable to view related records when using web maps based on map services in ArcGIS Pro 2.3.2.
BUG-000124250	In ArcGIS Pro, the Calculate Geometry tool is disabled on a feature class attribute if a table is joined to the feature class.
BUG-000124574	Certain premium ArcGIS Living Atlas content layers do not successfully display in the legend of a map printed from ArcGIS Web AppBuilder.
BUG-000125587	The Map.addLayer command fails with ValueError when attempting to add a layer created with the MakeFeatureLayer_management and MakeRasterLayer_management tools.
BUG-000126098	In ArcGIS Pro, selecting an item with quotes or spaces in the multiValue parameter list with a Python tool results in inconsistent behavior and returns the error message, "ERROR 000800: The value is not a member of <value>."
BUG-000126355	LayoutElementFactory.Instance.CreatePictureGraphicElement causes a memory leak in ArcGIS Pro.
BUG-000126667	Unable to run the Add Surface Information tool on raster data.

Issue	Description
BUG-000127689	WRL files imported into ArcGIS Pro display incorrect textures when the file name contains Chinese characters in a Chinese operating system.
BUG-000128070	'Title' dynamic text for layouts is not directly accessible in ArcGIS Pro.
BUG-000128072	The Map Series Best Fit Extent option erroneously clips index polygons in the output pages at certain percent values.
BUG-000128757	Unable to change the alignment of a numerical field in the attribute table in ArcGIS Pro.
BUG-000128776	For a mosaic dataset containing coincident rasters, ArcGIS Pro navigation tools identifies all the coincident pixels, but the value of each pixel is the same as the top pixel.
BUG-000128810	Some geoprocessing services, such as PublishingTools and PrintingTools, crash when installing ArcGIS Data Interoperability in ArcGIS Pro on the same ArcGIS Enterprise machine.
BUG-000129329	Tie points change to the same symbology as ground control points in certain ortho mapping projects in ArcGIS Pro 2.5.
BUG-000129468	Annotations created in an annotation feature class in ArcMap do not preserve the anchor points, sizes, dimensions or orientations in ArcGIS Pro with Esri and third party fonts installed in the correct location.
BUG-000129669	Printing a map and layout with the black and white option does not work in ArcGIS Pro 2.5.
BUG-000129843	Using a multipatch shapefile causes the Make Query Table tool to return ERROR 999999.
BUG-000130522	Exporting data to GeoJSON using the Features To JSON geoprocessing tool adds extra decimal places in double and float fields.
BUG-000130537	The Calculate Prediction Zone tool crashes in ArcGIS Pro when using a large number of features as the input.
BUG-000130576	Unable to reorder multiple fields by clicking the Shift button and dragging in the Feature Class To Feature Class tool in ArcGIS Pro 2.5.
BUG-000131112	The annotation layer in ArcGIS Pro is shown underneath the other layers when the annotations are inside a group layer with 'Enable symbol layer drawing' enabled.
BUG-000131365	When exporting a map layout with a transparent background to a PDF file in ArcGIS Pro, the background transparency is not honored.
BUG-000131422	Unable to access a related data if a relate is created using the primary and secondary key fields of a feature class and an attachment table.

Issue	Description
BUG-000131512	When creating a polygon graphic in a layout in ArcGIS Pro, the graphic changes shape and is larger than the envelope if zooming more than a certain scale into the layout.
BUG-000131798	Creating thousands of graphic elements in an ArcGIS Pro layout eventually leads to the error message, "An unhandled exception of type 'System.ArgumentException' occurred in mscorlib.dll. Destination array was not long enough."
BUG-000132042	The Replace Geometry tool fails on a registered feature service with null geometry fields for polygon or polyline data in ArcGIS Pro.
BUG-000132389	The Mosaic To New Raster tool does not honor the resampling method in ArcGIS Pro when there is a change in resolution for the output raster.
BUG-000132477	The chart symbology duplicates or is removed when a layout containing a polygon or line is exported in ArcGIS Pro.
BUG-000132537	Sharing a project package duplicates data for reference mosaic datasets.
BUG-000132927	Unable to present data in the Pie Chart widget with data published from an Oracle database as a registered service if the category field is selected as 'Shape.Area.' or 'Sharp.Len.'
BUG-000133083	CADRG/ECRG: Image City Maps format displays Product Name as 'Unknown' when added to the mosaic dataset.
BUG-000133085	The Shape_Area and Shape_Length fields do not display in the table frame for a layout view in ArcGIS Pro for an enterprise geodatabase feature class.
BUG-000133087	The Select By Attribute and Select by Location tools do not have the options for docking on the side panel in ArcGIS Pro 2.6.
BUG-000133517	Select Layer By Location fails when used as a scheduled task.
BUG-000134391	Exported heat map's minimum and maximum pixel intensity configurations are not reflected from the ArcGIS Online utility print service.
BUG-000134494	The first keyed-in digit remains in the non-nullable field after being erased from the attribute table.
BUG-000134608	The closest facility solver produces different results for the same incident-facility pairs under some circumstances.
BUG-000134693	ArcGIS Pro does not support the Add Relate function on a Microsoft Access Database (.accdb) table via an Object Linking and Embedding Database (OLE DB) connection.

Issue	Description
BUG-000135343	The 'Allow stacked labels to straddle lines' option does not straddle the lines.
BUG-000135673	The Segment Mean Shift (Spatial Analyst) tool does not create the necessary output when executed using Python.
BUG-000135934	The error message, "ERROR 999999: Tile size should be greater than zero" is returned when using the Classify Pixels Using Deep Learning tool.
BUG-000135960	Creating a relationship class with a database table in ArcGIS Pro returns the error message, "ERROR 999999."
BUG-000136122	Service Definition remains in the arcgisserver output folder of the federated ArcGIS Server when publishing a hosted feature layer.
BUG-000137059	Unable to get the correct statistics based on the second selection in ArcGIS Pro.
BUG-000137206	The 'Aggregated Geometry' trace results do not honor the mid-span end when using a filter function barrier.
BUG-000137455	The Cut Fill (Spatial Analyst) tool fails to execute once it is published from ArcGIS Pro to ArcGIS Enterprise if the window region in ArcGIS Enterprise is set as Lithuanian (Lithuania).
BUG-000137579	PBF files display data for layers one level prior to the set visibility range in developer tools.
BUG-000137676	In ArcGIS Pro, unable to remove duplicates using the Distinct Arcade function in the Dynamic Text tool for table attribute values.
BUG-000138052	The vertical alignment of the annotations shift when migrating from ArcMap to ArcGIS Pro.
BUG-000138150	The geoprocessing tool, arcpy.ListFeatureClasses() does not list the feature classes when the workspace is set to 'memory' or 'in_memory.'
BUG-000138577	There is a vertical offset of the bounding box around the annotation when using imported Windows fonts.
BUG-000139264	Arcpy.exportToTIFF() creates a different output than the Export Map functionality in ArcGIS Pro when a raster layer includes transparency.
BUG-000139563	The ModelBuilder iteration is not completed if an apostrophe is in the attribute data.
BUG-000140085	In ArcGIS Pro, using the analysis tools to join a hosted feature layer with many features to a hosted table fails with the error message, "Join Feature Failed."

Issue	Description
BUG-000140917	ArcGIS Pro report does not honor 'Start on a new page' and 'Repeat on every page' associated with the group header when working with a related report.
BUG-000141322	The error message, "Error 000840: The value is not a Feature Class" is returned when dragging and dropping feature class data from the Contents pane into the Input Feature Class parameter of the Rematch Addresses tool.
BUG-000141356	The Ortho Mapping wizard in ArcGIS Pro 2.8.1 returns a warning message, "Warning: Cannot computer flight height from input parameters. Use relative altitude: 89.800 m. [Area3 001]" when a DTM from an unfederated server is used as input.
BUG-000141565	Even though a task is successfully completed, an error message, "The step xxx in task xxx is referencing a GP xxx that is not accessible" is returned.
BUG-000141632	The Enable Enterprise Geodatabase option is still present after the database is enabled.
BUG-000142012	The ground textures are missing when loading a Revit (.rvt) file in ArcGIS Pro 2.8.2.
BUG-000142413	ArcGIS Pro 2.8.2 performs slower than ArcGIS Pro 2.5 when running the Create Vector Tile Package tool on a large dataset.
BUG-000142520	The map grid label is incorrectly updated when adjusting the map grid's custom origin in ArcGIS Pro.
BUG-000142637	Attempting to add a specific band from a multiband raster to the Raster Domain tool using the folder navigation option in the pane returns the Error 999999 and a generic error message.
BUG-000142703	Grid graticules in ArcGIS Pro layouts display incorrect labels at specific intervals.
BUG-000143304	In ArcGIS Pro 2.8.3, the Calculate Value tool in ModelBuilder with French language pack presents the data types in the wrong order, and the output cannot be used as expected.
BUG-000143483	A raster does not render when zoomed in in ArcGIS Pro but renders properly in ArcMap.
BUG-000143725	The Layer.SetDisplayCacheType method does not change the cache settings for the layer.
BUG-000143880	The Multipatch To COLLADA tool does not populate the output folder with Chinese characters and returns the error message, "ERROR 160058: The dataset already exists".

Issue	Description
BUG-000143980	If a field is added and calculated prior to an in-memory feature class before performing a spatial join, the output value of the field is truncated to the first character.
BUG-000144074	When adding a Web Map Service (WMS) to a mosaic dataset, the images do not display.
BUG-000144137	Remove f=json from requests sent to the server for OGC Feature layers in ArcGIS Pro.
BUG-000144327	Incorrect latitude of origin definition on displayed files when using certain coordinate systems.
BUG-000144818	The dataset containing a trace network is not added to the map along with the feature service when the service published from the dataset is added to the map in ArcGIS Pro.
BUG-000144887	Cannot add fields to the attribute table of a TIFF raster through the Add Field option in ArcGIS Pro.
BUG-000145173	Unable to clone the default Python environment on ArcGIS Pro with a Windows account name containing an accent.
BUG-000145402	Geodatabase is locked when using the arcpy.Exists statement in an ArcGIS Pro notebook.
BUG-000145610	In the Geoprocessing pane, a lock icon does not display the tools in the ArcGIS Production Mapping toolbox when a license is not available.
BUG-000145841	The Forest-based Classification and Regression tool fails if the matched explanatory variables in the prediction dataset are in uppercase.
BUG-000146209	Unable to add grouped user-definable values or reserved values for the class code renderer using the LAS dataset.
BUG-000146213	After editing the item description metadata in ArcGIS Pro for a feature class and sharing it as a map service, the item description in an ArcGIS Server REST API service is displayed with the HTML style tag added.
BUG-000146541	The "Runtime Warning: Glyph missing from current font" warning message is returned upon executing the Prepare Point Cloud Training Data tool in a Japanese environment in ArcGIS Pro.
BUG-000146690	The fourth band of an MRF file is read as "Alpha" in ArcGIS Pro.
BUG-000146928	The Validate Network Topology tool fails on a specific dirty area extent and returns the error message, "Error 999999 (Topology entry (from junction eid) not found.)"
BUG-000147106	In ArcGIS Pro, attachments are not considered when creating a mobile map package with 'Area of Interest' and when the 'Keep only the rows which are related to features within the extent' checkbox is checked.
BUG-000147119	Unable to find matched locations for batch geocoding on the composite locator in ArcGIS Enterprise 10.9.1.

Issue	Description
BUG-000147189	When publishing a hosted feature service to ArcGIS Online from ArcGIS Pro, the resulting service is not displayed in Map Viewer if a field is invisible and contains a definition query created based on that invisible field.
BUG-000147223	Unable to use the Name output variable from ModelBuilder's Iterate Feature Classes and Iterate Tables tools as an inline variable for the Copy tool in ArcGIS Pro 2.9 when Spatial Database Engine (SDE) tables or feature classes have a different schema than the SDE.
BUG-000147497	In ArcGIS Pro, when Turkish (Turkey) is configured as the region language format in the operation system (OS) settings, the defined scale range does not display correctly for symbol categories with scales (for example, graduated colors) if the map's tile scale range list is customized by the loading scales for ArcGIS Online, Bing Maps, or Google.
BUG-000147516	The Python code is modified after publishing to ArcGIS Server.
BUG-000148043	When using both the dynamicLayers and spatialFilter parameters when exporting a map service, the dynamicLayers parameter takes precedence and the spatialFilter parameter is ignored.
BUG-000148077	The downstream trace across tiers does not reach the target tier in some cases.
BUG-000148081	Shadows indicating run tools are reset when connecting new tools to process containing a LIKE query.
BUG-000148161	The Chinese character, '哩' is not displayed in the vector tile package in ArcGIS Pro.
BUG-000148398	Full extent validate operations must not pass a spatial filter when fetching all dirty areas to improve performance.
BUG-000148499	Broken Cartographic Information System (CIM) in Python when working with query layers.
BUG-000148668	Long processing time when using the field calculator when the layer symbology is set to a large number of different symbol classes.
BUG-000148785	In ArcGIS Pro, the error message, "Error 999999" is returned when the float value is divided by zero using the Calculate Field tool in ArcGIS Notebooks.
BUG-000148860	Opening a layout referencing multiple inaccessible workspaces takes a long time.
BUG-000148872	The KMZ file stops responding in ArcGIS Pro when running the KML To Layer tool, while it runs successfully in ArcMap.

