# Table of Contents

Esri resources for your organization

## Course introduction

- Course introduction
- Course goals
- Installing the course data
- Icons used in this workbook

## 1 Business needs and ArcGIS Enterprise solutions

- Lesson introduction
- Mapping business needs to a system deployment
- Architecting the ArcGIS System: Best Practices
- Explore infrastructure capabilities
- Expanding capabilities
- Using the ArcGIS Enterprise Functionality Matrix
- Business needs and ArcGIS Server licensing roles
- Lesson review
- Answers to Lesson 1 questions

## 2 Adding capabilities through federation

- Lesson introduction
- Base ArcGIS Enterprise deployment
- Federating additional server sites
- Explore considerations for federating additional server sites
- Exercise environment
- Exercise 2: Federate an Image Server site
  - Examine a stand-alone Image Server site
  - Investigate a raster store
  - Federate the Image Server site
  - Examine the effects of federation
  - Use the raster analysis tools
- Lesson review
- Answers to Lesson 2 questions

## 3 Ensuring resilient scaling through distributed computing

- Lesson introduction
- Distributed computing and business needs
- Explore ArcGIS Enterprise high availability
- Making ArcGIS Enterprise components highly available

- Explore workload separation
- Comparing high availability and workload separation
- Workload separation by server capability
- Exercise 3: Implement workload separation
  - Configure a raster store for second Image Server site
  - Federate the Image Server site
  - Explore system raster tools
  - Use Image Server to perform distributed raster analysis
  - Inspect running raster analysis services
  - Explore imagery layer output
- Lesson review
- Answers to Lesson 3 questions

## 4 Web service fundamentals

- Lesson introduction
- Web service fundamentals
- Explore user-managed data and ArcGIS-managed data
- How layers enable efficient exposure of services
- Understand the relationship between services and layers
- Exercise 4: Compare layers, services, and data
  - Publish a feature layer that uses ArcGIS-managed data
  - Investigate a feature layer that uses ArcGIS-managed data
  - Publish a feature layer with user-managed data
  - Investigate a feature layer that uses user-managed data
- Lesson review
- Answers to Lesson 4 questions

## 5 User-managed data

- Lesson introduction
- Types of user-managed data
- Referencing registered data from ArcGIS Pro
- Capabilities for services that use user-managed data
- Versioning
- Exercise 5: Perform branch versioning workflows
  - Register a dataset as branch versioned
  - Share a branch-versioned layer
  - Inspect branch management capabilities in ArcGIS Server Manager
  - Create versions
- Lesson review

Answers to Lesson 5 questions

## 6 Optimizing services that reference user-managed data

Lesson introduction

Service instances

Service instance types

Exploring service instances

Consider when to use shared instances

Exercise 6: Work with shared instances

- Inspect ArcSOC processes using Task Manager

- Change shared instance settings for a server site

- Configure a service to use shared instances

- Explore deletion behavior of a non-hosted feature layer

Reviewing ArcGIS Server logs and statistics reports

ArcGIS Monitor

Troubleshooting common service performance issues

Lesson review

Answers to Lesson 6 questions

## 7 ArcGIS-managed data

Lesson introduction

ArcGIS Data Store

Types of ArcGIS-managed data

Relationship between data storage options and service type

ArcGIS Data Store backup options

ArcGIS Data Store backup defaults

Managing ArcGIS Data Store using command utilities

Exercise 7: Manage ArcGIS Data Store backups

- Create a shared network folder

- Run a command utility

- Configure relational data store backup properties

- Take a manual backup

Lesson review

Answers to Lesson 7 questions

## 8 Optimizing services that use ArcGIS-managed data

Lesson introduction

Services that use or interact with ArcGIS-managed data

Optimizing hosted feature services using the object store

Distributed data enables distributed analysis

Exploring distributed raster analytics results

Determining a service optimization strategy

Exercise 8: Use ArcGIS Server to optimize feature analysis

- Inspect SpatialAnalysisTools service instances

- Increase instances for the SpatialAnalysisTools service

- Set up the analysis

- Run the analysis

- Inspect hosted feature layer output

- Explore deletion behavior of a hosted feature layer

Lesson review

Answers to Lesson 8 questions

## 9 The spatiotemporal big data store

Lesson introduction

Understanding the spatiotemporal big data store

ArcGIS Enterprise and the spatiotemporal big data store

How the spatiotemporal big data store relates to other ArcGIS Enterprise components

Exercise 9: Explore data in the spatiotemporal big data store

- Investigate the spatiotemporal big data store

- View a spatiotemporal big data store node

- Explore the spatiotemporal big data store in GeoEvent Manager

- View data stored in the spatiotemporal big data store

- Manipulate data in a spatiotemporal big data store

Distributed data and the spatiotemporal big data store

Distributed analysis and the spatiotemporal big data store

Lesson review

Answers to Lesson 9 questions

## 10 Configuring a real-time analysis solution

Lesson introduction

Real-time data

Working with real-time data

What is a GeoEvent?

Explore configuring real-time analytics

Building a GeoEvent Service in GeoEvent Manager

Exercise 10: Configure a GeoEvent Service to write real-time data to a spatiotemporal big data store

- Federate a GeoEvent Server site

- Investigate an existing input connector

- Configure the GeoEvent Simulator

- Investigate GeoEvent Definitions

- Create a new output connector

- Create a GeoEvent Service

Observe data as it flows through a GeoEvent Service

Lesson review

Answers to Lesson 10 questions

## 11 Distributed collaboration

Lesson introduction

Sharing content between portals

Distributed collaboration

Planning for a collaboration

Steps to create a distributed collaboration

Explore sharing content in a collaboration

Exercise 11: Use a collaboration to share content

- Ensure HTTPS only access to each portal

- Review the trusted certificates

- Create the collaboration invitation

- Accept the collaboration invitation

- Join a workspace from a guest portal

- Create a new workspace

Lesson review

Answers to Lesson 11 questions

## 12 Automating ArcGIS Enterprise

Lesson introduction

Automating administrative tasks

Automation strategies

ArcGIS Notebooks and ArcGIS Notebook Server

Exercise 12A: Create webhooks as an automation strategy in ArcGIS Enterprise

- Federate an ArcGIS Notebook Server site

- Create a custom role for notebook authors

- Upload a notebook

- Create a webhook

- Test the webhook

Working with ArcGIS API for Python

Architecture considerations for ArcGIS Notebook Server

Exercise 12B: Use ArcGIS Notebooks to schedule administrative tasks in ArcGIS Enterprise

- Import a notebook

- Run a notebook

- Schedule a notebook task

- Investigate a user workspace

- Inspect notebook containers

Lesson review

Answers to Lesson 12 questions

## Appendices

Appendix A: Esri data license agreement

Appendix B: Reference URL list

Appendix C: Answers to lesson review questions

Appendix D: Additional resources
