Small Government Departmental Platform Program

**Achieve Your Vision**

Building a department that is more efficient and productive has never been easier. Geographic information system (GIS) technology has a proven track record in helping governments achieve their goals, and many governments have relied on these tools for more than 30 years. By giving your organization the ability to visualize and analyze your data, you will enable your work force to more efficiently deliver services and boost productivity.

To help governments with limited budgets implement and adopt additional GIS capabilities, we’ve created the Small Government Departmental Platform program. This program is designed to give you the technology you need at a price you can afford.

**Eligibility**

The program is designed for discipline-specific government departments with plans to integrate GIS in multiple workflows. The Small Government Departmental Platform program is ideal for departments such as

- Economic Development
- Community Development
- Redevelopment
- Work Force Development
- Planning
- Housing
- Downtown Improvement Districts

**What You Get**

Get unlimited deployments of core ArcGIS® software within one government department with the new Small Government Departmental Platform program. In addition to the software, the agreement includes professional development courses and training.

This program gives departments everything they need:

**Core ArcGIS Software**

- ArcGIS for Desktop Advanced, Standard, and Basic
- ArcGIS for Server Enterprise and Workgroup Advanced, Standard, and Basic
- ArcGIS Engine
- ArcGIS Runtime
- ArcGIS extensions for Server, Engine, and Runtime
- Esri® Developer Network (EDN™)—One annual subscription
- Esri CityEngine® Advanced—One single use license and one concurrent use license
- ArcGIS™ Online

**Additional Training and Support**

- Virtual Campus
- Instructor-led training
- Esri User Conference passes (number of passes varies by population)
Pricing
The Small Government Departmental Platform program is open to all governments in the United States with populations of 100,000 or fewer. Municipal and county annual fixed pricing is based on the population a government serves.

- Tier One: Populations under 25,000
- Tier Two: Populations between 25,001 and 50,000
- Tier Three: Populations between 50,001 and 100,000

Even More Help
Build a Smarter Community
Take advantage of hundreds of free maps and applications that have been created specifically for the work that you do. With the Small Government Departmental Platform program, you can quickly deploy focused maps and applications using templates from ArcGIS for Local Government. Learn more about these resources at esri.com/smartcommunities.

The Park and Recreation Finder application helps citizens locate a park or recreation facility and obtain information about recreation activities in their community.

The Site Selector application can be used to analyze demographics, property costs, and more, to determine where to build.

The Land Use Public Comment application allows the general public and other interested parties to comment on proposed land-use cases being heard in their local government.

Live, Work, Locate is an application that enables people to explore amenities and services within a certain drive time.

IS or IT departments or governments that serve more than 100,000 have enterprise license agreements created specifically for their needs. Contact Esri Customer Service for more information.