Issue	Description
BUG-000148908	The Portal for ArcGIS connection does not show any results when Hebrew is applied as a category of the organization content in ArcGIS Online.
BUG-000148940	When a house number does not exist, ArcGIS Pro provides a wrong match address.
BUG-000149040	In ArcGIS Pro 2.9.x, the Import Map command is not available when creating Task steps action from the All Commands list and List of Tabs.
BUG-000149046	The Ignore Barriers At Starting Point parameter is not honored for Filter Barriers placed on line features.
BUG-000149082	Network Directions apply the last traversed non-null street name to unnamed streets.
BUG-000149119	The WKID 102498 coordinate system is not read as a valid coordinate system after the export and subsequent import of data.
BUG-000149274	Relative paths are referenced for data sources, and auto-population of other parameters is prevented when a model is run as a tool in an (.atbx) toolbox.
BUG-000149291	The utility network error is not created when a structure junction is placed coincident to a shared endpoint by electric lines with a different asset type.
BUG-000149393	The Validate Network Topology tool fails and returns the error message, "Error building network: Topology Engine::query from_to_junctions(): Topology entry not found."
BUG-000149464	The appearance of the Bilinear resampling type in ArcGIS Pro is blurry compared to ArcMap.
BUG-000149661	The Make Layer From Selected Features option from the context menu is greyed out when working in a layout.
BUG-000149673	The behavior of feature-linked annotation during editing does not maintain the defined distance to the feature.
BUG-000149709	Editing or running a Spatial ETL tool from the ArcGIS Data Interoperability extension in ArcGIS Pro crashes the application.
BUG-000149737	A geoprocessing service used in ArcGIS Pro or in the Geoprocessing widget fails when a private hosted feature layer is set as the input in the tool.
BUG-000149755	The Download Map function does not work when a cached map service is in a folder and added directly with REST-URL.
BUG-000149908	A comma is not transcribed as a decimal point but as a string when queried in SQL, for example, 1,5.

Issue	Description
BUG-000149939	Clone fails with the following error, "PermissionError: [Errno 13] Permission denied: 'C:\\Program Files\\ArcGIS\\Pro\\bin\\Python\\envs\\arcgispro-py3\\etc\\jupyter\\jupyter_notebook_config.json'."
BUG-000150098	The Add Field tool takes longer when a layer is included in the map and has a unique value renderer with a lot of classes applied.
BUG-000150099	Title configuration is not maintained for pop-ups within ArcGIS Pro.
BUG-000150123	The Layer To KML tool does not reflect the input layer's extent in ModelBuilder.
BUG-000150197	Model elements rerun when the tool properties are opened or the output is added to display when running the last tool in ModelBuilder.
BUG-000150210	Performance issues were observed while working with a Web Map Service (WMS) in ArcGIS Pro.
BUG-000150286	In ArcGIS Pro, starting points placed on point network features are not recognized as valid starting points.
BUG-000150399	Unable to change the map scale after specifying a layer with a Fixed center constraint under the map frame properties.
BUG-000150723	Non-default branch versioned feature services result in missing polygons when running the Split tool in the editing toolbar.
BUG-000150728	Location units x and y coordinates in the map view do not show the plus sign for meters when editing the unit format in ArcGIS Pro.
BUG-000150822	The Export Subnetwork Result Fields do not accept a value table.
BUG-000150892	The Statistics tool behaves inconsistently on selected records in ArcGIS Pro.
BUG-000150968	In ArcGIS Pro 3.0 Batch option of the KML to Layer tool does not add ground overlay mosaic to the map automatically.
BUG-000150977	The Import 3D Files geoprocessing tool does not import textures from the VRML file (.wrl).
BUG-000151035	Custom editor tracking field names in a parcel fabric causes some tools to fail.
BUG-000151161	The Apply Symbology From Layer tool does not run when the Input Layer parameter is a TIN layer and the TIN layer that created the layer file (.lyrx) in the Symbology Layer parameter is deleted. Instead, the following error message, "Error 000968: The symbol layer does not match the input layer" is returned.
BUG-000151341	The Enable Feature Binning tool returns the error 999999 when calculating the sum of a field with large values.

Issue	Description
BUG-000151444	The world file cannot be exported as a JPEG file from the layout view.
BUG-000151614	When changes are applied for the histogram adjustment in ArcGIS Pro, the image disappears (white screen) and appears with the changes.
BUG-000151692	The error message, "Failed to create LAS dataset" is returned when creating a LAS dataset directly from the Catalog pane without enabling 3D Analyst extensions.
BUG-000151712	The raster function template is not honored when applied to a multidimensional Cloud Raster Format (CRF) in Portal for ArcGIS 11.0.
BUG-000151723	The Map To KML tool does not transform the map to the WGS 1984 datum if a transformation is required.
BUG-000151769	The Convert Labels To Annotation tool does not convert all labels in ArcGIS Pro.
BUG-000151796	In ArcGIS Drone2Map 2022.1, when creating an area measurement for a project using the State Plane projected coordinate system, the measured value is off by a factor of 10.
BUG-000151811	The Import 3D files (3D analyst tool) does not show output textures after upgrading to ArcGIS Pro 3.0.
BUG-000151869	Searching for services or folders within ArcGIS Server from the Catalog view returns no results.
BUG-000151874	Image metadata reading and editing fail in ArcGIS Pro when accessed from Azure cloud or AWS S3 storage.
BUG-000151913	The information in the Meter Reference Guide overlaps with the frame when using a non-English ArcGIS Pro language pack.
BUG-000151950	The State Plane projection, NAD 1983 StatePlane Washington South FIPS 4602 (US Feet) shows the wrong latitude of origin for an Enhanced Compression Wavelet (ECW) file.
BUG-000151975	Updates to dataset schema are not reflected in chart properties for existing charts
BUG-000152233	In ArcGIS Notebooks, the syntax highlighting is incorrect when the f-strings function with quotes and the parameter is applied.
BUG-000152243	When adding text to a text box and creating new lines using the return key, new text cannot be inserted in ArcGIS Pro 3.0 without using the Element pane, whereas this issue does not occur in ArcGIS Pro 2.9.3.
BUG-000152407	When using Collaborative Design Activity (COLLADA) Digital Assess Exchange (DAE) files as 3D models for the Import 3D Files tool, the output multipatch feature class does not preserve the texture of 3D models in ArcGIS Pro 3.0.

Issue	Description
BUG-000152480	The Import 3D Files tool in ArcGIS Pro fails to process textures in COLLADA (.dae) files.
BUG-000152484	Overwriting the hosted feature service created from an Excel file with the Military Grid Reference System (MGRS) addresses returns an error.
BUG-000152548	The Traverse tool Adjust option does not perform the adjustment with polygons.
BUG-000152641	SQL functions using the ST_Geometry type fail on Oracle Solaris 5.11 11.4 OS - Oracle 19c Database - version 11.0.0.3.0 enterprise geodatabase environments and return the following error message, "ORA-06520: PL/SQL: Error loading external library."
BUG-000152820	Missing a documentation on the Address Locator Warmup setting, and how to modify it from a *.loc file.
BUG-000152823	When importing the XML Workspace Document from the original SDE database to a new one, the attribute rule for the FeatureSetByRelationshipName function references the original SDE database.
BUG-000152853	The error message, "Error 0003562: From and To Raster must have same number of bands." is returned when using the Compute Change Raster tool on single bands of two multispectral rasters in ArcGIS Pro.
BUG-000152928	The Select Associated Data command is unavailable in the Attributes pane when working with non-spatial tables.
BUG-000152980	The Move function in ArcGIS Pro fails when the layout and annotation are rotated to a degree.
BUG-000153065	Using a marquee selection tool in a report selects only 1 item rather than selecting all items dragged over.
BUG-000153077	The Table To Excel tool fails when the 'Use domain and subtype description' option is checked.
BUG-000153095	When using the 'null' string in a suggest request to the World Geocoding Service, a 400 error is returned.
BUG-000153225	After publishing the KML To Layer tool as a geoprocessing service from ArcGIS Pro, running the service in the Geoprocessing widget returns the error message, "Submitted. Executing... Failed. java.lang.Exception: Could not service request." The output .gdb
BUG-000153227	Bivariate colors does not work with small datasets.
BUG-000153249	In ArcGIS Pro 3.0.2 or 2.9.x, running a Python script tool that returns a JavaScript object notation (JSON) with more than 8189 characters leads to an empty window when accessing the 'Share as Web tool' dialog box of the tool via the history window.

Issue	Description
BUG-000153323	The Planarize tool creates unnecessary duplicate records when the input number of records is high.
BUG-000153395	Creating a 3D scene layer package from large-scale multipatch buildings causes ArcGIS Pro 3.0.2 to crash.
BUG-000153433	A web map configured with forms when edited and saved from ArcGIS Pro clears the form from the web map.
BUG-000153472	In ArcGIS Pro, after downloading a map, removing the local copy for offline data does not delete the mobile geodatabase in the project's Home folder.
BUG-000153501	Unable to import the bottleneck Python function in ArcGIS Pro.
BUG-000153544	ArcGIS Pro displays the incorrect symbology for unique values with multiple attribute fields.
BUG-000153545	ArcGIS Pro fails to follow the Time filter stamp on a GeoServer Web Feature Service (WFS) with the On Demand connection mode.
BUG-000153593	In ArcGIS Pro, editing a feature geometry using the Control Points option in a checkout replica is not transferred to the version during a check-in.
BUG-000153603	The ArcGIS Pro Locate pane returns a value with one space when the value in the reference data from the custom locator has two spaces.
BUG-000153607	Spelling mistake in the error message, "Sychronize Offline Features Error" in ArcGIS Pro.
BUG-000153633	Using a defined custom projection for a Web Map Service (WMS) in ArcGIS Enterprise returns a 400 error.
BUG-000153653	The Synchronize Changes geoprocessing tool fails in ArcMap and ArcGIS Pro and returns the error message, "Error 000655: 'An error was encountered while Validating Synchronize" for a One-way Parent to Child archiving enabled replica that has been renamed from ArcMap.
BUG-000153681	Using Python to run the Add Rasters To Mosaic Dataset tool with the NITF raster type does not parse correct values when executed outside of ArcGIS Pro, such as the Python window.
BUG-000153684	Web Map Tile Service (WMTS) layer names using ` and ' characters are cut off in ArcGIS Pro.
BUG-000153703	High Random Access Memory (RAM) consumption and slow performance in ArcGIS Pro when working with a feature service.
BUG-000153774	Unable to modify the geodatabase connection properties in ArcGIS Pro after the referenced version is deleted.

Issue	Description
BUG-000153777	When editing in ArcGIS Pro, dirty areas in versioned feature classes are not removed after a successful validation using the Validate Topology geoprocessing tool, which returns no errors.
BUG-000153823	Zone changes in an ArcGIS Pro 3.0.2 layout result in incorrect grid ID letters.
BUG-000153835	In ArcGIS Pro, incorrect statistics are displayed for a selection of features if the selection is made prior to creating the field statistics chart and the data resides in an enterprise geodatabase.
BUG-000153875	The EditOperation.IsEmpty method returns 'True' after calling the EditOperation.Modify method.
BUG-000153876	Using Inspector.Load(featureLayer, oid) to update one feature at a time in a loop only updates the last feature in the loop.
BUG-000153882	ArcGIS Pro is unable to load the textures of an OBJ file when the 3D model is used as a 3D model marker or imported as a multipatch, where else the texture are able to load with ArcGIS Earth or other 3D third-party tools.
BUG-000153883	ArcGIS Pro fails to load a 3D model file with the 3D model marker symbol if the file size is about 160 MB.
BUG-000153903	The Features To JSON tool does not work with GeoJSON and WGS84-Option when the input is MEMORY-Featureclass.
BUG-000153938	Custom print services with custom templates do not display chart frames.
BUG-000153949	The primary key GFID changes when a conflict between two versions is replaced with the selection 'Replace Object with Conflict Version' and 'Mapping and Charting Solutions' is installed and enabled.
BUG-000153961	When logging in to an ArcGIS Online Organization through Single Sign-On Two Factor Authentication (2FA) and built-in ArcGIS Pro 3.0, the browser window failed.
BUG-000154004	Instead of returning an exception indicating the user does not have the permission to access the versioned view (_evw), the arcpy.ArcSDESQLExecute execute() method outputs a random value for 'select count(*) from <User>.<feature class_evw>' when the user
BUG-000154007	Unable to display the field alias when changed from the pop-up configuration when printing in ArcGIS Enterprise
BUG-000154020	The Interpolate Shape tool in ArcGIS Pro returns the error message, "ERROR 000599: Falls outside of output geometry domains" when a raster surface has negative values and an undefined vertical datum.
BUG-000154044	The Enable Feature Binning tool does not run as a python command.

