# Table of Contents

Esri resources for your organization

## Course introduction

- Course introduction
- Course goals
- Installing the course data
- Training Services account credentials
- Icons used in this workbook

## 1 Editing in ArcGIS Pro

- Lesson introduction
- Editing GIS data
- ArcGIS Pro editing workflow
- ArcGIS Pro editing environment
- App and project settings for editing
- Exercise 1: Configure ArcGIS Pro for editing
  - Start ArcGIS Pro and open a project
  - Update the default measurement units
  - Investigate auto-save settings
  - Change the map's coordinate system
  - Set layer selectability and editability
- Lesson review
- Answers to Lesson 1 questions

## 2 Preparing to edit GIS data

- Lesson introduction
- Editable features
- Exercise 2A: Investigate coordinate systems
  - Identify map and layer spatial references
  - Measure the offset between layers
  - Change the map's x,y coordinate system and add a new layer
- Lining up data
- Tracking changes in ArcGIS Pro
- Exercise 2B: Enable editor tracking on a feature class
  - View data attributes
  - Run the Enable Editor Tracking tool
  - Make an edit
- Lesson review

Answers to Lesson 2 questions

### 3 Creating 2D features

Lesson introduction

Feature creation workflow

Choose a construction method

Feature templates

Types of feature templates

Managing feature templates

Exercise 3: Create 2D features using feature templates

- Open a new project and zoom to a bookmark

- Investigate how symbology affects feature templates

- Use a feature template to create new geometry

- Create attributes for your new feature

- Create a preset template

- Create a new set of features using a preset template

Lesson review

Answers to Lesson 3 questions

### 4 Maintaining spatial integrity

Lesson introduction

Snapping

Editing grid

Dynamic constraints

Undo/redo stack

Exercise 4: Use placement tools to create features

- Create new features

- Undo and redo actions

- Prepare the editing environment

- Use snapping to create new polygons

- Use dynamic constraints and snapping to create a polygon

- Add attributes to new features

Lesson review

Answers to Lesson 4 questions

### 5 Modifying 2D features

Lesson introduction

Evaluate geometry for modification

Feature modification workflow

Modification tools

Exercise 5: Modify existing features

- Relocate a point feature

- Modify polygon shapes

- Continue a line feature

- Combine two features

Lesson review

Answers to Lesson 5 questions

## 6 Editing attributes

Lesson introduction

Managing attributes

Investigate attributes

Using geodatabase schema in attribute edits

Exercise 6: Edit attributes in ArcGIS Pro

- Add data to a new map

- Investigate attributes

- Examine geodatabase schema

- Add attributes to a new feature

- Update attributes to existing features

- Calculate field values

Lesson review

Answers to Lesson 6 questions

## 7 Using topology

Lesson introduction

Using map topology

Exercise 7A: Use map topology while editing

- Enable map topology

- Use a topology to modify coincident point and line features

- Use a topology tool to eliminate polygon overlaps

- Use a topology tool to remove gaps

Geodatabase topology

Comparing map and geodatabase topology

Exercise 7B: Use geodatabase topology to maintain spatial integrity

- Investigate topology rules

- Validate a topology

- Use the Error Inspector to locate errors

- Fix a topology error

- Mark an error as an exception

- Use editing tools to fix an error

- Use a predefined fix to correct a data error

- Correct topology errors

- Revalidate a topology
- Lesson review
- Answers to Lesson 7 questions

## 8 Editing annotation

- Lesson introduction
- Annotation
- Creating annotation
- Exercise 8A: Create annotation features
  - Create feature-linked annotation
  - Create a new annotation feature class
  - Create standard annotation
- Modifying annotation
- Using the Attributes pane to modify annotation
- Exercise 8B: Modify existing annotation
  - Modify annotation position
  - Edit annotation text
  - Change text using the Annotation tool
  - Modify annotation rotation and position
  - Use vertices to modify annotation features
- Lesson review
- Answers to Lesson 8 questions

## 9 Creating and modifying 3D features

- Lesson introduction
- Points, lines, and polygons in 3D
- Multipatch data in ArcGIS Pro
- Creating multipatch data in ArcGIS Pro
- Exercise 9A: Create a new multipatch feature
  - Prepare the ArcGIS Pro scene
  - Sketch a new multipatch feature
- Modifying 3D data in ArcGIS Pro
- Exercise 9B: Modify multipatch data in ArcGIS Pro
  - Rotate a 3D feature
  - Add a new face to an existing multipatch feature
  - Extrude a multipatch face
  - Create new faces using interactive guides
- Lesson review

## 10 Implementing the editing workflow

- Lesson introduction

- ArcGIS Pro editing workflow review
- Implementing the editing workflow
- Comparing the feature creation and modification workflows
- Exercise 10: Apply the feature editing workflow
  - Prepare the editing environment
  - Prepare attributes for editing
  - Modify feature geometry
  - Create new features
  - Exercise solution with steps
- Lesson review
- Answers to Lesson 10 questions
- Exercise 10 solution

## Appendices

- Appendix A: Esri data license agreement
- Appendix B: Answers to lesson review questions
- Appendix C: Additional resources
