Table of Contents

Esri resources for your organization

Course introduction

- Course introduction
- Course goals
- Installing the course data
- Icons used in this workbook

1 Business needs and ArcGIS Enterprise solutions

- Lesson introduction
- Mapping business needs to a system deployment
- Architecting the ArcGIS System: Best Practices
- Explore infrastructure capabilities
- Expanding capabilities
- Using the ArcGIS Enterprise Functionality Matrix
- Business needs and ArcGIS Server licensing roles
- Lesson review
- Answers to Lesson 1 questions

2 Adding capabilities through federation

- Lesson introduction
- Base ArcGIS Enterprise deployment
- Federating additional server sites
- Explore considerations for federating additional server sites
- Exercise environment
- Exercise 2: Federate an Image Server site
 - Examine a stand-alone Image Server site
 - Investigate a raster store
 - Federate the Image Server site
 - Examine the effects of federation
 - Use the raster analysis tools
- Lesson review
- Answers to Lesson 2 questions

3 Web service fundamentals

- Lesson introduction
- Web service fundamentals
- Explore user-managed data and ArcGIS-managed data
- Referencing registered data from ArcGIS Pro

How layers enable efficient exposure of services
Understand the relationship between services and layers
Setting service properties
Service properties and end-user functionality
Exercise 3: Compare layers and services
 Publish a hosted feature layer
 Publish a non-hosted feature layer
 Investigate a hosted feature layer
 Investigate a non-hosted feature layer
 Explore deletion behavior of a hosted feature layer
 Explore deletion behavior of a non-hosted feature layer
Lesson review
Answers to Lesson 3 questions

4 Distributed computing

Lesson introduction
Distributed computing and business needs
Explore ArcGIS Enterprise high availability
Making ArcGIS Enterprise components highly available
Explore workload separation
Comparing high availability and workload separation
Workload separation by server capability
Exercise 4: Implement workload separation
 Configure a raster store for second image server
 Federate the Image Server site
 Explore system raster tools
 Use Image Server to perform distributed raster analysis
 Inspect running raster analysis services
 Explore hosted imagery
Lesson review
Answers to Lesson 4 questions

5 ArcGIS Enterprise data management

Lesson introduction
Types of ArcGIS-managed data
Distributed data enables distributed analysis
Explore distributed raster analytics results
Types of user-managed data
Branch versioning
Getting ready for branch versioning
Exercise 5: Perform edits using branch versioning
 Prepare data for branch versioning

- Register a dataset as branch versioned
- Share a branch-versioned layer
- Inspect branch management capabilities in ArcGIS Server Manager
- Create versions
- Edit branch-versioned data

Lesson review

Answers to Lesson 5 questions

6 Administering ArcGIS Data Store

Lesson introduction

ArcGIS Data Store

Managing ArcGIS Data Store using command utilities

ArcGIS Data Store backups

Exercise 6: Managing ArcGIS Data Store backups

- Create a shared network folder

- Run a command utility

- Configure relational data store backup properties

- Take a manual backup

Lesson review

Answers to Lesson 6 questions

7 Web service internals and troubleshooting

Lesson introduction

Service instance types

Consider when to use shared instances

Exploring service instances

Exercise 7: Working with shared instances

- Inspect ArcSOC processes using Task Manager

- Change shared instance settings for a server site

- Configure and use shared instances

Service properties and performance

Troubleshooting common service performance issues

Reviewing ArcGIS Server logs and statistics reports

Lesson review

Answers to Lesson 7 questions

8 The spatiotemporal big data store

Lesson introduction

Understanding the spatiotemporal big data store

ArcGIS Enterprise and the spatiotemporal big data store

How the spatiotemporal big data store relates to other ArcGIS Enterprise components

Exercise 8: Explore data in the spatiotemporal big data store

Investigate the spatiotemporal big data store

View a spatiotemporal big data store node

Explore the spatiotemporal big data store in ArcGIS GeoEvent Manager

View data stored in the spatiotemporal big data store

Manipulate data in a spatiotemporal big data store

Distributed data and the spatiotemporal big data store

Distributed analysis and the spatiotemporal big data store

Lesson review

Answers to Lesson 8 questions

9 Configuring a real-time analysis solution

Lesson introduction

Real-time data

Working with real-time data

What is a geoevent?

Explore configuring real-time analytics

Building a GeoEvent Service in GeoEvent Manager

Exercise 9: Configure a GeoEvent Service to write real-time data to a spatiotemporal big data store

Federate a GeoEvent Server site

Investigate an existing input connector

Configure the GeoEvent Simulator

Investigate GeoEvent Definitions

Create a new output connector

Create a GeoEvent Service

Observe data as it flows through a GeoEvent Service

Lesson review

Answers to Lesson 9 questions

10 Distributed collaboration

Lesson introduction

Distributed collaboration

Sharing content between portals

Planning for a collaboration

Explore sharing content in a collaboration

Establishing trust between portals

Exercise 10: Use a collaboration to share content

Investigate an existing workspace

Create a new workspace

Share content with the collaboration group

Join a workspace from a guest portal

- Edit a hosted feature layer
- Manually synchronize the workspace
- Investigate data deletion settings
- Lesson review
- Answers to Lesson 10 questions

11 Automating ArcGIS Enterprise

- Lesson introduction
- Automating administrative tasks
- ArcGIS Notebook Server
- Working with ArcGIS Notebooks
- Exercise 11A: Integrate ArcGIS Notebook Server
 - Federate an ArcGIS Notebook Server site
 - Create a custom role for notebook authors
 - Import a notebook
 - Run a notebook
- Architecture considerations for ArcGIS Notebook Server
- Exercise 11B: Use ArcGIS Notebooks to schedule administrative tasks
 - Schedule a notebook task
 - Investigate a user workspace
 - Inspect notebook containers
- Lesson review
- Answers to Lesson 11 questions

Appendices

- Appendix A: Esri data license agreement
- Appendix B: Reference URL list
- Appendix C: Answers to lesson review questions
- Appendix D: Additional resources
