Course Introduction	1
Lesson 1: Introduction to ArcGIS API for JavaScript.	2
Building a Simple Web App	3
Anatomy of a Simple Web App	4
Anatomy of a Simple Web App—JavaScript	5
Activity: Scavenger Hunt	6
Key Concepts—Introduction	7
Lesson 2: Load a map into a web app.	8
Workflow Key	9
Workflow Overview	10
Use a Working Example.	11
Use a Working Example: Load a Map into a Web App	12
Write the Code: Load a Map into a Web App	13
Code Activity: Load a Map into a Web App	15
Key Concepts—Load a Map	16
Lesson 3: Working with GIS layers.	17
Workflow Overview	18
Select an API Layer—Data Type	19
Select an API Layer—Purpose	20
Scenario Activity: Select an API Layer—Purpose	21
Use a Working Example: Add an API Layer to a Map	22
Write the Code: Add a TileLayer to a Map.	23
Code Activity: Add an API Layer to the Map	24
Key Concepts—Working with GIS Layers	25
Lesson 4A: Displaying maps with MapViews	26
Workflow Overview	27
MapView and Viewpoints	28
Use a Working Example: Center and Scale the Map	29
Write the Code: Center and Scale the Map	30
Code Activity: Work with the MapView	31
Key Concepts—MapView	32

Contents

Lesson 4B: Displaying maps with SceneViews	33
Workflow Overview	34
SceneViews and Viewpoints	35
Use a Working Example: Position the Camera.	36
Write the Code: Position the Camera.	37
Code Activity: Work with the SceneView	38
Key Concepts—SceneViews	39
Lesson 5: Implementing map widgets.	40
Workflow Overview	41
Select an API Widget—Purpose	42
Scenario Activity: Select an API Layer—Purpose	43
Use a Working Example: Implement a Widget	44
Write the Code: Implement a BaseMapToggle Widget.	45
Code Activity: Use a BaseMapToggle Widget	46
Code Activity: Use an SDK Widget	47
Key Concepts—Map Widgets	48
Lesson 6: Map visualization with renderers and symbols.	49
Workflow Overview	50
Select an API Renderer—Data Type	51
Symbols and Symbol Layers	52
Select an API Symbol—Purpose	53
Scenario Activity: Select an API Renderer and Symbol	54
Use a Working Example: Apply a Renderer	55
Write the Code: Apply a Renderer	56
Code Activity: Use a Renderer for Map Visualization	57
Key Concepts—Renderers and Symbols.	58
Lesson 7a: Performing searches in the map	59
Workflow Overview	60
Select a Search Source	61
Use a Working Example: Performing a Search	62
Write the Code: Implement a Search Widget	63
Code Activity: Use a Widget to Perform a Search	64
Key Concepts—Search	65

Contents

Lesson 7b: Performing queries in the map	66
Workflow Overview	67
Select a Query Type.	68
Use a Working Example: Performing a Query	69
Write the Code: Query Feature IDs	70
Code Activity: Perform Queries Using a FeatureLayer.	71
Key Concepts—Query	72
Lesson 8: Performing GIS analysis	73
Workflow Overview	74
Identify Geoprocessing Service	75
Use a Working Example: Perform Analysis (Task).	76
Write the Code: Perform Analysis (Task).	77
Code Activity: Use a Task to Perform Analysis	79
Key Concepts—Analysis	80
Lesson 9: Performing geometry operations	81
Workflow Overview	82
Geometry Operations	83
Use a Working Example: Buffer Features	84
Write the Code: Buffer Features	85
Code Activity: Perform Geometric Analysis.	87
Key Concepts—Geometry	88
Challenge: Apply a pop-up	89
Workflow Overview	90
Use a Working Example: Apply a Pop-up	91
Write the Code: Apply a Pop-up to a FeatureLayer	92
Code Activity: Apply a Pop-up to a FeatureLayer	93
Key Concepts—Apply a Pop-up	94
Appendix A	A-1
