Table of Contents

Esri resources for your organization

Course introduction

- Course introduction
- Course goals
- Installing the course data
- Training Services account credentials
- Icons used in this workbook
- Understanding the ArcGIS platform

1 Introduction to editing

- Lesson introduction
- Editing in ArcGIS Pro
- Editing tasks
- Exercise 1: Investigate ArcGIS Pro editing tools
 - Start ArcGIS Pro and open a project
 - Explore the Create Features pane
 - Investigate modification tools
 - Discard edits
- What can you edit?
- Creating, modifying, and deleting features
- Lesson review

2 Preparing to edit GIS data

- Lesson introduction
- Exercise 2A: Investigate coordinate systems
 - Identify map and layer spatial references
 - Measure the offset between layers
 - Change the map XY coordinate system and add a new layer
- Lining up data
- Managing attributes
- Exercise 2B: Enable editor tracking on a feature class
 - View data attributes
 - Run the Enable Editor Tracking tool
 - Make an edit
- Layer symbology for editing
- App and project settings for editing
- Configuring ArcGIS Pro and your project for editing

- Exercise 2C: Prepare a map for editing
 - Update the default measurement units
 - Change the map's coordinate system
 - Configure the layer attributes to make editing more efficient
 - Set layer selectability and editability

Lesson review

Answers to Lesson 2 questions

3 Creating 2D features

Lesson introduction

Feature creation workflow

Feature templates

Group and preset templates

Choosing a construction tool

Managing feature templates

Exercise 3A: Create 2D features using feature templates

- Start ArcGIS Pro and zoom to a bookmark

- Investigate how symbology affects feature templates

- Use a feature template to create new geometry

- Create attributes for your new feature

- Create a preset template

- Create a new set of features using a preset template

Dynamic constraints

Snapping

Editing grid

Creating attributes

Exercise 3B: Filter the undo and redo stacks

- Create new features

- Undo and redo actions

Exercise 3C: Use placement tools to create features

- Prepare the editing environment

- Create new feature geometry

- Use snapping to create new polygons

- Use dynamic constraints and snapping to create a polygon

- Add attributes to new features

Lesson review

Answers to Lesson 3 questions

4 Modifying 2D features

Lesson introduction

Modifying GIS data

Feature modification workflow

Modification tools

Modifying geometry and attributes

Exercise 4: Modify existing features

- Return to your ArcGIS Pro project

- Relocate a point feature

- Modify polygon shapes

- Connect a multipart feature

- Combine two features

Lesson review

Answers to Lesson 4 questions

5 Maintaining spatial integrity

Lesson introduction

Using map topology

Exercise 5A: Use map topology while editing

- Create a map topology

- Use a topology to modify coincident point and line features

- Use the Align Edge tool to eliminate polygon overlaps

- Use the Align Edge tool to remove gaps

Geodatabase topology

Comparing map and geodatabase topology

Exercise 5B: Use geodatabase topology to maintain spatial integrity

- Investigate topology rules

- Validate a topology

- Use the Error Inspector to locate errors

- Fix a topology error

- Mark an error as an exception

- Use editing tools to fix an error

- Use a predefined fix to correct a data error

- Correct topology errors

- Revalidate a topology

Lesson review

Answers to Lesson 5 questions

6 Editing annotation

Lesson introduction

Annotation

Creating annotation

Exercise 6A: Create annotation features

- Create feature-linked annotation

- Create a new annotation feature class

- Create standard annotation

Modifying annotation
Using the Attributes pane to modify annotation
Exercise 6B: Modify existing annotation
 Modify annotation position
 Edit annotation text
 Change text using the Annotation tool
 Modify annotation rotation and position
 Use vertices to modify annotation features
Lesson review
Answers to Lesson 6 questions

7 Creating and modifying 3D features

Lesson introduction
Points, lines, and polygons in 3D
Placement tools in 3D
Exercise 7A: Create polygon features in a 3D scene
 Start ArcGIS Pro and check the vertical coordinate system
 Add a cartographic offset
 Create a new polygon feature
 Use snapping to create a coincident polygon
 Extrude z-aware polygons
 Create a point feature and symbolize it in 3D
Multipatch data in ArcGIS Pro
Creating multipatch data in ArcGIS Pro
Exercise 7B: Create a new multipatch feature
 Prepare the ArcGIS Pro scene
 Sketch a new multipatch feature
Duplicating features vertically
Modifying 3D data in ArcGIS Pro
Exercise 7C: Modify multipatch data in ArcGIS Pro
 Rotate a 3D feature
 Add a new face to an existing multipatch feature
 Extrude a multipatch face
 Create new faces using interactive guides
Lesson review
Answers to Lesson 7 questions

Appendices

Appendix A: Esri data license agreement
Appendix B: Answers to lesson review questions
Appendix C: Additional resources
