Esri resources for your organization

Course introduction

Course introduction
Course goals
Installing the course data
Icons used in this workbook

1 Business needs and ArcGIS Enterprise solutions

Lesson introduction
Mapping business needs to a system deployment
Architecting the ArcGIS System: Best Practices
Understanding infrastructure
Expanding capabilities
Using the ArcGIS Enterprise Functionality Matrix
Business needs and ArcGIS Server licensing roles
Lesson review
Answers to Lesson 1 questions

2 Adding capabilities through federation

Lesson introduction
Base ArcGIS Enterprise deployment
Federating additional server sites
Considerations for federating additional server sites
Exercise environment
Exercise 2: Federate an Image Server site
- Examine a stand-alone Image Server site
- Federate the Image Server site
- Examine the effects of federation
- Investigate a raster store
- Enable Raster Analytics capabilities
- Use the raster analysis tools

Lesson review
Answers to Lesson 2 questions

3 Web service fundamentals

Lesson introduction
Web service fundamentals
Services and layers

Exercise 3A: Compare layers and services
Investigate a vector tile layer
Investigate a map image layer
Investigate a hosted feature layer
Setting service properties
Service properties and end-user functionality
Checkpoint
Image service properties
Exercise 3B: Share registered data in ArcGIS Pro
Register a data folder
Add a mosaic dataset to a new map
Configure image service properties
Analyze the web layer
Inspect a referenced image service
Inspect a hosted image service
Lesson review
Answers to Lesson 3 questions

4 Using workload separation

Lesson introduction
Workload separation
Workload separation and business needs
Workload separation by server capability
Exercise 4: Implement workload separation
Configure raster store for second image server
Federate the Image Server site
Explore system raster tools
Use Image Server to perform distributed raster analysis
Inspect running raster analysis services
Explore hosted imagery
ArcGIS Monitor
Optimizing your deployment
Lesson review
Answers to Lesson 4 questions

5 Web service internals and troubleshooting

Lesson introduction
Service instance types
When to use shared instances
Exploring service instances
Exercise 5: Working with shared instances
Inspect ArcSOC processes using Task Manager

Change shared instance settings for a server site
Configure and use shared instances
Service properties and performance
Troubleshooting common service performance issues
Reviewing ArcGIS Server logs and statistics reports
Lesson review
Answers to Lesson 5 questions

6 ArcGIS Enterprise data management

Lesson introduction
User-managed data and ArcGIS-managed data
Types of user-managed data and ArcGIS-managed data
Deletion behavior
Exercise 6A: Explore user-managed data and ArcGIS-managed data
Identify the source of user-managed data
Delete a user-managed layer
Investigate ArcGIS-managed data
Delete an ArcGIS-managed layer
Branch versioning
Getting ready for branch versioning
Exercise 6B: Perform edits using branch versioning
Prepare data for branch versioning
Set up branch versioning
Share branch-versioned data
Create versions
Edit branch-versioned data
Lesson review
Answers to Lesson 6 questions

7 Administering ArcGIS Data Store

Lesson introduction
ArcGIS Data Store
ArcGIS Data Store backups
Managing ArcGIS Data Store backups
ArcGIS Enterprise high availability
ArcGIS Data Store high availability
Exercise 7: Implement and manage an ArcGIS Data Store
Configure ArcGIS Data Store logs
Configure a standby ArcGIS Data Store
Examine ArcGIS Data Store roles
Use ArcGIS Data Store tools
Investigate ArcGIS Data Store logs

Update an ArcGIS Data Store license
Lesson review
Answers to Lesson 7 questions

8 The spatiotemporal big data store

Lesson introduction
Understanding the spatiotemporal big data store
ArcGIS Enterprise and the spatiotemporal big data store
How the spatiotemporal big data store relates to other ArcGIS Enterprise components
Exercise 8: Explore data in the spatiotemporal big data store
Investigate the spatiotemporal big data store
View a spatiotemporal big data store node
Explore the spatiotemporal big data store in ArcGIS GeoEvent Manager
View data stored in the spatiotemporal big data store
Manipulate data in a spatiotemporal big data store
Distributed vector analysis and the spatiotemporal big data store
Lesson review
Answers to Lesson 8 questions

9 Configuring a real-time analysis solution

Lesson introduction
Real-time data
Working with real-time data
What is a geoevent?
Configuring real-time analytics
Build a GeoEvent Service in GeoEvent Manager
Exercise 9: Configure a GeoEvent Service to write real-time data to a spatiotemporal big data store
Investigate an existing input connector
Investigate GeoEvent Definitions
Create a new output connector
Create a GeoEvent Service
Observe data as it flows through a GeoEvent Service
Lesson review
Answers to Lesson 9 questions

10 Distributed collaboration

Lesson introduction
Data sharing needs between portals
Distributed collaboration
Sharing content in a collaboration

Exercise 10A: Use a collaboration to share content
Enable sync for a hosted feature layer
Explore a collaboration group
Share content with the collaboration group
Work with content from the collaboration
Edit the hosted feature layer
Manually synchronize the workspace
Planning for a collaboration
Elements of a collaboration
Establishing trust between portals
Exercise 10B: Administer a collaboration between two Enterprise portals
Create a new workspace
Investigate an existing workspace
Join a workspace from a guest portal
Work with content shared through send-only and receive-only workspaces
Delete a workspace
Lesson review
Answers to Lesson 10 questions

11 Automating ArcGIS Enterprise

Lesson introduction
Automating administrative tasks
ArcGIS Notebook Server
Working with ArcGIS Notebooks
Architecture considerations for ArcGIS Notebook Server
Automating notebook execution
Exercise 11: Use ArcGIS Notebook Server to perform administrative tasks
Use a custom role to enable notebook authoring
Create an ArcGIS Notebook
Run an ArcGIS Notebook
Schedule the notebook task
Investigate a user workspace
Inspect a container in the Notebook Server Administrator Directory
Lesson review
Answers to Lesson 11 questions

Appendices

Appendix A: Esri data license agreement
Appendix B: Reference URL list
Appendix C: Answers to lesson review questions
Appendix D: Additional resources
