

Tapestry™ Segmentation

Esri's **Tapestry™ Segmentation** system divides U.S. residential areas into 65 distinctive segments based on socioeconomic and demographic characteristics to provide an accurate, detailed description of U.S. neighborhoods. **Tapestry Segmentation** can help you to identify your best markets, find the most profitable consumer types, tailor marketing messages to fit your audience, and define product and service preferences. Here's a brief description of a Tapestry segment.

13—In Style

Segment Code—13
Segment Name—In Style

LifeMode Summary Group—L2 Upscale Avenues
Urbanization Summary Group—U7 Suburban Periphery I

Demographic

In Style residents live in the suburbs but prefer the city lifestyle. Professional couples predominate. Household distributions by type are similar to those of the United States. Married-couple families represent 54 percent of households. Households without children (married couples without children, single-person, shared, and other family types), comprise more than two-thirds of all households. This count is increasing. The population is slightly older, with a median age of 40 years. There is little diversity in these neighborhoods.

Socioeconomic

In Style residents are prosperous, with a median household income of \$70,745 and a median net worth of \$182,665. Wages and salaries provide income for 84 percent of the households; 47 percent also receive some form of investment income. *In Style* residents are more educated compared to the US level: 42 percent of the population aged 25 years and older hold a bachelor's or graduate degree. Labor force participation is 68.5 percent; unemployment is 8.4 percent. Forty-six percent of employed residents have professional or management positions, with above average concentrations in the finance, insurance, health care, technical services, and education industry sectors.

Residential

In Style residents live in affluent neighborhoods of metropolitan areas across the country. More suburban than urban, they embrace an urbane lifestyle; 14 percent prefer townhouses to traditional single-family homes chosen by 56 percent of the households. The median home value is \$218,289. The 68 percent rate of home ownership is just slightly above average. More than three-quarters of the housing was built in the last 30 years.

Preferences

Computer savvy *In Style* residents go online daily to research real estate information; do their banking; track investments; trade stocks; book travel; and buy computer hardware or software, concert tickets, or tickets to sporting events. They use a financial planner and invest in stocks, bonds, money market funds, money market bank accounts, and securities. Looking toward the future, residents hold life insurance policies and contribute to IRA and 401(k) retirement accounts. To maintain their homes, they hire professional household cleaning services and contractors to remodel their kitchens.

Residents stay fit by exercising, eating a healthy diet to control their weight, buying low-fat foods, and taking vitamins. They attend live musical performances and gamble at casinos. They take domestic vacations to hike, golf, and go backpacking. They read magazines, listen to news-talk radio, and watch professional sports events and golf on TV.
