Esri resources for your organization

Course introduction

- Course introduction
- Course goals
- Installing the course data
- Icons used in this workbook

1 Creating ArcGIS Dashboards

- Lesson introduction
- Using a dashboard to display data
- Benefits of a dashboard
- Types of dashboards
- Identify a dashboard's message
- Options for creating a dashboard
- Exercise 1: Create a dashboard from Map Viewer
 - Sign in to ArcGIS Online
 - Open a web map
 - Create a dashboard
 - Add the map legend element
- Lesson review
- Answers to Lesson 1 questions

2 Designing in ArcGIS Dashboards

- Lesson introduction
- ArcGIS Dashboards design questions
- Dashboard display options
- ArcGIS Dashboards elements
- Design considerations for ArcGIS Dashboards elements
- ArcGIS Dashboards layout options
- Modifying ArcGIS Dashboards layouts
- Configuring dashboard elements based on design
- Exercise 2: Create a dashboard using design considerations
 - Determine design considerations
 - Sign in to ArcGIS Online
 - Save a web map
 - Create a dashboard
 - Add a header element
 - Add a map element

- Add a map legend element
- Add a list element
- Modify the dashboard layout

Lesson review

Answers to Lesson 2 questions

3 Working with maps

Lesson introduction

Identify data sources for a dashboard

Using a web map to display information

Layer capabilities

Identify best practices for web map configuration

Web map configuration options

Exercise 3: Configure a map element

- Open the existing web map

- Add bookmarks to the web map

- Modify map layer pop-ups

- Open the existing dashboard

- Configure the map element

- Explore map element changes

Lesson review

Answers to Lesson 3 questions

4 Working with tables and lists

Lesson introduction

Displaying attribute data with tables and lists

Configuring lists to display data

Types of tables used in a dashboard

Configuring tables to display data

Downloading data from data-driven elements

Exercise 4: Add attribute data to a dashboard

- Open the existing dashboard

- Configure the list element

- Add a table element from features

- Configure the table element

- Modify the dashboard layout

- Test list and table functionality

Lesson review

Answers to Lesson 4 questions

5 Working with charts

Lesson introduction

Using data series

Identify serial charts used in a dashboard

Displaying data series using pie charts

Configuring a chart element

Exercise 5: Add charts to a dashboard

- Open the existing dashboard

- Add a pie chart element

- Add a serial chart for renters

- Add a serial chart for owners

- Name the group tabs

- Resize dashboard elements

- Examine data using dashboard charts

Lesson review

Answers to Lesson 5 questions

6 Filtering dashboard data

Lesson introduction

Filtering dashboard data

Applying dashboard data filters

Using indicator elements

Explore indicator element options

Using gauge elements

Exercise 6: Filter dashboard elements

- Open the existing dashboard

- Add a gauge element

- Add thresholds to change band colors

- Add an indicator element

- Add a filter to the indicator element

- Modify the dashboard layout

Lesson review

Answers to Lesson 6 questions

7 Configuring an interactive dashboard

Lesson introduction

Interactive dashboards

Identify interactive capabilities

Configuring an interactive element

Exercise 7A: Add interactivity to a dashboard using actions

- Open the existing dashboard
- Configure a map element
- Test the map interactivity
- Change the map element configuration
- Test the updated map interactivity

Using selectors

Exercise 7B: Add interactivity to a dashboard using selectors

- Open the existing dashboard
- Add a sidebar element
- Add a selector to the sidebar
- Configure selection actions
- Test the selector interactivity
- Configure the list element for selection
- Test the list selection interactivity
- Enable dashboard reset

Types of URL parameters

Enabling URL parameters in a dashboard

Lesson review

Answers to Lesson 7 questions

8 Formatting dashboards with Arcade

Lesson introduction

Element formatting options

Formatting option scenarios

Arcade expression language

Applying Arcade formatting expressions to elements

Exercise 8: Format dashboard elements using Arcade

- Open the existing dashboard
- Add a reference to the indicator element
- Add conditional formatting to an indicator
- Test the indicator element
- Enable advanced formatting for the list element
- Add an Arcade expression to the list element

Lesson review

Answers to Lesson 8 questions

9 Using Arcade data expressions for ArcGIS Dashboards

Lesson introduction

Arcade data expressions

Considerations for Arcade data expressions

Applying Arcade data expressions to elements

Exercise 9: Use Arcade data expressions in dashboard elements

Open the existing dashboard

Add a serial chart

Add a data expression to the serial chart

Configure the serial chart

Lesson review

Answers to Lesson 9 questions

10 Sharing dashboards

Lesson introduction

Design considerations for a mobile view

Exercise 10A: Create a mobile view

Open the existing dashboard

Add a mobile view

Copy elements to the mobile view

Configure the table element

Add a drawer to the mobile view

Add a number selector to the drawer

Test the number selector

Dashboard sharing process

Dashboard sharing options

Dashboard sharing considerations

Exercise 10B: Share a dashboard

Navigate to the web map item page

Share your web map

Navigate to the dashboard item page

Share your dashboard

Test the dashboard sharing level

Update the sharing level

Open the ArcGIS StoryMaps builder

Add the narrative to the story

Add images to the story

Embed the dashboard in the story

Publish the story

Lesson review

Answers to Lesson 10 questions

Appendices

Appendix A: Esri data license agreement

Appendix B: Answers to lesson review questions

Appendix C: Additional resources
