Table of Contents

Esri resources for your organization

Course introduction

- Course introduction
- Course goals
- Installing the course data
- Icons used in this workbook

1 Geospatial intelligence analysis in ArcGIS

- Lesson introduction
- Intelligence Cycle and geospatial analysis workflow
- ArcGIS Pro in the ArcGIS system
- Geographic data types
- ArcGIS Pro project structure
- ArcGIS Pro interface and structure
- Lesson review

2 Data preparation for operational planning

- Lesson introduction
- Preparing data for analysis
- Understanding metadata
- Checkpoint
- Cleaning data
- Data organization in ArcGIS Pro
- Loading data into a geodatabase
- Exercise 2: Prepare data for analysis
 - Create a project in ArcGIS Pro
 - Make a folder connection
 - Examine feature class metadata
 - Modify a feature class
 - Change a feature class alias
 - Copy a feature class to a geodatabase
 - Import shapefiles into a geodatabase
 - Create a new feature dataset
 - Import feature classes into a feature dataset
- Lesson review

Answers to Lesson 2 questions

3 Data and layer properties

Lesson introduction

Data and layers

Exercise 3A: Repair a data source

- Update a single layer source

- Repair multiple data sources

Data visualization

Symbolizing layers in ArcGIS Pro

Exercise 3B: Change symbology

- Change the color of a feature

- Change the appearance of a polygon feature

- Change the appearance of a point feature

Selecting features of interest

Exercise 3C: Work with layer attributes

- Add layers from the Catalog pane

- Reorder layers

- Examine layer attributes

- Change symbology based on attributes

Adding value to your map

Exercise 3D: Apply labels and set scale dependency

- Label features on a map

- Use properties to label features at a certain scale

- Use properties to draw features at a certain scale

Using definition queries

When to use queries

Exercise 3E: Limit data in the display

- Open the query builder

- Build a limiting expression

- Limit your display data

Lesson review

Answers to Lesson 3 questions

4 Spatial reference

Lesson introduction

Shape of the earth

Datums

Modeling the earth

Geographic and projected coordinate systems

UTM and MGRS coordinate systems

Geographic or projected coordinate system?

Exercise 4A: Create a point feature

- Create a project

- View raster dataset properties

- Define projection

- Create a feature class

- Add a point at specific coordinates

- Change point symbology

Checkpoint

Exercise 4B: Create a line feature

- Create a line feature

- Add vertices to a line

- Convert feature vertices to points

- Export feature class coordinates to a comma-delimited ASCII text file

Lesson review

Answers to Lesson 4 questions

5 Raster fundamentals

Lesson introduction

Raster sources

Raster resolutions

Raster uses

Defining a mosaic dataset

Stretch types

Exercise 5A: Change the image stretch type

- Add existing features

- Change the mosaic stretch type

Raster processing

Orthorectification

Pan sharpening

Exercise 5B: Create a mosaic dataset

- Create an empty mosaic dataset with a product defined

- Add rasters to a mosaic dataset

- Apply raster type properties

Lesson review

Answers to Lesson 5 questions

6 Working with vectors

Lesson introduction

Sources of vector data

Cartographic generalizations

Vector digitization pitfalls

Working with vector data

Creating vector data

Exercise 6A: Create a feature class

- Create a new project

- Connect to your data

- Import a shapefile

- Set up baseline foundation data

- Create a new feature class

Checkpoint

Exercise 6B: Digitize features

- Focus the display on an AOI

- Create new polygon features

- Update new polygon feature attributes

- Add additional polygon features

- Create a new feature class

- Add new point features

Lesson review

Answers to Lesson 6 questions

7 Introduction to spatial analysis

Lesson introduction

What is spatial analysis?

Buffer analysis

Digital elevation models

Exercise 7A: Prepare your map

- Conduct buffer analysis

- Clip the elevation data

- Project the dataset

- Symbolize elevation data

Visibility analysis

Exercise 7B: Conduct visibility analysis

- Run the Visibility tool

- Change the visibility layer symbology

- Analyze the attribute table and resymbolize

- Add a point to a feature class

Surface visualization

Hillshade characteristics

Exercise 7C: Create a relief map

- Create a buffer

- Clip the elevation data

- Create a hillshade using functions

Lesson review

Answers to Lesson 7 questions

8 Map production

Lesson introduction

Products for dissemination

Creating a map

Exercise 8A: Create a map layout

- Select a layout

- Insert a new map frame

- Modify the map layout

Exercise 8B: Add map elements

- Add an MGRS grid

- Add a north arrow

- Add scale bars

- Add a legend

- Add map text

- Add classification markings and explanatory text

- Add a grid reference box

- Add an extent indicator

Product dissemination

Exercise 8C: Export a final product

- Export the map

- Export layers to KML

Sharing content

Lesson review

Answers to Lesson 8 questions

Appendices

Appendix A: Esri data license agreement

Appendix B: Acknowledgments

Appendix C: Answers to lesson review questions

Appendix D: Additional resources
