# Table of Contents

Esri resources for your organization

## Course introduction

- Course introduction
- Course goals
- Installing the course data
- Icons used in this workbook

## 1 Applying GIS in public safety

- Lesson introduction
- How do you currently solve public safety problems?
- The geographic approach
- Similarities in the geographic approach to other problem-solving models
- The ArcGIS patterns of use
- The Incident Command System (ICS)
- ArcGIS patterns of use in the ICS
- Applying patterns and problem-solving to problems
- What is the Crime Analysis Solution?
- Lesson review
- Answers to Lesson 1 questions

## 2 Getting to know your data

- Lesson introduction
- GIS data storage formats
- Using public safety data
- Exploring data properties
- Exercise 2: Organize GIS data
  - Prepare an ArcGIS Pro project
  - View data in the Catalog pane
  - Create a file geodatabase
  - Move data to a new location
  - Add a date attribute to a dataset
- Lesson review
- Answers to Lesson 2 questions

## 3 Adding tabular data to a map

- Lesson introduction
- How is data represented on a map?
- What is a coordinate system?

The importance of coordinate systems  
Exercise 3A: Define a coordinate system  
    Examine the coordinate system of a map  
    Examine the coordinate systems of layers in a map  
    Define a coordinate system  
Getting data on a map  
Exercise 3B: Add data to a map  
    Geocode addresses  
    Add x,y data to the map  
Lesson review  
Answers to Lesson 3 questions

## 4 Asking questions of your data

Lesson introduction  
Query types  
Querying data  
Exercise 4A: Use attribute queries  
    Prepare an ArcGIS Pro project  
    Use the Select By Attributes tool  
    Use the Select Layer By Date and Time tool  
    Summarize query results  
    Use a definition query  
    Create a selection layer  
Checkpoint  
Exercise 4B: Use spatial queries  
    Use the Select By Location tool  
    Select data manually  
Lesson review  
Answers to Lesson 4 questions

## 5 Creating and modifying data

Lesson introduction  
Why create or modify public safety data?  
Creating features in ArcGIS Pro  
Exercise 5A: Create public safety data  
    Create a feature class  
    Digitize a feature  
    Add attributes  
Modifying features in ArcGIS Pro  
Exploring tools to modify features  
Exercise 5B: Modify public safety data  
    Reshape features

Modify attributes

Lesson review

Answers to Lesson 5 questions

## 6 Getting to know geoprocessing

Lesson introduction

What is geoprocessing?

Locating geoprocessing tools in ArcGIS Pro

Geoprocessing in public safety

Exercise 6: Use geoprocessing tools

Prepare an ArcGIS Pro project

Create counts within districts

Calculate percent change for each district

Buffer the college campuses

Create counts within buffer area

Lesson review

Answers to Lesson 6 questions

## 7 Using symbology

Lesson introduction

What is visualization?

Symbology types

Classifying quantitative symbology

Exercise 7: Work with symbology

Symbolize polygons using unique values

Symbolize data using graduated colors

Symbolize points using unique values

Apply symbology from another layer

Symbolize points using graduated symbols

Symbolize features by density

Lesson review

Answers to Lesson 7 questions

## 8 Optimizing your map with scale and text

Lesson introduction

Using scale to optimize your map

Exercise 8A: Set scale ranges to control visibility

Change the scale of a map

Set the visible scale range of a layer

Adding text to a map

Choosing labels or annotation

Exercise 8B: Use labels and annotation

- Label the features

- Set scale dependencies on labels

- Create a label expression

- Convert labels to annotation

Lesson review

Answers to Lesson 8 questions

## 9 Visualizing and analyzing in 3D

Lesson introduction

Visualizing data in 3D

Global vs. local scenes

Elevation types

The value of 3D in public safety

Exercise 9: Visualize data in a 3D scene

- Convert the map to a scene

- Add an elevation source

- Extrude the Buildings layer

- Add a multipatch feature class to the scene

- Perform line of sight analysis

- Link the 2D map and the 3D scene

Lesson review

Answers to Lesson 9 questions

## 10 Disseminating content

Lesson introduction

Sharing public safety content using ArcGIS Pro

Exercise 10A: Create a layout to share a map in ArcGIS Pro

- Open a project package

- Insert a layout

- Add a map frame to a layout

- Add a title to the layout

- Add supporting map elements

- Add another map to the layout

- Export the layout to a PDF

What is a portal?

Disseminating public safety content

Exercise 10B: Use ArcGIS to share content

- Share a web map

- Locate a shared map in ArcGIS Online

- Configure a web map

- Create a web app

Configure a web app  
Lesson review  
Answers to Lesson 10 questions

## Appendices

Appendix A: Esri data license agreement  
Appendix B: Answers to lesson review questions  
Appendix C: Additional resources