Issue	Description
BUG-000154056	When rotating a map with label callout point symbols applied, the labels are not displayed on the map.
BUG-000154072	Network diagrams generated from the ArcGIS Utility Network service show domain codes instead of domain descriptions.
BUG-000154080	A functionality is required to rematch addresses for the hosted feature services in ArcGIS Pro.
BUG-000154082	ArcGIS Pro crashes when running the Repair Self Intersection geoprocessing tool on a shapefile.
BUG-000154087	The 3D lines with a cartographic offset results with polygons using the Map To KML tool.
BUG-000154168	The alternate name table roles 'Alternate County Name' and 'Alternate State Name' change to 'Alternate Subregion Name' and 'Alternate Region Name,' respectively, after the locator is created.
BUG-000154173	After publishing by referencing a registered database with a constant input mode from an offline service definition containing a tool with an SDE feature class input, the original SDE file cannot be connected.
BUG-000154213	The color of the exported map from ArcGIS Pro does not match the color of the original TIFF file when using the Esri stretch type.
BUG-000154241	The Trace (Utility Network) geoprocessing tool does not accept the trace type parameter in Czech when using the Czech language pack in ArcGIS Pro.
BUG-000154245	When running a model as a tool that contains the Calculate Field tool, the attribute table does not automatically refresh with the new values.
BUG-000154253	In ArcGIS Pro, when published as a web tool, the Linear Line Of Sight (Defense) tool does not execute successfully.
BUG-000154274	Utility Network 'Add Trace Configuration' geoprocessing tool failure when using the Czech language pack in ArcGIS Pro.
BUG-000154277	In ArcGIS Pro 3.0.3, the Contour with Barriers tool produces incomplete results when running on a large raster.
BUG-000154288	Installing the Spyder 5.1.5 library in a cloned Python environment results in new and existing notebooks, and returns the error message "Error: Failed to open notebook."
BUG-000154299	A Web Map Service (WMS) group layer consisting of two sublayers does not load correctly in ArcGIS Pro, but loads correctly in ArcMap.
BUG-000154308	The TableToExcel function fails when the subtype-value is set to NULL and not in List.
BUG-000154328	The Evaluate Rules geoprocessing tool does not consider selected rows from tables.

Issue	Description
BUG-000154351	The Abbreviation setting with 'lower case' in Dictionary is not honored for labels in ArcGIS Pro.
BUG-000154369	Optimize the network index storage for associations during validate.
BUG-000154377	Point features located precisely on the cell border are not exported to an S-57 file.
BUG-000154404	A stereo map does not display any features when using ISAT as the data source for the stereo collection.
BUG-000154409	In the Catalog pane, the Authoritative Status filter is not respected unless logged in to ArcGIS Online in ArcGIS Pro.
BUG-000154445	The getUser operation returns incorrect user information in a multi-user enterprise.
BUG-000154515	Unable to synchronize replicas using ArcGIS Pro when the default geodatabase is protected.
BUG-000154526	CRF data is not displaying in ArcGIS Pro but does display in Portal for ArcGIS.
BUG-000154560	The ArcGIS Pro 3.0.x Video Multiplexer tool returns the warning message, "WARNING 002652: The following field is not a valid MISB metadata field: VMTI Local Data Set."
BUG-000154617	When validating topology, new topology errors previously not detected are created.
BUG-000154640	arcpy.AddMessage does not add any message in the geoprocessing details if a Python string starts and ends with unpadded angle brackets.
BUG-000154642	When running the JSON To Features tool, a specific field or property is not transferred over in some GeoJSON files to the output feature class.
BUG-000154653	Unable to resize the Report Header subsection in ArcGIS Pro.
BUG-000154689	The display of the MicroStation DGN file colors do not match the display in the source application.
BUG-000154740	The temporal profile chart becomes unresponsive when loading large multidimensional raster datasets.
BUG-000154749	In the ArcGIS Pro Location Referencing toolbox, the Update Measure From LRS tool fails to calculate measures for points on a coincident route.
BUG-000154750	Translation issue on the legend title for the output created by the Spatial Association Between Zones tool when using ArcGIS Pro with the Chinese language pack.
BUG-000154758	Improve query performance when filtering candidates during the update subnetwork operation.

Issue	Description
BUG-000154772	When creating a thumbnail for an image service in ArcGIS Pro, a generic thumbnail is still displayed in ArcGIS Server Manager.
BUG-000154784	In ArcGIS Pro, the Pairwise Dissolve tool splits certain features in line datasets when the Create multipart features parameter is disabled.
BUG-000154794	The reconcile process does not set the association status bit to dirty for associations validated in a named version prior to reconciling.
BUG-000154816	In ArcGIS Pro, a calibration point's measure attribute does not match the m-value of the route's vertex.
BUG-000154820	ArcGIS Pro fails to detect conflicts for the attribute field in traditionally versioned data.
BUG-000154830	A specific set of imagery fails to process in ArcGIS Drone2Map 2022.1.2 and the error message, "Failed to compute block adjustment with engine 'Frame'." is returned.
BUG-000154850	Output Units do not update when making changes to the Create LRS geoprocessing tool spatial reference output.
BUG-000154867	Allow a web tool or geoprocessing service to publish a different web tool or web layer using a Python script tool.
BUG-000154887	Parcel points in an ArcMap parcel fabric with a value in the Name column but no related control point gets dropped when using the Upgrade ArcMap Parcel Fabric tool in ArcGIS Pro.
BUG-000154896	In ArcGIS Pro 3.0.3, right-clicking a layer created in ArcGIS Pro 2.8 in the Contents pane to export features does not include all of the fields in the attribute table.
BUG-000154923	After upgrading a PostgreSQL 10.7.1 geodatabase, editing feature classes fails due to some functions not being owned by the data owner anymore.
BUG-000154926	The Pairwise Intersect tool fails to populate m-values (m-values return NaN values) for certain route vertices.
BUG-000154946	The Export Layout tool fails to abide by the 'Clip to index feature' option in the ArcGIS Pro map series when the color model is set to CMYK.
BUG-000155084	Overwriting an existing accelerator for the Paste Special command (pasting items on the clipboard using the Paste Special settings) fails to retain the newly assigned value.
BUG-000155105	The WFS To Feature Class tool returns Error 999999.
BUG-000155106	Improper handling of special characters when using the suggest API.
BUG-000155110	Mosaic datasets containing raster proxy for NetCDF files fail to display when published at ArcGIS Enterprise 10.9.1.

Issue	Description
BUG-000155121	Unable to return or reset ArcGIS Drone2Map offline licenses.
BUG-000155139	Inserting records with an InsertCursor and attribute rules returns incorrect results.
BUG-000155145	In ArcGIS Pro 3.0.3, running the Tabulate Area tool on a National Land Cover Database (NLCD) dataset results in the first class name being substituted with an 'A_' in the output table.
BUG-000155148	When using the Batch KML To Layer tool, points are not automatically added to the map.
BUG-000155175	The error message, "Requested operation cannot be completed" is returned while rearranging the drawing order of the symbology classes after applying a data exclusion expression on the layer in ArcGIS Pro.
BUG-000155178	Unable to publish a scene service from the AP-East-1 (Hong Kong) Amazon S3 bucket and returns the error message, "Error executing tool. Publish Datasets in Data Stores Job ID <>. ERROR 999999: Something unexpected caused the tool to fail".
BUG-000155233	The Excel To Table geoprocessing tool does not work properly in ArcGIS Pro with files exported from Oracle SQL Developer.
BUG-000155236	The Update Data Source option does not change the workspace for a feature class in ArcGIS Pro properly.
BUG-000155245	The Find Space Time Matches geoprocessing tool is not finding all matches when the 'Space and time' option is selected.
BUG-000155252	The Select Data tool does not produce the expected output when an iterator is utilized in ModelBuilder.
BUG-000155261	The Conflict Manager does not display conflicts when a subtype group layer is published as a referenced feature service.
BUG-000155279	The Geospatial Data Abstraction Library (GDAL) python module shipped with ArcGIS Pro 3.0.3 (GDAL v3.4.0) returns empty objects and not gdal.dataset objects when reading XYZ files.
BUG-000155331	Attribute propagation for the 'phaseenergized' attribute of an electric line conductor in an electric utility network is occurring in the upstream direction despite terminals set on transformer to only allow for downstream flow.
BUG-000155362	ArcGIS Pro update fails when logged in to an ArcGIS Online public account with a Single Use license.
BUG-000155364	Copy Python Command from Create Locator tool returns an error when the input source is a shapefile.
BUG-000155377	Unable to create a bar chart on a database view created in a mobile geodatabase in ArcGIS Pro.

Issue	Description
BUG-000155394	The Aviation Airports Evaluate Obstacle tool must further explain the Elevation Layer source and the expected OIS Multipatch layer schema.
BUG-000155397	The Error Inspector options in the UI are out of sync with what is being sent to the Evaluate REST endpoint.
BUG-000155413	The Aviation Airports Evaluate Obstacle tool must give a descriptive error for insufficient OIS Multipatch layer schema.
BUG-000155422	Running the Generate Routes tool using the postmile network changes the odometer values in a linear referencing system (LRS) Dataset (published and branch versioned).
BUG-000155449	Unable to use the Tab or 'Shift + Tab' keyboard shortcut in the Reclassify Field tool to navigate values in the reclassification table.
BUG-000155454	In ArcGIS Pro, when the function of the MIL2525C military symbology is set as Maneuver Lines: Forward Edge of the Battle Area (FEBA), the modifier does not match the symbology standard.
BUG-000155464	The Upgrade Geodatabase error message, "Could not update server tables and stored procedures. (SDE_table_registry : Error (-64) DBMS error code: 0 42000 [Microsoft] [ODBC Driver 17 for SQL Server] [SQL Server] 'colregistry_fk' is not a constraint.)" is returned.
BUG-000155468	Parcel fabric returns unexpected behavior with dirty areas and the Validate Topology tool.
BUG-000155555	ST_Geometry functions take a longer time to execute in ArcGIS Enterprise 10.7.1 and above compared to ArcGIS Enterprise 10.6.1 or earlier when working with a feature with a large number of points (vertex stored in Oracle).
BUG-000155557	The Append tool creates duplicates when the 'Enable Undo' button is selected with the Calibration Point dataset from the linear referencing system (LRS) network.
BUG-000155578	The Export Subnetwork tool does not export all specified resultFields in the exported JSON file when shape_Length or shape_Area are included.
BUG-000155586	The Create Random Points tool generates empty geometries.
BUG-000155613	The error message, ""error": "code":400, "extendedCode": -2147467259, "message": "Unable to complete operation.", "details": ["trying to read out of file"]" is returned for some inputs into the findAddressCandidates operation.
BUG-000155642	The JSON To Features tool returns the error, "ERROR 999999" for having an empty JSON and GeoJSON file.

