Table of Contents

Esri resources for your organization

Course introduction

Course introduction
Course goals
Installing the course data
Training Services account credentials
Icons used in this workbook

1 Why use a geodatabase?

Lesson introduction
Types of data
Data within your organization
Organizational goals
Advantages of using a geodatabase
Organizing your data for a feature dataset
Life cycle of a geodatabase
Exploring a geodatabase
Exercise 1: Get started with a geodatabase
- Create a new ArcGIS Pro project
- Inventory the data
- Create a file geodatabase
- Import a feature class into the geodatabase
- Create a feature dataset
- Import feature classes to the feature dataset
- Add metadata to the imported layers

Lesson review

2 Improving data integrity with geodatabase structure

Lesson introduction
What is a schema?
Using a geodatabase to improve data integrity
Subtypes and domains in your organization
Exercise 2: Work with subtypes and domains
- Create a project
- Examine the domains
- Apply domains to the fields
- Create a domain
- Apply the new domain

Add a study area layer
Edit with domains
Create subtypes
Use subtypes with domains
Symbolize with subtypes
Edit with subtypes
Challenge: Control input with range domains
Using a data model to improve workflows
Refining a data model
Working with templates
Lesson review
Answers to Lesson 2 questions
Exercise 2 challenge solution

3 Associate nongeographic data with geographic data

Lesson introduction
Why associate nongeographic data with geographic data?
Types of nonspatial data
Considerations with incorporating nonspatial data
Basics of cardinality
Spatial and nongeographic data connections
Checkpoint
Relationship classes and tabular data
Methods to define associations
Relationship class workflow
Exercise 3: Use relationship classes
Create a project
Examine the Parcels feature class
Examine the ParcelOwners table
Create a relationship class
Reload the map
Configure pop-ups
Adding media files with attachments
Lesson review
Answers to Lesson 3 questions

4 Managing raster data

Lesson introduction
What is raster data?
Raster data management issues
Storing rasters in a geodatabase
What is a mosaic dataset?

Creating a mosaic dataset
Advantages of mosaic datasets
Mosaic dataset workflow
Exercise 4: Create a mosaic dataset
Create a project
Add rasters to the map
Review raster properties
Remove rasters from the map
Create a mosaic dataset
Add rasters to the mosaic dataset
Examine the attribute table
Evaluate rasters within the mosaic dataset
Modify the mosaic dataset properties
Lesson review
Answers to Lesson 4 questions

5 Designing geodatabase topologies

Lesson introduction
What is geodatabase topology?
Why use a topology?
Using topology in your organization
How topology works
Types of rules
Topology rules for each workflow
Using topology to correct geometry
Topology design workflow
Exercise 5A: Build a topology
Create a project
Evaluate spatial relationships
Create a topology
Configure the topology
Validate the topology
Topology edit workflow
Exercise 5B: Apply a topology
Assess topology errors
Add study area
Prepare to fix errors
Fix errors
Lesson review

Answers to Lesson 5 questions

6 Migrating to an enterprise geodatabase

Lesson introduction
What is an enterprise geodatabase?
Comparison of types
Comparing different geodatabase types
Benefits of an enterprise geodatabase
Checkpoint
Creating an enterprise geodatabase
Enterprise geodatabase connections
Building a connection
Accessing an enterprise geodatabase
Methods to add data to an enterprise geodatabase
Which method is more appropriate?
Exercise 6: Connect to an enterprise geodatabase
    Create a project
    Evaluate database connections
    Load data into an enterprise geodatabase
Lesson review
Answers to Lesson 6 questions

7 Working with enterprise geodatabases

Lesson introduction
Types of users within an enterprise geodatabase
Matching the type of user
Controlling user capabilities
Role management
Checkpoint
Controlling user roles
Exercise 7A: Manage privileges in an enterprise geodatabase
    Create a project and make connections
    Grant privileges to the storm_water role
Workflows for updating an enterprise geodatabase
Updating through automation
Exercise 7B: Update an enterprise geodatabase
    Add wastewater data to the map
    Evaluate data schemas
    Prepare the existing data
    Update the feature with new data
Lesson review

Answers to Lesson 7 questions

8 Editing workflows in a geodatabase

Lesson introduction
Types of editing workflows
Considerations about choosing an editing workflow
When should you version your feature class?
Checkpoint
Versioned editing
Learning the basics of versioned editing
Exercise 8: Edit versioned data
- Create a project
- Add a streets layer to the map
- Version the streets layer
- Edit the streets layer
- Compare versions
- Reconcile and post edits
- Confirm the changes

Connecting to ArcGIS Enterprise
Benefits of sharing with ArcGIS Enterprise
Workflow for using a feature service for editing
Appropriate workflows for each connection
Editing a shared feature service
Lesson review
Answers to Lesson 8 questions

Appendices

Appendix A: Esri data license agreement
Appendix B: Answers to lesson review questions
Appendix C: Additional resources
