# Table of Contents

Esri resources for your organization

## Course introduction

- Course introduction
- Course goals
- Installing the course data
- Training Services account credentials
- Icons used in this workbook
- Understanding the ArcGIS platform

## 1 Getting started with ArcGIS Pro

- Lesson introduction
- ArcGIS Pro features
- Licensing ArcGIS Pro
- Template options for starting ArcGIS Pro
- Project structure
- ArcGIS Pro interface
- Exercise 1: Use map navigation and data exploration tools
  - Create a project
  - Add a folder connection
  - Add layers to the map
  - Use ArcGIS Pro Help to find tools
  - Use the Explore tool to navigate the map
  - View feature attributes
  - Select features interactively
  - Change the basemap
- Lesson review
- Answers to Lesson 1 questions

## 2 Working with GIS data

- Lesson introduction
- Data storage models
- Spatial data properties
- Locating key data properties
- Exercise 2A: Connect to data sources in ArcGIS Pro
  - Add shapefiles to a map
  - Add geodatabase feature classes to a map
  - Add data from ArcGIS Online
- Getting data into a geodatabase

Exercise 2B: Populate a geodatabase with data  
Use ArcGIS Pro without a template  
Create a file geodatabase  
Transfer data between geodatabases  
Import a shapefile into a geodatabase feature class  
Import multiple feature classes into a geodatabase  
Convert tabular data  
Convert online data  
Lesson review  
Answers to Lesson 2 questions

### 3 Coordinate systems

Lesson introduction  
Types of coordinate systems  
Geographic transformations  
Importance of projected data  
Projecting data  
Exercise 3: Change coordinate systems  
Import a map file  
Inspect spatial reference properties  
Inspect on-the-fly projection and transformation settings  
Set datum transformation for a map  
Transform datum for source data  
Explore a shapefile coordinate system  
Project a shapefile  
Lesson review  
Answers to Lesson 3 questions

### 4 Symbolizing layers

Lesson introduction  
Attribute types and layer symbology  
Types of layer symbology  
Differentiating between layer symbology  
Classification methods  
Selecting a symbology option  
Exercise 4: Symbolize layers using different methods  
Use unique values  
Use graduated colors  
Use graduated symbols  
Symbolize features by density  
Lesson review

Answers to Lesson 4 questions

## 5 Controlling feature display

Lesson introduction

Types of selection queries

Selecting features using queries

Exercise 5A: Use queries to select features

- Import a map file

- Create an attribute query

- Add a second clause to an attribute query

- Create a selection layer

- Create a spatial query based on distance

- Create a spatial query based on a geometric intersection

- Create a new feature class from selected features

Definition queries

Displaying features at different scales

Symbol classes

Exercise 5B: Control the visibility of features

- Set scale ranges on layers

- Use scale-based symbol classes

- Create a definition query

- Modify a definition query

- Create multiple definition queries for a layer

Lesson review

Answers to Lesson 5 questions

## 6 Adding text to a map

Lesson introduction

Characteristics of map labels

Exercise 6A: Add and modify labels

- Add a layer to a new map

- Label features

- Change the label field

- Modify the label font

- Change the label position

Using label classes

Exercise 6B: Create label classes

- Explore attributes

- Create label classes for each airport type

- Define label class criteria for regional airports

- Define label class criteria for local airports

- Define label class criteria for international airports

- Set scale dependencies on label classes
- Geodatabase annotation
- Choosing standard or feature-linked annotation
- Exercise 6C: Create and modify geodatabase annotation
  - Import a map file
  - Convert labels to annotation
  - Modify annotation text
  - Modify annotation placement
  - Create annotation features
- Lesson review
- Answers to Lesson 6 questions

## 7 Visualizing data in 3D

- Lesson introduction
- 3D mapping capabilities
- Local and global scenes
- Exploring elevation sources
- Exercise 7A: Create a local scene
  - Open a map file
  - Convert a map to a scene
  - Add a ground source
- Displaying features in 3D
- Exercise 7B: Extrude features
  - Extrude block groups based on an attribute
  - Visualize subsurface data
  - View a 2D map and 3D view together
- Lesson review

## 8 Creating features from tabular data

- Lesson introduction
- Indirectly storing spatial data
- Evaluate tabular data
- Displaying x,y coordinates in a map
- Exercise 8A: Create point features from x,y coordinates
  - Import a global scene
  - Explore tabular data
  - Create point features from a table containing x,y coordinates
- Geocoding
- Properties of an address locator
- Exercise 8B: Geocode address locations
  - Add and explore address data
  - Add a locator to the project

- Inspect the properties of an address locator
- Geocode addresses from a table
- Assess geocoding results
- Improve geocoding results
- Find locations

Lesson review

Answers to Lesson 8 questions

## 9 Associating tabular data

Lesson introduction

Table relationships

Common table management items

Exercise 9A: Prepare tabular data

- Import a map and explore tabular data

- Export the CSV file into a geodatabase

- Add and calculate a field

Table cardinality

Joins and relates

Exploring joins and relates

Choosing joins or relates

Exercise 9B: Create table associations

- Join tables

- Use joined fields

- Export a joined layer

- Create a relate

- Use the relate to access associated records

Lesson review

Answers to Lesson 9 questions

## 10 Editing features and attributes

Lesson introduction

Why edit features?

ArcGIS Pro editing environment

Exercise 10A: Create features by digitizing

- Open a map

- Modify a feature template

- Digitize a polygon

- Update attributes

- Digitize line features

Feature modification tools

Exercise 10B: Modify existing features

- Modify vertices

- Reshape a feature
- Split a polygon
- Merge polygons
- Lesson review
- Answers to Lesson 10 questions

## 11 Spatial analysis

- Lesson introduction
- Spatial analysis workflow
- Types of analysis
- Geoprocessing tools
- Exploring the analysis environment
- Exercise 11A: Answer questions using analysis tools
  - Import a map of the study area
  - Set analysis environments
  - Enrich a dataset with demographic data
  - Buffer the lahar zones
  - Extract utilities features within 1,000 feet of the lahar zones
- Running tools in succession
- Exercise 11B: Determine the total parcel value affected
  - Apportion parcel attributes
  - Perform an intersect between two layers
  - Explore results of the intersect
  - Use a spatial join to add county names to parcels
  - Summarize data
- Lesson review
- Answers to Lesson 11 questions

## 12 Analysis using ModelBuilder

- Lesson introduction
- Automating your analysis
- Why use ModelBuilder?
- Exploring model elements
- Exercise 12: Automate an analysis workflow with ModelBuilder
  - Create a model
  - Add the Buffer tool to the model
  - Add the Make Feature Layer tool to the model
  - Add the Intersect tool to the model
  - Add the Spatial Join tool to the model
  - Add the Summarize tool to the model
  - Run the model and explore results
  - Prepare the model for sharing

Lesson review

## 13 Map layouts

Lesson introduction

What is a map layout?

Map objectives

Explore a map layout

Creating a map layout

Exercise 13: Create a map layout for lahar analysis results

- Open a map file

- Create a layout

- Add a map frame

- Add a north arrow

- Add a scale bar

- Add an inset map and supporting elements

- Add a title

- Add a legend

- Add a table frame

Lesson review

Answers to Lesson 13 questions

## 14 Sharing with ArcGIS Pro

Lesson introduction

Sharing methods

Sharing roles and permissions

Exercise 14: Share analysis results

- Share a map file

- Share a layer package

- Share a map package

- Share a web map

Lesson review

## Appendices

Appendix A: Esri data license agreement

Appendix B: Refined map example

Appendix C: Answers to lesson review questions

Appendix D: Additional resources
