Small Government Departmental Platform Program

Achieve Your Vision

Making your department more efficient and productive has never been easier. Geographic information systems (GIS) technology from Esri has a proven track record in giving public works divisions the ability to visualize and analyze data, which transforms decision making across city and county governments of all sizes to make prudent use of all the information they handle. Do you need help justifying budgets, prioritizing projects, getting the most from your infrastructure, and being transparent with your citizens?

To help governments with limited budgets implement and adopt additional GIS capabilities, we’ve created the Small Government Departmental Platform program. This program is designed to give you the technology you need at a price you can afford.

Eligibility

The program is designed for discipline-specific government divisions and departments with plans to integrate GIS in multiple workflows. The Departmental Platform program for public works is ideal for departments such as the following:

- Streets
- Water/Wastewater
- Solid Waste
- Parks and Grounds
- Fleet

What You Get

Get unlimited deployments of core ArcGIS® software within one government department with the new Small Government Departmental Platform program. In addition to the software, the agreement includes professional development courses and training.

This program gives departments everything they need:

Core ArcGIS Software

- ArcGIS for Desktop Advanced, Standard, and Basic
- ArcGIS for Server Enterprise and Workgroup Advanced, Standard, and Basic
- ArcGIS Engine
- ArcGIS Runtime
- ArcGIS for Server extensions, Engine, and Runtime
- Esri® Developer Network (EDN®)—One annual subscription
- Esri CityEngine® Advanced—One single use license and one concurrent use license
- ArcGIS® Online

Additional Training Support

- Esri Virtual Campus
- Instructor-led training
- Esri User Conference passes (number of passes varies by population)
Pricing

The Small Government Departmental Platform program is open to all governments in the United States with populations of 100,000 or fewer. Municipal and county annual fixed pricing is based on the population a government serves.

- Tier One: Populations under 25,000
- Tier Two: Populations between 25,001 and 50,000
- Tier Three: Populations between 50,001 and 100,000

Even More Help

Building a Smarter, Healthier Community

Take advantage of hundreds of free maps and applications that have been created specifically for the work that you do. With the Small Government Departmental platform Program, you can quickly deploy focused maps and applications using the templates included in ArcGIS for public works without any programming. Learn more about these apps at esri.com/smartcommunities.

The Road Network Management map can be used by mapping technicians to inventory intersections, roads, and physical road characteristics that can be maintained with ArcGIS for Desktop. To learn more, visit esri.com/pwsolutions.

Road Closures is a configuration of ArcGIS Online that can be used by engineers and operations staff to track road blocks or closures and share this information with the public.

Sign Inventory is a configuration of ArcGIS Online and the Collector for ArcGIS application that can be used by public works operations staff to inventory traffic signs within your right-of-way.

GIS/IT departments or governments that serve more than 100,000 have enterprise license agreements created specifically for their needs. Contact Esri Customer Service for more information.
