Table of Contents

Esri resources for your organization

Course introduction

- Course introduction
- Course goals
- Installing the course data
- Training Services account credentials
- Icons used in this workbook

1 Introduction to ArcGIS Insights

- Lesson introduction
- Insights for all analysts
- ArcGIS Insights overview
- Exploring data potential
- Approaches to scientific inquiry
- Data sources
- Exercise 1: Create a new workbook
 - Sign in to ArcGIS Online
 - Create a new workbook and add a feature layer
 - Add CSV files
 - Rename datasets
 - Explore attributes
- Deploying ArcGIS Insights
- Lesson review
- Answers to Lesson 1 questions

2 Adding and displaying data

- Lesson introduction
- Location field type
- Enabling location on a table
- Table relationships
- Creating a table relationship
- Styling data
- Exercise 2: Enable location and create relationships using tabular data
 - Create a map card
 - Enable location on a dataset
 - Create a table relationship
 - Style by category field
 - Style by numeric field

Make a heat map

Lesson review

Answers to Lesson 2 questions

3 Exploring and visualizing data

Lesson introduction

What is in your data?

Field types

Chart types

Using charts to answer questions about data

Exercise 3A: Explore storm events using various cards

- Add storm event data for the United States

- Create a summary table

- Explore climate regions using charts

- Summarize multiple fields

- Explore events by season and climate region

- Explore events using a time series

- Explore events using a data clock

- Explore events by type

Selecting features

Filtering data

Exercise 3B: Work with subsets and selections

- Add storm event data for the United States

- Create a dataset filter

- Use a card filter

- Use cross filters

- Make a selection on the map

- Make a selection on a card

Lesson review

Answers to Lesson 3 questions

4 Spatial analysis

Lesson introduction

Analysis capabilities

Analyzing customers and distributors

Exercise 4: Perform vulnerability analysis

- Duplicate the page and add data

- Use a spatial filter

- Spatially aggregate storms and counties

- GeoEnrich counties with a population density variable

- GeoEnrich counties with demographic variables

- Calculate z-scores

- Add and calculate a field
- Evaluate variable relationships using a scatter plot matrix
- Visually analyze storm events with vulnerability

Lesson review

Answers to Lesson 4 questions

5 Sharing your insights

Lesson introduction

What you can share

Sharing your work

Exercise 5: Share storm analysis results

- Share a dataset

- Share a page

- Share a model

- Use a shared model with different data

- Share a workbook

- Access shared content from the Insights home page

Deployment for your organization

Lesson review

Answers to Lesson 5 questions

Appendices

Appendix A: Esri data license agreement

Appendix B: Answers to lesson review questions

Appendix C: Additional resources
