1 Welcome to GIS

Lesson introduction
GIS history
Your map history
GIS components
GIS capabilities
Exploring GIS capabilities
More than just maps
The geographic approach
What is ArcGIS?
Explore a story using ArcGIS
The ArcGIS Pro user interface
Exercise 1: Use ArcGIS
  Sign in to ArcGIS Pro
  Open an ArcGIS Pro project
  Navigate a map
  Sign in to ArcGIS Online
  Search for a web map
  Navigate a web map
Lesson review
Answers to Lesson 1 questions

2 GIS data

Lesson introduction
Your locational data
Spatial data
Working with tables
Vector data
Raster data
Imagery
Representing real-world objects
Data collection methods
Searching for geographic data in ArcGIS
Choosing GIS data
Exercise 2: Explore data collection
   Prepare a web map
   Add layers from ArcGIS Online
   Add tabular data
   Add layers from ArcGIS Living Atlas of the World
Lesson review
Answers to Lesson 2 questions

3 Managing GIS data

Lesson introduction
Data management with geodatabases
Adding data to a map
Metadata
Exercise 3A: Explore data management
   Open an ArcGIS Pro project
   View the properties of a layer
   Use the Catalog pane to organize data
   Review metadata
   Create a group layer to organize the Contents pane
Web layers
Using web layers
Sharing data in ArcGIS
Exercise 3B: Share data in ArcGIS
   Share data as a web layer
   View a web layer in ArcGIS Online
Lesson review
Answers to Lesson 3 questions

4 Exploring coordinate systems

Lesson introduction
How is data represented on a map?
Coordinate systems
The importance of coordinate systems
Map projections and distortion
Explore spatial distortion
Exercise 4: Work with coordinate systems
   Prepare your ArcGIS project
   Examine the coordinate system of a map
Mapping and visualization

Lesson introduction
Not all maps are created equal
Map components
Identify effective map elements
Exercise 5: Use ArcGIS for mapping and visualization
  Open an ArcGIS Pro project
  Change symbology
  Use scale ranges to control visibility
  Use pop-ups
  Open a layout
  Explore layout elements
Visualize map layers in 3D
Use imagery for visualization
Lesson review
Answers to Lesson 5 questions

Spatial analysis

Lesson introduction
What is spatial analysis?
Spatial analysis workflow
Types of spatial analysis
Identifying types of analysis
Exercise 6A: Use ArcGIS to explore 3D analysis
  Prepare a web scene
  Analyze building height
  Analyze daylight
Performing analysis in ArcGIS Pro
Exercise 6B: Use ArcGIS Pro for spatial analysis
  Prepare an ArcGIS Pro project
  Use tools to prepare data for analysis
  Run a model
  Review the analysis results
  Visualize a chart
Performing analysis in ArcGIS Online
Exercise 6C: Use ArcGIS Online for spatial analysis
  Add data to a web map
7 Putting GIS to use

Lesson introduction
The geographic approach review
Applying the geographic approach
Exercise 7: Identify shelter locations using ArcGIS
  Prepare an ArcGIS Pro project
  Change basemap imagery
  Add data to the map
  Change symbology
  Perform analysis
  Share as a web map
  View a map in ArcGIS Online
Sharing results with ArcGIS
How will you use GIS?
Answers to Lesson 7 questions

Appendices

Appendix A: Esri data license agreement
Appendix B: Acknowledgments
Appendix C: Answers to lesson review questions
Appendix D: Additional resources
