Table of Contents

Esri resources for your organization

Course introduction

- Course introduction
- Course goals
- Installing the course data
- Icons used in this workbook

1 ArcGIS information products

- Lesson introduction
- Using the ArcGIS system to create visualizations
- Understanding design considerations
- Sharing content using ArcGIS
- Types of ArcGIS information products
- Discover information products
- Choosing an information product
- Creating information products
- Lesson review
- Answers to Lesson 1 questions

2 Preparing data

- Lesson introduction
- Data in visualizations
- How coordinate systems affect visualizations
- Scale and resolution
- ArcGIS Pro basics
- Investigate scale and resolution in visualizations
- Preparing attributes
- Exercise 2: Prepare data for visualization
 - Open an ArcGIS Pro map
 - Choose a projected coordinate system
 - Evaluate attributes using the Data Engineering pane
 - Hide unnecessary fields
 - Perform final data preparation task
- Enriching data
- Lesson review

Answers to Lesson 2 questions

3 Applying symbology

Lesson introduction

Visualizing data using symbology

Applying visual variables

Evaluate symbology

Creating accessible symbology

Symbolizing layers

Configuring symbology by attribute values

Scale-based symbology

Exercise 3: Symbolize features on a map

- Open a map

- Symbolize a layer with a custom color

- Symbolize a layer using a hex code

- Symbolize points using unique values

- Symbolize a line with a multilayer symbol

Lesson review

Answers to Lesson 3 questions

4 Configuring advanced symbology

Lesson introduction

Visual hierarchy

Evaluate visual hierarchy

Applying visual effects

Clustering data points

Exercise 4A: Apply advanced symbology

- Open a map

- Apply a Layer Blend mode

- Symbolize a point layer using Clustering

Managing symbology using styles and layer files

Styles and layer files

Exercise 4B: Apply styles in ArcGIS Pro

- Open a map

- Add styles to the project

- Customize a point symbol

- Add symbol layers to a polygon symbol

- Set the properties for a marker symbol layer

- Save a custom symbol to a style

Lesson review

Answers to Lesson 4 questions

5 Creating map text

Lesson introduction

Understanding map text

Evaluating map text

Type basics

Interpreting data using labels

Using Arcade to configure map text

Customizing map text using label classes

Creating map text

Configuring pop-ups

Exercise 5: Configure map text

- Open a map

- Define a label class

- Adjust label properties for line labels

- Label a polygon feature class

- Copy label class properties into a different layer

- Use an Arcade expression to customize labels

- Label a point layer

- Convert labels to annotation

- Adjust annotation feature location

- Edit annotation text

Lesson review

Answers to Lesson 5 questions

6 Creating map layouts

Lesson introduction

Visualizing data in a map layout

Evaluating map layouts

Pattern of reading

Creating a map layout

Map series

Using dynamic text

Exercise 6: Create a map series

- Open and explore a map

- Add a scale bar to a map layout

- Create a map series

- Add dynamic text as a map title

- Add page numbers to a map series

- Set up a map series page filter

- Export a map series to PDF

Lesson review
Answers to Lesson 6 questions

7 Publishing web maps

Lesson introduction
Designing web maps
Web map design considerations
Exercise 7A: Create a web map using ArcGIS Online
 Open a web map
 Add layers to a web map
 Symbolize a web map
 Configure a pop-up title
 Format a pop-up
 Use Arcade to format attributes
 Save a web map
Accessing web maps
Exercise 7B: Create a web app from a web map
 Choose an app using ArcGIS Instant Apps
 Configure the app
 Preview the app
 Publish the app
Lesson review

8 Creating charts

Lesson introduction
Why use charts?
Using charts in ArcGIS
Creating charts in ArcGIS
Exercise 8: Create charts in ArcGIS Pro
 Open a map
 Examine data attributes
 Symbolize data using pie charts
 Create a bar chart
 Configure data display for a bar chart
 Configure visual design elements of a chart
 Configure chart labels and text
 Add a chart to a layout
Configuring charts using ArcGIS Dashboards
Lesson review

Answers to Lesson 8 questions

9 Creating 3D visualizations

Lesson introduction

Using 3D scenes to visualize data

Creating 3D scenes

Displaying data in 3D

Exercise 9: Create a 3D scene

- Convert a 2D map to a 3D scene

- Convert 2D layers to 3D layers

- Symbolize a layer using Unclassed Colors

- Extrude features

- Navigate the scene

Sharing 3D scenes using ArcGIS

Lesson review

Answers to Lesson 9 questions

10 Creating animations

Lesson introduction

Animation types

Animation components

Creating animations

Exercise 10: Create an animation

- Enable animation for a map

- Create a keyframe

- Import bookmarks as keyframes

- Change keyframe order

- Update a keyframe

- Add holds to keyframes

- Add a title overlay

- Create overlay text

- Export animation as a video

Lesson review

Appendices

Appendix A: Esri data license agreement

Appendix B: Answers to lesson review questions

Appendix C: Additional resources
