Course goals

Installing the course data

Icons used in this workbook

1 Introduction to ArcGIS Enterprise

Lesson introduction

The ArcGIS geoinformation model

Identifying ArcGIS geoinformation model components

Base ArcGIS Enterprise deployment

Accessing portal content

Exercise 1: Explore content galleries in the portal

- Search for items in the gallery

- Discover the gallery for personal content

- View the gallery for group content

- Explore the gallery for organizational content

- Search for items in ArcGIS Living Atlas of the World

Discovering a portal item's details

Lesson review

Answers to Lesson 1 questions

2 Adding items to the portal

Lesson introduction

Data storage for items created in the portal

Adding portal items that are supported by a service

Working with portal items and services

Exercise 2A: Add items to ArcGIS Enterprise

- Add an item from a CSV

- Add an item from an AutoCAD drawing

- Add an item from a file geodatabase

- Add a layer to Map Viewer from a shapefile

- Create a web map

- Create a layer by performing an analysis

Improving the searchability of portal items

Modifying portal layers

- Exercise 2B: Configure a portal layer
 - Open the item details for a portal layer
 - Add and remove fields
 - Add a list to a field for an item
 - Modify the default style for a layer
 - Change an editing setting
 - Open the layer in Map Viewer

Lesson review

Answers to Lesson 2 questions

3 Sharing content in ArcGIS Enterprise

Lesson introduction

Sharing portal items

Considerations for creating a group

Exercise 3A: Share content with a group

- Specify the general group information

- Define the group settings

- Invite members to the group

- Request to join the group

- Perform group manager tasks

Configuring a shared update group

Using web apps to share content

Exercise 3B: Use a gallery app to share content

- Share an image for the gallery app

- Create a gallery app

- Configure the app

- Use the gallery app

Lesson review

Answers to Lesson 3 questions

4 Sharing GIS resources using ArcGIS Pro

Lesson introduction

Accessing portal content in ArcGIS Pro

Exercise 4: Connect to a portal in ArcGIS Pro

- Review the portals in ArcGIS Pro

- Change the active portal

- Sign in to ArcGIS Enterprise

- Add portal layers to a map

Fundamental sharing models

Comparing the sharing models

Making data accessible to ArcGIS Server

Lesson review

Answers to Lesson 4 questions

5 Publishing workflow for ArcGIS-managed data

Lesson introduction

Benefits of ArcGIS-managed data

Data hosted by ArcGIS Data Store

Exercise 5: Publish a hosted layer with the option to copy all data

- Prepare the layers for publishing

- Publish a hosted feature layer

- Create a hosted feature layer view

Discover the settings for feature layer views

Data hosted by the hosting server

Identifying the data storage location

Workflow review

Answers to Lesson 5 questions

6 Publishing workflow for user-managed data

Lesson introduction

Benefits of user-managed data

Registering data stores in ArcGIS Pro

Web layers that can reference a registered data store

Exercise 6A: Publish a web layer that references a registered data store

- Publish a map image layer with a feature layer

- Edit the feature layer in Map Viewer

- Review the changes in ArcGIS Pro

Bulk publishing layers from a user-managed data store

Exercise 6B: Bulk publish layers

- Review a data store item in ArcGIS Pro

- Bulk publish layers in the portal

- Review the published layers in the portal

- Share bulk-published items

User-managed versus ArcGIS-managed

Workflow review

Answers to Lesson 6 questions

7 Understanding the performance of layers

Lesson introduction

Portal layer performance

Evaluating the performance of portal layers

Identifying the role of a map layer

Selecting the optimal role for a map layer

Lesson review

Answers to Lesson 7 questions

8 Optimizing basemap layers

Lesson introduction

Cached layers as basemaps

Creating optimized custom basemap layers

Exercise 8A: Apply optimization techniques to source datasets

- Set the map properties

- Configure labels

- Set scale dependencies

Types of portal layers that can function as basemaps

Exercise 8B: Publish an optimized basemap layer

- Publish a map image layer

- Publish a vector tile layer

- Explore the layers in Map Viewer

Working with vector tile layers

Lesson review

9 Optimizing operational layers

Lesson introduction

Optimization techniques for operational layers

Exercise 9A: Apply optimization techniques to feature classes

- Access the web editing version of the data

- Configure the fields that need to be retained

- Remove any unnecessary fields

- Build an attribute index

- Apply a definition query

Identifying examples of operational layers

Exercise 9B: Publish an optimized operational layer

- Publish the optimized feature layer

- Review the dynamic map image layer

- Perform an analysis with the feature layer

Lesson review

Answers to Lesson 9 questions

10 Using optimized layers in a map

Lesson introduction

Identifying the components of a map

Publishing a web map

Exercise 10: Create an optimized app

 Create a web map

 Create a web app

 Configure the web app

 Review the web app

Lesson review

Answers to Lesson 10 questions

Appendices

Appendix A: Esri data license agreement

Appendix B: Answers to lesson review questions

Appendix C: Additional resources