Issue	Description
BUG-000155660	Definition queries do not appear as active after enabling the query and reopening the definition query again.
BUG-000155671	When NITF (.ntf) rasters are added, the error message "External component has thrown an exception." is returned when the Windows regional format settings is set to Czech(Czechia).
BUG-000155682	All fields can be configured despite checking the 'Text symbol required to be selected from the symbol table' check box.
BUG-000155690	arcpy.Exists does not work with the Object Linking and Embedding Database (OLE DB) connection table in ArcGIS Pro 3.1.
BUG-000155706	The Select Data tool selects the incorrect sublayer in ModelBuilder when the Add To Display option is enabled for input.
BUG-000155736	The error message, "Underlying DBMS error [[Microsoft][ODBC Driver 17 for SQL Server][SQL Server]The instance of the SQL Server Database Engine cannot obtain a LOCK resource at this time." is returned when attempting to run a compress against the ArcGIS Enterprise geodatabase.
BUG-000155737	The Realign Route tool fails and returns the error message: "error processing edits on Server" for exceptionally long routes.
BUG-000155761	When using the suggest operation from the World Geocoding Service, if the text string contains "T #" (where the first three dots are one single ellipsis character), the following error message is returned: <code>{"error":{"code":400,"extendedCode":-21470248,"message":"Unable to complete operation.","details":["bad allocation"]}}</code> .
BUG-000155773	The project items in ArcGIS Pro 3.1 projects have invalid item properties when opened in ArcGIS Pro 3.0.3.
BUG-000155778	The XML workspace document generated by the Create Replica tool fails with "error 999999" while importing it into another geodatabase.
BUG-000155785	Unable to scroll down from the drop-down list using the mouse scroll wheel with the Add Line Event tool for the Location Referencing extension when adding an event.
BUG-000155810	Unable to build parcels in the map extent with the 'Build Extent' Parcel Fabric command when having a GIS Professional Standard user type assigned. The error message, "Edit Operation Failed. This layer is controlled by a Parcel Fabric. To edit this layer you must be assigned a Parcel Fabric User Type Extension by the portal administrator." is returned.
BUG-000155819	The attribute table of a joined layer in a mobile geodatabase does not open when a definition query with a subquery is applied to the join table.

Issue	Description
BUG-000155836	Support linear referencing system (LRS) operations for Geographic Coordinate Systems (GCS) data with vertices sparsely spaced apart.
BUG-000155857	Some geocoding inputs take a longer time to process and eventually results in a 504 Gateway Timeout error.
BUG-000155871	When performing a realignment with abandonment, the 'Recalibrate route downstream' check box unchecked, and the point event layer's Calibrate Route event behavior rule set to 'Move', the upstream event record gets the Location Error value of "Route Location Not Found".
BUG-000155874	A scene layer package (.slpk) returns incorrect attribute information after adding a 16,777,214 polygon multipatch feature class.
BUG-000155890	A model stored outside the ArcGIS Pro project runs but does not process correctly when batched.
BUG-000155896	Text callouts are cut off when using Print Layout to PDF ArcGIS Pro.
BUG-000155922	Using most vector inputs to the Create Accuracy Assessment Points tool results in an error 999999 in ArcGIS Pro 3.0.3.
BUG-000155968	ArcGIS Pro stops responding when editing or running Python code that calls the Geodesic Viewshed tool.
BUG-000155992	The feature weight is ignored on point features with clustering enabled.
BUG-000156004	Users are able to add duplicate topology rules in a parcel fabric, and those rules same as read-only rules fail to be deleted with the error message, "Error 160858: Cannot update a read-only parcel fabric rule" returned.
BUG-000156008	The Model Arguments parameter cannot be populated after selecting the Model Type under the Train Deep Learning Model tool in ArcGIS Pro 3.0.3.
BUG-000156042	Passing privileges on a feature class in SAP HANA through database roles does not work in ArcGIS Pro.
BUG-000156079	When publishing a sync-enabled feature service, allow fields that do not participate in attribute rules or contingent values to be hidden.
BUG-000156089	In Google BigQuery from ArcGIS, the error message, "Failed to load data. Invalid query: Could not cast literal "<datetime>" to type DATE" is returned when working with a query layer containing a unique identifier of the Date data type.
BUG-000156119	Incorrect Unified Facilities Criteria (UFC) Transitional Surface is generated for Rotary-Wing Air Force and Army Service Types.
BUG-000156120	Incorrect Unified Facilities Criteria (UFC) Approach Surface is generated for Rotary-Wing, Instrument, and all Service Types inputs.

Issue	Description
BUG-000156121	Incorrect Unified Facilities Criteria (UFC) Clear Zone and Accident Potential Zone 1 surfaces are generated for Rotary-Wing types, all Service Types, and Flight Rules.
BUG-000156150	ArcGIS Pro stops responding when opening the Export Topology Errors tool in the ModelBuilder window.
BUG-000156163	The Merge tool in a model produced in ArcMap does not load certain source fields.
BUG-000156171	In ArcGIS Pro, multiple vertices or control points can be selected but only the first selected vertex or control point is changed when using the 'Convert Vertex to Control Point' command and the 'Convert Control Point to Vertex' command.
BUG-000156203	The layer package of a subtype group layer contains the subtype layers as additional layers.
BUG-000156241	A Web Map Tile Service (WMTS) link works in ArcGIS Online but not in ArcGIS Pro.
BUG-000156251	ArcGIS Pro 3.1 crashes when adding a GeoPackage file.
BUG-000156274	ArcGIS Pro stops responding when using the Duplicate Parcels command if the parcel type feature layer in the Contents pane is renamed.
BUG-000156281	Publishing a hosted feature layer from an uploaded file in ArcGIS Enterprise fails with an undefined error after installing ArcGIS Server 10.9.1 Utility Network and Data Management Patch 4 or ArcGIS Server 10.8.1 Utility Network Patch 9.
BUG-000156306	The loading animation is stuck when using 3D files as the model file for multipatch features in ArcGIS Pro 3.1.
BUG-000156315	ArcGIS Pro does not support International Foundation Class (IFC) files with the IFC Entity of IfcProxy when running the BIM File To Geodatabase tool.
BUG-000156328	Pan sharpened imagery produces stripes or blocks when exported to a new raster in ArcGIS Pro.
BUG-000156329	Running the Disable Parcel Topology tool results in Error 002138 and 160722.
BUG-000156344	Sharing a feature layer as a web layer does not delete the temporary project folder in ArcGIS Pro.
BUG-000156356	Offline areas downloaded from hosted feature services created from the Boom Placement template do not show the correct count in the Symbology pane and in charts created when the Calculate Field tool is used in ArcGIS Pro.

Issue	Description
BUG-000156359	Poor performance with Select Associated Data in the Attributes pane when a large number of utility network features (1000 or more) are selected.
BUG-000156382	The Export to CAD geoprocessing tool hangs when using a selection layer from an enterprise geodatabase as an input.
BUG-000156390	When attempting to publish or analyze a feature service, the Share As Web Layer pane in ArcGIS Pro drops the hostname from the username and returns the error message, "Error 00231: Layer's data source must be registered with the server" when using an Azure PostgreSQL 11 geodatabase.
BUG-000156393	In ArcGIS Pro 3.1, when the user-defined function is declared within a loop in the Arcade script, it returns the following error message, "Invalid expression. Function declaration only at global scope".
BUG-000156399	When using ArcGIS Pro geoprocessing tools with the Input Raster parameter that accepts an image service, specifying an extent on the Parameters tab does not clear Error 001491.
BUG-000156401	One of the feature classes with out beyond set in vector tile package which is generated in a flat tiling format does not display at any scales in ArcGIS Pro.
BUG-000156402	When a project is reopened or a layout file is imported, a rectangle with rounded corners in the ArcGIS Pro layout is not visualized.
BUG-000156410	The reference level field for certain features is displayed as 'Null' when reviewing Revit files in ArcGIS Pro.
BUG-000156421	Provide a more informative error message when failures are encountered with a large number of starting points when running the Trace tool.
BUG-000156447	The Remove Relate tool does not work on subtype group layers in ArcGIS Pro.
BUG-000156451	Publishing a web map to Portal for ArcGIS with a minimum scale defined and selecting the 'Reference registered data' option in the publishing configuration results in an undesirable visibility range for all layers.
BUG-000156475	Attempting to publish a map service to ArcGIS Enterprise 10.9.1 from the Python window in ArcGIS Pro 3.0.3 returns the error message, "ERROR 999999".
BUG-000156479	The layout settings in a map series are not retained in the Layout Properties dialogue box once the dialogue box has been closed.
BUG-000156482	The Re-Export Unacknowledged Messages geoprocessing tool fails to execute.

Issue	Description
BUG-000156491	The referent fields are not displayed in event feature layers' properties when viewed through a feature service in ArcGIS Pro.
BUG-000156494	In ArcGIS Pro, the copied layout does not reference to the respective map in the Contents pane.
BUG-000156515	Exporting a layout as a PDF file with the CMYK color scheme fails to maintain the set symbology colors.
BUG-000156535	Running the Make WCS Layer tool returns the error, "Error 999999."
BUG-000156539	The Train Deep Learning Model tool does not create the model_metrics.html report, loss_graph.png, or show_results.png in ArcGIS Pro 3.1 (In ArcPy, it creates model_metrics.html).
BUG-000156567	In ArcGIS Pro 3.1.0, a mosaic dataset used as a scene elevation surface cannot be shared as a web layer because the Share As Web Layer pane is disabled.
BUG-000156594	Overwriting an existing image service does not allow for selecting an existing cache.
BUG-000156607	The Sort tool does not have the Preserve Global IDs check box in the environment settings.
BUG-000156621	Importing the .mxd file to ArcGIS Pro fails if the .mxd file contains a layer from a selected feature (data stored in a Spatial Database Engine).
BUG-000156627	The JSON To Features tool fails to run in ArcGIS Pro when setting the output to a memory workspace.
BUG-000156642	An SQL Server geodatabase connection does not correctly display the list of tables in the Catalog pane when the owner name matches the name of the database.
BUG-000156645	The JSON To Features tool returns the error message, "Error 001558" when referencing features that have both a GlobalID field and a parentGlobalID field.
BUG-000156658	The rematch address operation fails in ArcGIS Pro with the error message, "Edit operation failed. The value type is incompatible with the field type [Distance]" returned.
BUG-000156663	When using the Traverse tool, Export Arcmap Traverse File does not work consistently.
BUG-000156665	Attribute rules from the Address Data Management solution fails after upgrading to ArcGIS Pro 3.1.
BUG-000156681	The full document path to internal drives and shared path are exposed within the document information. Including the title on a map service published from ArcGIS Pro within the REST interface.

Issue	Description
BUG-000156685	In ArcGIS Pro, the Create Overpass and Create Underpass geoprocessing tools do not create the correct Margin Across and Margin Along parameters.
BUG-000156709	Typing errors in Pro.settingsConfig XML sample in the 'Manage application settings' documentation cause the entire script to fail to execute.
BUG-000156710	The Mask option and Snap Raster environment settings are disabled for a project created in ArcGIS Pro 2.9.0.
BUG-000156720	The layout PictureElement_SetSourcePath method only updates the path in the element properties, but not the picture in the layout.
BUG-000156737	The high-priority label parameter is not reflected in the exported PDF file from ArcGIS Pro 3.1.
BUG-000156744	ArcGIS Pro 3.1 fails to open the DGN file and the error message, "External component has thrown an exception" is returned.
BUG-000156747	Label placement and stack labels fails to constrain labels at the end and the start point of a line feature in ArcGIS Pro.
BUG-000156748	When using the Autocomplete Polygon tool on a polygon with a default value, the value is not added to the attribute table.
BUG-000156755	Curve geometry from DGN is displayed as straight lines in ArcGIS Pro.
BUG-000156756	The Apply Event Behaviors tool produces incorrect results on point event layers.
BUG-000156763	The post requires the current list of modified tables for a version prior to the posting operation.
BUG-000156764	Using the != Python operator with a conditional in an ArcGIS Pro Network Dataset field script expression returns "Error 160410."
BUG-000156773	The Revit file loses textures when added to ArcGIS Pro, but is well-presented in the Revit software.
BUG-000156781	The range slider of a netCDF (network Common Data Form) file does not work correctly in ArcGIS Pro.
BUG-000156782	ArcGIS Pro with the Japanese language pack does not translate the drop-down options of the Sort geoprocessing tool in the Fields parameter.
BUG-000156846	Honor the Container split policy for nonspatial junctions and edge object contents when the container line is split.
BUG-000156853	In an ArcGIS Pro layout, an Arcade expression which conditionally colors a part of the text (using the CLR tag) in a dynamic text does not work when the expression is not fully contained at the specified bounding size of the dynamic text box.

