Esri inspires and enables people to positively impact their future through a deeper, geographic understanding of the changing world around them. Governments, industry leaders, academics, and nongovernmental organizations trust us to connect them with the analytic knowledge they need to make the critical decisions that shape the planet. For more than 45 years, Esri has cultivated collaborative relationships with partners that share our commitment to solving earth’s most pressing challenges with geographic expertise and rational resolve.

Today, we believe that geography is at the heart of a more resilient and sustainable future. Creating responsible products and solutions drives our passion for improving quality of life everywhere.

WHAT IS TAPESTRY SEGMENTATION?
Tapestry Segmentation represents the fourth generation of market segmentation systems that began 35 years ago. The 68-segment Tapestry Segmentation system classifies US neighborhoods based on their socioeconomic and demographic compositions. The power of Tapestry Segmentation allows you to profile consumers in a number of ways including:

• Standard geographic areas including counties, census tracts, block groups, or ZIP codes
• User-defined areas such as rings or polygons based on distance, drive time, or users’ own territories (sales districts, planning areas)
• Customer addresses or site locations

The versatility of Tapestry Segmentation provides several methods of combining the 68 segments into summary groups for a broader view of US consumer markets:

• LifeMode: 14 summary groups based on lifestyle and lifestage
• Urbanization: 6 summary groups based on geographic and physical features

The tapestry model includes a comprehensive, multi-layered database of US neighborhoods that integrates data from multiple sources including the US Census, schools, hospitals, restaurants, retail locations, and more.

The Tapestry Segmentation database is updated semi-annually to reflect the latest demographic changes. Each neighborhood in the country is scored against its Tapestry characteristics and assigned to one of the 68 segments based on the closest match. The Tapestry Segmentation database is a powerful tool for understanding consumer behavior and market potential at the neighborhood level.

INCOME RANGE OF THE LIFEMODE SUMMARY GROUPS

- Affluent Estates
- Upscale Avenues
- Uptown Individuals
