ArcGIS Desktop Entry Certification

Organizations of all sizes and in almost every industry are using Esri's geospatial technology for its economic and strategic value. So it's no surprise that Esri tech skills are in high demand.

Whether you're just embarking on your career or shifting your focus to new opportunities, the ArcGIS Desktop Entry certification is a great way to showcase skills that employers want.

Consider

- Do you have less than two years' experience using ArcGIS® for Desktop software?
- Have you acquired ArcGIS for Desktop skills in the course of your studies, internship, or workplace responsibilities?
- Can you perform mapping and visualization tasks, editing workflows, and file geodatabase management at a basic level?
- Do you aspire to eventually achieve the ArcGIS Desktop Associate and ArcGIS Desktop Professional certifications?

Start shaping the career of your dreams. Find out more at **esri.com/StartYourCertificationJourney**
