# Table of Contents

Esri resources for your organization

## Course introduction

- Course introduction
- Course goals
- Installing the course data
- Training Services account credentials
- Icons used in this workbook

## 1 Rasters

- Lesson introduction
- What is remote sensing?
- Rasters in ArcGIS Pro
- Sensor resolutions
- The electromagnetic spectrum
- Band combinations: Applied
- Exercise 1: Explore band combinations
  - Create a course project
  - Examine your raster
  - View image information
  - Modify band combinations
  - Compare band combinations
  - Display with indices
- Lesson review
- Answers to Lesson 1 questions

## 2 Raster functions

- Lesson introduction
- What are raster functions?
- Benefits of raster functions
- Consider raster function parameters
- Types of raster functions
- Exercise 2: Explore raster functions
  - Examine a raster
  - Apply the Greater Than function
  - Apply the Slope function
  - Apply the Aspect function
- Lesson review

Answers to Lesson 2 questions

### 3 Raster function templates

Lesson introduction

What are raster function templates?

Raster function template components

Evaluate a raster function template

Exercise 3: Create a raster function template

- Create the raster function template

- Build the first raster function

- Build the second raster function

- Combine the raster functions

- Save the raster function template

- Apply the function template

- Modify the raster function template

- Apply the raster function template

- Challenge: Add Aspect range to the calculation

Benefits of using raster function templates

Raster functions used in raster products

Lesson review

Answers to Lesson 3 questions

Exercise 3 challenge solution

### 4 Change detection with raster functions

Lesson introduction

Change detection types

Choosing types of change detection

Preprocessing methods for change detection

Discovering change with the Change Detection Wizard

Pixel value change detection workflow

Exercise 4: Measure change detection using raster functions

- Evaluate rasters

- Preprocess input rasters

- Use an index on an input raster

- Calculate change

- Identify meaningful change

- Create an analysis product

Lesson review

Answers to Lesson 4 questions

## 5 Image classification techniques

Lesson introduction

Defining image classification

Describing image classification outputs

Image classification types

Image classification methods

Choosing image classification techniques

Lesson review

Answers to Lesson 5 questions

## 6 Classification workflows

Lesson introduction

Unsupervised image classification workflow

Exercise 6: Use the unsupervised image classification workflow

- Add input data

- Prepare the surface model data

- Prepare the multispectral raster

- Train the image classifier

- Classify the raster

- Create the initial analysis product

- Evaluate in 3D

- Challenge: Survey the tree canopy

Supervised image classification workflow

Classifying a raster with the Image Classification Wizard

Lesson review

Answers to Lesson 6 questions

Exercise 6 challenge solution

## 7 Segmentation

Lesson introduction

What is segmentation?

Segmentation parameters

Segmentation parameter exploration

Exercise 7: Create a segmented raster

- Add the input raster

- Create initial segmentation

- Improve segmentation results

- Create the segmented raster

Lesson review

## 8 Training the classifier

Lesson introduction

Training sample considerations

Exercise 8A: Create training samples

- Add input data

- Evaluate the study area

- Configure the Training Samples Manager

- Collect training samples

- Save training samples

Types of image classification algorithms

Exercise 8B: Create a classified thematic raster

- Create a classifier definition

- Create a classified thematic raster

- Extract a target class

- Challenge: Calculate the percent per parcel

Lesson review

Answers to Lesson 8 questions

Exercise 8B challenge solution

## 9 Classification evaluation

Lesson introduction

Pixel Editor functionality

Compare Pixel Editor operations

Post-processing classification results

Accuracy assessment workflow

Accuracy assessment statistics

Exercise 9: Create an accuracy assessment of classified results

- Evaluate input layers

- Reclassify pixels

- Add accuracy assessment points

- Complete the confusion matrix

Lesson review

Answers to Lesson 9 questions

## Appendices

Appendix A: Esri data license agreement

Appendix B: Answers to lesson review questions

Appendix C: Additional resources