Issue	Description
BUG-000156873	ArcGIS Pro changes the ModelBuilder Calculate Field expression type from Python 3 and Arcade to SQL
BUG-000156874	In ArcGIS Pro, the Fields list is removed from the ModelBuilder's Calculate Fields tool.
BUG-000156875	The ArcGIS Pro Calculate Field tool's documentation incorrectly states the default Expression Type is Python 3.
BUG-000156886	Non-LRS (linear referencing system) edits to the calibration point features generate records in the LRS Edit Log.
BUG-000156896	ArcGIS Pro 3.1 crashes when zooming in or out and panning around a map or layout in a project containing the Sentinel-2 imagery.
BUG-000156902	When running the Identity tool, the following error message is returned even with a valid topology: "Error 160196: Invalid Topology."
BUG-000156905	ArcGIS Pro 3.1 freezes when changing the symbology of a graphics layer and the rendering engine is set to OpenGL.
BUG-000156910	ArcGIS Data Reviewer Ready to Use Rule - Features on the Feature check does not display any filter parameters on a feature service configured on the feature class of LRS network before publishing to ArcGIS Enterprise portal.
BUG-000156911	Copying and pasting a utility network dataset from an enterprise geodatabase to a file geodatabase returns the error, "ERROR 000260: The domain is incompatible with the existing default value. The operation was attempted on an empty geometry."
BUG-000156927	Using Alibaba Cloud Object Storage as a raster store causes raster analysis to fail.
BUG-000156931	Unable to select features using the Explore tool or the Select tool from a view in a mobile geodatabase in ArcGIS Pro.
BUG-000156958	CSV files containing tab-separated data with strings surrounded by quotes create a new row as soon as it contains line breaks.
BUG-000157009	Some processing inputs used for suggested, reverseGeocode, and findAddressCandidates operations take a longer time to process and occasionally result in a 504 Gateway Timeout error.
BUG-000157020	Inconsistent project results between the ArcGIS Pro project and Geometry Service from ArcGIS Online when converting from WKID: 3857 to WKID: 2881.
BUG-000157025	The Parcel Seed tool in the Create Features pane is not immediately available after modifying group layers in the Contents pane.
BUG-000157041	Some CAD files (.dwg) work in ArcGIS Pro 3.0.x but does not open in ArcGIS Pro 3.1 and return the error message, "External component has thrown an exception" or crash the software, or both.

Issue	Description
BUG-000157047	When running the Apply Event Behaviors tool in ArcGIS Pro 3.1 with some datasets, more than 15 minutes are taken for the tool to run, even when edits are not being made.
BUG-000157056	The error message, "External sharing process failed" is encountered when publishing a feature class from an enterprise geodatabase when there is a linear referencing system (LRS) feature dataset owned by a different user.
BUG-000157067	In ArcGIS Pro 3.1, dictionary styles fail to display correctly with German regional settings.
BUG-000157085	When a file downloaded using the BIM cloud connection is moved to a different folder, the property sheet tools do not download the most current version of the model.
BUG-000157092	The MapFrame.Export() method returns the exception message, "MapView is not initialized" after creating a new MapFrame object on a layout in ArcGIS Pro SDK 3.1 for .NET.
BUG-000157093	The placement of labels when a map is clipped in ArcMap and ArcGIS Pro returns different results.
BUG-000157094	Getting inconsistent area calculation results of the same feature class in the same spatial reference when it is calculated by Calculate Field (Data Management) from ArcGIS Pro and Geometry Service from ArcGIS Online.
BUG-000157102	In ArcGIS Pro 3.1 with a Japanese language pack, 'On-screen constraints' and 'Inference' words are still displayed in English.
BUG-000157105	Enable Enterprise Geodatabase Tool fails on Azure SQL Database Managed Instance with AAD authenticated sde user with the following error: "Failed to connect. ODBC 17 error: 40532, [Microsoft][ODBC Driver 17 for SQL Server][SQL Server]Cannot open server "database.windows.net" requested by the login. The login failed."
BUG-000157146	In ArcGIS Online, the locator view suggestions are returning more languages than expected.
BUG-000157157	The annotation tab in the Attributes view is not accessible for feature-linked annotations based on feature classes storing NULL values in a field that should be labeled.
BUG-000157167	When merging parcels in a record-driven workflow, the error message, "Merge Feature Failed. The server took too long to answer. The client has timed out. (status code 28)." is returned, even after increasing the 'The maximum time a client can use a service' setting in ArcGIS Server Manager.

Issue	Description
BUG-000157294	The raster function layer (Hillshade) fails to be published by reference when the source data is stored within an enterprise geodatabase (SQL Server).
BUG-000157305	Incorrect time dimension formatting on time-enabled Web Map Service (WMS) image services when viewed at the GetCapabilities endpoint.
BUG-000157306	On the Location Referencing tab, tools in the Events group are disabled when opening existing projects.
BUG-000157333	Symbology based on data values are incorrect when rendering using U and V variables for meteorological data in ArcGIS Pro. The identified value and symbol drawing direction are incompatible for the vector field renderer.
BUG-000157342	Layers and symbols visible at certain scales in a map are not always visible at the same scales in a vector tile package created from the map in ArcGIS Pro.
BUG-000157346	Unable to draw a Web Feature Service (WFS) when the 'On demand' connection mode is enabled in ArcGIS Pro 3.1.x.
BUG-000157351	Incorrect error ID or wrong description for CheckGeometry failing on non-geodatabase tables.
BUG-000157353	The transformation path is not properly set for JGD 2011 (WKID 6668).
BUG-000157365	Functions are not honored in the Trace tool when using the 'Use Trace Configuration' option to load a trace configuration.
BUG-000157371	The Generate Grid From Point (Defense) tool outputs an incorrect grid size.
BUG-000157386	Incorrect credits consumption when running the Add Location tool with the custom configuration in ArcGIS Pro.
BUG-000157390	Generic Evaluation Error returns when running attribute rules in ArcGIS Arcade script validation.
BUG-000157409	Unable to change the enterprise geodatabase version more than once after using the Make Route Event Layer tool in ArcGIS Pro.
BUG-000157413	Adding a certain CAD dataset to ArcGIS Pro 3.1 causes the application to crash.
BUG-000157418	In ArcGIS Pro 3.1, when editing a mobile geodatabase polygon features, if Undo is clicked after an edit operation (Merge, Split, Reshape, Edit Vertices, Move, Delete...) and the Undo operation is followed by a Split or a Reshape operation, the geometry of t
BUG-000157432	Contact points are drawn with the MILSTD2525D definition instead of the MILSTD2525C.

Issue	Description
BUG-000157435	ArcGIS Pro 3.1.1 crashes upon selecting, and deleting multiple ground control points (GCPs) from the GCP Manager in a Reality mapping workspace.
BUG-000157444	The content type of attachments added via the apply edits operations with the upload ID parameter is incorrect.
BUG-000157446	The Extract LAS tool does not export all points for a class when a filter is applied if the point cloud is generated in ArcGIS Drone2Map.
BUG-000157465	ArcGIS Pro crashes when adding any layer from an OGC API server connection to a map.
BUG-000157469	The documentation overstates the maximum length of the SQL Server Operating System Authenticated username.
BUG-000157482	The ArcGIS Arcade compiler returns zero instead of the actual count for a calculation in an expression.
BUG-000157516	ArcGIS Pro crashes when the Simplify Polygon tool runs on data with the ArcGIS Maritime data model.
BUG-000157545	Labels are placed in incorrect areas when using the Maplex Label Engine in ArcGIS Pro.
BUG-000157569	The value of the Table Attribute from Dynamic Text is unavailable when defining from a layer other than the map series index layer.
BUG-000157600	In ArcGIS Pro, deleting a feature class owned by an operating system (OS) authenticated user and contained in a feature dataset fails with no error message in the Catalog pane.
BUG-000157602	The 'Landsat 8-9 Normalized Difference Vegetation Index (NDVI) Colorized' image service is not drawn on a map in ArcGIS Pro.
BUG-000157621	The error message, "An exception occurred while retrieving properties." is returned in the Network Dataset Properties dialog box.
BUG-000157662	Fail to create 3D vertical polygons with a polygon feature class in ArcGIS Pro 3.0.3.
BUG-000157706	Running the Create Routes tool on centerlines with approximately 30,000 vertices fails and the following error message is returned, "There was an error while processing the edits on the server".
BUG-000157709	In ArcGIS Utility Network, the dirty area of an updated subnetwork which intersects other sub-network geometry invalidates all intersected sub-networks and makes them dirty.
BUG-000157718	The Excel to Table tool prefixes the table name with 'main.main_ ' when importing to a mobile geodatabase.
BUG-000157734	Unable to use the 'Extract by Mask' geoprocessing tool with the image service in ArcGIS Pro 3.1.1.

Issue	Description
BUG-000157736	The Create Database View geoprocessing tool results in incorrect data when the SQL CASE expression returns a text value in the View Definition parameter in a mobile geodatabase.
BUG-000157742	The number function in Arcade returns NaN in ArcGIS Pro.
BUG-000157743	The Generate Routes tool results in incorrect centerline sequence records when run against a derived network for the first time with a defined parallel processing factor.
BUG-000157750	Some Civil 3D DWG files that were working in ArcGIS Pro 2.9.x are not opening in ArcGIS Pro 3.1 and returns the error, "External component has thrown an exception" or/and make ArcGIS Pro 3.1.1/3.0.x crash.
BUG-000157766	Error "Unable to complete operation. Internal error during object update. The following feature has associated routes or lines which need to be locked before performing an edit: [FC OID] = [ev_StateOnCounty 26891] Failed to execute (CalculateField)."
BUG-000157776	A zonal histogram returns an incorrect output when the Zones as rows option is used in ArcGIS Pro.
BUG-000157782	Masking for symbol layers is not correctly set when converting to unique values.
BUG-000157802	The Field Map parameter in the Append tool does not recognize the matching fields of a layer with editor tracking enabled in ArcGIS Pro.
BUG-000157804	Disabling parameters does not work in the .atbx Toolboxes validation code when initializeRarameters block is entered.
BUG-000157809	Validating a topology fails and the following error message, "Edit operation failed. ERROR: General function failure [Topology entry (edge eid: xxxx) not found for feature]" is returned.
BUG-000157812	The ArcGIS Pro 3.1 Import AIXM 5.1 Message tool does not complete when using an enterprise geodatabase.
BUG-000157813	Unable to copy and paste the parcel fabric from the file geodatabase to the SQL Server enterprise geodatabase.
BUG-000157817	When specifying a geoprocessing tool's input feature data using interactive input in ArcGIS Pro, editing templates are not available if a feature layer is added to the map first.
BUG-000157834	The World Geocoding Service 'suggest' operation returns an invalid address.
BUG-000157838	When using the Validate Network Topology tool, an edit operation failed and returns a General Function Failure error.
BUG-000157839	The WMS GetMap operation returns images that do not always align correctly.

Issue	Description
BUG-000157854	ArcGIS Pro crashes with an AccessViolationException when calling the BasicFeatureLayer.GetDrawingOutline() method for a feature outside of the current map view.
BUG-000157867	The Delete Diagram Template tool runs indefinitely and does not complete.
BUG-000157868	The First(Attachments(\$feature)).ID field calculation fails in ArcGIS Pro 3.1.1.
BUG-000157892	Unable to use the Alter Field geoprocessing tool to change the alias on a registered database view field in ArcGIS Pro 3.1.
BUG-000157900	Importing an MXD file with data from an enterprise geodatabase that includes a selection set layer causes ArcGIS Pro to hang.
BUG-000157905	Subaddresses suggestions do not appear when building a locator with a PostalExt (zip4) field.
BUG-000157928	Adding the 'USA NAIP Imagery: NDVI' ArcGIS Living Atlas layer to ArcGIS Pro 3.1 and above does not display the layer on the map.
BUG-000157930	Autosuggest requests to the standard geocoding endpoint (https://geocode-api.arcgis.com/) return an incorrect magicKey response when submitted from Central European locations.
BUG-000157936	Publishing or overwriting the web tool to ArcGIS Enterprise does not include the choicelists parameter when published using the Python (arcpy.sharing) script.
BUG-000157973	Unable to rematch addresses when the locator path changes and the following error message, "Geocoding result was not stored. Ensure you are signed in to ArcGIS Online and you have geocoding privilege" is returned.
BUG-000157991	In ArcGIS Pro 3.1.1, field aliases are not sticking when exporting the data.
BUG-000157992	Phase propagation loses phase in certain 'loop' situations.
BUG-000158019	Importing a map document (.mxd) that has a temporary layer created by applying selection to a feature class in ArcGIS Pro until the session from the task manager is killed.
BUG-000158022	ArcGIS Pro intermittently crashes after clicking the Split Centerline option.
BUG-000158026	Using %Name% in the Output Feature Class location for the Batch command under the Erase tool returns the error message, "000354: The name contains invalid characters" in ArcGIS Pro 3.1.1.
BUG-000158027	The values in the attribute table do not display correctly after changing the field type and running the Append tool.

