Cartography with Esri Production Mapping
CONTENTS

1 Introduction
   Cartography with Esri Production Mapping
   Welcome to Esri Training
   Course goals
   Production Mapping
   Mapping and Charting Solutions for ArcGIS Desktop
   Author – Share - Use
   Course materials
   Exercise introduction

2 Cartographic Product Management
   Managing Production Documents
   Learning objectives
   Think about…
   ArcGIS Desktop cartographic production
   Challenges in cartographic production
   Cartography with Production Mapping
   Distributing templates
   Map document management
   Instructor-led demo
   Document management in the product library
   Manage documents
   Exercise introduction (40 minutes)
   Lesson review

3 Cartographic Data
   Cartographic Data
   Learning objectives
   Think about…
   What are grids and graticules
   Grids in ArcGIS
   Make Grids and Graticules layer
   Instructor-led demo
   Grid layers in a geodatabase
   Configuring the grid template file
   Visual design process
   Instructor-led demo
   Magnetic tools
   Elevation Banding
   Exercise introduction (45 minutes)
Lesson review

4 Visual Specifications
   Visual Specifications
   Learning objectives
   Think about…
   Instructor-led demo
   Cartographic representations benefits
   Benefits of using Visual Specifications
   Types of specification rules
   Structure
   Applying and dropping visual specifications
   Instructor-led demo
   Visual specifications
   Visual design process
   Exercise introduction (45 minutes)
   Lesson review

5 Symbology with Views
   Production Mapping Views
   Learning objectives
   Think about…
   Cartographic map production challenges
   Benefits of using Views
   Maintain standards using views
   Instructor-led demo
   Defining View Settings
   View Properties
   Instructor-led demo
   Exercise introduction (30 minutes)
   Lesson review

6 Cartographic Editing
   Cartographic Editing
   Learning objectives
   Think about…
   What is cartographic editing?
   Editing representations
   ArcGIS Desktop representation editing
   Production Mapping cartographic editing
   Production Mapping representation editing
   Workflows for editing cartographic data
   Layer Snapshot
Representations do not match specification
ArcGIS tools to focus cartographic review
Exercise introduction (45 minutes)
Lesson review

7 Page Layout
   Page Layout
   Learning objectives
   Think about…
   Managing surround elements
   Adding tables to a map
   Examples of Graphic Table Elements
   Instructor-led demo
   Standardizing layouts with product library
   Building templates
   “Dynamic” Layouts
   Layout rules
   Apply rules on check out
   Instructor-led demo
   Exercise introduction (40 minutes)
   Lesson review

8 Exporting, Archiving and Automating
   Exporting, Archiving and Automating
   Learning objectives
   Think about…
   Why can’t we just use a plotter?
   Overview of color separation
   Production PDF exporter
   Saving and sharing settings
   Export to Separated TIFF
   Exporting to Layout GeoTIFF
   Document management in the product library
   ArcPy
   ArcPyproduction.mapping
   Instructor-led demo
   Exercise introduction (30 minutes)
   Lesson review

9 Configuring the Product Library
   Product Library
   Learning objectives
   Think about…
What is the Product Library
Product Library Organization Options
Solution (Level 1)
Product Class (Level 2)
Series (Level 3)
Product (Level 4)
Template Instructions
Adding Products to a Series
Instance (Level 5)
Area of Interest (AOI) (Level 6)
Conflicts when checking in map document
Setting Product Library permissions
Central cartographic management
Exercise introduction (30 minutes)
Lesson review

10 Production Mapping Cartographic Concepts for the Technical Lead
Production Mapping Cartographic Concepts for the Technical Lead
Learning objectives
Think about…
Production Mapping Implementation
Existing Customer Implementation Feedback
Implementation sections
Needs Assessment
Template Design
Design: Map Sheet Settings
Design: Define Symbol Requirements
Design: Symbol Design
Design: Symbolize Sample Data
Design: Advance Symbol Options
Design: Create Static Layout Elements
Design: ‘Dynamic’ Layout
Design: Configure Product Library
Implement: Production Workflow (1st Edition)
Implement: Production Workflow (nth Edition)
Resources and Support
Exercise introduction
