Understanding the ArcGIS platform

1 Introduction to the ArcGIS Pro SDK

Lesson introduction
Customization strategies for ArcGIS Pro
Exploring ArcGIS Pro SDK documentation and help resources
.NET add-ins
Using a sample to build an add-in
Exercise 1: Build an add-in using a sample
   Download ArcGIS Pro Community samples
   Build and test an add-in
   Remove the add-in using the Add-In Manager
Lesson review
Answers to Lesson 1 questions

2 Working with DAML

Lesson introduction
How can the ArcGIS Pro ribbon be customized?
Using the ArcGIS Pro SDK and DAML to customize controls
Creating an add-in with custom and existing ArcGIS Pro controls
Exercise 2: Customize the ArcGIS Pro ribbon
   Create an ArcGIS Pro Module Add-in project
   Customize the ArcGIS Pro ribbon with a new tab
   Add core ArcGIS Pro commands to a tab
   Modify the core Map tab
   Remove the add-in
Exercise review
Lesson review
3 Implementing states and conditions

Lesson introduction
Implementing states and conditions
Using states and conditions to control visibility
Exercise 3: Change control visibility using states and conditions
  - Open an existing project
  - Define a custom state and condition
  - Add a button to toggle the state
  - Implement a Delegate command
Exercise review
Lesson review
Answers to Lesson 3 questions

4 Executing asynchronous and synchronous methods

Lesson introduction
ArcGIS Pro threading model
Coarse- and fine-grained methods
Creating asynchronous utility methods
Exercise 4: Use coarse- and fine-grained functions
  - Open an existing project
  - Select features using a coarse-grained function
  - Zoom to selected features using a coarse-grained function
  - Select features and zoom using a fine-grained function
Exercise review
Lesson review
Answers to Lesson 4 questions

5 Creating a dockpane with ArcGIS Pro commands

Lesson introduction
Creating a dockpane using an item template
ArcGIS Pro MVVM pattern
Hooking ArcGIS Pro commands
Exercise 5: Customize a dockpane
  - Open an existing project
  - Hook existing ArcGIS Pro commands
  - Populate the feature layer drop-down list
  - Synchronize the UI with data updated by a worker thread
  - Fill the data grid with selected records
  - Flash the feature for the current selected row on the data grid
Exercise review
Lesson review
Answers to Lesson 5 questions
6 Working with project items

Lesson introduction
Working with projects
Project items
Opening a map and adding a folder connection to the project
Exercise 6: Work with project items
  Add a folder connection to the project
  Add a new dockpane to the add-in
  Update the dockpane View and ViewModel
  Import the selected MXD file
Exercise review
Lesson review
Answers to Lesson 6 questions

7 Working with portal items

Lesson introduction
Working with a portal
Searching a portal for items
Using EsriHttpClient
Exercise 7: Add a layer from a portal to a map
  Search for portal items using EsriHttpClient
  Add item results to a dynamic list
  Create a layer from an item result and add it to the map
  Run the add-in
Exercise review
Lesson review
Answers to Lesson 7 questions

8 Interacting with the map view

Lesson introduction
Understanding the map view
Navigating the map view using the camera
Creating a map tool
Exercise 8: Create a map tool to interact with the map view
  Add a custom map tool using an item template
  Implement the custom map tool
  Display identify results in an overlay control
9 Working with layers and renderers

Lesson introduction
Applying a renderer to a layer
Providing symbols and defining a renderer for a layer
Displaying pop-ups for a layer
Exercise 9: Apply symbols using layer and renderer definitions
   Examine the symbol picker
   Get styles for the current project
   Display symbols that match search criteria
   Apply the symbol to the selected layers in the map
Exercise review
Lesson review
Answers to Lesson 9 questions

10 Working with geodatabase features

Lesson introduction
Accessing content in a geodatabase
Exercise 10A: Access a feature class in the geodatabase
   Add a feature class to a map
   Add a feature class to a map as a layer
Querying features
Adding attachments to features
Exercise 10B: Add image attachments to geodatabase features
   Retrieve features
   Add attachments to features
Exercise review
Lesson review
Answers to Lesson 10 questions

11 Editing features

Lesson introduction
Implementing editing tools
Creating edit operations
Adding edit tools to the ArcGIS Pro UI
Exercise 11: Create an edit tool
   Use the Map Tool item template to create an edit tool
Use edit operations
Use the GeometryEngine to rotate features
Add the edit tool to the Editor tools gallery and Modify Features dockpane

Exercise review
Lesson review
Answers to Lesson 11 questions

12 ArcGIS Pro configurations

Lesson introduction
Understanding configurations
Deploying and using configurations
Lesson review

Appendices

Appendix A: Esri data license agreement
Appendix B: Answers to lesson review questions
Appendix C: Additional resources
Appendix D: Lesson stories