Issue	Description
BUG-000158046	The attribute rule is not triggered correctly when creating a related feature in ArcGIS Pro.
BUG-000158056	Location Referencing editing workflows results in ArcGIS Pro timeout errors when working with larger feature datasets.
BUG-000158111	In ArcGIS Pro, the Apply Event Behaviors geoprocessing tool fails after adding multiple calibration points when working with the Location Referencing solutions.
BUG-000158121	ArcGIS Pro checks out a license a few seconds after a forced check-in.
BUG-000158141	The cardinality of a join is incorrect in the layer's properties for one to one joins in ArcGIS Pro 3.1.
BUG-000158155	The Recalculate Feature Class Extent tool does not reduce the extent of a feature class after outlying features are deleted.
BUG-000158170	Features are sometimes not displayed or no longer selectable when editing a feature service layer.
BUG-000158185	Improve the Enable Network Topology and Validate Network Topology operation's performance and correctness.
BUG-000158186	Improve the branch versioning workflow performance and correctness.
BUG-000158213	Running replica.LastSend and replica.LastReceive in the Python window causes ArcGIS Pro to crash.
BUG-000158228	Error when connecting to the OGC API server in ArcGIS Pro 3.1. The connection appears to only work after attempting a Web Feature Service (WFS) connection on the service URL first in an ArcGIS Pro session.
BUG-000158262	Creating a portal web connection returns the error message, "Unable to retrieve access token" when attempting to connect to ArcGIS Enterprise 11.1 with ArcGIS Data Interoperability.
BUG-000158268	In ArcGIS Pro, border lines are ignored in pictures when the Aspect Ratio parameter is disabled in the picture properties.
BUG-000158272	The Select By Attributes tool does not generate the correct SQL syntax for records with a single quotation mark, and returns the following error message: "ERROR 000358: Invalid expression. Failed to execute (SelectLayerByAttribute)".
BUG-000158281	The Apply Building Offsets tool is not rotating point symbols correctly if rotating clockwise is set on a marker.
BUG-000158282	The Generate Elevation Bands from Features tool result are missing low bands in some scenarios.

Issue	Description
BUG-000158317	Running the Add Trace Locations geoprocessing tool with the 'Load Selected Features' check box enabled fails with Error 999999 and ArcGIS Pro crashes shortly afterward.
BUG-000158352	The JSON To Features tool produces output along with "Error: 999999" when using a GeoJSON file in ArcGIS Pro.
BUG-000158380	In ArcGIS Drone2Map 2023.1.1, the camera 'Focal length' parameter is not read correctly when the Windows regional settings is set to German.
BUG-000158382	The 'select spatial reference' window in the New Reality Mapping Workspace wizard scrolls infinitely for certain coordinate systems in ArcGIS Reality for ArcGIS Pro.
BUG-000158396	A stand-alone Python script crashes when trying to execute <code>arcpyproduction.mapping.ExportToProductionPDF</code> .
BUG-000158399	DGN files with projection files (.prj) do not display in the correct location in ArcGIS Pro 3.1.
BUG-000158405	OGC API services from ArcGIS Enterprise 11.1 cannot be added to any client.
BUG-000158421	ArcGIS Pro stops responding when using the Reclassify tool with an input raster that is included in a group layer.
BUG-000158441	Prevent the ability to change or unassign the association role set for a feature's asset group and asset type after the initial run of the Enable Network Topology tool.
BUG-000158442	The curvature options are disabled for multiline annotations in ArcGIS Pro.
BUG-000158474	Feature service with utility network and stand-alone topology fails to reconcile, and the following error message is returned, "ERROR: code: 500, Error in handling operation reconcile, Internal server error".
BUG-000158491	Using ArcGIS Pro 3.x and ArcGIS Enterprise 10.9.1 creates Utility Network Version 6 in an enterprise geodatabase.
BUG-000158508	Target Designator must not be present in the Smoke Target symbology MIL-STD-2525C.
BUG-000158515	The DWG file fails to align correctly in ArcGIS Pro.
BUG-000158517	The Append Routes tool produces a log with incorrect column headers.
BUG-000158523	The Append Routes tool results in a logged error, "Partially matched centerlines found." when the centerline and route appear to have a complete match.
BUG-000158524	"Error 999999" is returned when running the Append Events tool in ArcMap.
BUG-000158539	Error 999999 is returned when running the Add Locations tool.

Issue	Description
BUG-000158544	The 'Generate links within tolerance' process of the Align Parcels tool takes a long time to complete.
BUG-000158561	The error message, "RuntimeError: Failed to evaluate Arcade expression." is erroneously returned when running the Calculate Geometry Attributes tool against a feature service that contains attribute rules with the 'Exclude from application evaluation' option unchecked.
BUG-000158571	The ArcGIS Online Map Viewer Print tool does not honor the updated symbology on an imagery layer in a map view.
BUG-000158616	The Target XY Resolution and Target Z Resolution parameters' unit option is updated to Unknown when running the Batch Thin LAS tool in ArcGIS Pro.
BUG-000158628	A downstream trace runs indefinitely in an infinite loop when specifying a target tier in some scenarios.
BUG-000158654	Editing a group template consisting of point and line features, with a point as the primary feature, and combined with a line template causes the wrong template to be drawn by the tool.
BUG-000158670	The linear blend mode on a group layer with contents above returns an error when opening the PDF in Adobe products.
BUG-000158672	A warning message appears when editing symbols and when converting the representation in group layers.
BUG-000158684	The error message for a constraint attribute rule is not returned when removing a relationship, if the rule is configured not to edit or update a specific feature or register.
BUG-000158703	Lists of Fields and Functions are not displayed as expected on the Label Class pane when Arcade is selected.
BUG-000158718	In ArcGIS Pro 3.1.x, assigning, hanging, or both, a command's shortcut in the Customize the Ribbon tab of the Options window does not work.
BUG-000158727	Function barriers lead to unexpected trace results when applied to junction objects with terminals and the Use Local Values option set to false.
BUG-000158738	Redshift is unable to work with the database connection established with a non-default port.
BUG-000158741	The Calculate Route Concurrency tool returns unexpected results when a dominance rule is set up with a text field filled with zeroes.
BUG-000158747	In the Join Field tool, the minimum and maximum merge rules do not give the correct output values in ArcGIS Pro 3.1.2.

Issue	Description
BUG-000158797	Registering a feature class with Azure SQL geodatabase using the Register With Geodatabase tool fails and returns the following error, "ERROR 999999: Something caused the tool to fail. DBMS does not support this function".
BUG-000158834	When using the World Geocoding Service, if an address information input is in the Belarusian language, the field information for City is not produced for the country of Belarus.
BUG-000158845	Unable to get the correct statistics for the output raster of the Flow Accumulation geoprocessing tool in ArcGIS Pro 3.1.2.
BUG-000158846	When using the Clip tool with multipatch features (Input Features) and a polygon layer with multiple non-overlapping polygons (Clip Features) sourced from a file geodatabase, the "Error 160196: Invalid Topology." error message is returned. All involved feature classes have a spatial index and the same spatial reference. No geometry problems are reported when running the Check Geometry tool for each feature class.
BUG-00015885	The line layers participating in a parcel fabric display elevation units which do not match source units when added to a map.
BUG-000158890	The EllipticArcBuilderEx.CreateEllipticArcSegment method returns incorrect results when a non-zero rotation angle is used.
BUG-000158898	In ArcGIS Pro 3.1.2, saving an untitled project can result in creating endless recursion folders until it reaches the NTFS file system max limit.
BUG-000158909	Delete operation on the scene layer does not delete the associated database in the standby tile cache data store.
BUG-000158911	Unable to Retire Route error is returned for LRS in Location Referencing ribbon: "Unable to retire route" or "Retire Route Failed unexpectedly".
BUG-000158945	The omega, phi, and kappa values are not imported when using an MRK file as the GPS source.
BUG-000158956	Running the Create LRS Event From Existing Dataset tool in batch mode displays available fields for Route Name but returned the error message, "Error 130035: Invalid Field Name."
BUG-000158962	Improve the trace performance when returning results that contain a large number of associations.
BUG-000158963	Improve the performance of trace when returning aggregated geometry results.
BUG-000158967	A map frame grid or graticule for a map series, with a map rotation pulled from a field and map clipping enabled, draws out of sync with the map frame, if the map had a non-zero rotation before the map series was authored.
BUG-000159007	The attribute rule gives an incorrect count of features in a file geodatabase feature class.

Issue	Description
BUG-000159046	The URL for 'Migrate the Product Library and NIS to ArcGIS Pro scripts' directs to an item not shared publicly in the following documentation: https://pro.arcgis.com/en/pro-app/latest/help/production/maritime/download-and-install-product-files.htm .
BUG-000159048	The ArcGIS Data Store (Managed) appears twice in the Managed Registered Data Stores pane in ArcGIS Pro.
BUG-000159073	Map.ChangeVersion() fails to change the version of the second map when using a branch versioned feature layer in ArcGIS Pro SDK for .NET 2.9.x and 3.1.x.
BUG-000159074	The Append Routes tool fails with error, "Not implemented." when appending routes from a different file geodatabase.
BUG-000159091	Invalid syntax for the 'Copy Python Command' when using the Kriging tool.
BUG-000159094	Annotation features cannot be browsed in the Feature Outline Masks or Intersecting Layers Masks tools.
BUG-000159095	Dynamic text populated from 'Project Metadata' cannot be displayed when exported to PDF.
BUG-000159111	The Share As Web Layer tool returns the following warning message, "24043 Related layers or tables are not present in the map," when the related layers are in the map.
BUG-000159117	The Export Subnetwork tool does not include domain descriptions in the JavaScript object notation (JSON) for text or string fields included in the Result Fields.
BUG-000159127	Changing the alias of a utility network feature class field with subtypes causes sequential numbering edits of features in the field to fail with the "Edit operation failed. Field not found." error message returned.
BUG-000159165	ArcGIS Pro crashes when adding interior ticks to a grid and saving the grid to a style.
BUG-000159167	The scheduled execution of the Select Layer By Attribute tool does not function as expected in the ModelBuilder.
BUG-000159179	Label expressions are cut off due to the string limit.
BUG-000159219	The S-58 Error Manager tool validation incorrectly flags errors for the AidsToNavigationP.SIGSEQ attribute.
BUG-000159256	The Find operation on a map service returns an error for the image layer in a mosaic dataset when the map service is published from ArcGIS Pro.
BUG-000159272	The Traverse tool fails to create a line and returns no error when the spatial index grid size is invalid.

Issue	Description
BUG-000159285	The Feature Outline Masks (Cartography) tool does not create output features when the 'All attributes' option is selected for the Transfer Attributes parameter.
BUG-000159286	Contingent values do not display in ArcGIS Field Maps when published from ArcGIS Pro after using the Import Contingent Values tool.
BUG-000159316	ArcGIS Drone2Map 2023.1.1 fails during processing and returns the "ERROR 999999: Something unexpected caused the tool to fail. Contact Esri Technical Support (http://esriurl.com/support) to Report a Bug, and refer to the error help for potential solutions or workarounds." error message if all available central processing unit (CPU) threads are used during processing.
BUG-000159354	The Add Join tool fails and returns the error message, "Error 999999" when joining a CSV file to a feature class or shapefile if the Index Joined Fields check box is checked.
BUG-000159371	A custom print service with the 'Only show features visible in the map extent' property checked in the legend filters feature services, but does not filter image services.
BUG-000159381	In ArcPy, the updateDocsSecurity module specifies an unexpected value for the new_user_password property.
BUG-000159388	Allow the ability to set minimum size values that are lower than 1 pt for proportional symbols in ArcGIS Pro 3.1.
BUG-000159403	The line caps are visible at closing points when a polygon has the Suppress effect.
BUG-000159411	The Create Hosted Imagery Layer wizard in ArcGIS Pro fails to upload data when publishing tiled or dynamic imagery layers.
BUG-000159444	The ArcGIS Drone2Map processing engine generates blurry results in grassy areas and artifacts on the road lines and pavement.
BUG-000159445	The simplification in the Offset effect can result in oversimplification with reference scales, resulting in unsmooth or broken results.
BUG-000159451	When setting up a mosaic dataset, the creation of a 2D and 3D product fails.
BUG-000159474	The active record is de-activated when using a task to update the record name in ArcGIS Enterprise.
BUG-000159492	The Identify Narrow Polygons (Topographic Production) tool crashes in ArcGIS Pro.
BUG-000159493	When querying utility network hosted feature layers and tables containing millions of features, HTTPS requests are extremely slow

Issue	Description
	when using the Select By Attributes tool on the features and tables while conducting a full table scan.
BUG-000159525	Checking the 'May place label at secondary offset' option for a label placement strategy and converting labels to annotation results in the Feature ID equaling '0' for features placed at the secondary offset.
BUG-000159527	The Generate Floor Transitions tool fails to complete with the warning "180299: Failed to create floor transitions".
BUG-000159530	In ArcGIS Pro, tables within a feature service do not appear on the Resources tab of the Task Designer pane.
BUG-000159569	Opening a web scene saved from Scene Viewer in ArcGIS Online opens with the error message "web map.External component has thrown an exception." in ArcGIS Pro on Windows 11 (for non-English operation systems).
BUG-000159572	In ArcGIS Pro, the masked layer is not displayed when the layout or map is exported to PDF format.
BUG-000159579	In ArcGIS Pro, the Utility Network connected traces do not honor User Defined Barriers when Filter Function Barriers are configured.
BUG-000159595	Proportional circles exhibit size inconsistency when exporting the layout to an image or PDF.
BUG-000159611	The scheduled execution of the XY Table To Point tool does not work as expected for the output when using a file geodatabase in the model builder.
BUG-000159620	Publishing a map service from a raster dataset stored in an Amazon S3 bucket prompts the warning data to be copied to the server although the Amazon S3 bucket is registered with ArcGIS Server.
BUG-000159632	A TIFF layer with Classify symbology is not displayed when exported to PDF or other file types.
BUG-000159684	On the Location Referencing tab, the event tools are disabled after adding a linear referencing system (LRS) feature service to the map.
BUG-000159685	The Identify Routes tool does not display route or measure information when moving the mouse pointer over the route if the LRS is being pulled from a branch versioned enterprise geodatabase connection.
BUG-000159686	When the Aggregate Polygons geoprocessing tool is executed in ArcGIS Pro using the WKID 3006 projection, the specific distribution of polygons generates erroneous output.
BUG-000159694	The Reassign Route tool unexpectedly fails and returns the following error message, "The input measures will result in a non-monotonic route".

Issue	Description
BUG-000159706	Update the input information of the Band Arithmetic Raster Function Tool: Method MTVI2
BUG-000159720	The adjust image altitudes function in ArcGIS Drone2Map incorrectly modified the values.
BUG-000159742	Parts of symbols are missing from an imported symbology of an annotation feature class when changing the symbol ID in ArcGIS Pro.
BUG-000159762	ArcGIS Pro stops responding when running a script tool with a selection layer.
BUG-000159766	ArcGIS Pro fails to maintain the clip to boundary selection applied in the Map Properties dialog box while exporting the map series using a Python script.
BUG-000159775	The Align Parcels tool's preview (blue dotted line) disappears when panning through a map in ArcGIS Pro.
BUG-000159785	Updating the appearance of labels in custom grids is not preserved after zooming or saving a project.
BUG-000159792	Changing the text symbol for a graphic layer's straight text moves the text to a different location on the map.
BUG-000159853	Staging a Web Feature Service (WFS) using Python fails and returns the following error message, "[00297: <value> layers must be shared with everyone]".
BUG-000159870	ArcGIS Pro 3.1.x crashes when adding certain DGN files to the map.
BUG-000159909	Parcel locator roles return a score of 100 for a flawed input address.
BUG-000159921	With a feature class without a coordinate system, ArcGIS Pro crashes when clicking Ready to Use Rules (Attribute Rules).
BUG-000159935	The text symbol font styles do not produce expected results.
BUG-000159953	Spatial Index is missing on an empty feature class.
BUG-000159960	ArcGIS Pro stops responding when clicking the Retire button from the Location Referencing tab.
BUG-000159974	Upon geocoding some addresses in Bronx, NY, the results do not return the expected Zip4 value.
BUG-000160030	ArcGIS Workflow Manager does not respond while failing to open ArcGIS Pro project items to review data when an older ArcGIS Pro template is specified instead of an ArcGIS Pro map package.
BUG-000160068	The batch calculation evaluation does not reset Validation Status to validationRequired.
BUG-000160096	The output of the Detect Objects Using Deep Learning tool is abnormal when a mask is added in ArcGIS Pro.

Issue	Description
BUG-000160101	The Calculate Geometry tool fails after changing the coordinate system in the environment settings of ArcGIS Pro.
BUG-000160164	When the Create Seeds command is clicked twice, it returns with the error, "Lines in the map extent do not form valid closed loop".
BUG-000160181	Images with filenames longer than 64 characters are dropped from ArcGIS Drone2Map 2023.1.1 projects despite appearing with a checkmark in the list of images to include in the New Project window.
BUG-000160190	In the 'Add data store' pane in ArcGIS Pro, there is no scrollbar for the ArcGIS Server connections which leads to servers getting disconnected.
BUG-000160225	ArcGIS Pro crashes while using the Create Map Tile Package tool if the output package type is a .tpk file and uses a custom tiling scheme.
BUG-000160234	Fix manage page UX when a new feature class is added to a versioned feature dataset.
BUG-000160238	The 'Build Frames and Cameras Tables' tool does not recognize the first row of the CSV and text (.txt) files in ArcGIS Pro 3.1.2.
BUG-000160258	Timeout failures in ModelBuilder for some larger datasets when using the Delete Rows geoprocessing tool that has an ArcGIS Online hosted feature service as the input.
BUG-000160298	A fixed extent constraint for a layer in a map frame layout is not respected when a custom projection is used in the map.
BUG-000160340	Using keywords STORE_EXTENT and DO_NOT_STORE_EXTENT as the set parameters in the Recalculate Feature Class Extent (Data Management) tool returns the error message: "ERROR 000622: Failed to execute (Recalculate Feature Class Extent). Parameters are not valid. ERROR 000628: Cannot set input into parameter store_extent." in ArcGIS Pro.
BUG-000160351	ArcGIS Pro crashes when using the Upgrade Dataset tool with the Japanese language pack.
BUG-000160358	The database connection is not retained after creating project templates.
BUG-000160364	The Elevation Guide Bar is not dynamic in the GPL or Generate Product output.
BUG-000160371	The leader line should attach to the background symbol edge instead of the text outline.
BUG-000160398	Z-values in non-metric units are converted to metric units when a Starting M value is specified for vertex m-values.

Issue	Description
BUG-000160414	Unable to sync offline edits with referenced feature service from the SAP HANA published by a member with edit privileges and is not an owner of the data.
BUG-000160418	The Aviation Update tool creates incorrect geometry for certain AirBoundaryArea polygons.
BUG-000160448	The Locate pane for a locator returns unrelated results when searching for '100 Main St'.
BUG-000160453	Using the Rebuild Indexes tool with the Rebuild Delta Tables Only option unchecked on a mosaic dataset within Oracle 19c crashes in ArcGIS Pro.
BUG-000160459	Editing attributes reverts the text back to regular or bold when using any of the Narrow options with annotations.
BUG-000160464	Null values set on the ArcGIS Pro feature template do not save with the default values.
BUG-000160472	The Generate Routes tool in ArcGIS Pro is stuck at 15 percent progress and fails to complete the execution.
BUG-000160481	When entering data for Label Text in the Scale Bar properties, the cursor repeatedly moves to the left.
BUG-000160497	The Modify LRS tool erroneously returns Error 130066 when a new name is specified under the New LRS Name parameter.
BUG-000160504	Fail to geocode an address using the Create Composite Address Locator tool created with the Japanese language pack in ArcGIS Pro.
BUG-000160516	The Unified Facilities Criteria (Aviation) tool creates gaps and overlaps in surfaces.
BUG-000160564	The Build Parcel Fabric tool returns Error 999999 and Error 000952.
BUG-000160566	When exporting to PDF with the Simulate Overprint option checked, the map frame border is visible in the exported PDF.
BUG-000160585	The tiling option in the Print Layout pane is disabled when the map frame in the layout is activated in ArcGIS Pro.
BUG-000160607	Indices with Classify symbology cannot have their color ramp or the number of classes changed by default.
BUG-000160628	When using the DEMs wizard with a large satellite imagery dataset (over 90 square kilometers), the following error message, "ERROR 003048: Input folder does not contain LAS files" is returned.
BUG-000160634	Incorrect regional date formatting in the processing report.
BUG-000160635	When calculating the Average Panel Reflectance value, the Radiometric Calibration dialog box displays a "Failed to compute panel reflectance factor error" error message.

Issue	Description
BUG-000160636	The dense point cloud generation fails to generate on certain 3D projects.
BUG-000160637	Deleting the measurement data does not clear the Mensuration Results pane.
BUG-000160638	A crosshatch map is not generated with the German language pack (LP) and regional settings.
BUG-000160639	Contour and measurement data are not deleted when deleting project data.
BUG-000160640	Hosted scene layers display at incorrect elevations.
BUG-000160641	The image rotation is not consistent for all regional languages.
BUG-000160642	Batch processing starts when a project has broken image links.
BUG-000160643	The JPEG file format is flagged as an unsupported image type.
BUG-000160644	Processing is allowed without all required camera parameter values.
BUG-000160645	Dewarp metadata from drones are not being verified.
BUG-000160646	Add the ability to block updates in ArcGIS Drone2Map.
BUG-000160649	After clicking the Recalculate From Measure button in the Realign Route tool, the To Measure value in the Realigned Route section is calculated instead of the From Measure value.
BUG-000160650	In ArcGIS Pro, when using the Realign Route tool, the From Measure value in the Realigned Route section does not get backcalculated after typing a preferred To Measure value and clicking the Recalculate From Measure button.
BUG-000160668	Aggregate geometry trace results with function barriers on user-provided network attributes in a trace network are returning the entire line.
BUG-000160675	In ArcGIS Pro, attempting to add a User Datagram Protocol (UDP) stream returns the error message, "The player encountered an error during initialization and needs to close."
BUG-000160722	ArcGIS Pro geocodes address even if the user does not have enough credits to run the process based on the estimated credits.
BUG-000160758	The enhanced thermal camera support is to be metadata dependent.
BUG-000160793	The Upgrade ArcMap Parcel Fabric tool does not generate parcel records with true curves.
BUG-000160797	In ArcGIS Pro, the Data Interoperability extension Workbench does not load.
BUG-000160834	The Reverse Routes tool introduces non-zero and negative non-zero values instead of clean zero values.

Issue	Description
BUG-000160866	When using the Duplicate Parcels command to duplicate parcel features for a different parcel type, the duplicated lines have more records.
BUG-000160868	The Image Centers symbology is reverted back to the default values after saving and reopening a project created from Mavic 2 Pro images.
BUG-000160923	The SearchForSuggestion API returns an error that the input exceeds 200 characters for some input less than 200 characters.
BUG-000161000	Incorrect line numbers are reported for invalid Arcade expressions.
BUG-000161015	ArcPy geometry getArea and getLength with PRESERVE_SHAPE method, returns incorrect results due to projecting the geometry to WGS84.
BUG-000161022	The points and lines graphics layer elements do not maintain position when the map is rotated.
BUG-000161077	Labels in a vector tile package do not honor the label placement settings configured in the original feature layers.
BUG-000161110	The DWG files are not located correctly in ArcGIS Pro.
BUG-000161112	Reduce the memory footprint of ArcSOC by not cloning class definition.
BUG-000161130	The Apply Parcel Least Squares Adjustment geoprocessing tool is slow on larger fabrics.
BUG-000161158	The Import 3D Files tool crashes ArcGIS Pro with a .dae input.
BUG-000161303	An error, "ERROR 000584" is returned after selecting Input Features for the Create Feature Locator tool in ArcGIS Pro set to Czech language.
BUG-000161415	In ArcGIS Pro, the Clip Raster geoprocessing tool resamples a raster even when the Maintain Clipping Extent option is unchecked.
BUG-000161427	2D ortho generated from ArcGIS Drone2Map is incorrect if using different rasters with the same names.
BUG-000161470	Predicting using a spatial statistics model file fails and returns the following error message, "UnboundLocalError: local variable 'sharePredictValues' referenced before assignment".
BUG-000161570	The 'Reset' and 'Reset Selected Item' options in the 'Customize the Ribbon' dialog box do not work.
BUG-000161623	Using the Append tool to upsert data does not insert new rows when no match is found or the target is empty.
BUG-000161664	The Save Web Map option is disabled when working with a project accessed from a network drive in ArcGIS Pro 3.1.3.
BUG-000161682	An unknown error is returned when changing HistoricalVersion using DateTime in ArcGIS Pro SDK for .NET.

Issue	Description
BUG-000161710	In ArcGIS Pro, the Create Point Cloud Scene Layer Content geoprocessing tool fails when the Target Cloud Connection parameter is set to Azure GovCloud Blob Storage.
BUG-000161813	Honor directional devices when calculating flow direction in loops.
BUG-000161848	ArcGIS Pro loops endlessly when adding CAD feature layers located within a DWG file to a map or when using the data as input features to the Export Features (Conversion) geoprocessing tool.
BUG-000161851	In ArcGIS Pro, merging two polygons with a common edge using the Merge tool produces a multipart feature instead of a single feature if the common vertices have equal z-values.
BUG-000161932	The layer file's symbology property of the output parameter in a model tool is not carried over to ArcGIS Server.
ENH-000086470	Add the functionality to change the font of the attribute tables in ArcGIS Pro, similar to the functionality in ArcMap
ENH-000101569	Allow database connection files to be added directly into the ArcGIS Pro project folder
ENH-000102786	Customize the Symbol used to represent a custom model in the Analysis Gallery
ENH-000104905	Provide the functionality of sub-folders within the Favorites folder for projections in ArcGIS Pro.
ENH-000105494	ArcGIS Pro does not have option to only show classes from a heading group of symbology in Legend.
ENH-000106949	Need Project browse dialog to be recognise Windows shortcuts in ArcGIS Pro.
ENH-000107975	Do not display groups that do not have project templates in ArcGIS Pro
ENH-000107980	Allow for sorting options for groups when looking at the Portal connection while creating a new project in ArcGIS Pro
ENH-000108243	Make network build type configurable to enforce a full, initial-like build with a parameter in the build-tool is really required
ENH-000113131	When exporting pages in a map series, allow the same Export Options available for PDF export to be available when exporting to other formats, e.g. PNG, JPG, etc.
ENH-000113670	Markers produced by graduated or proportional symbols on polygons draw in the annotation phase, meaning that labels draw on top of them, but annotation does not.
ENH-000114362	Include the ability to change the color of guides to support those with color blindness.

Issue	Description
ENH-000115056	Integrate ArcGIS Pro with Haivision's SRT open source protocol for delivery of MPEG-2 Transport Stream.
ENH-000115441	Add an "Executing...<tool name>..." line as a default message with the arcpy.GetMessages() tool in ArcGIS Pro python
ENH-000115928	Add the ability to rename pipelines which will more easily update all related records across multiple time slices
ENH-000116559	Add the ability to directly access the Vertical_Shift and Direction parameters from the Vertical Coordinate System in the ArcGIS Pro SDK API.
ENH-000117923	Provide the ability to create, delete, set, update, rename, import/export, and select bookmarks using python in ArcMap and ArcGIS Pro.
ENH-000118063	Create a Print Preview button in ArcGIS Pro
ENH-000118234	Inform users that they may not be able to run ArcGIS Pro indexing when logged out of their Windows account if they do not have the required Windows user privileges.
ENH-000118878	Add an Envelope parameter to the MapView.Export and Layout.Export methods to allow the specification of a specific geographic area when performing an export in ArcGIS Pro SDK
ENH-000119292	In ArcGIS Pro in Layout View, allow Graphic and Text Format pane to retain previously opened Gallery tab after being closed.
ENH-000120941	Allow users to change model settings where the environment settings do not supersede the model settings.
ENH-000123823	Allow transferring of a route that belongs to an existing line to a new line through Re-assign Routes in ArcGIS Pipeline Referencing.
ENH-000124263	Provide the ability to add data from Windows Explorer through Drag and Drop method to a Modelbuilder in ArcGIS Pro.
ENH-000124612	Create an error message when analyzing data that is not registered before publishing when Copy Data to Server is disabled in ArcGIS Server Manager or ArcGIS Server Admin.
ENH-000124947	Add the option to change the highlight color for highlighting records and features when showing selected records
ENH-000126018	Rows in the details section of a report should grow or shrink according to the amount of text in a particular group.
ENH-000126341	Please provide a way to create/enable map series for a layout using only python
ENH-000127237	Requesting the ability to include EPSG code under Spatial Reference as dynamic text in layout for ArcGIS Pro

Issue	Description
ENH-000127947	The ArcGIS Pro documentation does not state that changes made to the alias of a field from the content pane will not propagate to the underlying Data source
ENH-000129497	Provide the option to choose to retain CAD text as annotations, before converting them to labels in ArcGIS Pro.
ENH-000129957	Provide the option to display graphical output in Multi-Distance Spatial Cluster Analysis Tool in ArcGIS Pro
ENH-000130289	Provide the ability to automate the process of creating bookmarks in ArcGIS Pro.
ENH-000131766	Request for the ability to open the attribute table of a map service sub layer in ArcGIS Pro
ENH-000132150	Provide a tool or add in that can be used to update the expression use in the calculate field.
ENH-000134680	Allow the ability to update the Service Definition of a Feature Service (hosted/non-hosted) in ArcGIS Pro.
ENH-000135380	Provide the ability to switch license levels in ArcGIS Pro 2.6.1 in a citrix environment as it prompts an error message "Licensing configuration is disabled when multiple ArcGIS Pro are running" while trying to switch between levels in a concurrent use environment
ENH-000136480	Add 'ArcMap's 'Export Map Styles' command into ArcGIS Pro to save .stylex of current symbology
ENH-000136843	Enhance the matrix heat chart type to include temporal binning options
ENH-000137016	Create a Pairwise Eliminate Tool, or Expose Eliminate to the Parallel Processing Factor
ENH-000137449	Using the 'KML to Layer' tool assign the feature dataset and feature class with the same name assigned to the file geodatabase
ENH-000137532	Provide the ability to index specific folders on network drives in ArcGIS Pro.
ENH-000137736	Request to add the functionality to show all values, even the ones not part of the domain code in Select by Attribute on a domain field in ArcGIS Pro
ENH-000140293	Allow the user the ability to delete the Status, Score, or Matchaddr fields in the Geocode Output Table
ENH-000140789	Error message produced by the "Create Database User" tool should be more descriptive - specifying the exact reason why it failed (e.g. because double quotation marks are needed on some Oracle passwords).

Issue	Description
ENH-000141358	Require ArcGIS Pro to Indicate When a Layer is Unable to Draw (Similar to ArcMap Error Messaging)
ENH-000141386	Improve folder selection in the Output Folder Window when selecting an Output Location for projects and geoprocessing tools in ArcGIS Pro
ENH-000141517	Support Reports and advanced TextElements with default and custom print services.
ENH-000141904	The traverse polygon does not focus on the vertex when clicking Flash.
ENH-000142266	Allow for the alteration of field names in the Make Feature Layer tool.
ENH-000142433	Add join support to mobile map packages
ENH-000143065	Allow feature dataset as supported output data types parameter in geoprocessing service
ENH-000143513	Implement the functionality of X-Ray in ArcGIS Pro
ENH-000144085	Provide an ability to manage the limit of indexing log size
ENH-000144806	Establish the recommended extent for an area of interest used for a Spectral Chart.
ENH-000144977	Please update the MKL Package being used in ArcGIS Pro to 2020.0.1 or later in a new release of Pro.
ENH-000146682	Allow users to manually save edits when editing non-versioned data in an enterprise geodatabase in Pro
ENH-000147174	Fine-grain access to properties and methods for manipulating TIN Datasets with ArcGIS Pro SDK
ENH-000147176	Provide tools to ingest flight logs/camera information from popular drone manufacturers to create the necessary metadata file for the Video Multiplexer tool in Image Analyst extension
ENH-000147830	Please improve Error 160277 to include messages identifying the troublesome row or attribute when running Evaluate Rules tool.
ENH-000149135	Modify auto-suggest behavior for Quebec province addresses to return french notation by default
ENH-000149397	Prevent the cursor from reverting to adding graphics/text elements in a Layout when the "Keep the last active tool" setting is turned on and Selection mode is chosen.
ENH-000149959	Update the monotonicity tool to fix errors in ArcGIS Pro
ENH-000150811	Create a toggle in the ArcGIS Pro Options to enable that the toolboxes in the Catalog Pane are displayed by the Label instead of the Name
ENH-000151003	Provide the ability for ArcGIS Enterprise Portal administrator to control how long can the users take the ArcGIS Pro named-user license offline.
ENH-000151009	ArcGIS Pro to have the similar Table Appearance option like ArcMap

Issue	Description
ENH-000151384	Request to open up the default folder that has been set when using the browse button inside the toolbox in ArcGIS Pro.
ENH-000151809	Tool to Compact a Mobile Geodatabase
ENH-000151998	Please add documentation to ArcGIS Pro Roads and Highways resources stating how true curves are handled by LRS tools.
ENH-000152024	When a Geographic Transformation is applied in a tool environment, the Transformation method applied needs to be saved in the tool History.
ENH-000152069	Implement the "Show live traffic only" option in ArcGIS Pro
ENH-000152635	Add "Save As SD" option to overwrite an existing service from ArcGIS Pro to ArcGIS Enterprise
ENH-000152717	Requesting the same functionality ArcObjects' ISurface.GetLineOfSight in Pro SDK for.NET.
ENH-000152845	Allow the Extract Multi Values to Points tool to retrieve the band names / aliases from the input raster, and populate those to the input point feature class
ENH-000152961	Remove unexcepted postal code ext in search places index for text.
ENH-000153937	Request the Hebrew layout with legend to be from right to left in ArcGIS Pro
ENH-000154095	Provide a refresh function for Vector Tile Layer.
ENH-000154113	Improve processing accuracy when using Control Point on Drone2Map 2022.1.2
ENH-000154511	Provide the ability to temporally select data visualized in ArcGIS Pro's temporal profile chart.
ENH-000154705	Save to Layer File (Data Management) tool documentation is outdated or missing information
ENH-000154806	Support for OGC Geopackage and MEMORY-Workspace as Output for the GP-Project Tool
ENH-000154938	Improve latency of the World Geocoding Service when geocoding Korean addresses.
ENH-000155062	Please allow the "Convert Time Field" to convert a Date field into another Date field type.
ENH-000155305	Improve documentation to instruct users to include administrative zones or a location parameter in their request when candidates are not returned in a findAddressCandidates request due to a low candidate match score.
ENH-000155516	Update the documentation of 'Upgrade Dataset' to mention that versioned annotation and dimension feature classes can be upgraded if we temporarily unregister them as versioned

Issue	Description
ENH-000155654	Give functionality of to list all databases connection of a ArcGIS pro project using python
ENH-000155804	Clarify documentation on "Visual differences in imported map documents" to state that small features may not display at small scales in ArcGIS Pro.
ENH-000156069	Provide a plan and estimated implementation date to have magic keys working for China/Korea without separately requiring the country code
ENH-000156085	Required adequate clarification on the tool tip for 1:1 zoom in the layout in ArcGIS Pro
ENH-000157191	The documentation for delete management tool must be improved
ENH-000157489	Please expand the "Use web feature layers" ArcGIS Pro documentation to include more information on pagination.
ENH-000157603	Elaborate the 'Database driven feature binning' section in Aggregate features into bins documentation: https://pro.arcgis.com/en/pro-app/latest/help/mapping/layer-properties/aggregate-features-into-bins.htm
ENH-000157897	Better explanation about when it is appropriate to use the "Within a distance" versus the "Within a distance geodesic" match option in the Spatial Join (Analysis) geoprocessing tool documentation
ENH-000158546	Add the ability to treat native VPF data as a supported data type in ArcGIS Pro
ENH-000158817	Provide the ability to programmatically set the Preferred City Name and Preferred Street Name options using ArcPy when creating a Locator in ArcGIS Pro.
ENH-000158836	Provide unique extended codes when magicKeys no longer correspond to the current release.
ENH-000159209	Experience Builder's Print Widgets don't recognize the dynamic text box added to custom layouts when adding any other text inside the text box.
ENH-000159332	Request to add subaddress support for Belgium in the Create Locator tool.
ENH-000159920	Allow the capability to not show the "Search currently in progress. Cancel current search?" prompt when doing geocoding with LocatorManager.GeocodeAsync.
ENH-000160007	Provide a list of extended error codes in the Geocoding API reference.
ENH-000160071	Allow valid token to be passed via geoprocessing tool called by Python when ArcGIS Pro is signed out.

Issue	Description
ENH-000160337	Provide an ability to support multiple multi-factor authentication (MFA) of the Autodesk BIM cloud connection in ArcGIS Pro.
ENH-000160339	Requesting more consistency in direction numbering, and dependable exit information for default "Desktop"-style Directions pertaining to roundabouts.
ENH-000160725	Improve the documentation of reverse geocoding output fields to indicate supported and unsupported output fields.
ENH-000160755	Create documentation about dealing with schema changes with parcel fabric that is published as a feature service.
ENH-000161760	Within the Match Options for a locator, we would like to add the option in the Categories to Support for blocks to be a selectable parameter.
ENH-000162057	Allow the use of the ISO 8601 date format in a map service.
ENH-000162059	Map services to support 64-bit ObjectIDs and Big Integer field types.
ENH-000162132	Unable to publish catalog layers as ArcGIS Enterprise map services and by reference, feature services.
NIM098715	The Inverse Distance Weighted (IDW) tool causes ArcMap to freeze or crash with specific data when the processing extent is modified to a dataset in port 299946.
